If so the dealer code of this dealer
****UConnect Case Management Escalation****
Customer advised a call back is required and will take place
within one business day by COB their time
Preferred Morning/Midday call back number is [redacted]
Preferred Afternoon/Evening call back number is [redacted]
Customer email address for case updates: n/a
Briefly summarize why the customer is contacting Chrysler: Customer
states that some features of his 8.4 AN system are not working properly.
Customer states that for two safety features, Forward Collision Warning
and Forward Collision Active Braking, he cannot successfully select
them. He selects them and then they unselect a couple of seconds later.
Additionally, the text message to voice feature worked the first day but
under the phone settings, text is now greyed out and cannot be selected.
Briefly summarize what the customer is expecting: Customer seek resoluton
on these features. Writer contacted Uconnect helpdesk but they were not
available. Writer reassigned CAIR to 86U.
CM attempted to contact the customer but received his voicemail. CM left
a message with the direct number and ext 4718355.
Customer called in wishing to speak with who he was promised a call back
from. Agent advised customer that their CM Justin tried reaching them
earlier today and has left a message regarding their number and
extension. Customer thanked agent for this information and advised agent

they will check their messages.
Caller requested to speak with the casemanager, agent transferred to 4718355 as per request.
CM attempted to contact the customer at [redacted] but received his voicemail. CM left a message with the direct number and ext 4718355.
Customer states his number is [redacted] is the correct number.
Agent transferred caller to ext 4718355 to leave a message for his case manager
CM attempted to contact the customer at [redacted] but received his voicemail. CM left a message with the direct number and ext 4718355.
CM attempted to contact the customer for the 2nd time at [redacted] but received his voicemail. CM left a message with the direct number and ext 4718355.
CM attempted to contact the customer for the 3rd attempt but reached his voice mail. Agent left a message for the customer to contact the CM at 877-855-8400 ext 4718355.
CM sending case to TL for survey by-pass do to no contact made by customer.
By-Pass Added
Customer called back to speak with JD1303, with customer permission agent transferred customer to JD1303 voicemail.
CAIR RE-OPENED AND FOLLOWING REASON CODE(S) REMOVED
Survey By Pass - No Response
CM attempted to contact the customer at [redacted] but received his voicemail. CM left a message with the direct number and ext 4718355.
Jeep Customer Care agent Bryce trying to transfer Customer to CM JD1303 at extension 4718355, reached Writer by mistake. Writer advised caller that CM JD1303 is not a member of our department; caller will try again.
Per Answer ID 19128, zone 86U is for the Chatham Uconnect Team.
Customer called back for JD1303. Customer will be contacted right as soon phone call ended.
CM attempted to contact the customer five times but reached his voice mail every time. CM left a message for the customer stating if we do not speak by 4:30pm EST a fellow CM would attempt to contact him to try and resolve his case.
Agent transferred the caller to BL746 extension 4718031 for further assistance.
CONTACT UPDATE - CM spoke to the customer as the current CM on the case was unavailable.
CM advised the customer that the reason why he is not able to fully use the text messaging feature is because the phone is not fully compatible with the system.
Customer understands and also would like an answer on the other two concerns as well.
CM advised that in order to address thoughs concerns, the case needs to be forwarded off to another case management department for further investigation and that a contact will be provided to him by COB tomorrow.
Customer thanked the CM for the assistance and has no further questions or concerns at this time.

Product - Electrical - uConnect Cellular System - Complete Failure - Default	Electricla issues with uconnect
Corporate - Survey By-Pass - Duplicate CAIR - Default - Default	pls see 23389883

Briefly summarize why the customer is contacting Chrysler: The customer had called in and stated he had purchased his vehicle in Mar. 2013. The customer states he has had electrical issues with his uconnect 8.4AN since he had purchased it. The customer stated his dealership 66262 had star looking into it and they have no solution. The customer stated that the dealership had been really good with him they gave him another vehicle the same as his original vehicle. The customer states it too is having the very same electrical issues. The same uconnect is in this vehicle. The customer is very concerned because it is affecting other systems in his vehicle such as the collision warning; it turns itself off and on. The customer really likes the vehicle, he wants it repaired in a timely manner. His second choice would be to get out of that vehicle.
Briefly summarize what the customer is expecting: To have his vehicle repaired.
Agent advised the customer this would be sent to a CM for further assistance and he would receive a call back within 24 hours.
Customer was advised that due to the nature of their contact a call back is required and will take place within one business day by COB their time.

CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted] Not able to leave message.
Writer contacted dealership at 248-476-7900. SM Shawn stated he is very familiar with customer. SM stated that customer had another 2014 vehicle same model and radio model and issue happened. Dealership swapped vehicle out with another and next day customer stated they are still having issue. SM had tech advisor on site for two days and it was determined that a software update is needed for radio. At this time vehicle is driveable and SM let customer know on 4/8/13 that they are currently waiting to get the software update once that is available they will reach out to customer to have software update applied.
2nd attempt to reach customer at [redacted]. Writer given message the customers mailbox is full. Unable to leave message.
3rd attempt to reach customer at 2[redacted] Writer still recieves message that customer mailbox is full. Writer attempted to reach customer at 2nd contact number of [redacted] Writer left message for customer.
Writer recieved a call from customer. Customer states he has had issues with 2 vehicles now same model with uconnect system in vehicle. Customer states uconnect will turn off features in vehicle such as the forward collision detector and the parking sensor. Customer states loves the vehicle itself he would just like these issues resolved. Writer informed customer he spoken with dealership and our higher level techs are currently working on a software update to resolve issues customer is having with vehicle. Writer informed customer at this point we have gotten everybody involved that can help and are currently at a standstill until the software update is released. Writer informed customer that his case would be closed at this point. Customer understood.
CLOSED LOOP UPDATE - no need for additional follow-up.
Customer calling into to express his frustration with his ongoing issues with his vehicle system needing updates. Agent was going to research customer information to better serve him and customer disconnected the call.
Customer called and stated that the case manager NH217 is supposed to call him back because he is very upset that he is having issues with his new 2014 vehicle. Caller stated that Chrysler replaced the vehicle and this vehicle has the same issue and he seen on line that other 2014 Jeep owners are having the same issues. Customer wants to speak with the case manager. Agent transferred the customer to extension 66113 but the line was busy. Agent transferred the customer to case management line. [redacted] called requesting to speak to CM NH217. Writer warm transferred customer to CM CW509 for further handling.
Writer spoke to customer and gave the same information showing on the STAR case and what the CM has told the customer. They are working on a software update to resolve the issue. Writer stated that his case has been reopened and sent to his CM NH217 for follow up. Said at this time they will update the dealers with the software update and it would be advised to stay in touch with them. Customer states they traded him out of this vehicle because of the same issue on his previous. Writer apologized but again his case manager will call. Customer suggested he may request a buyback and writer stated to discuss with him.
Writer recieved call from SM Shawn. Writer informed SM that customer had contacted as he is still waiting for the software update for Radio. SM informed writer that he had spoken with customer on 4/19/13 and informed him that the dealership was still waiting for the software update. SM stated he has not spoke with customer since.
Writer contacted customer. Writer informed customer that he would be ending case over to department that would be able to update customer once the software update has come out on vehicle. Customer became very upset and stated that he can t even drive the vehicle. Writer informed customer that after speaking with the dealership the vehicle is considered drivable and customer would just need to be patient and the radio update is being worked on. Customer stated the vehicle is not drivable because his parking sensors and forward collision sensors turn themselves on and off. Writer informed customer the vehicle is considered drivable and case

would be sent over to proper department that will update customer as soon as new information is available.

Briefly summarize what the customer is expecting:
****End structured narrative T2 - Beginning Narrative
CM has been working with the customer to track the vehicle production (CMC US Brands). Customer called after picking up the vehicle stating there is a gouge in the paint on the passenger side near the wipers. Customer is requesting a new hood, not a repair. Customer also stated the CEL came on the first day and he spent an hour and 1/2 in service for diagnosis - knock sensor.
Customer advised a call back is required and will take place within one business day by COB their time
Preferred Morning/Midday call back number is [redacted]
Preferred Afternoon/Evening call back number is xxx-xxx-xxxx
Customer email address for case updates [redacted]
Who has possession of the vehicle? (Owner/Dealer/IRF) owner
Has the vehicle been diagnosed by a CDJ dealer? (Yes/No) yes
If a CDJ dealer has diagnosed, what is the dealer name or code? 05002
CM contacted Kevin in sales who confirmed the customer declined dealer prep on the vehicle and photos have been taken. Kevin transferred the call to Steve, owner of Videon #05002 who states the customer declined dealer prep. Steve states he would like to replace the hood, CM recommended DP contact AM for approval if that s what he would like to do for the customer. DP stated he does not believe an oil change package is going to satisfy the customer s request for compensation.
Email to BK43 and JAL.
CM left voicemail for DP Steve requesting confirmation DI claim has been submitted.
Email from customer requesting update on decision and requesting

