**Re: Travelers Insured: [REDACTED]  
Travelers Our Claim No.: [REDACTED]  
Date of Loss: 06/27/00**

**Dear Jeff:**

I'm writing to confirm that we have settled this claim for ~~\$21,000.00~~ and that Travelers will accept that sum from you in full, final and complete settlement and satisfaction of its property damage subrogation claim arising from this incident. Please make your check payable to "Travelers Property Casualty" and mail it to me at the letterhead address as soon as possible.

To implement the settlement, I enclose the original of the General Release that you faxed to me recently. I have executed it on behalf of Travelers and [REDACTED] as their Authorized Agent and Attorney-In-Fact. Please let me know if you need anything further from me. Otherwise, thanks again for your most kind help with this one. I appreciate it.

Very truly yours,

  
J. Preston Ruddell

Encl. - General Release

RELEASE OF ALL CLAIMS

File No: 8373-258-411826

KNOW ALL MEN BY THESE PRESENTS:

That the Undersigned, being of lawful age, for the sole consideration of Twenty one Thousand Dollars (\$21,000.00) to the undersigned in hand paid, receipt whereof is hereby acknowledged, do/does hereby and for my/his/its heirs, executors, administrators, successors and assigns release, acquit and forever discharge General Motors Corporation, and his, her, their, or its agents, servants, successors, heirs, executors, administrators and all other persons, firms, corporations, associations or partnerships of and from any and all claims, causes of action, demands, rights, damages, costs, loss of service, expenses and compensation whatsoever, which the undersigned now has/has or which may hereafter accrue on account of or in any way growing out of any and all known and unknown, foreseen and unforeseen property damage and the consequences thereof resulting or to result from the accident, casualty or event which occurred on or about the 27<sup>th</sup> of June, 2000 at or near Greenwich, CT.

It is understood and agreed that this settlement is the compromise of a doubtful and disputed claim, and that the payment made is not to be construed as an admission of liability on the part of the party or parties hereby released, and that said releases deny liability therefor and intend merely to avoid litigation and buy their peace.

The undersigned further declare(s) and warrant(s) that no promise, inducement or agreement not herein expressed has been made to the undersigned, and that this Release contains the entire agreement between the parties hereto, and that the terms of this Release are contractual and not mere recital.

ANY PERSON WHO, WITH INTENT TO DEFRAUD OR KNOWING THAT HE IS FACILITATING A FRAUD AGAINST AN INSURER, SUBMITS AN APPLICATION OR FILES A CLAIM CONTAINING A FALSE OR DECEPTIVE STATEMENT IS GUILTY OF INSURANCE FRAUD.

THE UNDERSIGNED HAS READ THE FOREGOING RELEASE AND FULLY UNDERSTANDS IT.

signed, sealed and delivered this 29<sup>th</sup> day of MAY, 2001.

1997 Cadillac Eldorado 1G6ET1296VU619591

Purchased on 9-15-97 at Greenwich Cadillac-Oldsmobile 217 West Putnam Ave  
Greenwich CT 06830

Dear General Motors Corp:

We are handling a claim for Louise Munro who sustained a loss on 06/27/2000.

Our investigation reveals that you may be legally responsible for this loss, and we look to you to satisfy this obligation.

We have paid \$29,691.30 for this loss. In addition, we are requesting reimbursement for Louise Munro's deductible of \$100.00 for a total of \$29,791.30. The vehicle has been placed on hold awaiting your inspection. Please contact us within the next 30 days to set up an inspection.

Please call me immediately if you have any questions.

Sincerely,

Wendy Parent

Vehicle fire

Dear Greenwich Cadillac Olds,

We are handling a claim for [REDACTED] who sustained a loss on 06/27/2000.

Our investigation reveals that you may be legally responsible for this loss.

We have paid \$29,691.30 for this loss. In addition, we are requesting reimbursement for Louise Munro's deductible of \$100.00 for a total of \$29,791.30. The salvage is currently on hold. I have placed General Motors on notice as well.

If you have insurance, please complete the attached form and return it to me. Please refer this letter to them immediately, requesting they contact our offices.

Please call me immediately if you have any questions.

Sincerely,

Wendy Parent

Re: Travelers Insured: [REDACTED]  
Travelers Our Claim No.: [REDACTED]  
Date of Loss: 06/27/00

Dear Jeff:

Thank you for visiting with me today about this claim. As I mentioned, I represent Travelers and [REDACTED] concerning their claim against GMC for the total loss of Ms. Munro's 1997 Cadillac El Dorado. [REDACTED] purchased her vehicle new from Greenwich Cadillac Olds in Greenwich, Connecticut on 9/15/97 for \$36,812.86, taking into account a trade in on her previous vehicle, a Cadillac Deville. She had only routine maintenance performed on her new Caddy, religiously every 3,000 miles, at the dealership. Her last date of service before the loss was in May of 2000. The car had only about 30,000 miles as of June of last year.

On June 27, 2000, [REDACTED] went out to start her car in her driveway. She turned the ignition key, heard a "pop" and noticed smoke coming from under the hood. The smoke was the result of a fire that eventually consumed the engine compartment. Our C&O report pinpoints the cause of the fire as a fault seal or gasket in the area of the fuel injection rail for cylinders #1 and #3 allowed fuel on top of the engine, which ignited due to a spark or heat from the ignition coils or spark plugs. Since there had been no service to the seals and gaskets, and the car was less than 3 years old and with about 30,000 miles on it, it appears that the seal/gasket failure was a manufacturing defect and therefore GMC's responsibility.

Mr. Jeff Haudak  
January 18, 2001  
Page 2

██████████ car was under warranty at the time of the fire. Unfortunately, the dealership stonewalled her and refused to honor the warranty. She therefore asked Travelers, her auto insurer, to cover the loss, which it did. Travelers totaled the car and paid ██████████ a total of \$29,761.30, less her \$100 deductible. This is the amount we are now seeking to recover from GMC.

