Brief Description:

I own a 2006 dakota slt v8 less than 30k m. trans. is broke. waiting for a month. turn signal recall, fixed.... broke after a day...why should I ever buy a dodge.

Comments:

A month to change a transmission that still hasn't been changed. A factory recall for a turn signal that you fixed and I still can't turn left without fearing for my life because every left turn turns into a right turn or windshield wipers. Sounds safe. My lawyer loves this already.
