Re: DPO5-002

Dear Scott:

I am enclosing some additional ODI citations some of which will be repeats which you can check against your lists.

Enclosed are the following items: (1) a handwritten list of Toyota Camry 2002 ODI brake and accelerator complaints (200) out of total of 545 consumer complaints as of October 26, 2005; (2) 2003 Toyota Camry complaints, 137 brake and accelerator complaints out of total of 310; (3) 2002-2005 Toyota Corolla complaints (61); (4) 2002-2005 Toyota Highlander complaints (73).

While in California, I only had a limited time to use the library computers. I was therefore unable to review all of the consumer complaints for a particular model vehicle for a certain year. The information I had provided you during the past summer was limited, as I now realized. Now that I am home, I intend to review each Toyota and Lexus vehicle model for the years 2002-2005 for consumer complaints involving the throttle and brake issues. There are 200 such complaints for the 2002 Camrys; 137 for the 2003 Camrys; 61 for the 2002-2005 Corollas; and 73 for the 2002-2005 Toyota Highlanders, for a total of 471 complaints in these attachments. As the vehicles age, there will be increased complaints in each model, as the statistic already reveal. In the next set of attachments, I will review 191 consumer complaints with respect to the 2004 Camry and 85 with respect to the 2005 model. I will also attempt to include additional 2002 Toyota vehicles and all other Toyota vehicles through the year 2005 and then begin a similar review for all the 2002-2005 Lexus vehicles.

Sincerely,

REC'D BY  
REG-SAN
