RE: EQ 14-006

Dear Ms. Glass,

Cannonball Engineering llc is not a motor vehicle manufacturer. We produce a hydraulic flat bed for installation on an existing pickup truck, used in agriculture as a means to feed cattle. Our units are powered by an electric over hydraulic system.

In response to the information request for EQ14-006, the 4 defective PTO pressure switch kits that Cannonball Engineering llc purchased from Muncie Power Products, Inc. were special order items for specific customers. We are working with Muncie to remedy the subject kits for these customers.

Therefore, Cannonball Engineering llc is not conducting a recall on this issue.

Sincerely,

Debora M Schrag
Managing Member