additional compensation for his inconvenience.
Email to customer confirming DI claim has been submitted and CM is working with DP and supervisor on a decision to repair or replace the hood. CM stated technically, Chrysler s responsibility is to repair the vehicle to the terms of the warranty but once a decision is made on the hood, CM will research whether additional compensation is possible.
CM reviewed with BK43.
CM spoke with DP Steve Videon - he is still waiting for a decision on how to proceed. CM agreed to follow up when a decision has been reached.
Customer emailed CM asking for confirmation that his vehicle is the first 2014 Grand Cherokee SRT produced in Deep Cherry Red.
Email to JAL.
CM spoke with customer and stated the hood will be replaced. CM will contact the dealer to make the arrangements. CM also stated she will provide POC24N toward satisfaction. CM reminded the customer we need to get the Track Experience scheduled also. CM will follow up with the customer via e-mail next week on the part status.
CM attempted to contact DP Steve to discuss replacing the hood. The phones at the dealership are out of order and are being forwarded to a sales person s cell phone - CM agreed to call back on Monday, 4/22.
Reviewed CAIR - Approving replacement of hood.
CM left voicemail for Steve, DP regarding hood replacement, requesting a call back.
CM followed up with DP Steve who stated BSM Rick will handle from here. DP will have BSM contact CM to confirm part has been ordered.
BSM Rick left voicemail requesting a return call.
CM returned the call to BSM and confirmed the hood is to be replaced, not repaired. CM asked BSM to contact her if the part needs to be expedited.
BSM Rick called stating the new hood arrived. CM stated the customer is out of town this week, but she can e-mail him. CM will contact the customer and ask him to contact her when he returns so an appointment for the repair can be scheduled. DP Steve has approved a loaner vehicle for the customer during the repair.
Email to customer: Hi [redacted], I hope you enjoy your trip to California. Your new hood had arrived at Videon today. Let me know when you get back in town and I ll schedule an appointment to have it replaced. We have a loaner vehicle lined up for you while the vehicle is being repaired.
Let me know if you have any questions. Thanks for driving SRT!
Customer via email - Customer is out of town this week and will contact CM to schedule an appointment when he returns next week.
Email from customer stating vehicle was in an accident this weekend and needs additional body work. Customer requesting assistance in obtaining parts and to have the new hood moved to the body shop currently doing the insurance repair so the paints will all match.
CM attempted to contact the dealership - the phones appear to be out of order.
CM left voicemail for BSM Rick requesting a call back.
BSM Rick returned the call stating he is happy to drop the hood off at the IRF:
Cavallo Auto Body
18 South Newtown St. Rd.
Newtown Square, PA 19073
610-353-3300
Contact is Stephen Mugler
BSM also stated hood has not been paid for by Chrysler yet and wants to know how to write the claim. CM agreed to research and follow up.
CM reviewed with BK43 and will request photos of the vehicle to confirm the hood wasn t damaged in the accident.
CM emailed customer and requested photos.
TA JGM4 called asking CM to contact SM John at Videon to confirm DM notes for goodwill hood.
****** Below Customer Contacted for Documentation Request ******
bb1001@chrysler.com on 2013-04-29 @ 12:01
Customer called to discuss photos, attached.
CM attempted to reach Rick in the body shop, the phones appear to be out

of order.
***** Customer Document Received *****
CM left voicemail for BSM Rick requesting a call back.
CM contacted customer who states he wants the body shop to paint the hood. Customer states he would like Videon to pay the body shop what warranty would pay and the customer will pay the difference. CM agreed to speak with DP and BSM tomorrow and then follow up with the customer.
Customer Document Reviewed.
BSM Rick called stating he spoke with the customer and reviewed the photos and he s still willing to send the hood to the IRF body shop for painting. CM stated she can t approve paying the IRF as a sublet but will put notes in the system for the new hood. BSM stated he will speak with SM John and follow up with CM.
SM John called stating he is working up the estimate for the hood, paint and labor. CM stated she will put them in DM notes as soon as SM provides. Dealer will sublet hood to IRF for painting. SM asked CM to confirm IRF will return original hood to dealer.
CM left a message for the customer requesting a call back.
CM contacted customer and relayed the information on lines 109-112. Customer states he doesn t have the part list from the sublet yet. Customer also requested an SRT hitch cover - from specifying via email: The p/n for the SRT embossed hitch bezel 68157472AA. CM stated she will research via the dealer.
BSM Rick called and provided warranty costs and stated the dealer will deliver the hood and emblem to the body shop and also pick up the original hood. BSM is also researching hitch cover bezel.
As a one-time goodwill gesture, Chrysler will be approving this out of warranty repair. According to the dealer, the warranty costs of the repair are as follows:
Parts = $824.11
Labor = $378.35
Paint = $152.46
Total = $1354.92
Co-pay = $0
########## DIRECT-TO-DEALER ##########
Customer Care is sending this file to your dealership because a joint goodwill decision has been made on behalf of our mutual customer.
If this repair falls under the Digital Imaging (DI) process, you will need to follow the DI process of submitting images or the required DI documents to the Powertrain Service Center for claim approval. Be sure to include in your comments that Customer Care is involved. Customer Care will add DM Notes to the VIN describing our decision. These notes are available to the DI group for reference.
When repairs are completed, submit your claim as you would normally.
If you need assistance with claim payment, please refer to Warranty Bulletin D-11-19 or for tech training requirements see Warranty Bulletin D-12-13.
This customer has been informed of this decision.
Please update and/or close CAIR when complete.
##########
BSM Rick called back stating the tow hitch bezel is $172 customer pay and available for order. CM agreed to provide information to the customer.
Email to customer.
Customer sent several emails to CM over the weekend indicating there is an electrical problem with the vehicle and it needed to be towed to Videon.
CM contacted SA Matt at Videon 8:31 a.m. - due to system issues, CAIR was not updated immediately. SA agreed to call CM once vehicle is diagnosed.
CM called customer who states he was in the left lane on the freeway at 70 MPH when the vehicle shut down - no steering, no ABS, no power. Customer states he was in front of a semi and lucky to get to the right shoulder without an accident. Customer called his own tow company and had the vehicle towed to Videon. Customer is requesting reimbursement of $120 for the tow cost and states the vehicle needs to be at the body shop for repair on 5/8. CM confirmed Videon is an SRT dealer and to keep in contact regarding diagnosis. Customer stated several times he wants the

