Greg, after analysis of the Verbatims it appears as if things are better. We have received several of the pedals in the attachment, however only 2 of them do not meet criteria.

To date we have received 37 units back, of the 37 only 4 have been verified as not meeting criteria. These units are under analysis at the present time.

Per the note below are you guys getting 6.0L pedals back and what are the results of testing?

Can you summarize for all 6.0L pedal returns, thanks.

> Greg,

> INFO.

> This file contains claims with 6.0L pedal repairs after the Warranty Action Notice (WAN) went out 4/10/03. I was trying to see if WAN was effective or not.

> Most of the claims have some indication of diagnostics, but don't list the specific codes so its hard to say if the WAN helped.

> Are you getting 6.0L pedals sent to the supplier for analysis? If so, what if anything are they finding? Especially on vehicles built after the calibration update of 2/24/03 at RTP.

NYE UNIFLOR™ 8511

A PTFE thickened, medium viscosity, completely fluorinated grease for use in high temperature applications exposed to fuels or aggressive chemicals. It possesses excellent thermo-oxidative stability and low vapor pressure characteristics.

The World Leader in Synthetic Lubricants
