Volvo Trucks North America

PRODUCT INFORMATION

NE-G1 Dual Integrated Super60 Incandescent Tail Lights with Separate Backup Light – All Lights Mounted In Tapered Crossmember

Affects: VN, VHD Tractor Models

Related: Rear Frame Treatment
Rear Towing Device

Restrictions: Taper Rear Crossmember (X6-B1) required; not available with lightweight rear crossmember.
Not available with pintle hook (6P-C1).
Not available with Angle Stock Mud Flaps (69-C1).

This option features Super60 braking (red) and backup (clear/white) lamps mounted in the tapered rear crossmember. These "European style" tail lights give the vehicle a distinctive, stylish look and are designed for reliable performance. The bulbs used are standard incandescent bulbs, which are easily replaced.

Tail lights are mounted in the tapered rear crossmember. (If tail lights other than Super60 are selected, the tapered crossmember will have the oval holes.)

This option may be used on any tractor, but may not be used on vehicles where a pintle hook or other specialized fittings will be mounted on the rear crossmembers.

PRODUCT NUMBER
STOP/TAI/TURN:
 52562 - Red

FEATURES & BENEFITS

- Torsion Mount® III, Gel-Mount® bulb cradle design minimizes bulb vibration
- Double contact
- Oval style lamp fits competitors' grommets and brackets
- Locking tabs assure solid pigtail connection
- O-ring seal design reduces corrosion