vehicle replaced. CM stated at this time we re unsure if the issue could be related to the accident the customer had and urged him to wait for diagnosis.
Customer calls to speak with their Case Manager.
Transferred the customer to BB1001 at ext 4720258
SA Bob called stating the stored code for the CEL was due to high idle - which is not accurate. SA states STAR has been contacted and they re waiting for a response. CM stated customer has asked for a replacement vehicle. CM asked SA to let SM know and discuss with DP Steve so they are up to date. SA agreed.
Email to customer.
SA Bob called stating STAR recommends replacing the PCV value and if the codes don t clear, the PCM.
Email to BK43 and LD464
Email from customer asking CM to confirm the part arrived.
CM spoke with SA Bob who confirmed the part arrived and technician is preparing to install now. SA also stated TA JM is in today and will be inspecting the vehicle.
TA JM called stating he is taking the vehicle for a test drive now. He s reviewed the stored codes and doesn t see one that would indicate all the electronics shutting down. TA stated if the condition doesn t repeat, a data recorder may be installed to store future data.
****** Below Customer Contacted for Documentation Request ******
bb1001@chrysler.com on 2013-05-07 @ 16:08
***** Customer Document Received *****
TA JM left voicemail stating vehicle is operating normally at this time, the codes had been erased by the technician before TA arrived. TA recommends installing flight recorder after body work is complete. TA s contact number 215-514-6987.
Email from customer asking if trailer hitch cover has been approved for goodwill and also stating vehicle is at the body shop for repair.
Reviewed with TL LD464 - trailer hitch cover approved as goodwill for customer satisfaction - $172.
CM spoke with BSM Rick who agreed to order the trailer hitch cover and deliver to the body shop doing the insurance work - hopefully when he delivers the new hood. Email to customer with this information.
Reimbursement:
Customer pay towing, receipt attached:
Reimbursement: $119
Check issued.
Email to customer confirming reimbursement was issued.
Customer Document Reviewed.
Vehicle is at body shop for accident repair.
Email from customer requesting part status for body shop repair.
Customer also states insurance adjuster said the lens for the adaptive cruise control unit will be coming off a 2013 - customer asked CM to confirm all parts will be for 2014.
CM spoke with PA Charlie who states he doesn t show the order from Cavallo in the system for this vehicle. PA also checked under the customer s name. CM left voicemail for BSM Rick to see if he had any information, requesting a call back.
BSM Rick returned the call stating Cavallo, the body shop has not placed a parts order. The Jeep emblem, hood and trailer hitch cover are waiting at Videon for Cavallo to call and say they re ready for them to be delivered. Rick also states the lens cover will be a 2014 because the order will be placed by VIN.
CM attempted to contact the customer but he is out of the office today.
CM left voicemail for customer on [redacted].
CM left voicemail for customer on [redacted]
Email to customer with information from 213-217.
Customer returned the call stating Cavallo didn t place the parts order through Videon - 'they have a guy' they use. The customer asked the CM to contact the IRF to request they use the dealer, CM stated she isn t authorized to do that, that would be the customer s or insurance adjuster s responsibility. Customer stated he understands and asked CM to contact Videon to deliver the hood, emblem and hitch at their

convenience, the body shop is expecting them. CM agreed.
Email to BSM Rick with information from lines 226-228.
CM spoke with BSM Rick who states the parts will be delivered to Cavallo today. The hood has been inspected and is defect free.
Customer calls wanting to find out how to sign up another person on his track experience - Writer calls track experience line and patches customer through to speak with Kim @ track experience.
CM contacted PM Phil on 5/14 to order parts list from IRF, but narrative didn t post:
Hood Grille 68090698AB
Bumper Bracket 68144218AC
Fog Bezel / Surround 68214327AA
Fender Flare Clips (4)
****** Following Corporate Resource has been contacted ******
PARTS EXPEDITING

Email to customer regarding part status.
CM spoke with PA Charlie who stated everything came in except the Fog Lamp Bezel. The other parts will be delivered to IRF today and bezel will be sent with it arrives ETA line 257.
Customer sent e-mail stating IRF broke the grill while removing it. IRF will contact Videon to order the new part.
CM attempted to contact dealer regarding part status - the line was busy.
CM attempted to contact dealer - the line is busy.
CM attempted to contact dealer - the line is busy.
CM contacted PA Charlie who states the Fog Lamp Bezel has not arrived but has been released for shipment from another dealer.
Email to IRF and customer regarding parts status.
Email from customer stating repairs should be complete 5/31 by IRF. Case remaining open to confirm stalling issue is resolved - vehicle went from dealer to IRF without allowing customer to drive to confirm satisfaction with repairs.
Customer called stating IRF needs two more parts to complete repair - chrome bezel for driver s side brake duct and lower black grill for bumper. CM agreed to contact Videon and get the parts ordered and sent to Cavallo.
CM contacted PA Charlie who agreed to order the parts and make sure they get shipped to Cavallo upon arrival. CM stated she will call later to get the shipping ETA.
CM contacted PA who states both parts should arrive tomorrow.
Email to customer with part status.
Writer received call from Level One stating she has dealer on the line looking to speak with BB1001, transferred to ext. 4720258
Briefly summarize why the customer is contacting Chrysler: Joe from dealer calling in to speak to BB1001.
Briefly summarize what the customer is expecting: Customer is expecting to speak to BB1001.
Agent got Joe transferred over to BB1001.
TA JM called to see if customer s stalling concern is resolved. CM explained the vehicle is still at the body shop for repair. While on the phone, CM received an e-mail from IRF body shop asking for assistance in

