To: O'Neall, Jim (J.D.)
Cc: Iorio, Rob (R.R.)
Subject: FW: Quality Data Pull for Golden Sensor Strat.

Jim,

Forgot to cc you on the note to Rob.

We used 12 MIS actual, the number has come down since our initial look in August, currently around 37.8 for DPFE.

I also talked to Gilanji, the differences in our numbers were primarily due to the 2.0L I-4 applications being included in our overall number.

Pete:

The data you pulled for us last week. The component guys feel we should have asked for 12MIS as it is a better look. What are your thoughts on that? Would we be able to get the same data if required?

Rob, Jim

Follow up to my phone message.

I believe we are looking at the difference between actual and forecast.

The 9J460 Delta Pressure sensor 2002 12MIS data of 46.9 R/1000 was an actual at 12 MIS but was run back in late August when an update report-out was made to the FTQR, thus was very early data based on low volume (approx 117,500).

We reran the 12 MIS data last week, it currently shows 37.8 R/1000 actual at 12 MIS with higher volume (approx 902,000).

Total volume of 2002 MY is currently shown as 3,081,000. So only 29% of the vehicles have attained 12 MIS, the remaining 71% of vehicles have yet to achieve 12 MIS. I am not sure when the fix was implemented nor how effective it has performed. The final 12 MIS value will be a volume weighted average of the pre- and post fix performance. Jim's people should have the forecast detail that shows both pre, post and the weighted average values projected to 12 MIS.

We reviewed the paper today with Robin and Frank. Jim Oneal did not agree with the 12MIS R/1000 number

on our slide which had a 2002 projection of 46.9 R/1000 - he felt it should be more in the 20s. This slide was a direct lift from your presentation.

Can you please provide us with an updated number or justification for the 46.9? Thanks.

Rob,

Sensors/Actuators data is shown for each item separately. Note that the Pedal Sensor/Assembly does not include the TPS as the TPS sensor warranty is an unknown fraction of the overall throttle body warranty.

Please give me a call if you have any questions.

Subject: Quality Data Pull for Golden Sensor Strat.

Larry:

We have begun assembling the new presentation with much of what you gave us but we have found little backup for the sensor warranty or if we have it is not consistent.

As we spoke yesterday, could you pull the R/1000 data for us for each of the top 10 sensors?

The format we would like is

Time in Service: 3MIS

Years: MY99,00,01,02

Sensors/Actuators

DPFE

IABV

VMV

MAFS

Ign Coils

TRS

Trans Solenoids

HEGO/CMS Combined or Split

**Pedal Sensor/TPS Combined or Split
Fuel Injectors**

Not sure how it is to automatically dump these in a simple excel chart for us. That would be the preferred format. If not, we can place the raw data in a chart. It would be great if we could get this my tomorrow morning. Not sure how hard this pull is. Thanks.