To my knowledge, the car is available for your inspection. If you wish to do that, let me know and I will make the necessary arrangements. The dealership also inspected the car right after the fire, and may have given you a report.

Enclosed are copies of our expert report, including color photos, our claims and damages documentation. Please review everything in detail over the next few weeks, then call me to let me know where we stand. I will look forward to hearing from you soon, and to working with you on this claim. Thanks for your kind attention.

Very truly yours,

  
J. Preston Ruddall

# CARLEARN FIRE INVESTIGATIONS, LLC

Investigative Report of Carl Egan CFI  
Claim Number: 271ADLTR149GN  
Insured: [REDACTED]  
Car Fire: 1997 Cadillac Eldorado  
Vehicle ID#: 1G6ET1296VU619591  
Claim Representative: Micky Wilson  
Date of Loss: June 27, 2000

## ASSIGNMENT

On July 19, 2000 I was requested by Joseph Glowacki of Travelers Property Casualty to conduct a fire investigation on the above named vehicle. I commenced my investigation on July 21, 2000.

## ENCLOSURES

1. Photographic package of 24 photos.
2. General Motors parts schematic of a fuel injection rail for the 4.6 V8 engine.
3. NHTSA recall information.

## INVESTIGATIVE FINDINGS

The fire in the vehicle originated within the engine compartment. Minor smoke damage had occurred to the interior of the passenger compartment. Examination of the vehicle's steering column indicated that the ignition lock and column were intact and undamaged. Reference photos # 5 and # 6.

The vehicle's engine is a transverse-mounted 4.6 liter fuel injected V8. Examination of the engine compartment provided burn pattern indicators that the fire originated in the rear area of the right hand (passenger) section of the engine compartment. This portion of the engine compartment is occupied by a body support shock tower housing, ignition coil(s), wiring and the fuel injection rail for number one (1) and three (3) cylinders of the V8 engine. The fire had also caused melting of the aluminum air conditioning lines located in this portion of the engine compartment. Reference photo # 19.

Burn pattern indicators and soot deposits on the hood and hood insulation pad also support that the fire originated in this section of the engine compartment. Paint had burned off the underside of the hood in a localized area. This burn pattern corresponds with the area located directly above this part of the engine compartment. Reference photos # 9, # 10, # 11 and # 12. There was visual evidence of liquid residue in the burn pattern on the hood. This (brown colored) residue can be seen in photos # 9 and # 10. This portion of the fire damaged hood is located directly over the area of the fuel injector rail serving cylinders number 1 and 3.

The vehicles hood insulation pad was examined. The hood insulation pad had detached from the hood as a result of the fire melting the plastic clips holding it in place. A portion of the pad approximately 6" X 8" in size was observed to have a clean, soot free area (white in color). This indicates that a hot, clean burning fire had existed in this area of the hood insulation pad at the time of the fire. Black soot deposits were observed on all other portions of the pad. Reference photo # 13. Photo # 14 shows the hood insulation pad with the steel shock tower strengthening brace on the pad for orientation purposes. The brace is seen in place in photo # 12 at top part of photo.

Writer placed the hood insulation pad on top of the engine to simulate its position at the time of the fire with the hood closed. Reference photos # 15 and # 16. This reconstruction of the fire scene indicates that the 6" X 8" clean, soot free area of the hood insulation pad had been located over the rear, (left) cylinder head at the time of the fire. This portion of the insulation pad was located over a portion of the engine occupied by the fuel injector for cylinder number one (1). Photos # 17 and # 18 show the insulation pad after writer had turned back a portion the insulation pad where the soot free area was located. This portion of the engine is located in the central area of photo # 19. The vehicles (4) ignition coils and the location of the spark plug ignition wiring are seen in photos # 19 and # 20. These are the four cylinder shape items in the photo.

Examination of the vehicles wiring harness in the area of fire origin provided indication that the wiring had been damaged as a result of fire exposure. No indications of melting or degradation of the metal caused by arcing or corrosion of the copper conductors was observed on the wiring. The majority of the wiring insulation was found intact in the area of the fire origin with color coding of the insulation remaining visible. The engine compartment wiring harness was found approximately 93% intact with varying degrees of melting damage to the wires insulation covering due to fire exposure.

Visual examination of the vehicles (4) coils and the fire damaged remains of the spark plug ignition wiring provided no obvious visible indication of pre-fire damage or electrical failure. It is possible that this equipment had provided the spark or arc for the ignition of the fire since it is located in the area of the fire origin. It is unknown to writer what the pre-fire condition of the equipment was without further examination under laboratory conditions.

Examination of the vehicles fuel supply and return lines provided indication that they were intact and undamaged. The connection point of the vehicle fuel lines to the engine fuel injection rail was examined. This equipment appeared intact with no indication of failure. The vehicles, gas tank, fuel lines and the connection point of the fuel lines to the engine fuel injection rail were determined to have been damaged as a result of fire exposure and were not responsible for the cause or the origin of the fire. Reference photos # 21 and # 22. The air intake, air filter and throttle body for the engine were damaged as a result of fire exposure.

No evidence of problems with the starter, starter wiring or charging circuit was observed. Examination of the battery and battery cables and battery terminals provided no indication of short circuits. Minor corrosion damage (white powder) was observed in the area of the battery tray. Damage to this equipment was determined to have been caused by fire exposure. Reference photos # 23 and # 24.