replacing the emissions label for the hood - the original tore. CM asked TA as there is no information in Answer Connect. TA states label can only be replaced through BC if it was not provided at delivery or is in correct. Label can t be replaced due to an accident - TA states label services no purpose and shouldn t need to be replaced.
CM left a message for Steve at Cavallo s requesting a call back regarding the emission label.
Steve, Cavallo s returned the call, CM explained the information on lines 291-298. Steve stated not transferring the label is a clear sign of repair and they are sticklers for detail. Steve thanked CM for all her assistance and stated he will find another avenue for the label. Steve also stated the vehicle will be ready for pick up 6/3.
Email to customer requesting follow up on the vehicle performance once he s driving it again.
Email from customer stating the he has the vehicle back and is satisfied with the insurance repair. Customer is leaving on vacation and will contact CM if he has any problems related to the stalling concern above.
CLOSED LOOP UPDATE - no need for additional follow-up.
BSM Rick called requesting a status update on the customer. CM explained that the vehicle is repaired and the customer is satisfied. BSM requested an e-mail outlining how the parts should be billed.
There are notes in the system under CAIR [redacted] authorizing the hood and hitch cover as customer service goodwill.
Here s a list of the parts I ordered on behalf of Cavallo s and had dropped off to them for the accident repair:
Hood Grille 68090698AB
Bumper Bracket 68144218AC
Fog Bezel/Surround 68214327AA
Fender Flare Clips (4)
I also contacted Charlie in Parts and asked him to order and deliver to Cavallo s a chrome bezel for the driver s side brake duct and the lower black grill for the bumper. I don t have part numbers for these.
Everything that was ordered and delivered to Cavallo s should be billed to them as they are covered under the insurance claim.
If you have any questions or need anything else from me, please don t hesitate to call.
Thanks for all of your help with this customer, it s been a pleasure working with you and the rest of the folks at your dealership, you made my job much easier!
SM John called and asked CM to speak with the warranty biller because the claim was rejected. Biller was using PA and needs to be RA.
Doris, Biller called requesting CM speak with Tammy at the warranty hotline regarding warranty claim - 586-497-0901.
CM spoke with Tammy at the warranty hotline 586-497-0901 - CM referred Tammy to the DM notes and line 50 of the narrative regarding approval to replace the hood on the vehicle. Tammy stated she will review with her supervisor.
CM called Doris and confirmed she spoke with Tammy and hopefully the billing issue is resolved.
CM spoke with PM Charlie who states warranty is requesting the original trailer hitch bezel returned. CM explained that there wasn t a trailer hitch bezel on the vehicle at the time of purchase and CAC provided it to the customer toward customer satisfaction - lines 191-194. CM agreed to enter in DM notes.
As a one-time goodwill gesture, Chrysler will be approving purchasing the customer a trailer hitch bezel.
Parts = $172
Labor = $$$$Ù
Total = $$$$Ù
Co-pay = 0

CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted] . Left message.
Customer called back and left a voice mail. Called customer back and left a voice mail.
Customer called and left a VM requesting that writer call him at his work phone number, [redacted]. Writer called the customer back and inquired about the concerns with the navigation system, the touch screen, the Bluetooth, and the collision avoidance system.
Customer stated that it wasn t a big problem and with so many systems working together sometimes there are problems. Writer advised the customer to take the vehicle into the dealer. Customer stated that the dealer may not be able to correct the problems. Writer advised that this was a brand new vehicle and it may be something as simple as an update or getting something reprogrammed. Customer then advised that there was a cruise control and when it was set higher than the vehicle in front of him was going it slowed down; however, sometimes it would go crazy and

then brakes would jam on the freeway. Writer advised that this problem could be serious and Customer really should get the vehicle to the dealer. Customer stated that he has an appointment with the dealer two weeks from Friday, 5/24/13, and he could turn the collision avoidance system off until that time. Advised customer that writer would do a follow-up the Monday after, 5/27/13, to make sure all went well with the dealer. Customer advised that the current miles were between 23,000 and 24,000. Writer will change on Hpims.
Writer advised customer that a follow-up would be made on 5/27/13. As this is a holiday, follow-up will be made on 5/28/13.
Writer called customer at [redacted]. The customer took his vehicle to the dealer on Friday 5/24/13. The salesman that sold the vehicle to the customer is now working in a different department after-market parts- and the customer states he needs to reprogram.
Customer said that he had no problems since the writer and he last spoke. The customer still has his collision avoidance system turned off and the radio system freezes when he presses the radio station bandit locks up when he tries to change the radio station. The customer took a video of this problem. The customer travels frequently and he has every other Friday off. The vehicle will be taken back to the dealer June 6/21/13 for repairs and to get side bars put on the jeep. Writer advised the customer that the case would be closed for now but that a follow-up would be done on Monday 6/24/13 to make sure the repairs had been done to his satisfaction,. The writer also advised that as this was a brand new vehicle, all repairs should still be under warranty. Writer gave the customer the Jeep customer care number and the writer s number and direct extension.
The case will remain open until after the repairs are completed.
Called customer at [redacted] and he advised that he hadn t had a chance to take the vehicle back to the dealer. Writer advised that the case would be closed but if he needed our assistance in the future to call the Jeep customer care number that had been provided and we would open a new case.

