Re: NVS-215cg, EQ 14-003, 13E-045

Dear Ms. Glass, et. al:

In response to your correspondence dated April 2, 2014, Coast RTA has inspected all vehicles in our fleet with A&M Door Systems. The list follows:

Bus Number	Description	VIN Number
01	2009 Goshen GC11	1FDEE35SX9DA18767
02	2009 Goshen GC11	IFDEE35S19DA18768
03	2009 Goshen GC11	1FDEE35S39DA18769
04	2009 Goshen GC11	1FDFE45S29DA18773
05	2009 Goshen GC11	1FDFE45S79DA50120
128	2007 Starcraft 15 Passenger	1FDXE45S17DA51622
129	2007 Starcraft 15 Passenger	1FDXE45S67DA51633
130	2007 Starcraft 15 Passenger	1FDXE45S27DA51631
131	2007 Starcraft 15 Passenger	1FDXE45SX7DA56320
132	2007 Starcraft 15 Passenger	1FDXE45S97DA56275
133	2007 Goshen Gc11	1FDXE45S87DB36652
134	2007 Goshen GC11	1FDXE45SX7DB36636

Only one of these vehicles, number 03 of the above list, was found to have a defective electric door actuator printed circuit board. The defective board has been replaced with a serviceable board from another vehicle.

Coast RTA is under no risk of harm, damages or liability relative to the recall of the defective part. The single defective board in our possession is labeled as such, and will neither be used on our buses, nor transferred. Therefore, Coast RTA is not conducting a recall for EQ-14-003.

Please do not hesitate to contact me if you have additional questions or concerns. Thank you.

With warm regards,

Barbara Blain-Olds, Esq,
Staff Attorney