I conducted an interview with the vehicle owner, [REDACTED]. She stated that when she went to start the car it had "taken some time for it to turn over" (start) and that she had "fed it some gas" and then the car had started running. Shortly after the car started running she had heard a "big pop under the hood". At this time, she turned off the ignition and she sat in the car waiting for "the car to settle down" and she "waited a minute until she could decide what to do next". As she was sitting in the car, she thought she "saw a wisp of vapor coming out of the hood". At this time she made the decision to sit there in the car and wait a little longer to make sure "she wasn't seeing things" but "it started to increase". She got out of the car and went to get the superintendent of the building to see if he could figure out what was wrong with the car (and) help her.

He came out and "he didn't know what it was all about" and then there "were more wisps of smoke coming out". At this time she told him to call the fire department. The fire department responded in approximately five minutes. At the time he was calling the fire department she decided to go and "open the garage doors to ventilate the smoke out of the garage". When she did this "a lot of acid smoke came out of the garage", forcing her to stay out of the garage where the car was located. She stated that she didn't go back into the garage because she was "afraid of an explosion". The fire department put the fire out and told her to have the car towed away from there. She had "called Cadillac" and a tow truck came and towed away the car.

She stated that the vehicle had about 30,000 miles on it and she always had her cars serviced every 3000 miles. She had the vehicle serviced approximately 30 days prior to the fire. Greenwich Cadillac in Greenwich, Connecticut had performed the 30,000 mile service on the vehicle on May 22, 2000. The vehicle was purchased from Greenwich Cadillac on September 15, 1997.

The only problem she recalled having with the vehicle was that the car "seemed to be starting slower". It took longer for the car to start and the battery seemed to turn the car over slower than it did before. She stated that since she always had the car serviced (every 3000 miles) that she didn't think (assume) that there could be anything wrong with the battery.

She stated that she had not experienced any problems with the car prior to the fire other than the "slow starting" condition.

## CONCLUSION

Burn pattern indicators within the fire damaged engine compartment provide indication that the fire originated in the area of the fuel injection rail for cylinders # 1 and # 3 of the V8 engine. Writer believes that a failure of a seal or gasket caused fuel to leak under high pressure within the plastic enclosure of the air plenum covering the top of the engine. The plastic plenum enclosure was destroyed in the fire. [REDACTED] heard an audible "pop" just after starting the car. After hearing this she turned off the ignition and then observed smoke coming from the engine compartment. The (4) ignition coils and spark plug ignition wiring is in close proximity to this area. A spark or arc from this equipment is the most likely source of the ignition of the gasoline. No evidence was uncovered during the investigation that would indicate the fire is of incendiary origin and the fire is determined to be accidental.

Claim Number: 271ADLTRI49BN

## 24 PHOTOS TOTAL

1. Front view of the vehicle. Heat and fire damage present on hood.
2. Drivers (left) side of the vehicle. No damage present. Note: Center hubcaps of alloy wheels are missing.
3. Rear and driver side of vehicle. No damage present.
4. Passenger (right) side of vehicle. No damage present. Note: Center hubcaps of alloy wheels missing.
5. Front drivers side of the interior of the vehicle. Minor smoke damage present.
6. Steering column and ignition lock intact and undamaged.
7. View of the engine compartment with the fire damaged remains of the hood insulation on top of the engine.
8. Engine compartment of vehicle. Transverse mounted 4.6 V8 engine. Engine showing fire damage in the rear portion of the vehicles engine in the area of cylinder numbers 1, 3, 5, and 7 and the plastic fuel injection enclosure assembly.
9. Underside of the hood showing clean burn damage in the area above number 1 cylinder and the four ignition coils.
10. Second closer view of clean burn damage as identified in # 9. Evidence of liquid spattering in the burn pattern.
11. View of the fire damaged hood in relation to the engine components.
12. View of the engine compartment as seen from the drivers side front of the vehicle.
13. Under hood insulation pad from the vehicle showing clean burn (white colored area) near number one fuel injector and the remains of the plastic fuel injector rail housing.
14. Second view of the hood insulation pad with the shock tower body brace in position as it would be located when the brace is in place and the hood is closed. Note clean (white) area where a hot, clean burning fire existed at the time of the engine compartment fire.
15. Hood insulation pad placed in engine compartment as it would have been located at the time of the fire.
16. View of hood pad from passenger side. Note that the (white) area is located under the portion of the pad in the center area of the photo.
17. Part of the hood insulation pad pulled back showing the area of the engine compartment where the hottest and longest burning part of the fire existed at the time of the fire. This was in the immediate area of the number 1 cylinders fuel injector and fuel line.
18. Second view as identified in # 17.
19. View of the top, left rear portion to the transverse mounted V8 engine. The four cylinder shaped items in the photo are the ignition coils for the engine. All spark plug wiring for the V8 engine came from the rear portion of the coils (firewall side). Number one cylinder is located in the approximate center of the photo.

20. View of the coil assembly and position of the fuel injection rail where number 1 cylinder's fuel injector is located. This is the area where the hottest portion of the fire existed at the time of the fire.

21. View of the drivers side of the engine compartment. This is the area where air intake plenum valve is located. The vehicles supply and return fuel lines are connected to the fuel rail in the center area of the photo.

