Jaguar F-Type Convertible 2014 Model Year vehicles

ASSEMBLY PLANTS/DATES OF PRODUCTION

Assembly Plant - Castle Bromwich (UK)

Production Dates

| Begin | End |
|-------------------|------------------|
| February 12, 2013 | November 2, 2013 |

VIN

| Begin | End |
|-------------------|----------------------|
| SAJAA65C7E8K00312 | to SAJAA647XE8K09624 |

Other Limiting Factors

Jaguar Land Rover has not received any reports of accidents, injuries or fatalities as a consequence of this issue and has concluded that this condition does not present an unreasonable risk to safety in the United States. This condition is unique to vehicles built for sale in the Republic of Korea.

"Substantially Similar" vehicles sold in the U.S. are:

Jaguar F-Type Convertible 2014 Model Year vehicles

A characterization of the vehicle as "Substantially Similar" is made exclusively for purposes of complying with 49 CFR Part 579 and does not imply that the vehicles are "Substantially Similar" in any other context or for any other purpose, regulatory or otherwise. Also, characterization of a vehicle as "Substantially

Similar" in this context specifically does not imply that the vehicle is available for import or sale in the United States.

Estimated number of vehicles affected

72 vehicles in the Republic of Korea.

Estimated Percentage of Vehicles that contain the subject condition

100%

Reason for this Field Action

Jaguar Land Rover is conducting a voluntary safety recall involving certain Jaguar F-Type Convertible 2014 Model Year vehicles built at the Castle Bromwich (UK) Assembly Plant for the Republic of Korea to replace the fuel tank. The fuel tanks were incorrectly selected for installation during the vehicle assembly process.

Jaguar Land Rover received a dealer field report from the Republic of Korea that the Malfunction Indicator Lamp (MIL) was illuminated on the instrument cluster. Dealer inspection identified the Diagnostic Module Tank Leakage (DMTL) system was at fault. Upon further investigation the dealer identified that the vehicle was fitted with an incorrect specification fuel tank. The correct specification fuel tank should meet Federal Evaporative Emissions system specification, however the fuel tank installed does not and therefore will discharge liquid fuel when completing an evaporative emissions system self-test.

The driver may see a MIL illuminated on the instrument cluster and/or notice a fuel odour smell. In some circumstances with the vehicle static, there could be liquid fuel underneath the rear of the vehicle, which in the presence of an ignition source could lead to a fire.

Number of reports of this Condition

Reports of the condition: 2 Field Report received worldwide, both in the Republic of Korea.

Alleged Accidents: 0

Alleged Injuries: 0

Alleged fatalities: 0

Description of the remedy

Dealers in the Republic of Korea will be notified and instructed to replace the fuel tank with the correct specification part.

Date of determination: December 12, 2013

Date Recall will commence: December, 2013

Determination made by

Jaguar Land Rover Limited