ATTENTION SERVICE DIRECTOR OR SERVICE MANAGER
Please follow your Business Center guidelines in an attempt to resolve this customers concern(s). If needed, seek assistance from your District Manager, Business Center or STAR.
The unresolved concern is radio is cutting out, forward collision warning light is not working
Action requested: Get back in contact with STAR and if necessary contact the TA.
Please update this CAIR with resolution.
##################################
REASSIGNED TO BC/DLR 51 66272 05/16/13 18:22[redacted]
CUSTOMER: Writer contacted the customer at [redacted] Writer informed the customer that the SM is currently working with our technical assistance team to figure out what to do with the vehicle. Customer stated that he has gone in for two issues and neither have been resolved. Customer stated that he is getting the same information as he did from yesterday. Writer informed the customer that the SM had requested a call back by the afternoon. Writer informed the customer that a call back will be made after speaking with the dealership about the technical assistance team.
Customer called wanting an update on his account and was upset because he has not received a callback.
Customer wants a call back as soon as possible.
Briefly summarize why the customer is contacting Chrysler: Customer states he would like to speak with Lisa. Agent advised the customer she was empowered to assist him, however customer stated he did not want to talk to another agent, he wanted to speak with Lisa who was his case manager. Agent called CM Lisa who stated this was not her case and did not know why this customer has not received his call back. Lisa offered to have the customer transferred over to her so that she could inform him his Case Manager would be contacting him soon. Agent transferred the customer through to CM Lisa who took over the call.
Briefly summarize what the customer is expecting: Customer is expecting to speak with CM Lisa about his case.
CUSTOMER: Customer called in. Customer stated that he is upset with his CM due to not being contacted. Customer stated that he was not contacted as promised. Customer stated that nothing is getting done. Customer stated that the dealership will not provide information this late. Customer stated that he wants a supervisor that will address his concerns.

**********SUPERVISOR CALL**********
Writer took call from customer MR [redacted]. Customer stated the vehicle was at the dealer beginning on 5/6/2013 and customer picked the vehicle on 5/10/2013. Writer inquired if when the stereo stops working is it the FM, AM or both. Customer stated it is AM, FM and Sirius. Writer inquired what happens when the forward collision warning system does not work properly. Customer stated the system is supposed to slow the vehicle down when getting too close to the vehicle in front of customer. Customer stated the system does nothing. Writer explained that writer will forward customers case to executive team for further assistance. Customer inquired about lemon law, but is willing to give executive team a chance. Status update provided via email to the following email address:
[redacted]
My name is Kala and I have been assigned as your new case manager. Here is some information that you may find helpful:
The Chrysler Case Management telephone number is 1-800-763-8422.
My direct extension is 66177.
My work hours are 9:30 a.m. 6:00 p.m. MST, Monday Friday.
End of Status Update
Writer contacted customer, [redacted]. Writer informed customer that writer was assigned as new case manager and sent writers information to email address. Writer confirmed email address is current and correct and informed customer that he may use a link within that email for email communication. Customer states that he contacted the dealer 05-01-13 about both concerns. 05-06-13 he took in vehicle for diagnosis but after 5 days he picked up the vehicle because nothing was done. That s why he contacted Customer Care. Customer inquired if the executive team is a real thing. Writer informed customer that this would be a reference to the STAR engineers. Writer informed customer that writer is thorough but has not had time to review case as this is the end of writers shift and just wanted to inform him of assignment of the case with new Case Manager as well as that writer was informed that customer needed to take vehicle back for diagnosis of the radio as there is no documentation that the radio concern was addressed. Customer stated that he had to go and requested contact 05-20-13. Writer informed customer that writer will contact him in the afternoon to give writer time to contact dealer for more information. Customer was upset that he had contact with so many case managers. Writer apologized. At the end of the call customer seemed satisfied with reassignment of case.
REASSIGNED TO BC/DLR 51 66272 05/17/13 20:20 O [redacted]
Writer will change case to reflect writer as CAIR Manager, research case, contact dealer, then contact customer in the afternoon.
Customer contacted writer reminding writer that writer is to contact him today.
Customer contacted writer asking what writer needs to do. Writer informed customer that writer will review the notes on the case and research if there are similar cases. Writer informed customer that writer needs time to research and that writer will contact him at approximately 6:30, CT.