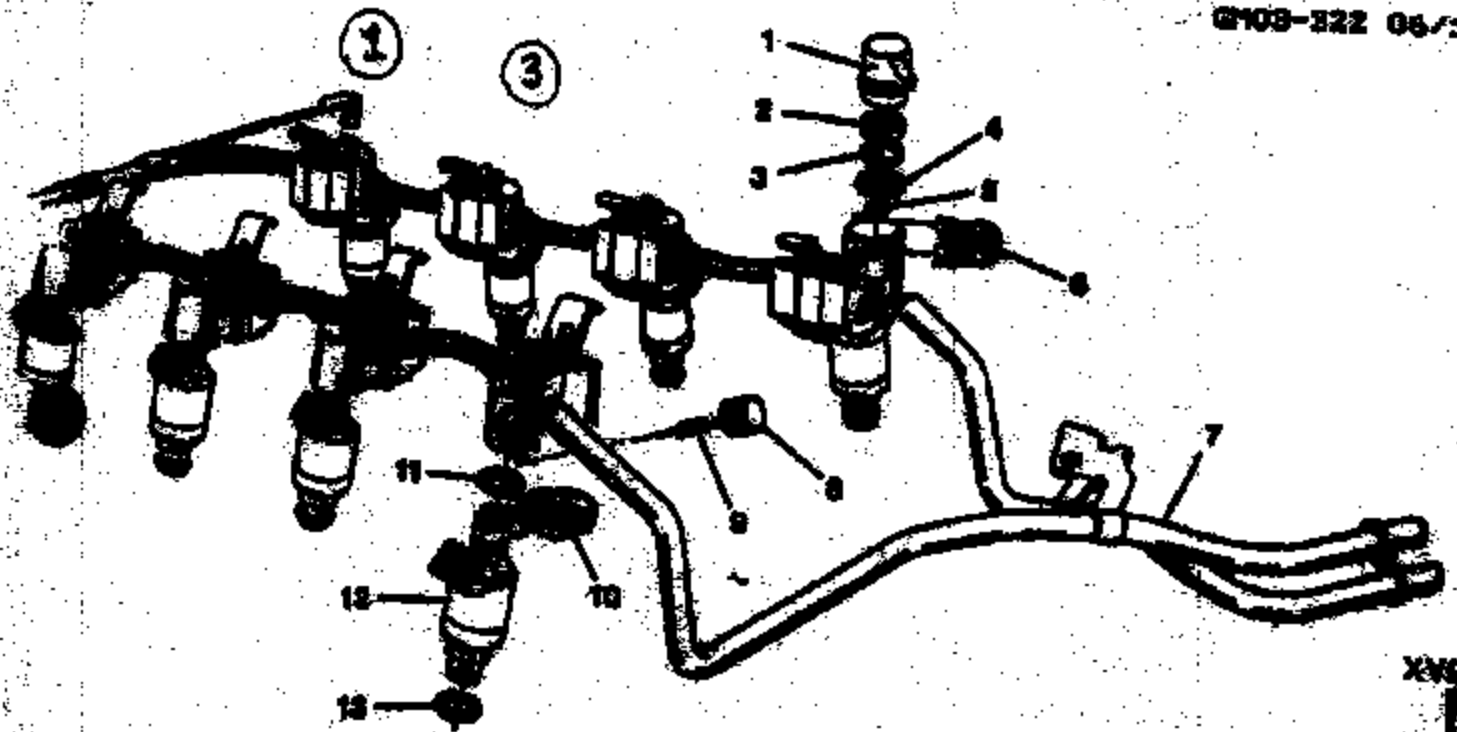

22. View of the vehicles supply and return fuel lines where the two lines connect to the fuel injection rail of the engine. No evidence of damage or failure. Damage to this portion of the engine compartment was caused by fire exposure.

23. View of the passenger side front portion of the engine compartment where the vehicles battery is located. Fire damaged battery is located in the center portion of the photo.

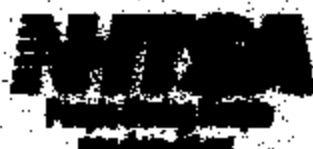

24. Second close up view of the fire damaged battery. The battery was determined to have been damaged as a result of fire exposure.

Report Date: July 26, 2000 02:13:55 PM

NHTSA CAMPAIGN ID Number: 97V064000  
Component: BRAKES:HYDRAULIC:ANTI-SKID SYSTEM  
Manufacturer: GENERAL MOTORS CORP.

Year: 1997  
Make: CADILLAC  
Model: DEVILLE  
Year of Recall: '97  
Type of Report: Vehicle  
Potential Number of Units Affected: 156910

### Summary:

The Electronic Brake Control Module or the Electronic Brake and Traction Control Module can cause the Antilock Brake System (ABS) to cycle during a non-ABS brake application.

This condition can result in an increase in vehicle stopping distance increasing the risk of a vehicle crash.

Dealers will replace the Electronic Brake Control Module or the Electronic Brake and Traction Control Module.

Owner Notification: Owner notification is expected to begin during May 1997.

NOTE: Owners who take their vehicle to an authorized dealer on an agreed upon service date and do not receive the free remedy within a reasonable time should contact Buick at 1-800-521-7300 or Cadillac at 1-800-452-8066. Also contact the National Highway Traffic Safety Administration's Auto Safety Hotline at 1-800-424-9393.

You have reached 1 of the 5 free daily values for Official Used Car Guide - Domestic

**Average Trade-in** -- An Average Trade-in vehicle should be clean and without glaring defects. Tires and glass should be in good condition. The paint should match and have a good finish. The interior should have wear in relation to the age of the vehicle. Carpet and seat upholstery should be clean and all power options should work. The mileage should be within the acceptable range for the model year. The "Average Trade-in" value is a national average calculated from the Official Used Car Guide's nine regions. The "Average Trade-in" value for your vehicle could be higher or lower than the national average due to your local market conditions.

**Average Retail Value** -- An average retail vehicle should be clean and without glaring defects. Tires and glass should be in good condition. The paint should match and have a good finish. The interior should have wear in relation to the age of the vehicle. Carpet and seat upholstery should be clean, and all power options should work. The mileage should be within the acceptable range for the model year.

An Average Retail vehicle on a dealer lot may include a limited warranty or guarantee, and possibly a current safety and/or emission inspection (where applicable).

(\*) Vehicles with low mileage that are in exceptionally good condition and/or include a manufacturer certification can be worth a significantly higher value than the Average Retail price shown.

