Navistar, Inc. is responding to your letter dated 7/29/14 and addressed to International Truck & Engine, President and CEO regarding 13 Muncie power take off (PTO) pressure switches that were sold to our company.

Navistar has worked with Muncie to understand what parts were actually ordered and determined that 12 PTO's were purchased between 5/12/2010 and 8/20/2013 through our service parts group for Navistar dealerships.

Navistar has validated that no Muncie PTO's with the suspect switch location were installed on production vehicles at our assembly plants. Because the 12 suspect PTO's were only sold through service parts, Navistar has no knowledge of what vehicles the suspect parts could have been installed on or even if the suspect parts were installed.

Given this information Navistar does not plan to file a defect information report. We trust this letter addresses your inquiry regarding the defective parts purchased through Navistar.

Please ensure that ODI maintains the proper contact information for our company to ensure timely processing. The undersigned should be contacted for any additional information regarding this issue on (331) 332-1590.

Sincerely,

R. L. Van Laar
