FORM 4-75 10000

10-11-99

Dear Jessie Hollingsworth
I receive your letter dated Sep-29-1999.
you said the Company find No Evidence
of a mfg or design defect; also you said
you believe that the Economic Loss
Doctrine would prohibit me from any
recovery under those circumstances.

you sent me this letter before you
receive my letter; all the pictures
I also was explaining the way my vehicle
just exploded; you are stating that I
should buy all the parts; have them
ready if there was a trial.

I have said to you: my other letter
I am not wanting a trial all I
am asking for is for Mr. Co. is
to refund to me what I have in
the vehicle which is \$10,138 I think
I am entitled to that amt.

Thanks

P.S. there are no parts to keep
every thing Burn.

P.S. Could I have the picture return to me; what I sent thanks

Office of the General Counsel

Ford Motor Company

Parklane Towers West, Suite 400
Dearborn, Michigan 48120-3000

September 29, 1999

[REDACTED]
Social Circle, GA [REDACTED]

Dear [REDACTED]

Following a review of the facts and circumstances surrounding this event, Ford Motor Company finds no evidence of a manufacturing or design defect, therefore, we must deny liability for this claim. Additionally, we believe that the Economic Loss Doctrine would prohibit you from any recovery under these circumstances.

Please be advised that all necessary steps must be taken to ensure that the subject vehicle and all of its component parts are maintained and preserved in the event you elect to litigate this matter. Ford Motor Company has the right to inspect the vehicle and remove and test any component part that you claim to be defective, and to be presented with the vehicle and the subject component part(s) at the time of trial, should litigation ensue from this informal claim.

If you propose to repair the vehicle for continued usage, such repairs may not be performed until after Ford Motor Company has inspected the vehicle and removed and tested any component part you claim to be defective or advised you in writing that it does not intend to perform such inspection and/or testing at this time. But even in that event, Ford Motor Company will insist that all components claimed to be defective are maintained and preserved for trial.

Sincerely,

Jessie Hollingsworth
Claims Analyst

Re: Case # 1980112229

Dear [Redacted]:

We acknowledge your recent contact to Ford Motor Company. Your complaint has been directed to this office for further handling. In order to assist us in evaluating your claim, we request that you provide us with the following information:

1. ^{Yes} A copy of the police and/or fire report.
2. For each person alleged injured: full name, date of birth, home address, marital status and name of spouse, social security number, occupation, a complete description of the injuries, the names and addresses of all treating physicians, and copies of all medical bills and reports.
3. ^{Yes} Documentation to substantiate your defect allegation, including a copy of your expert's report and their original photographs.
4. ^{Yes} Has the alleged defective part been repaired or replaced?
5. ^{Yes} The present location of the alleged defective part and the vehicle.
6. A complete service history for the subject vehicle, including any tune-ups or oil changes.
7. We will be pleased to conduct non-destructive testing on your alleged defective part should you choose to remove the part and assembly and ship it at your own expense. Please follow the directions listed in the attached shipping instructions.
8. ^{Yes} Has any insurance company been advised of this incident? If so, please state the name, address, and telephone number of those insurance companies; their claim number; and the agent's name.
9. ^{NONE} If an attorney has been retained by you to settle this claim, please include his/her name, telephone number, and address.

The allegedly defective parts should be sent to Dearborn for inspection by the Parts Analysis Section. The following steps should be taken when parts are shipped.

Note to send

none

WTS

1. The parts should be marked by the sender in some manner so that they can be identified as the ones we inspected.
2. The parts should be properly packaged so that they can withstand handling by the carrier to Dearborn.
3. All parts should be labeled with the name of the claimant, complete address and the Claims Analyst name by the sender.
4. The package should be shipped to:

Ford Motor Company
Parts Analysis Section
Parklane Towers West
Suite 408
8 Parklane Boulevard
Dearborn, MI 48126

5. The package should be shipped U.P.S. - prepaid.
6. The sender should advise the Claims Analyst by letter when the parts have been shipped.

Subject: Fire Damage - 1992 Crown Victoria

Dear [REDACTED]

This is in regard to your contact to our office in Detroit, Michigan, advising of the fire damage to your vehicle.

Our Fire Inspector, Mr. Tom Ellis, inspected your vehicle on April 7, 1994, and spoke with you concerning the damage. Mr. Ellis could not determine a manufacturer's defect which could have caused the fire.

We apologize for the time lost and inconvenience this has caused you. Ford Motor Company cannot accept responsibility, and we must refer you to your insurance carrier. If they feel a manufacturer's defect caused the fire, they will subrogate Ford Motor Company.

Sincerely,

Maureen Sullivan
Customer Relations Manager

 NAMES OF PERSONS PRESENT DID ANYONE PREVIOUSLY EXAMINE VEHICLE?

None *Intellis, Jr. 4/7/94*
 PREPARED BY DATE

How was the vehicle being used when the fire was first noticed? How long?
 (e.g., parked with engine off for 15 minutes, idling for 5 minutes, stop and
 go driving for 30 minutes, etc.).

