Subject: United Fire

Hi [REDACTED]
Do you have a receipt from United Fire for a replaced fuel tank plug and power steering leak? I don't know what truck, it doesn't say what truck on the invoice.

Description	Quantity	Rate	Amount
OD Reading 6489: Traveled to customers location for an air leak at road to pump valve. Inspected valve and it seemed to be good. Inspected air solenoid on the pump transmission and found the piston had busted in the middle. Removed old piston from the air solenoid. Resealed the activator rod and the new piston. I installed the piston in the solenoid. Tested the road to pump system. Tested good See attached repair order ticket Miscellaneous shop supplies Travel Sales Tax		450.00	450.00

Inspection (Brakes)

1) Received call from [REDACTED] that he wanted all units to have a brake inspection.

2) Traveled to all [redacted] Fine stations and completed inspections on all units with air brakes. Adjusted all brakes on units with down brakes. See attached paperwork with all information of inspections.

[illegible]

I hereby authorize the above repair work to be done along with the necessary materials. You and your employees may operate vehicle for purposes of testing, inspection, or delivery at my risk. An express mechanics lien is acknowledged on above vehicle to secure the amount of repairs thereto. It is understood that you will not be held responsible for loss or damage to vehicles or articles left in vehicle in case of fire, theft or any other cause beyond your control.

To: [REDACTED]
Subject: Re: Sutphen

We received the part but we were told it was warranty.

[REDACTED] wrote:

Hi [REDACTED]

I have an invoice from Sutphen for 172.70 for a switch.

It is attention [REDACTED]

Would this be a warranty thing and if not, do you have a packing slip or can you verify the part was received?

File Sir.)

FAMILY OWNED
SINCE 1890

October 26, 2009

(Important)

Dear Sir:

In reference to the issue with water tank support on you're newly purchased Sutphen units. I have been made aware of the issues with current tank supports and Pro-Poly's current structural recommendations. I have reviewed with our engineering staff the issues relating to these tanks and our current structural supports. Engineering has approved our supporting structure to be sufficient and exceed the requirements from our standpoint. We will be reviewing this issue with Pro-Poly in the future. Sutphen will stand behind the structural integrity of these units as built. I hope this will resolve any issues or concerns you may have. Again we would like to thank you for purchasing a Sutphen.

Sincerely,

Keith Townsend
Plant Manager

OPERATOR AND MAINTENANCE MANUAL DELIVERY DOCUMENT

Dear FIRE CHIEF OR TRAINING OFFICER,

This date, 24 JULY 09, Sutphen Corporation delivered to

[REDACTED]
(Fire Department)

2 Operator/Service Manual(s) for
(No. Rec'd)

Service and operation of SPH 100 HS 4596.

1. Sutphen recommends the manual be thoroughly read and studied before trying to operate this apparatus.
2. Sutphen further recommends that this manual be readily available to persons operating and/or servicing this equipment.
3. Sutphen also recommends that no operator drive or work on Sutphen apparatus without being trained by Training Officer or person(s) attending the Demonstration of Operation.
4. We recommend that users of the apparatus view the video/cd with the training officer prior to use of the vehicle.
5. We recommend that the driver be certified or be CDL licensed before driving the apparatus.

Included with these manuals: Video(s) as indicated below

SUTPHEN DEMO & HYD & ELEC ROM
CLASS 1 HALE MERITOR

We recommend the above as we want to eliminate any potential injury resulting from the misuse or negligence on the part of the operator. This is why it is so important to have properly trained personnel to operate the Sutphen apparatus.

SHOP TOWER HOURLY MAINTENANCE SCHEDULE

AERIAL

Every 10 Hours of Documented Use

- pg. 2-3 **Pivot Shift Bearings** At Base attached to Turntable Side Plates
Lubricate with Multi-Purpose Grease
- pg. 2-9 **Recommended Weekly or every 10 hours**
360 Rotation right and left at 80 degrees and fully extended
- pg 2-5 **Sheaves and Cables**
Sheaves Check for wear, dirt, and damage
Lubricate w/ Multi-Purpose Grease
Cables Check for wear, dirt, and damage
Wipe down w/ Naphtha Cloth; re-apply thin film of Multi-Purpose grease
- pg 2-7 **Water Way Tubes**
Visually check all Seals and Swivel assembly
***Wipe tubes down when dirty
***Re-apply a thin film of ATF periodically

