Re: Safety Recalls EQ 14-002, 13E-050

Ms. Timian,

This letter is in response to the above referenced request for additional information regarding manufacturer Sure Power's recall 13E-050 of battery equalizers and DC/DC power converters.

Your letter stated, "Sure Power reported to NHTSA that it sold 11of these defective battery equalizers and DC/DC power converters to Daimler Trucks North (your company) for possible installation into buses."

The above statement is not entirely accurate. After our inquiry to Sure Power, they stated eight power converters were sold with part number 52304 to Daimler Buses North America. Daimler Buses North America is a separate company from Daimler Trucks North America and Sure Power has been in contact with them directly concerning the recall.

Three power converter part numbers 12040C00 were sold to Daimler Trucks North America to be used for testing purposes only, not for public use.

Accordingly, we have not sold any of the stated components that would require us to follow the recall process.

Thank you for making us aware of these 11 defective parts but we do not believe any further action is needed at this time.

Please contact me if you have any questions.

Sincerely yours,

Nasser Zamani