Describe: [REDACTED] *was driven from his home to his grand children home to pick them up and go to a daycare. He had driven driven approximately 3 miles from his home. Picked up grand children & wife on busy road. Driver observations of vehicle performance prior to noticing fire (e.g., 1/2 hrs home. running rough previous 15-20 minutes, smelled electrical, smelled fuel, heard "pop", noticed nothing unusual, etc.)*

Describe: *has dropped grandkids at their home - got back in vehicle and started backing to access road. engine stalled restarted and tried to continue rearward - engine stalled again - she [REDACTED] saw smoke then I [REDACTED] and got out and called 911 - [REDACTED] stopped and saw flame L.S. on right side - let them get out. Fire man arrived 15-20 min.*

PAGE - 1

EMG-828 51481

I. A. Location of Initial Fire -- be as specific as possible (e.g.,
underdash - 2. at side, or trunk - right rear).

1. Underhood: Unable to determine location due to damage
2. Instrument Panel/Dash: burned into right side & center
3. Trunk: _____
4. Under Vehicle: _____
5. Seat (Front/Rear; Left/Right/Center): _____
6. Steering Column: _____
7. Fuel Filler Area: _____
8. Other: _____

B. Smoke/Flame

1. Location of Initial Smoke: ENGINE COMPARTMENT
2. Color of Smoke: black-gray
3. Duration of Smoke: Smoke & Flame - 15-20 minutes (estimate by Mr. Hamm)
4. Location of Initial Flame (or "No Flame/Smoke Only"):
She saw it right side front - he saw it left side.
5. When Was Flame First Seen: Smoke first observed as they were backing first time and thought it to be exhaust.

C. Type of Fire (Describe)

1. Electrical: _____
2. Exhaust System: _____
3. Fuel Leak: _____
4. Other Vehicle Fluid Leak: _____
5. Battery: _____
6. Other: All wiring & plastic in engine compartment and hood right rear side destroyed (melted).
7. Unknown: Unable to determine cause.

II. Vehicle System Inspection

A. Electrical System

1. Apparent Point of Fire Origin: Unable to determine. From ~~front~~ driver's position -- right side of engine compartment and fender shield and tire, A/C and dash more damaged than left engine side and dash area -- left fender (front) not damaged.

4. CHECK FUSE PANEL

- a. Fuses/Circuit Breakers Blown: ENGINE COMPARTMENT FUSE BOX - NONE
4th fuse - 5th panel - only one blown
- b. Oversize Fuses Used: NONE DETERMINED
3. Note Electrical Components Damaged/Destroyed: All plastic in engine compartment and all wiring, A/C lines, ends of fuel pressure and return lines burned loose from their connection at pressure regulator - wires are on left side of engine and a path would be toward right side.
4. Check Wiring at Point of Fire Origin: be toward right side.
- a. Wire(s) Penetrated by Sheetmetal, or nipped/cut/or spliced: NONE DETERMINED
- b. Proper/Improper Routing: NONE DETERMINED
- c. Insulation/Connector Condition - Subject to Chafing/Sources: " "
- d. Color of any Bared Copper Wires: All insulation burned off
- e. Wire Strands Fused/Welded Together: yes - result of fire
- f. Bending or Balling of Wires Where Separated: NONE DETERMINED

5. Check Condition of Components

- a. Utilize External Power Source to Determine if Component Still Functions (Excessive Draw? - Drag?): Unable to make any tests due to damage
- b. Attempt to Manually Rotate Electromechanical Components (e.g., Blower Motor, etc.): " " " " " "

B. Exhaust System

1. Check Appearance of

- a. Catalytic Converter: OK
- b. Muffler: had been replaced year earlier -
- c. Exhaust Manifold: OK
- d. Component Clearance to Floorpan, Crossmembers, Other Components, etc.: OK
- e. Note Any Holes, Dents, Separation, Missing Components (e.g., Heat Shields, Manifold Bolts, etc.): Comment: NONE DETERMINED

check engine idle speed, ignition timing, & Comment:

C. Fuel System

1. Examine tank, lines, fuel metering systems for evidence of fuel leaks
 - a. Fuel Tank (Perforations, Seams, Sanding Unit, etc.):
 - b. Fuel Lines, Hoses, Fittings and Connectors:
see (3) above
 - c. Fuel Metering System (Carburetor, Fuel Rail, Injectors):
Throttle body was full of hood
Noise insulation material - may have been
reason for second engine shutdown.
2. Note any evidence of modified or Non-OEM components (e.g., rerouted fuel or vapor lines, non-OEM gas caps, modified filler pipe, etc.): None determined

D. Other Fluid Leaks

1. Examine engine for evidence of possible oil leaks (e.g., valve cover gasket):
Unable to determine due to damage.
Eng oil - full and not burned.
2. Possible brake fluid leaks (check master cylinder fluid level, examine for cut/pinched/crossed lines):
Master cylinder plastic melted.
3. Transmission cooler connections (fluid level and condition, examine lines): Not in use - Trans fluid
OK - not burned -
4. Power steering fluid (fluid level, examine lines):
lines burned -

1. Analyze & describe burn patterns

- a. Paint saked/Pealed/Blistered: None melted 3/4" away - INNER and outer hood shell separated
- b. Metal Bared and Oxidized (Rust Red): yes - Right hand fender splash shield, A/C ducts
- c. Low Temperature Metals (see Chart) Heat Damaged: None. A/C evaporator not melted - case was.
- d. Condition of Plastic, Rubber, Cloth Fabrics: All melted in engine compartment dash, and sun visors, glove compartment -

2. Note any Non OEM Equipment installed: _____

None determined.

3. Other Observations/Comments:

Only concern was a noisy muffler - and was replaced earlier. Vehicle has been giving very satisfactory service except at about 100 above mileage when brakes would vibrate when applied and engine had a running rough and spitting noise could be heard - Vehicle was taken into Arrow Ford 4/1/94 for these two concerns.

Technician - Earl Scheetz determined that front brake rotors were out of plane and caused brake vibration when brakes were applied - Replaced both rotors - His test drive revealed brake problem resolved but did notice engine miss on pull or acceleration.

Same Day - Next technician EEC certified Freddie Votato drove engine problem - See Mr. Votato's statement of his experience and repair procedure of vehicle.
