Jerry and Marty -

Note that the Ohio State Highway Patrol has been running at a high rate of replacement for the seat belt buckle campaign. Also note that they have extended an offer if any of your people are interested in reviewing their vehicles in the field.

FYI. Note the large percentage of affected vehicles.

I am forwarding this to you to see if there is any interest in his offer for Ford to be able to view a large number of affected vehicles in the field. Action required only as you feel necessary.

Subject: 2001 Ford Seat Belt Recall 01S21

Good afternoon,

When I received the information on Ford recall 01S21, I contacted Graham Ford here in

Columbus, Ohio to inspect the 2001 Ford Crown Vic's we have waiting for assignment. After checking 125 new cars today only "2" passed the seat belt buckle tester. The technician from Graham Ford thought that there must be some mistake and returned to the dealership and picked-up a new seat belt buckle tester just to make sure. He had the same number of failures.

Questions:

Do I stop the assignment of 2001 Ford Crown Vic's and not drive the ones we have in-service until all seat belt buckles have been replaced?

If the drivers are sure the red button on the buckle has returned to the top of its travel, is it safe to operate the vehicle?

Can we get a 'large' order of replacement seat belt buckles ASAP?

Since we experienced nearly 100% failure on the cars Graham Ford checked, do you want to send someone from Ford Motor Company to assist?

The information of the recall and a copy of the customer letter has already been supplied to all of our Patrol locations across the state.

Your assistance in this matter will be appreciated!

Joseph Price
Fleet Manager
OOPS / Ohio State Highway Patrol

Cc: Kalina, Curtis (C.D.); Oswald, Greg (G.G.); Badger, Robert (R.S.); Goering, Kimberly (K.L.)
Subject: TRW tool evaluation

Talking this morning with Charlie Steffens and Ed Schlapf, they need to conduct an evaluation of their own, today, to prove out the second generation tool. I have digital photos of the revised tool which I will send you separately. It looks like our evaluation will need to take place tomorrow as TRW have been asked to attend multiple meetings this afternoon - including our Tech. Review at 3:30. I've asked Ed to develop a timing plan that will get us 8500 tools within the next two weeks, and to ensure that raw materials are available in the required quantities.

Regards,

Steve Parkin

Hi Nitin.

Please ship the parts to MSXI Mt. Elliott facility.
The address is as follows:

MSXI
5500 Mt. Elliott
Detroit, MI 48211
Attention: Mike Zielinski

I have already picked up the installation CD from Julie and supplied it to Mike Zielinski at MSXI. MSXI has a certified mechanic prepared to make these repairs. Thanks..

Nitin Desai
You can inspect 'in plant buckles'.

Subject: Re: FW: EV Ranger - TRW Seat Belt Inspection.

Nitin / Julie,
Please send information to Ricardo Espinosa (810)781-7389 concerning the number of driver and passenger buckles that need to be replaced. Ricardo will make arrangements to obtain the buckles. As far as assisting with or instructions for replacement, we are going to leave that in Ford's hands. Our personnel is not trained in replacement on production units. Please contact me should there be further questions. Thanks

Sent: Friday, August 10, 2001 1:42 PM
To: Zychowitz, Julie (J.A.)
Cc: Philip, Abraham (A.G.)
Subject: Seat Belt Buckle Inspection

Julie,

Hello from APG. I received the seat belt checker today and have conducted several checks on U222/228 prototypes under test out here. I got your name to contact. Several already tested as BAD, so we are ordering replacement parts. We have also had numerous complaints of U152 Explorers out here and that buckle style can't be checked with the fixture. I like the concept and would like a similar fixture for the other style of buckle. Is there such a fixture? Also, is the Explorer under recall also? Maybe it should be?

Subject: ***TRW STOP SHIPMENT (Seatbelts)***

Lisa, TRW has a seatbelt issue that has caused a 'stop ship' at 11 Ford assembly plants. The plants have closed the gates and 22,762 vehicles are parked.

Issue

The failure mode is a 'false latch' where an occupant thinks the belt is engaged, but in reality it isn't. A slight 'tug' on the buckle will cause the tongue to disengage from the buckle. TRW identified 2 root causes for this issue. First, a bent spring in the buckle base. Second, a cracked bridge. TRW identified a clean date of 5/10/01. All parts produced after this date are clean, however all parts built prior to this date are 'suspect'. TRW has developed a test to certify quarantined stock but this test is currently being verified. Verification will be complete by 10:00 tonight. The next conference call is scheduled for 10:00pm.