The web Trade-In, Retail Vehicle, and Optional Equipment values, as well as the Acceptable Mileage Ranges, are based on the Quarterly values of the Official Used Car Guide.

 REGISTRAR OF MOTOR VEHICLES

**GREENWICH CT** 10/05/98 805 74.00 00010 3253

APPLY the enclosed EXPIRATION-DATE STICKER to the REAR PLATE on your vehicle. Remove old stickers before applying the new one. APPLY the new sticker to the right of the word CONNECTICUT over any old stickers. The new sticker may be applied immediately, but must be applied no later than midnight of the day your previous registration expires.

IF YOU CHANGE YOUR ADDRESS, the DMV must be notified of the change within 48 hours. A change address postcard is included with the new sticker. You must provide both your new and old address when notifying the DMV of an address change. You must also print your new address on this certificate in the designated area on the reverse of this form, but do not return this certificate.

WRITTEN SIGNATURES OF REGISTRANT(S) *[Redacted]*

Please sign this certificate in the space indicated for signature(s) of registrant(s) to attest to the information contained therein. KEEP THIS CERTIFICATE IN YOUR VEHICLE.

**GREENWICH CT**

**GREENWICH CT**

**IF YOU SELL, TRANSFER, OR JUNK THIS VEHICLE:**

- ➔ Complete the area on the reverse of this certificate and cancel your registration by returning both the upper part of this certificate and your plate(s) to any DMV branch office. Until you do so, your vehicle is subject to property tax assessment in the town of record for this vehicle. To transfer the plate(s) ANOTHER VEHICLE, bring only the upper part this certificate to DMV when you register that vehicle.
- ➔ Complete and detach BILL OF SALE below and present to new owner together with title to the vehicle.

**BILL OF SALE (for use if you sell this vehicle)**

VALUATION NOTES

97 CADILLAC ELDORADO TOURING 2D COUPE

Adjustments of Special Note

- No special adjustments were made for this vehicle.

Information Provided By The Travelers

- Loss Vehicle description was provided by The Travelers.

- All values are in U.S. dollars.

ADP/AUTOSOURCE Production Steps

- Over 1,500,000 vehicles are entered weekly into the database used for researching this value. This database includes dealer inspected, dealer inventory, dealer advertised, phone verified and advertised private party vehicles.

- The originating search area for this valuation was Greenwich, Connecticut.

- The market area expansion was authorized by John Bass.

- The VIN decoded correctly.

- The tax was calculated based on a date of loss of 06/27/2000 using zip 06830, in Greenwich, Connecticut. (The city may vary from search area to reflect correct tax location.)

Rear Tires	Good (30-79% Of Tread)	Good (30-79% Of Tread)	

Total Condition Adjustments:

\$0

**TYPICAL CONDITION STATEMENT**

1997 Cadillac Eldorado Touring 2D Coupe  
Odometer, equipment, trim level and condition must all be considered carefully on this vehicle. The average miles driven for this vehicle are 45,448. The expected vehicle condition would be as follows:

Component	Description of Typical Condition
<b>INTERIOR</b>	
Seats	Good Slight wear. Soil removed with detail. No fading/discoloring
Carpets	Good No damage. Soil removed with detail. No fading. No discoloring.
Dash	Good No obvious damage. Very slight wear on close inspection.
Glass	Good 1-3 very small pits. Light scratches on close inspection.
Headliner	Good Soil removed with detail. No fading/discoloring. No tears.
<b>EXTERIOR</b>	
Body	Good No obvious damage. 1-3 small dings on close inspection.
Paint	Good 1-3 small chips/scratches. Swirl marks, can be buffed out.
Trim	Good 1-3 marks/scratches. Shiny chrome/brightwork/color-key parts
<b>MECHANICAL</b>	
Engine	Well Maintained Clean/good condition. Maintenance performed and documented.
Transmission	Well Maintained Clean. No leaks. Maintenance performed. Service documented.
<b>TIRES</b>	
Front Tires	Good (30-79% of tread) Tires are in good condition. 30-79% of tread remains.
Rear Tires	Good (30-79% of tread) Tires are in good condition. 30-79% of tread remains.

Having a clean, well maintained vehicle will add to its market value. Prior body damage, rust, extensive interior damage or mechanical problems will all decrease the market value of this vehicle.

REPLACEMENT VEHICLES

97 CADILLAC ELDERADO TOURING 2D COUPE

The following replacement vehicles may include a sampling of the actual vehicles used to calculate the selling price. The replacement vehicles represent vehicles that have recently been offered for sale in the marketplace. These vehicles have similar attributes and characteristics to the total loss vehicle.

RECALL BULLETINS

97 CADILLAC ELDOURADO TOURING 2D COUPE

Nat'l. Highway Traffic Safety Admin (US) has issued a total of 1 recall bulletin that may apply to this vehicle.

NHTSA ID#: 97V064 Date Issued: 04/01/97 Number Affected: 77,449  
MANUFACTURED DATES: April-December 1996

VEHICLE DESCRIPTION: Passenger vehicles.

**DESCRIPTION OF DEFECT:** The Electronic Brake Control Module on the Electronic Brake and Traction Control Module can cause the anti-lock brake system (ABS) to cycle during a non-ABS brake application.

**CONSEQUENCE OF DEFECT:** This condition can result in an increase in the vehicle stopping distance, increasing the risk of a vehicle crash.

**CORRECTIVE ACTION:** Dealers will replace the electronic brake control module or the electronic brake and traction control module.

**STATE REGULATORY STATEMENT**

Connecticut General Statutes require that whenever any damaged vehicle covered under an automobile insurance policy has been declared to be a constructive total loss by the insurer, the insurer shall, in calculating the value of such vehicle for purposes of determining the settlement amount to be paid to the claimant, use the average of the retail values given such vehicle by (1) the National Automobile Dealers Association (NADA) Used Car Guide and (2) the Automatic Data Processing Autosource Valuation Service for Connecticut local market conditions.