However, conventional diagnostic methods will not prove conclusive in the diagnosis of the FCW+ system or the electronic controls and communication between modules and other devices that are provided some features of the FCW+ system. The most reliable, efficient and accurate means to diagnose the system or the electronic controls and communication related to the FCW+ system operation requires the use of a diagnostic scan tool. Refer to the appropriate diagnostic information.
The minimum speed for FCW+ activation is 5 mph (10 km/h).
Writer contacted dealer 66272, Service Manager (SM) cell phone ending in

2616. Sarah states that she is no longer the SM.
Writer contacted dealer 66272. [redacted] states that the SM is either Doug or Chris. Writer left voicemail for Doug requesting call back.
######### DIRECT-TO-DEALER #########
ATTENTION SERVICE DIRECTOR OR SERVICE MANAGER
Please follow your Business Center guidelines in an attempt to resolve this customers concern(s). If needed, seek assistance from your District Manager, Business Center or STAR.
The unresolved concern is radio is cutting out intermittently and collision warning is not working.
Action requested: Complete Vehicle Not Repaired Check Sheet found within DealerCONNECT, Continue with STAR case, Review the following path in Techconnect Search words forward collision > 8B - Chime/Buzzer/Driver Assist Operation (FORWARD COLLISION WARNING PLUS) - Operation.
Please update this CAIR with resolution.
##################################
The dealer is unable to duplicate and/or diagnose the customer s concern. The dealer was asked to contact STAR using the Vehicle Not Repaired Check Sheet found in DealerCONNECT under Service - Repair Information - Other - Vehicle Not Repaired Check Sheet.
REASSIGNED TO BC/DLR 51 66272 05/20/13 19:40 O [redacted]
Writer contacted customer, [redacted] Writer left voicemail informing customer that
What speeds have you noticed the concern? Does not cycle on. Customer states that there is no visual or audio warning, no automatic breaking.
What distances? Closest at 5 feet at 15-25 MPH
In all weather conditions? Does not work in any weather condition.
Customer is the only one that drives the vehicle. Customer states that he had Doug at the dealership test drive it and the concern was duplicated at that time. This was the week before 05-06-13.
Customer states that on Uconnect there is two settings for far and near. Neither work.
Customer does not generally drive on gravel roads.
Customer states that that he will need a rental/loaner if they keep his vehicle.
Customer states that the dealership told him that Chrysler told him that Case Managers can not communicate through calls. Writer informed customer that we can communicate through email or phone.
Customer states that writer can set up an appointment for Tuesday, Wednesday, or Thursday at 8:00 am CT.
SM Chris from dealer left voicemail requesting call back.
SM Chris contacted writer. SM Chris states that there are no codes and that the system does turn on but is not as sensitive as similar models. Someone from Techline contacted the dealer and gave directions which were completed. The person was supposed to call back but did not. SM Chris states that they need to get more information in order to proceed. Writer informed SM Chris that writer will research options. SM Chris states that the radio was working correctly but would be willing to do test drive with customer starting between 9-11 am, CT to address the radio concern. Writer informed SM Chris that writer will seek a timeframe for the Collision system concern and if it looks to be a long process writer will have dealer address the radio concern this week. Writer requested SM Chris fill out Vehicle Not Repaired Check Sheet..
The dealer is unable to duplicate and/or diagnose the customer s concern. The dealer was asked to contact STAR using the Vehicle Not Repaired Check Sheet found in DealerCONNECT under Service - Repair Information - Other - Vehicle Not Repaired Check Sheet.
BRUCE SEARS called to speak to CM KM887 but discovered KM887 is out of the office today. Customer was expecting a call back yesterday from KM887 with an update after KM887 spoke with dealership, but was not contacted. Writer warm transferred customer to CM LV162.
CUSTOMER: Customer called in. Writer informed the customer that it appears that the dealership is willing to do a test drive with the customer. Writer informed the customer that contact with the dealership had occurred on 5/21. Writer informed the customer that the case has been sent up to the Executive team. Customer stated that he was supposed to

