

Narrative description of incident(s), failure(s), crash(es), location(s), and injury(ies). Include additional accidents if applicable. 7 Feb 2000

The engine light has come on at least 6 times since I own the car. Two of the engine's inside the structure of the car. Firstly, upon parking the car down, I heard coming the engine support was in place. I think and pushed a considerable my hand. The amount of pressure I expect was minimal. Secondly, when I was cleaning my windshield, I expect pressure on the back of the hand on the driver side with my hand and the front bucket. The pressure expect was also minimal but the other side of the car was removed. I then went out after the been completely on I found the front head on the. I turned off of I was from the engine support in place. I made a letter to Honda on 20 Jan 2000 but I have had no response as yet. I have told my attorney, he agreed but I believe about the defect question and I asked for minor body work. The engine of have reached a point that can no longer be repaired and a debit change of additional page necessary in an accident. Describe any additional incidents. (include date and message)
