**To:** Bowker, Kyle (NHTSA)  
**Cc:** York, Bruce (NHTSA); nasser.zamani@daimler.com  
**Subject:** PE12-018 Subject Component  
**Attachments:** SFYCASCADIA-1111-04-00123.pdf; SFYCASCADIA-1111-04-00129.pdf

This email is to request clarification of the Subject Component listed on the July 11th IR sent to DTNA regarding PE12-018. It is our understanding that ODI is investigation an outside-the-rail perpendicularly-oriented air reservoir mounting system equipped with aluminum support brackets. As written the Subject Component includes "all" styles of air reservoir mounting brackets - of which DTNA seems to have an infinite supply.

Please verify that the subject component of this IR is the air reservoir mounting system identified in Q3-2011 EWR hard copy submissions such as SFYCASCADIA-1111-04-00123.pdf and SFYCASCADIA-1111-04-00129.pdf, and not all of the numerous styles of air reservoir mounting brackets used by DTNA.

I have attached copies of the two EWR reports mentioned above for convenience.
