CUSTOMER COMPLAINT

Customer Says while driving on highway the sunroof shattered.

ACTUAL CONDITION

FTR inspected vehicle and found front panel of panoramic roof shattered. The sunroof was closed as well as the sunshade. The glass debris sitting on top of the sunshade.

INVESTIGATION RESULTS

A hole was in the center of the closed glass sunroof panel. (see photo) An outward crack was at the front of the glass that remained in place and cracks were throughout the rest of the panel. A paint chip was found on the hood down to the metal. No rust was on the exposed metal suggesting the chip was recent. A chip was in the windshield was also found. (see photos attached) other small chips in the paint and windshield were noted as well.

POSSIBLE CAUSE

Possible roof glass failure due to impact from outside source resulting in weakening of glass integrity. Signs of impact on hood and windshield was found.

CORRECTIVE ACTION

No action taken at this time. Results of inspection reported to Platform Engineer and NCA.

I inspected the vehicle during my dealer visit last week I did not see any evidence of outside influence (no rocks, debris or witness marks of impact around the upper roof). Dealer advised they will need to drop the headliner to fully clean all shattered glass, that's what the PWA below is for. Thanks.
