Re: Cummins/Pierce Fuel Filter Recall EQ 14-014

Dear Cynthia

As your records indicate, Cummins did inform us of their recall of 61 Fleetguard UFF-ST fuel filters in engines they had shipped to us in 2014. At that time it is my understanding that the product was either in our inventory, or on finished vehicles within or control. We therefore worked with Cummins to complete their prescribed remedy without the need to provide a 573 report.

While a few vehicles did end up leaving our plant without the remedy completed, 60 of the 61 affected engines have now been updated. The final truck is scheduled to be remedied this week.

At this point we do not plan on completing any further reporting.

Sincerely,

Roger Lackore
Director of Product Safety
