Subject: PE08-009 Question 10 TRW power steering pump

Bruce

Attached is the response for request 10 on PE08-009 for the TRW power steering pump. The power steering pump part numbers referenced in the Service Bulletin 46-38 have been installed in production on multiple models beginning in 2000 and are still being used in 2008. In the aftermarket, these pumps may also be installed on other makes or brand vehicles and are also being sold to replace pumps produced by other pump manufacturers.

Please let me know if you need more information on these requests

10. State the number of each of the following that Freightliner has sold that may be used in subject vehicles by component name, part number (both service and engineering/production), model and model year of the vehicle/engine in which it is used and month/year of sale (including the cut-off date for sales, if applicable):
- a. Subject component;
 - b. Any new design of the subject component intended to replace the subject component.
 - c. Any kits that have been released, or developed, by Freightliner for use in service repairs to the subject engine or component.

For each component part number, provide the supplier's name, address, and appropriate point of contact (name, title, and telephone number). Also identify by make, model, and model year, any other vehicles of which Freightliner is aware that contain the same part number component, whether installed in production or in service, and state the applicable dates of production or service usage.
