Subject: EQ 14-006, Safety Recalls 13V-458, and 14E-016
Chevron, Inc.

Dear Ms. Glass,

In response to the information request for EQ 14-006, the 60 PTO pressure switch assemblies are part of PTO assemblies that Chevron, Inc. purchased from Muncie Power Products. The purpose of the PTO assembly is to transfer power hydraulically from a truck chassis transmission to the towing and recovery equipment that Chevron, Inc. manufactures. The PTO assemblies are then provided to our distributors.

Chevron, Inc. is not a vehicle manufacturer. We are a towing and recovery equipment manufacturer. We manufacture the bodies of wreckers and car carriers, which are installed on truck chassis manufactured by third parties.

Therefore, Chevron, Inc. is not conducting a recall on this issue. We will, however, provide information to Muncie Power Products as needed in order to assist them in conducting their PTO pressure switch recall.

If I can be of any further assistance, please feel free to contact me directly at (423) 238-4171, extension 1245.

Regards,

Will Kelley
