

**2002 – 2003 Taurus Sable  
Front Suspension Coil Spring Fracture**

**OWNER REPORTS**

As the agency is aware, within FCSD's North American Customer Service Operations, there is a Customer Relationship Center (CRC) that is responsible for facilitating communication between customers, dealerships and Ford Motor Company. Among other things, the CRC handles telephonic, electronic, and written inquiries, suggestions, informational requests, and concerns ("contacts") from Ford and Lincoln-Mercury vehicle owners about their vehicles or sales and service experience. The contacts are handled by CRC customer service representatives who enter a summary of the customer contact into a database known as CuDL (Customer Data Link). Certain contacts, such as letters from customers, are entered into the CuDL database. Those that were entered into the earlier MORS II system were also microfilmed. More recently, the records in MORS III/CuDL are imaged and stored electronically.

The CRC assigns to each vehicle-related contact report a "symptom code" or category that generally reflects the nature of the customer contact or vehicle concern, as described by the owner. The CRC does not undertake to confirm the accuracy of the description provided by the owner; they simply record what is reported. Therefore, given the complexity of the modern motor vehicle, it is Ford's experience that a significant percentage of owner contacts do not contain sufficient information to make a technical assessment of the condition of the vehicle or the cause of the event reported. Accordingly, although MORS contact reports may be useful in identifying potential problems and trends, the records are not the empirical equivalent of confirmed incidents and/or dealership's diagnosis. In the interest of responding promptly to this inquiry, Ford has not undertaken to gather the electronic images related to these contacts because of the largely duplicative nature of the information contained in the images, as well as the time and the burden associated with locating and producing those documents. The pertinent information related to those contacts generally would be included in the contact reports obtained from the CuDL system. To the extent that those documents exist, they are reflected in the comments of MORS III contact reports. Upon request, Ford will attempt to locate any specific items that are of interest to the agency.

In responding to this information request, Ford electronically searched CuDL using the following criteria:

Model Year: 2002 - 2007

Subject Vehicle: Taurus/Sable vehicles manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands.

Date Parameters: January 1, 2001 through September 29, 2008 (the date of this inquiry)

Types of Contacts: All, including suspended data, canceled contacts and inquiries

MORS III Symptom Code(s):

Symptom Category	Symptom Code	Symptom Description
CHASSIS STEERING	303000	STEERING/HANDLING
CHASSIS STEERING	303100	STEERING/HANDLING FUNCTION
CHASSIS STEERING	303155	STRG/HANDLING FUNCTION LOSS OF STRG
CHASSIS STEERING	303400	STRG/HANDLING NOISE
CHASSIS STEERING	303450	STRG/HANDLING NOISE NO LOAD
CHASSIS STEERING	303451	STRG/HANDLING NOISE ACCELERATION/DECEL
CHASSIS STEERING	303453	STRG/HANDLING NOISE OVER BUMPS
CHASSIS STEERING	303454	STRG/HANDLING NOISE WHEN TURNING
CHASSIS STEERING	303999	STEERING/HANDLING NOT LISTED
CHASSIS SUSPENSION	304000	SUSPENSION SYSTEM
CHASSIS SUSPENSION	304100	SUSPENSION RIDE QUALITY
CHASSIS SUSPENSION	304152	SUSPENSION RIDE QUALITY BOTTOMING
CHASSIS SUSPENSION	304200	SUSPENSION LEAN/SAG/HEIGHT
CHASSIS SUSPENSION	304285	SUSPENSION LEAN/SAG/HEIGHT BOTH ENDS LOW
CHASSIS SUSPENSION	304287	SUSPENSION LEAN/SAG/HEIGHT FRONT LOW
CHASSIS SUSPENSION	304289	SUSPENSION LEAN/SAG/HEIGHT LEANS LEFT
CHASSIS SUSPENSION	304290	SUSPENSION LEAN/SAG/HEIGHT LEANS RIGHT
CHASSIS SUSPENSION	304500	SUSPENSION NOISE
CHASSIS SUSPENSION	304586	SUSPENSION NOISE FRONT
CHASSIS SUSPENSION	304588	SUSPENSION NOISE BOTH
CHASSIS SUSPENSION	304700	SUSPENSION SHOCKS/STRUTS
TIRES/WHEELS	306000	TIRES/WHEELS
TIRES/WHEELS	306200	TIRES/WHEELS AIR LOSS
TIRES/WHEELS	306201	TIRES/WHEELS AIR LOSS SLOW LEAK
TIRES/WHEELS	306202	TIRES/WHEELS AIR LOSS PUNCTURE
TIRES/WHEELS	306600	TIRES/WHEELS TIRE FAILURE
		TIRES/WHEELS TIRE FAILURE BLOWOUT/SUDDEN
TIRES/WHEELS	306602	LOSS OF AIR
TIRES/WHEELS	306605	TIRES/WHEELS TIRE FAILURE CHUNKS MISSING

