Re: NVS-215cg EQ 14-003, 13E-045 Defect & Noncompliance report.

Hello Cynthia,

This letter is provided in response to the information request for EQ 14-003, for the 13 defective printed circuit boards that Commercial Body Builders Ltd. of 591 Chester Road, Delta, British Columbia, BC, V3M 6G7, purchased from A&M Systems, Inc.

The bus manufacturer known as Commercial Body Builders Ltd. stopped operations and manufacturing of buses, closed their bus manufacturing division and sold their remaining parts assets to Dynamic Specialty Vehicles Ltd., whom I represent. The components (parts assets) purchased from Commercial body builders included the A&M door header control modules named in this recall. The door headers that were originally supplied to Commercial Body Builders have never been installed in any bus body and exist as dead stock on our shelves for service support parts, with the suspect control modules as the exception. The control modules named by A&M as being a concern have been removed from the door header assemblies, destroyed and discarded some time ago. Therefore, Commercial Body Builders Ltd. is not conducting a recall on this issue.

I trust that this brief explanation will aid you in closing this chapter of your recall.

Sincerely Yours,

Erin Francis
