Subject: Re: Draft of the response 13.

Sir,

Thank you for reviewing the draft. I appreciate it. Any your comments are very important for us. Fortunately, we can find the Ford's recall just before making the draft. This is really good for us.

As for the demonstration to NHTSA, as you pointed out, seeing is worth 1000 words, I think, but we would like you to discuss it later.

Best regards,

Mitch

I looked at it sir. I think its pretty good - however a little bit confusing at times with the numerous "...if the customer pulls down the hatch, and the moon is lined up with the sun, and the rear strut is half full, blah blah...etc." but it OK - no problem

I also advised Chris that we should just invite the investigator here and we can SHOW him the failure. It is worth 1000 words.

But the most important section to me is the comparison with the DCX and Ford information - these are excellent comparisons which I think make it difficult for NHTSA to argue that this is a big problem.

Regards

Chris

OK, Chris. I want you to take a look at the final version of our response before the submission.

To be honest, I want you to reveiw the draft once, which is the second or third version, in order to hear your comments and add/modify based on them.

Regards,

Mitch

Subject Draft of the response 13

Chris,

Thank you for drafting the response 13. We reviewed the draft and have some comments. Please see attached the file entitled "Assessment Sienna with TMC's comment.doc".

Another word file is the draft in which we revised some portions based on our comments. But there are some portions that we would like you to revise.

Please take a look at both documents and modify the draft.

If you have any questions/concerns, let me know.

Best regards,

Mitch
