Description of Issue

Daimler AG has determined that on certain C-class vehicles (205 platform), the vehicle-specific labels (type label, tire pressure label, fuel type label and refrigerant label) are missing.

In this case the vehicles do not meet the legal requirements.

Description of Foreign Campaign

DAG will notify the appropriate authorities in the affected countries that it will initiate a voluntary safety recall on the subject vehicles on July 09, 2018. The campaign will be conducted in South Korea and is expected to begin as of tbd, 2018. The vehicle-specific labels will be retrofitted on the affected vehicles.

Identification of Substantially Similar Vehicles Sold or Offered for Sale in the United States

The following vehicles sold in the U.S. fall under the definition of “substantially similar”: C-Class (205 platform). None of the potentially affected vehicles were sold or offered for sale in the U.S.