Every 25 Hours of Documented Use

- pg 2-4 **Rotation Worm Gear**
Fitting greased with multi-purpose EP grease
Located @ upper portion of of main gear case
- pg 2-6 **Slide Block Paths**
Re-coated with McLube 1700L every 25 hours or as needed.
Reapply to missing or worn off load bearing areas
May take (2) coats DO NOT OVERCOAT**
If tower exposed to excessive dirt/grime during operation clean and recoat
- pg. 2-13 **Cable Adjustment**
Adjust the cables tension as needed.
- All Water Swivels**
Manufacture (Amity Machine) Recommends all Water Swivels greased every
25 hrs of operating time or every 6 months
DO NOT OVER GREASE

Every 3 Months

- pg. 2-4 **Gear Reduction Oil Level**
Maintain level to oil level plug. Never over fill.
Use a good grade of 80 wt. gear lubricating oil
- pg. 2-5 **Aerial Extension/Retraction Cylinders**
Check cylinder end bolts for tightness

AERIAL Scheduled Maintenance Continued

Every 6 Months

- pg. 2-3 ***Turntable Bearing***
Lubricated every 6 months
Use multipurpose grease
- pg. 2-3 ***Turntable Bolts***
Check for tightness
250 ft. lb. of torque
- pg. 2-4 ***High Speed Worm Gear Shaft***
Should be greased
DO NOT OVER GREASE
- pg. 2-5 ***Aerial Extension / Retraction Cylinders***
Lubricate the Rod Eye Mounting Pin
Use Multipurpose Grease

Torquing of Bolts:

UNTIL FURTHER NOTICE:
ONLY UNITED FIRE IS PERMITTED TO TORQUE BOLTS.

1.1 Introduction

This manual has been prepared with the assistance of service and engineering specialists to acquaint you with the operation and maintenance of your new apparatus. You are urged to read this manual carefully. Following the instructions and recommendations in this manual will help ensure the safe and enjoyable operation of your apparatus.

After you have read this manual, it should be stored in the apparatus or another location which enables quick and easy reference for all firefighters.

Throughout this manual, the words **WARNING**, **DANGER**, and **CAUTION** appear. These serve as reminders to follow all instructions carefully. Failure to follow instructions can cause personal injury or damage to your apparatus.

This manual has been written to help in the setup and use of the tower during emergencies.

There may be circumstances that arise throughout the life of this apparatus which do not appear in this manual. At all times, common sense and safety should be your first consideration.

Sutphen knows your apparatus best and has the parts and factory-trained technicians available to keep your apparatus in an ever-ready state. Sutphen Corporation works towards giving you complete satisfaction. Please do not hesitate to contact Sutphen Corporation at 1-866-287-5549.

 Operator Manual

1.2 Aerial Platform Operation

Operation Safety Points

When the truck is delivered, a factory-trained representative will demonstrate the proper use of the apparatus. The department must continue this to achieve a proficient level of training.

The aerial tower is only as good or as safe as the operator is competent. Continued training and familiarization is essential.

An operator **MUST** be at the lower control station anytime the aerial is being operated.

Personnel should not climb the aerial tower until the lower controls operator indicates that it is safe to do so. The upper power switches must be turned off in the platform and at the turntable pedestal before climbing the ladder.

Rating of the aerial: Model SPH 100 - 1,000 lbs.

Rating in the bucket: Model SPH 100 - 500 lbs. while flowing water
or with charged waterway

Do not operate turntable controls while personnel are climbing the tower.

Personnel should use an approved life belt when operating on the aerial tower.

At night, the entire aerial tower should be well lighted.

Do not forcefully extend the end of the tower against a structure.

Never use the aerial as a battering ram.

Never use the aerial for pulling down walls or structural members.

Never willingly or intentionally abuse an aerial by careless handling, overloading, or use for which it was not designed.

ALL OUT.

Operate the aerial with deliberate motions and smooth application of power.

Training and practice with the apparatus on a regular basis is a must for safe operation.

Auxiliary ground pads should always be used under the outrigger feet when operating the aerial tower.

Do not use auxiliary ground pads under the rear jacks unless they are metal, as these jacks are used as a grounding point.

Safety lock pins on stabilizers shall always be in place.

Never move the vehicle with stabilizers in contact with ground.

Most problems encountered with operation of the tower are caused by inadequate maintenance. To keep the tower fully operational, routine lubrication policies should be followed.

The aerial should be inspected and tested annually in accordance with NFPA 1914, Testing Fire Department Aerial Apparatus.

Frequently inspect the chassis and running gear and maintain in good mechanical condition following recommended schedules in this manual. The aerial tower is of no use unless it can be transported to where it is needed. Careful, safe driving rules should be observed for the same reason.