MORS III Reason Code(s):

Reason Code	Description
07	LEGAL CONTACTS OF ANY NATURE

Word Searches:

The reports located using the search criteria described above were then searched using the Electronic Data Download System using a keyword process. Those reports that were identified by the keyword search described here were manually reviewed for relevance. The following keyword searches were conducted:

Coil  
Spring

Break  
 Broke  
 Corro  
 Puncture  
 Rust

### **LEGAL CONTACTS**

Within FCSD, there is also a Consumer Affairs Department that manages customer concerns, which cannot be resolved by the Customer Relationship Center (CRC). Among other things, the Consumer Affairs Department has a section, known as "Litigation Prevention," which handles a variety of informal (i.e., non-litigation) claims, such as property damage claims or attorney demand claims. Also, the Litigation Prevention section does not handle claims from insurance companies asserting subrogation rights arising out of payments made to insured. The Litigation Prevention section has been centralized in the Consumer Affairs Department since 1995, in Dearborn, Michigan. Prior to that time, Litigation Prevention personnel operated on a regional basis. For matters that the Litigation Prevention section handles, there are typically paper files that reflect the handling, investigation and resolution of property damage claims. The claims, known as "Legal Contacts" within FCSD, are entered into the CuDL database in the same manner that the CRC enters other customer communications into the CuDL database. When a customer contact is designated as a Legal Contact, it is so indicated near the top of the contact report.

### **FIELD REPORTS**

Within FCSD, there is a Vehicle Service & Programs Office that has overall responsibility for vehicle service and technical support activities, including the administration of field actions. That Office is the primary source within Ford of vehicle concern information originating from Ford and Lincoln-Mercury dealerships, field personnel, and other sources. The information is maintained in a database known as the Common Quality Indicator System (CQIS). The CQIS database includes reports compiled from more than 40 Company sources (e.g., Company-owned vehicle surveys, service technicians, field service and quality engineers, and technical hot line reports, etc.) providing what is intended to be a comprehensive concern identification resource. As with MORS contact reports, CQIS reports are assigned a "symptom code" or category that generally reflects the nature of the concern.

In responding to this information request, Ford electronically searched CQIS using the following criteria:

<u>Model Year:</u>	2002 - 2007
<u>Subject Vehicle:</u>	Taurus/Sable vehicles manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands.
<u>Date Parameters:</u>	January 1, 2001 through September 29, 2008 (the date of this inquiry)

Symptom Code(s):

Symptom Category	Symptom Code	Symptom Description
STEERING/HANDLING	3034	NOISE
SUSPENSION	3040	OTHER
SUSPENSION	3041	RIDE QUALITY
SUSPENSION	3042	LEAN/SAG/HEIGHT
SUSPENSION	3045	NOISE
SUSPENSION	3047	SHOCKS/STRUTS
SUSPENSION	3049	NOT LISTED SUSPENSION
TIRES/WHEELS	3060	OTHER
TIRES/WHEELS	3062	AIR LOSS
TIRES/WHEELS	306600	TIRE FAILURE – OTHER
TIRES/WHEELS	306602	TIRE FAILURE – BLOWOUT SUDDEN LOSS OF AIR
TIRES/WHEELS	306605	TIRE FAILURE – CHUNKS MISSING
TIRES/WHEELS	306606	TIRE FAILURE – IMPACT BULDGE

Broke  
Corro  
Puncture  
Rust

**OASIS MESSAGES**

FCSD is responsible for communicating a variety of vehicle and service information, such as warranty information for up to the past 360 days, Extended Service Plan part coverage information, and technical repair information, to North American Ford and Lincoln Mercury dealers. This information is communicated primarily through OASIS, which serves as an electronic link between Ford Motor Company and the dealers. OASIS covers all North American Ford and Lincoln Mercury cars and light trucks, and medium and heavy-duty Ford trucks, for the ten most current model years. Technical diagnostic and repair information on OASIS is contained in Special Service Messages (SSMs) and Technical Service Bulletin (TSBs) titles and brief summaries. It should be noted that dealers cannot access brief summaries.