Vehicle Lines affected: (10) 2001 MY Vehicles

F-Series	Superduty	Excursion
Ranger	Expedition	Navigator
Towncar	Crown Victoria	Grand Marquis
Windstar		

Assembly Plants affected:

Norfolk	✓ Ontario Truck
✓ Kansas City	✓ Wisconsin
✓ <u>Tenn Cities</u>	Quintan II
✓ Michigan Truck	✓ Kentucky Truck
✓ Oakville	✓ <u>Edison</u>
✓ <u>St. Thomas</u>	

Tier II Plants affected

JCI- ✓ Shelbyville / Port Street / Chesapeake / Milton
Lear- ✓ Liberty / St. Thomas
Visteon- ✓ Chesterfield

I will keep the team updated as we drive toward resolution. Thanks.

Sent: Friday, July 20, 2001 2:10 PM
To: rbardales@ford.com
Subject: Re: 01s21 Parts requests

Rosemary,
I have commented in RED on below questions. Also, attached is updated version of matrix to include the Med. Dark Denim for the F250 - F550 SD (See tab Final List and Dlr attach II) Thanks, Dave

>>> Stephen Scalise <scalise@renkin.com> 07/19/01 02:58PM >>>
Kathie,

A couple of issues that need to be answered:

A dlr is seeking a part # for F150 SuperCab Med. Parchment that is involved in campaign but does not show part # in bulletin.
If it is base bench - unaffected
If it is 40/60 or bucket - buckle is Black only, no matter seat color

Dlr stating that they have about 6 F150 Super Crew that has captain seats in the front- what part # can be use. Super Crew is called Crew Cab in the list

Dealer has a F-350 crew cab 4x4 that needs denim blue - bulletin only shows graphite. Med. Dark Denim missed on original list - see updated copy

Dlr seeking to order a dark blue seat belt for 2 F250 Super Duty Crew 4 wheel drive. Trim code 3r. Not on Bulletin list. Med. Dark Denim missed on original list - see updated copy

Dealer seeking Med. Parchment, Med graphite, Dark graphite for a F150 Super cab 60/40 bench and bucket - Bulletin only shows Black.
If it is base bench - unaffected
If it is 40/60 or bucket - buckle is Black only, no matter seat color

[REDACTED]

Dix states they have F-Series Lightning edition that is involved in the campaign.
Claiming the tool will not fit this vehicle seatbelt. Insufficient info -what was build
date of vehicle - If tool does not fit -most likaly vehicle has prior model End Release
buckle.

Thank You!!!

Subject: RE: EV Ranger - TRW Seat Belt Inspection.

Julie,

Attached file is the list of all MY2001 EV Ranger inspected for TRW seatbelt buckle concern. Seatbelt buckle identified in RED needs replacement with new buckle.

Need direction on replacement of the buckle. Will MSX facility will do the replace of the buckle or someone else will do the replacement.

I could not locate three trucks at MSX-Detroit facility. I have identified that in the attached list. Mark Steppay at MSX is aware of that. Mark will call me back to check these trucks at later date.

Seatbelt buckles of the trucks listed in the attached list were checked with the inspection gage supplied by TRW.

David,

I have tool (inspection gage) to inspect buckle latch condition on the Ranger. Please advise where I should contact to access EV Rangers for this inspection at MSX. Please refer to Julie Mercier's note attached below.

Appreciate your help in this matter.
Regards!

Nitin, you had told me that you were not going to inspect vehicles until this program was launched. I spoke to Steve Parlin, and he said that you can do an inspection at MSK on the EV Rangers before then because it is an assembly plant. Please start the inspection as soon as you can. Thanks.

David, I was provided VINs of 2 vehicles that are sold (one of which is in a Ford test fleet.) Can you verify that is all the VINs that should be included.

Thanks.

Subject: EV Ranger

We realized that we had forgotten all about the 2001 EV Ranger. Per David Wagner, only one 2001 EV Ranger has been shipped. I will get the VIN and add it to the population. All others are at the plant. Someone needs to get in touch with David and have the containment action/inspection instituted at the Detroit Chassis Plant.

Thanks

David, it is my understanding the NHTSA inspected the EV Ranger units at the plant for 01S21 (TRW Seatbelts) and determined that a number of belts needed to be replaced. Can you let me know when those units have been fixed. I will keep the units that need the belt replacement in the vehicle population until you tell that the belts have been replaced. The below note contains the list of units that need a belt(s) replaced.

Thanks for your help.

Subject: 2001 Front Seat Belt Buckles Replaced After Recall

Julie,
ECI has received front seat belt buckles which were replaced after recall, belt buckles are from 2001 Ranger, Expedition, F150. These parts are available for further analysis. Let me know where to deliver parts, these parts are related to 2001 MY vehicles front belt buckles replaced after 01S21 inspection.

Thanks,
