Narrative description of incident(s), failure(s), crash(es), location(s), and injury(ies). Include additional accidents if applicable.

Since date of purchase this GMC Yukon 2001, and my mother of whom made travel have pulled to the right. Alignment, tire balancing have all been checked and included by dealer service center. They said it might be the right but we not sure what's making it do it. Alignment no, this may possibly a component of the steering column I think. No one talking however. They are changing me for alignment which should not have been needed. I think it is dangerous. It is a subjective thing however. I hope you can make GM admit themselves in fixing this very bad problem.

Continue on additional page if necessary.

Describe any additional incidents. (include date and mileage)

The Privacy Act of 1974—Public Law 93-579. This information is requested pursuant to authority vested in the National Highway Traffic Safety Administration. You are invited to participate in response to this questionnaire. Your responses may be used to assist the NHTSA in determining whether a manufacturer should take appropriate action to correct a safety defect. If the NHTSA proceeds with administrative enforcement or litigation against a manufacturer, your response or a statement in a letter may be used in support of the agency's action.
