Subject: Safety Recalls EQ 13-006, 13E-039

Dear Ms. Glass:

I am writing in regard to the above recall of door locks used on recreational vehicles. Yes, it is correct that we purchased 31 entry door locks from Fastec. However, we are not an RV manufacturer. We are an RV transporter. The purchase of the locks was to replace entry door locks on units that had been broken in to while in our possession. These 31 units will be covered under the actual manufacturer's recall of these locks. If this does not satisfy your need for information, please let me know.

Regards,

Anita Carpenter
