VIN# 6 truck

CURRENT MILEAGE

DELIVERY DATE 2-24-06

PLEASE DESCRIBE PROBLEM WITH UNIT (be as specific as possible)

Customer has 6 truck that lost power in rear of unit. We found fused junction wheeled coach installed under truck disintegrated and cable ends rotted off. We need 6 new fuse holders and fuses ASAP to get customer back on road. Can we get a water proof fuse like used in boats? You need to mount these fuses inside truck when building them like they do at Kansas Plant. Please send parts ASAP, we emailed pictures to Tim Henke. Will take 2 hrs per truck labor to remove clean install new cable end, remount, and try to seal from corrosion. Labor 140.00 per truck x 6

WHEELED COACH WARRANTY CLAIM

Please fax to 1800 241-5177

Please print.

Date 4-13-07 Wheeled Coach Work Order 242138

Customer [REDACTED] VIN# 1FDSS34P34 [REDACTED]

Current Miles 46266 Delivery Date 1-19-05

Please describe problem with unit (-Be specific as possible)

The 400 amp primary Fuse located between the
two external batteries and the printed circuit board
is continually exposed to road use chemicals and
the natural elements. This component part is
discolored and visibly shows signs of wear.
There are signs of oxidation present so we are
requesting a retrofit kit for our ambulance.

REPLACEMENT RETROFIT KIT FOR 400 AMP FUSE PER
MAINTENANCE INSPECTION BULLETIN, 400 AMP PRIMARY FUSE
IS SHOWING CORROSION FROM ROAD CONDITIONS. I HAVE
CLEANED AS BEST AS POSSIBLE & PUT TERMINAL PROTECTOR
ON IT, BUT FEEL THAT DUE TO HEAVY OXIDATION IT SHOULD
BE REPLACED. COPPER CONNECTIONS SHOWING MINOR FATIGUE
& DETRIORATION FROM CORROSION.

Thank You

Please describe problem with unit (-Be specific as possible)

After inspection Bulletin 400 AMP primary fuse shows significant amounts of corrosion and will require replacement.
Air Rear A/C unit will not regulate for heat - Air conditioning remains full cold regardless of thermostat setting - Have done diagnostic check and found VACUUM controlled HEAT VALVE does not open; with bypass hose between vacuum ports I get full heat; checked electrical circuit power does regulate to valve - NEED replacement valve

PLEASE DESCRIBE PROBLEM WITH UNIT (be as specific as possible)

Customer has 6 truck that lost power in rear of unit. We found fused junction wheels coach instructed under truck disintegrated and cable ends rotted off. We need 6 new fuse holders and fuses ASAP to get customer back on road. Can we get a water proof fuse like used in boats? You need to mount these fuses inside truck when building them like they do at Kansas Plant. Please send parts ASAP, we emailed pictures to Tim Henke. Will take 2 hrs per truck labor to remove clean install new cable end, remount, and try to seal from corrosion. Labor 140.00 per truck x 6

Please describe problem with unit (-Be specific as possible)

400 amp primary fuse for Type III, located under unit, curbside, and forward of the battery compartment attached to the back of the step well was noted to have significant corrosion. I would like to request a retrofit kit to avoid possible future problems. Thank you.
