Subject: An Additional Question for RQ06-003

Hi John,

As part of VW's response to ODI March 15, 2006 information request letter, please add your response to the following question. The due date for the response is May 26, 2006.

14. In VW's last quarterly report (4th quarter, 2005) for recall 04V-133 submitted to the agency, it reported that 258 vehicles were totaled. With regard to those 258 vehicles, please explain in detail the following:
- The number of vehicles that were totaled because of a fire due to wire chafing of the driver's side knee bolster.
 - Of those that VW totaled due to a fire, how many did VW evaluate?
 - What were the results of the evaluation for each of the vehicles in question "a" and what did VW do with those vehicles?

Regards,

Tom Cooper