---

**VEHICLE LOCATOR SERVICE**

97 CADILLAC ELDOURADO TOURING 2D COUPE

After your claim is settled, ADP/AUTOSOURCE provides free assistance in locating your next vehicle. Call us Monday through Friday, between 8:00 AM and 5:00 PM, Pacific time, at (800) 351-3133, ext 4292. Our specialists will work with you to find a new or used vehicle in your area.

---

**LOSS VEHICLE VALUATION**

ADP/AUTOSOURCE has been chosen by The Travelers to assist in establishing a fair market value for your vehicle. We are proud to offer you the most current and comprehensive vehicle valuation available today.

Your vehicle was inspected and/or described to ADP/AUTOSOURCE by a trained representative of The Travelers. ADP/AUTOSOURCE has evaluated all aspects of your vehicle provided by The Travelers as well as those features identified by the VIN or known to be standard equipment for your vehicle.

The market value of your vehicle was determined by comparing it to other vehicles in your area of similar make, model, equipment, mileage and condition that have been offered for sale or sold in the past 90 days. The sources for this comparison include dealers selling new and used vehicles, newspapers, traders and specialty journals.

Each week, over 1,500,000 vehicles are input from these sources representing over 20,000 dealerships and 2700 publications. This database contains over 24,000,000 individual vehicles annually, making it the largest in the industry. We utilize the industry's largest electronic network and leading edge technology to provide you the most current inspected, surveyed or advertised market data. We will find the closest vehicle matches in the area nearest your home.

Client/Account: General Motors

Dear Ms Edens:

We are the third-party administrator on behalf of General Motors Corporation for matters involving allegations of product liability.

In that regard, We are in receipt of your correspondence dated October 12, 2000. Your correspondence alleges that your insured's vehicle sustained property damage as a result of a manufacturer's product defect. Please provide us with:

- Proof of payment for vehicle rental

As soon as the requested information has been received, a technical evaluation of this matter will be completed. Upon the conclusion of our evaluation, We will contact you with our position.

Also, you have the obligation and responsibility to ensure that the subject vehicle and it's related components are maintained and preserved in their post-event condition for so long as you intend to pursue a claim and/or cause of action. We will be unable to determine if a physical inspection of the subject vehicle would be necessary until we have had the opportunity to thoroughly evaluate your supporting technical documentation.

Sincerely,

Yveta M. Young

Dear Ms. Edens

This letter is in reference to your product liability subrogation claim filed with General Motors Corporation on behalf of your insured.

We have completed our review of this claim, and based on the material and information available, our analysis does not disclose that a manufacturers product defect was a causative factor in the above incident, therefore this claim has failed to meet the burden of proof.

ESIS, on behalf of General Motors must deny this claim, in the event you have additional information or proof of a defect, Please forward to my attention for reconsideration.

Please also be advised that should you intend to pursue this matter further, the subject vehicle, along with any alleged defective components should be pressured during the duration of the claim.

Sincerely,

Curtis Collins

Your File: UNKNOWN

Dear Greg:

The above vehicle was involved in a fire loss. Damage to the vehicle resulted in a total loss in the amount of \$19,098.50.

Our investigation indicates the cause of the fire as follows:  
The fire originated within the engine compartment, where gasoline was leaking from the fuel line connections, and upon ignition of the vapors, the fire extended upward and outward from that location.

Please accept this letter as notice of a subrogation claim in the amount of \$19,098.50.

The vehicle is being held at an offsite location. Please call to schedule an appointment if you wish an inspection of the vehicle.

Sincerely,

Dear Mr. Edens:

This will acknowledge your claim on the above-referenced matter. In order to evaluate your claim, the following documents and information are respectfully requested:

1. A copy of your expert report which states your theory of liability. Also include the original or laser color copies of the photographs taken by your expert.
2. A copy of the police and/or fire report.
3. A copy of the vehicle operator's statement of events. This should include events prior to and immediately following the incident.
4. Advise if the vehicle owner and/or operator note anything wrong or unusual about the vehicle prior to the incident.
5. Provide copies of all available maintenance, warranty, or repair orders on the subject vehicle. If repairs and maintenance were performed by the vehicle owner, then a chronological summary of operations performed is needed.
6. Advise as to any after-market equipment which may have been installed on the subject vehicle. If applicable, provide copies of receipts and/or invoices for installation of said equipment.

7. Advise as to any modifications, alterations, or changes to the subject vehicle. If applicable, provide copies of relevant installation receipts.
8. Did the vehicle owner receive any Recall Notices for the subject vehicle? If so, please provide copies of the notices.
9. Advise if the subject vehicle was ever involved in any prior accidents. If applicable, identify the nature and extent of the damages and repairs completed.
10. Provide copies of your proof of payment.
11. The present location of the subject vehicle and its availability for inspection.
12. Provide proofs of the transmission and engine oil levels, if applicable.

Upon receipt of the above-requested information and documentation, this matter will be assigned a claim number and further review of this matter will be complete. During this entire process, the subject vehicle should remain available for inspection, if necessary.

If you have any questions, please feel free to contact me at 1.800.888.0164.

Sincerely,

**Greg Thresher**

IN RE: State Farm Claim No. 13-9858731  
E&A File No. 00-1316VP  
[REDACTED]

**PREDICATION:**

This report is predicated upon the request of Mr. Steve Davison, State Farm Claims Investigator, Vehicle Investigation Program, to conduct an investigation into a [REDACTED] with special reference to the fire loss of a 1996 Cadillac, Deville.

