RE: EQ 14-002; Sure Power Recall 13E-050

Dear Ms. Timian:

Bendix Commercial Vehicle Systems LLC (Bendix) received your office's notification of this subject EQ14-002 on February 13, 2013. This was the first written notification Bendix received relating to the Sure Power recall, 13E-050. Bendix did not receive any written notification of the recall by Sure Power. Sure Power has admitted that a voice mail message was left at our main phone number on September 13, 2013

Bendix has conducted a thorough investigation, including communication with Sure Power on this matter. Our investigation revealed the following information:

1. Bendix purchased 3pieces of Sure Power part number 12025C00-B; 1 piece in 2006 and 2 pieces in 2007.
2. These parts are used in our engineering laboratories for testing related to our control systems which are part of vehicle electronics. These units are not installed on highway vehicles but are used on simulated tests and in test garage vehicles.
3. All three suspect pieces have been scrapped after undergoing severe testing in our laboratories and are no longer in our possession.

Based on the above information, Bendix does not believe that further action is warranted by Bendix and considers the matter closed.

Please feel free to contact me, if you have any further questions.

Very truly yours,

Rafael R. Dominguez
Director, Quality and Product Safety
