A close-up photograph of a vehicle's interior metal chassis. The image shows several wires and components. On the left, a bundle of wires is secured by a metal bracket. In the center, a pair of black cables with silver connectors is visible. On the right, a bundle of four silver wires is held together by a black plastic clip. Below this, a perforated metal plate is attached to the chassis. The background is a light-colored, textured metal surface.

# VC11938 Post

A close-up photograph of a mechanical assembly. The central focus is a silver-colored metal post, identified as VC11938, which is mounted on a blue-painted metal component. The post has a cylindrical base with a small rectangular notch and a wider, U-shaped top section. The blue paint shows some texture and wear. To the left, a black plastic part is visible, and a red component is partially seen at the bottom left. In the background, a yellow-painted metal part is visible. The overall scene is brightly lit, highlighting the metallic surfaces and the various colors of the components.

A high-angle, rear view of a red car. The car's rear features a prominent black grille with horizontal slats. A license plate with the number '12003' is mounted in the center of the grille. Above the grille is a red LED light bar. Below the grille is a chrome bumper with a silver-colored textured plate. The car is parked on a light-colored floor, and its rear fenders are partially wrapped in clear plastic tape.