**INSPECTION:**

On June 28, 2000, Investigators Walt Herndon and Devin Jordan arrived at Insurance Auto Auction in Aurora, Illinois to conduct an investigation into the fire loss of a 1996 Cadillac, Deville.

Once at the scene, a close inspection provided the following information:

**SEE ENCLOSED INVESTIGATION REPORT**

Prior to leaving the scene, several 35mm color photographs were taken and are enclosed.

**ORIGIN AND CAUSE INVESTIGATION:**

On June 28, 2000 at 7:45 a.m., Investigators Walt Herndon and Devin Jordan arrived at Insurance Auto Auction in Aurora, Illinois to conduct an investigation into the fire loss of a 1996 Cadillac, Deville, four door, vehicle identification number 1G6KD52Y6TU257225. Upon arriving at the facility, the vehicle has been brought forward and is identified by its vehicle identification number located in the area of the windshield and dash, as well as the federal manufacturers label on the driver's door. Initial observations reveal evidence of a fire to have originated within the engine compartment, with the most severe damage present on the left or driver's side. The fire has extended through the bulkhead and windshield, entering the passenger compartment, causing the first stages of melting of the dashboard and heavy smoke staining throughout. The

[REDACTED]

July 7, 2000  
Page 2

investigation continues and the fire lessens in degree extending toward the rear, causing blistering to the painted surface of the driver's door. The examination continues, and the remaining painted surface of the vehicle is free of any fire damage.

At this time, the investigation is focused to the fuel tank, fill tube and gas cap, which are intact with no evidence of any fuel leakage. The examination of the underside of the vehicle reveals no evidence of any fire damage.

Entry is gained into the rear passenger compartment, where there is heavy smoke staining, however, no evidence of any fire origin. The examination of the front passenger compartment reveals partial melting of the dashboard with the rundown of melted plastic onto the driver's floor area. The examination further reveals that the odometer is a digital odometer and no mileage could be ascertained.

The examination is now focused to the engine compartment, whereupon gaining entry, it was determined that a fire has originated within the left rear to center of the engine compartment and extends upward and outward from that location.

The investigation is now focused to the battery, located in the right front, which is heat damaged, however, intact, and the battery terminals on the side and cables are still intact and have not been severed.

A check of the fluid levels revealed the brake fluid, power steering fluid and radiator to have drained during the course of the fire. The examination of the transmission fluid reveals no fluid registering on the dipstick. Further investigation reveals no oil registering on the dipstick.

At this time, the investigation is focused to the front of the engine, where there is exposure fire damage to the radiator hose on the left or driver's side, however, the remainder of the hose is intact. The examination further reveals combustible hoses and spark plug wires on the upper portion of the engine, revealing exposure fire damage. The examination of the left front of the engine compartment reveals plastic remaining for the air filter carrier and the paper element, wiring with insulation, ruling out any fire as having originated within this area.

PREPARED BY [REDACTED]

IN RE: State Farm Claim No. 13-9858731  
[REDACTED]

July 7, 2000  
Page 3

The examination continues, and upon examining the nylon fuel lines, which connect into metal fuel lines on the left or driver's side, the nylon fuel lines have been consumed with one of the metal fittings pointed in a downward position, with the other fitting pointing rearward. The examination reveals that this area is where the most severe damage is present.

At this time, the vehicle is elevated into the air and there is evidence of transmission fluid seepage from the transmission pan gasket, and there is evidence of oil seepage from the oil plug and oil pan gasket. The fact that there is evidence of seepage may very well account for the low reading of oil and transmission fluid.

At this time, after completing the above inspection and examination, no evidence of any electrical failure or incendiary act could be found and attributed to the cause of the fire. ~~The fire originated in the left rear area of the vehicle, where the fuel lines were located, and upon ignition of the gasoline vapors, the fire spread upward and outward from that location, causing the damage present.~~ The fire is deemed to be an accidental fire, fuel related.

**NICE VINASSIST:**

A review of the NICE Vinassist indicates that the 1996 Cadillac, Deville is equipped with a 4.6 liter, V8 engine and was assembled in Hamtramck, Michigan.

**AUTOMOBILE CLAIM SERVICE RECORD:**

A review of the Automobile Claim Service Record indicates claim number [REDACTED]. The named insured is listed as [REDACTED] of [REDACTED] Hoffman Estates, Illinois. [REDACTED] and [REDACTED] on [REDACTED] the 1, 2000 at 2:45 p.m. at Perry Road and [REDACTED] in [REDACTED], Illinois. Listed under facts is insured was driving down Perry Road and the car started to smoke. The insured lifted the hood and the fire started.

PRIVILEGED MATERIAL REDACTED

July 7, 2000  
Page 4

**NATIONAL HIGHWAY TRAFFIC & SAFETY ADMINISTRATION:**

A search of the National Highway Traffic & Safety Administration, Recall Database, produced one record pertaining to the vehicle in question. Upon reviewing same, it was found not to pertain to the fire in question.

A further search was conducted of the National Highway Traffic & Safety Administration, Investigations Database, which produced two records pertaining to the vehicle in question. Upon reviewing same, neither were found to pertain to the fire in question.

**ALldata SYSTEM:**

A search of the Alldata System produced a number of technical service bulletins pertaining to the vehicle in question. Upon reviewing same, none were found to pertain to the fire in question.

**OTHER INFORMATION:**

On June 14, 2000 at 2:30 p.m., Lisa Rodriguez of State Farm Mutual Insurance Company conducted an interview with [REDACTED], who is the title holder, named insured and operator of the vehicle at the time of the fire. At the time of the fire, no passengers were present in the vehicle.