Carefully and frequently check and inspect the entire aerial for loose bolts or rivets, unlubricated bearing surfaces, bent, warped, or twisted parts, hydraulic leaks, defective electric control equipment, etc. Follow the recommended maintenance schedules in this manual.

All members should frequently practice the different phases of aerial operations.

Never set up the aerial on marshy ground, freshly filled ground, or other soft surface.

 Operator Manual

Never apply opposing alternating control when operating the aerial, either in a side-to-side motion, a front-to-rear motion, or an up-and-down motion. This may set up an accelerated oscillation, which could put undue strain on the structure and cause immediate or eventual failure of the aerial tower and injury to the occupants and bystanders.

Do not overload the aerial. Learn and observe the load limit indicated at the operator's positions.

When raising an aerial platform to rescue people at roofs or windows, avoid raising the platform in line with the people. Either raise off to one side and rotate to the people or raise perpendicular to them and rotate toward them. This is because panic-stricken persons seeing the platform within reach below them could try jumping into it.

Although the aerial is designed for one person setup, it is a good safety practice to designate a person to observe the right-side stabilizer when the stabilizers are being set up. This person can place the stabilizer pad and observe that it is placed evenly and correctly and that the stabilizer is set properly.

Many accidents with aerial devices nationwide occur during nonemergency operation. For this reason, the aerial should not be operated by one person alone. Operators checking out or operating the tower alone in front of the station can forget something or be overconfident and get into trouble. "Two heads are better than one".

Never allow an untrained person or a person who is not thoroughly familiar with this aerial to operate it unless constantly supervised.

ALL OUT.

That person must:

1. Be capable of spotting the vehicle properly.
2. Be able to stabilize the vehicle properly.
3. Know the location of every control.
4. Know what each control does and how it works.
5. Be able to operate all controls smoothly and safely.
6. Know the location of safety devices, how they work, and how to operate them.
7. Be familiar with the loads that the aerial can safely accommodate under various operating conditions.
8. Be aware of how to operate the aerial under unusual circumstances.

When you consider the cost of an aerial platform, the lives that could be at stake, and the damage that could occur to the equipment, the importance of practice and training becomes very clear.

WARNING

Before operating this apparatus you must:

1. *Be thoroughly familiar with this instruction manual.*
2. *Be thoroughly trained in the operation of this apparatus.*
3. *Operate this apparatus in strict accordance with the manufacturer's recommendations.*
4. *Operate this apparatus in accordance with departmental rules and regulations.*
5. *Always set up the apparatus on concrete, blacktop, or gravel. Surface must be firm and solid.*

Failure to do so could result in injury or death to persons operating or working on or around this apparatus.

Failure to do so could also result in damage to this apparatus.

1.3 Safety Tags

On the following pages are the various safety tags found on the apparatus. All of the tags found here may not be used on your particular vehicle, as some are related to optional equipment. Included in this manual is a drawing showing the locations of these various tags on the apparatus. Should any of these tags become damaged or lost throughout the life of your vehicle, please contact Sutphen Corporation at 1-866-287-5549 for replacements.

SAFETY INSTRUCTIONS

Jump Starting Precautions:

1. Jump starting with voltages greater than 16 volts DC or reversing the polarity will damage the engine computer.
2. Before attempting to jump-start the engine, make sure jumper cables are connected properly (positive to positive, negative to negative) and in the proper sequence (connect positive to positive first). Failure to do so can result in alternator and/or equipment damage.
3. Reversing battery polarity can also result in personal injury caused by a sudden discharge of electrolyte from the battery vents or by the sudden rupture of the battery case caused by an explosion of internal hydrogen gas.

Battery Charging Precautions

1. When using battery charger to charge batteries, set on 12 VOLT LOW CHARGE. Do not exceed a maximum of 16 volts DC.
2. Electrical damage or explosion can occur when charging batteries or boosting batteries.

Welding Precautions:

1. Serious damage to the ECM(s) and DDEC components may result from welding if all ECM connectors are not disconnected.
2. Serious damage to the multiplexed platform controls may occur if the power supply to them is not disconnected.

DANGER

Electrocution Hazard

Death or serious injury may result from contact with this vehicle if it should be electrically charged.

Maintain 17 foot minimum clearance from all power sources during aerial operations.

Pump operator must use pull-out safety platform during aerial operations.

Always designate a spotter at pedestal to help avoid power lines during aerial operations.

Avoid simultaneous contact with truck and ground during aerial operations.
