Mr. Ansley,

With respect to your letter (NVS-215aa EQ10-001 008E-046), we were only made aware of this recall as of the 20th of April 2010 and this notification came from Vantage Mobility International, not RICON. We did not respond in accordance with 49 U.S.C. 573.6 as the vehicle in which the recalled equipment was installed was not offered to or sold in the United States. In fact the vehicle was built well before we even considered registration with NHTSA.

If this does not satisfactorily address your requirements with respect to Recall 08E-046, I would welcome a call from you in that regard. It is our sincere desire to remain fully compliant will all of your motor vehicle requirements.

Notwithstanding, in the interests of occupant safety we are endeavouring to contact the customer so that they may bring the vehicle in to us for an inspection and replacement as deemed necessary.

Respectfully,

Dan O'Brien
