Subject: EQ 14-009

Dear Ms. Jennifer Timian:

I am in receipt of your letter regarding the NHTSA investigation of the Suburban Manufacturing Company's SF-30 FQ furnace under identification number **EQ-14-009**.

Although we do use Suburban Manufacturing furnaces (model series NT in various sizes), we have no record of using any of the identified model SF-30 FQ furnaces in any of our products. Further communication with Suburban Manufacturing has verified the same.

In addition, our company has not performed any work on, or had any dealings with Trails West Manufacturing products directly or indirectly.

Therefore, since we have not received or used any of the identified model SF-30 FQ furnaces, we feel your notification **EQ 14-009** does not apply to our company and will not be conducting any further notifications to our customer body.

We have used Suburban Manufacturing furnaces (series NT) for 10 years without fail, but we have no experience with their model SF-30 FQ furnace so we cannot speak to its reliability or function.

If I can be of any further assistance, please feel free to contact me.

Sincerely,
Greg

Gregory Buss
