RE: Safety Recall 12E-026 and EQ12-009

Dear Ms. Timian and Mr. Ansley:

Thank you for taking the time to address Deere's questions regarding the information you requested for recall 12E-026 and equipment query EQ12-009. As we discussed, I am submitting this information to you by August 24, 2012.

Pursuant to the reporting requirements in 49 CFR Section 573.6(c)(3), Deere estimates that there are 600 Compressed Natural Gas (CNG) engines that may be subject to recall. These engines were manufactured and sold as original equipment. We are sending you a spreadsheet via email that lists the serial numbers of each engine, the build date, the sold to party, contact information and the line of business for each purchaser.

Deere's program for remedying the defect is forthcoming as well as its reimbursement plan pursuant to 49 CFR Section 573.13. We will send notifications to the listed vehicle manufacturers and distributors in the next week and will mention their responsibility to file a Part 573 Defect Report if they have affected vehicles. We will send you a copy of this notification. Deere will work with the vehicle manufacturers and distributors to identify owners and send them notification of the recall after we submit the remedy plan.

Please let me know if you have any questions about the submitted information.

Sincerely,

Kelly Van Veldhuizen
