RE: EQ14-009 and Safety Recall 14V-021

Dear Ms. Jennifer Timian:

Your letter dated July 18, 2014 pertaining to the above subject was forwarded to me by Mr. Mark Kritzman.
Forest River, Inc. will not participate in this recall.
I have investigated the Suburban Manufacturing Company (Suburban) Model SF-30 FQ furnace installation manual, the plant installations of all furnaces and we are in total compliance with the installation requirements of Suburban. As part of our Quality Assurance program we require periodic audits of the installation of all our purchased components, and they be approved in writing by a representative of the company supplying the component.
I have also been in contact with our warranty and service departments in various divisions and we have not had a complaint of the blower wheel melting in any of our SF-30 FQ furnace installations.

If I can be of further service please do not hesitate to contact me.

Sincerely,

William G. Conway Jr.
Chief Corporate Engineer
