To: Cynthia Glass

Thank you for returning my call. It was a pleasure speaking with you today.

In response to the information requested for EQ 14-005, the 1 defect Cummins Westport engine that Super Products LLC purchased from Cummins inc. was purchased as part of an existing chassis built by the chassis OEM Sterling. Super Products purchased the chassis to build a Sewer cleaning truck on.

We did not install the defective engine into a new vehicle.

Therefore, Super Products LLC is not conducting a recall on this issue.

Respectfully,

Mike Baron
Aftermarket Business Unit Manager
