February 14, 2014

Subject: Safety Recalls EQ 14-002, 13E-050

In Response to the information request for EQ14-002, the 50 defective units that Mobile Climate Control purchased from Sure Power Inc, were used for a few HVAC equipment, that we have sold or loaned to dealers and end users. Most of these HVAC units were for testing purposes. This component was a sub component on approx 17 of these units. These components were never in OEM equipment for buses. These were put in for aftermarket product

We are not a vehicle manufacture. We manufacture HVAC equipment and parts for the use of buses and off road equipment.

Therefore, we have determined that Mobile Climate Control is conducting a recall on this issue.

Sincerely,

Paul Mauceri
Service Manager – North America
