Mr. Ansley

I am in receipt of your letter dated September 8, 2011 regarding slack adjusters manufactured by the Accuride Corporation, safety recall 11E-008.

Unfortunately, this letter did not progress through the proper channels in a timely manner.

However, we are able to respond as follows:

When we were notified of the potential problem by Accuride the 100 questionable units that we received were still in our inventory.

Upon visual inspection of these 100 slack adjusters, we found that none of these units were from the manufacturing lots in question. These lot numbers were supplied to us by the Accuride Corporation.

As a result we took no further action.

For informational purposes, the slack adjusters we did receive were used in a trailing application (trailers) and were not used in any steer axle applications.

Again I apologize for the delay.

Please let me know if this response is sufficient.

Thank you

Lynn Reinbolt