SSMs and TSB titles are coded in OASIS by model year and vehicle line, and may be coded to other specific vehicle attributes (body style, engine code, or vehicle identification number) and one or more OASIS Service Code(s). The dealers with access to OASIS usually search for information on the database by entering a VIN and the applicable Service Codes. SSMs and TSB titles that become inactive or superseded continue to be accessible by Ford employees, but no longer are accessible by the dealers. Dealers also are able to determine the recalls

applicable to a particular vehicle by searching a particular VIN in OASIS. Recall information available on OASIS cannot be searched by Service Codes.

In 1998, the OASIS system was upgraded from the "OASIS 2" system to the new "Global OASIS." At that time, OASIS 2 was removed from service and is no longer used to communicate with dealers. During the upgrade, inactive information (such as inactive SSMs or superseded TSB titles) was not transferred to Global OASIS.

In responding to this information request, Ford searched Global OASIS for active, inactive, and superseded TSB titles and SSMs using the following search criteria:

Model Year: 2002 - 2007

Subject Vehicle: Taurus/Sable vehicles manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands.

Date Parameters: January 1, 2001 through September 29, 2008 (the date of this inquiry)

OASIS Service Code(s):

Code	Description
303000	STEERING/HANDLING
304000	SUSPENSION SYSTEM
306000	TIRES/WHEELS
700000	NOISE & VIBRATION
702000	OTHER NOISE CONCERNS
702100	OTHER NOISE CONCERNS FRONT
790000	NVH PUBLICATION REVISIONS

OASIS 2 and Global OASIS are not capable of performing electronic word searches, so the search results are reviewed manually to determine their applicability to the alleged defect in the subject vehicles.

The OASIS database also contains Broadcast Messages. Typically, these messages are directed to all dealerships and either are notifications of new SSMs/TSBs, or announcements with non-technical information (for example, "the Dealer Hotline will be closed today"). Broadcast Messages cannot be searched by OASIS service codes, and can be retrieved only while active (approximately 2 to 4 days). Ford has not undertaken to search for Broadcast Messages because Ford expects that any responsive information obtained with such a search generally would be non-substantive in nature or duplicative of the information obtained with the TSB title and SSM search described above.

### **INTERNAL SERVICE MESSAGES**

FCSD, as part of its technical support activities, maintains fleet and technical telephone "hotlines." During the early stages of Ford's efforts to identify and resolve potential vehicle concerns, hotline personnel may draft Internal Service Messages (ISMs) on CQIS for their internal use. The ISMs are assigned a CQIS "symptom code" or category that generally reflects the nature of the concern. An ISM can form the basis for an oral response over the technical hotline to an inquiry from an individual dealer or fleet technician. The ISMs, however, are not

made available electronically to fleets and dealers. Therefore, although ISMs are not "issued" to dealers like OASIS messages, Ford is construing this request broadly to include ISMs that may be related to the alleged defect in the subject vehicles.

In responding to this information request, Ford searched CQIS for active ISMs using the following search criteria:

Model Year: 2002 - 2007

Subject Vehicle: Taurus/Sable vehicles manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands.

Date Parameters: January 1, 2001 through September 29, 2008 (the date of this inquiry)

CQIS Symptom Code(s):

Code	Description
303000	STEERING/HANDLING
304000	SUSPENSION SYSTEM
306000	TIRES/WHEELS
597997	DRIVELINE NOISE CONCERNS
702000	OTHER NOISE CONCERNS
702100	OTHER NOISE CONCERNS FRONT

The CQIS database in which the ISMs reside is not capable of performing word searches, so the search results were reviewed manually to determine their applicability to the alleged defect in the subject vehicles.

### **FIELD REVIEW COMMITTEE**

Ford's Field Review Committee reviews all potential field service actions, including safety recalls and customer satisfaction programs, and recommends appropriate actions to corporate management. A Vehicle Service & Programs representative serves as Secretary to the Field Review Committee. Following approval of a field service action, the Vehicle Service & Programs Office prepares and launches the action. A representative copy of the communication to Ford's dealers, fleets, and Regional offices announcing the field service action is maintained in the Field Review Committee files.

### **WARRANTY**

Ford's Analytical Warranty System (AWS) contains warranty claims and vehicle information for model years 1991 and forward for North America, and model years 1992 and forward for Europe and Jaguar.

Ford performed a search of AWS for potentially responsive reports using the following search criteria:

Model Year: 2002 - 2007

Subject Vehicle: Taurus/Sable vehicles manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands.

Base Part Number: 5310