The fire was discovered on June 4, 2000 at 2:45 p.m. and the weather conditions were clear. The location of the fire was Penny Road and Hilly Road in Barrington Hill, Illinois. Subsequently, the insured contacted 911 and the Barrington Hill Fire Department responded in eight to nine minutes and extinguished a fire involving the 1996 Cadillac, Deville.

The vehicle in question was purchased used in January of 2000 from Budweiser Auto in Wisconsin. At the time of the purchase and at the time of the fire, there was no warranty in effect on the vehicle.

When questioned regarding how much fuel was in the tank, it was learned that it had been filled just minutes before the fire.

July 7, 2000  
Page 5

When questioned regarding who checks the fluid levels, [REDACTED]  
[REDACTED]

The insured went on to state that no engine service has been performed on the vehicle and the last person to have entered the engine compartment would have been the oil change facility to change the oil.

Since ownership of the vehicle, the insured has not had to add any oil or other fluids, other than the oil change performed.

When questioned regarding any mechanical or electrical problems with the vehicle, [REDACTED] with the [REDACTED] she [REDACTED]

Mileage at [REDACTED] the time [REDACTED]

Since ownership of the vehicle, they have not received any recall notices, campaigns or correspondence from the manufacturer. Further, [REDACTED]

The insured was then questioned regarding whether the vehicle has an alarm system or a cellular telephone, and indicates that it has a factory alarm, however, no cellular telephone.

When questioned regarding whether the vehicle had ever been involved in an accident, the insured indicated not to his knowledge.

At the time of the fire, the vehicle had been in operation for approximately one hour, the only accessory being utilized was the radio, and all accessories functioned. Further questioning revealed that he did not observe any fluid leaks, did not experience any operability problems, no warning lights were illuminated, he did not detect any odors or hear any noises.

[REDACTED] the [REDACTED] tire. He slammed the hood closed and called the fire department. The color of the smoke when first observed was black, the color of the flames were unknown, however, they were on the driver's

IN RE: State Farm Claim No. 13-9858731  
[REDACTED]

July 7, 2000  
Page 6

side, by the left front tire. The hood remained closed, then opened, and then closed again. All doors were closed and windows were open at the time of the fire.

No one photographed the vehicle at the fire location and the fireman did not indicate any probable cause regarding the fire. In conclusion, the insured states that maybe it was a gas line and further indicated how much he "loved his vehicle".

CONCLUSION:

Having completed an examination of the vehicle, reviewed an interview with the insured, conducted research pertaining to the vehicle in question, and based upon all of the information known at the time of the preparation of this report, it is the opinion of both Investigators that the fire was accidental in nature. It is further the opinion of both Investigators that the fire originated within the engine compartment, where gasoline was leaking from the fuel line connections, and upon ignition of the gasoline vapors, the fire extended upward and outward from that location, causing the damage present. The fire is deemed to be an accidental fire.

It should be noted that the insured detected an odor of gasoline and observed a fire on the left or driver's side of the engine compartment.

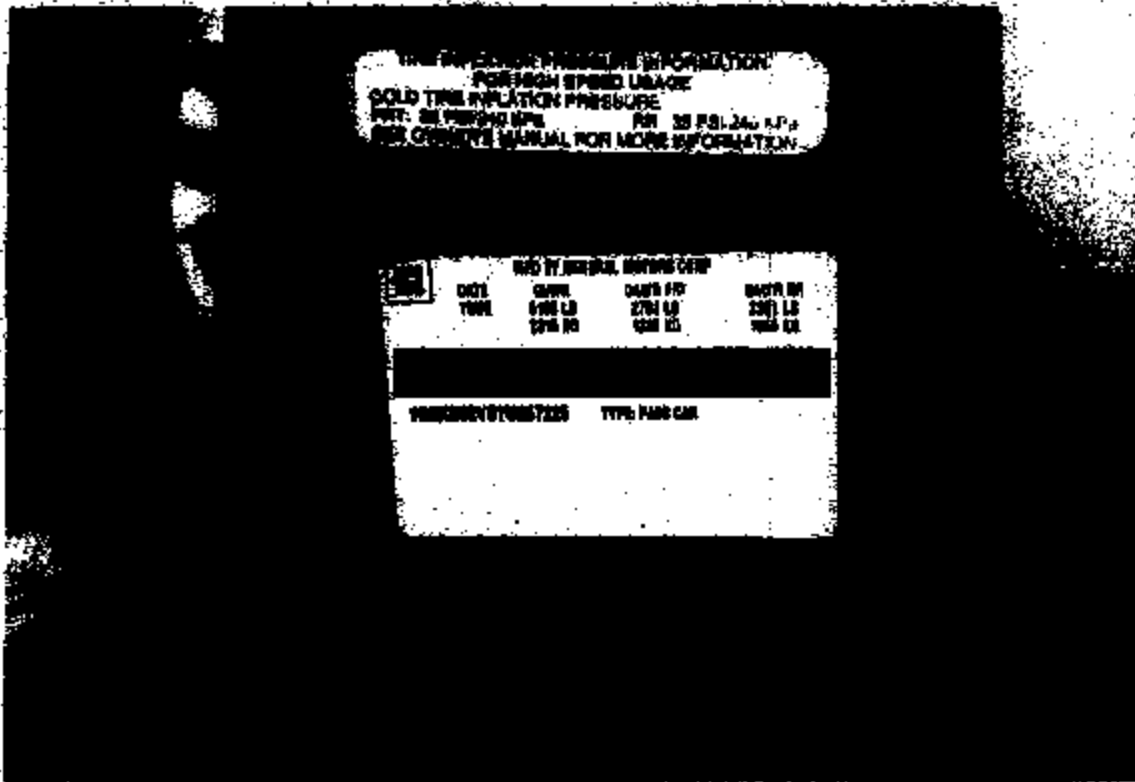

At this time, we are closing our file and forwarding our report and photographs for your review.