receive a call on 5/23 and didn t receive one. Customer stated that he should have been told that the dealership wanted to do a test drive with the customer. Customer stated that somebody needs to get his concerns taken care of. Customer stated that he feels like he is getting spun around with the different case managers that he has been speaking with. Writer informed the customer that his request for a call back will be notated for his CM.
Agent contacted dealer, spoke with SM Chris who advised that owner needs to leave vehicle for a time that dealer can test vehcle with a comparable vehicle to determine the sensitivity of the forward collision warning, and media center intermittent source change (could not duplicate). Agent will authorize rental for 7 days in the hope that dealer can diagnose vehicle. Agent invited owner to return to dealer for rental and diagnosis.
GWA-7 days per warranty guidelines.
Owner wanted to bring vehicle to dealer tomorrow morning, spoke with SM Chris. Chris would rather owner bring vehicle next week on Monday 6/3/13 so dealer can have five straight days working on vehicle. Owner informed.
Customer left voicemail stating writer was to call him on 05-23-13 and writer can contact him upon writers return.
Customer request contact from CM. Case transferred 05-22-13. Customer has not heard from 82. Please contact customer.
Customer left 2nd voicemail requesting call back.
AGENT JDS111 SPOKE WITH OWNER ON 5/28/13; OWNER HAS AGENTS DIRECT LINE. AGENT SPOKE WITH OWNER WHO ADVISED THAT HE DID INFACT HAVE AGENTS LINE, THAT THE VOICEMAIL LEFT BY OWNER WAS LEFT ON 5/23/13; AGENT KM887 DID NOT READ NARRATIVE STATING THAT OWNER HAD ALREADY SPOKE WITH JDS111 ON 5/28/13. OWNER STATED THAT KM887 WAS ON VACATION AND MUST HAVE BEEN AWAY FROM HER PHONE. OWNER IS SET UP FOR APPT ON 6/3/13.
Agent spoke with SM Chris who confirmed order for media center replacement and an email went out to STAR regarding the forward collision system; no fault codes, but calibration is off.
Per STAR: David, I believe there is not a set distance the vehicle needs to be from an oncoming vehicle or from lane changes as there are several items the system uses to determine weather or not there is a need to activate any audible or visual warnings. The system can be affected by the HFM/system. If you read all of the description it states, 'Forward Collision Warning options and Active Braking settings can be changed. When the vehicle is equipped with a Uconnect 8.4/8.4A system screen, the Safety and Driving Assistance soft key needs to be selected to access the options menu. When the vehicle is equipped with the Uconnect 5.0 system, pressing the + MORE hard-key located on the lower right side of the Uconnect system will bring you to the Settings soft key.' This means that if it is shut off then it will not function. You should diagnose the radio problem you have first and if you have any questions contact the audio group(8A). Keep us posted. Thanks Joe
Agent contacted dealer, spoke with SM Chris who advised that media center is on backorder and they have to wait for its arrival before they can address the forward collision system, controlled by the telematics system of the media center. Owner will have to return loaner as this was just to diagnose vehicle. His vehicle is driveable, and safe. Main concern was static on radio. CCAC will not extend rental for media center issues.
Part# Z8190240AF
order E0605A- special handling
dealer code: 66272
Star released part
****** Following Corporate Resource has been contacted ******
PARTS EXPEDITING
on 2013-06-07 @ 14:50
Agent spoke with owner and advised that parts are being expedited.
****** START OF SUPPORT ESCALATION by T8430MH******
Z8190240AF - Per SSD supplier ETA is week of 6/10
****** END OF SUPPORT ESCALATION ****** by T8430MH
Per SSD supplier ETA is week of 6/10; agent informed owner of ETA
Agent contacted dealer, spoke with SM Chris who confirmed delivery of part today. Owner is scheduled for tomorrow.

Order E0605A for dealer: 66272 for part: Z8190240AF has been resolved
Agent contacted dealer, spoke with SM Chris who confirmed repair of vehicle. Test driving now. Owner to pick up vehicle soon. Owner knows to call agent with any further questions or concerns.
CAIR RE-OPENED AND FOLLOWING REASON CODE(S) REMOVED
Dealer - By-Pass
Agent contacted owner who still believes that media center changes sources on its own and that the forward collision system does not work.
Agent contacted dealer, spoke with SM Chris, who will order another media center and contact owner when it arrives. Agent will not offer courtesy rental for a media center issue. If owner want a rental, dealer will have to provide.
Briefly summarize why the customer is contacting Chrysler: Customer called as he was trying to fill out the survey that was sent to his email regarding his recent Jeep purchase. Customer stated that he had gotten to a certain point in the survey and then it stopped and stated that survey was completed or expired. Customer at this point called Customer Care Assistance as directed by email. One of the questions were would you recommend Jeep to your friends. Customer answered to a 5 on the scale, as customer has been very disappointed by the quality of his purchase. As stated in CAIR customer has been having ongoing issues with the electrical. Customer enquired about a trading the vehicle in for a new Jeep or a buy back if issue does not soon get resolved. Customer would like a call back from JDS111 in regards to what direction Chrysler/Jeep will be taking now with the vehicle.
Briefly summarize what the customer is expecting: Customer would like to know what is now being done to solve the issue with the vehicle and when is someone calling him back with direction.
OWNER SHOULD BE CALLING JDS111 @586-274-8168, OWNER HAS BEEN GIVEN DIRECT LINE MANY TIMES. IF OWNER CALLS BACK, PLEASE REFER CUSTOMER TO JDS111. HE IS AWARE THAT A SECOND RADIO REPLACEMENT HAS BEEN AUTHORIZED AND AWAITING DELIVERY. IF HE WISHES TO BE TRADED OUT OF VEHICLE, HE WOULD HAVE TO CONTACT HIS DEALER FOR DETAILS.
Agent contacted dealer, left message with SM Chris. Agent requesting update on media center replacement and if owner had brought to the attn of the dealer, that he wished to be removed from vehicle.
Agent contacted owner to dicuss his callback. He was unable to complete an online survey. Owner spoke with SM Chris this morning, owner will be placed in another rental this week to install second media center.
Email from SM to DM: Hi Jen,
I have a customer [redacted] with a 2014 Jeep Grand Cherokee 1C4RJFCT3EC1[redacted] with an radio issue,
The radio is the new 8.4 and keeps switching from FM to mode while driving and we already replaced it once and had contacted Star Hotline about this issue and no one has any idea what the cause is. I am trying to secure M[redacted] with one of our vehicles so I can take and other look at it. This issue is so random and when I last had it in it was working for 3 days straight, then when he picked it up it acted up. Any suggestions? Should try to get a hold of Ed Szymanski?
Chris Cantu
Napelton s Northwestern Chrysler Jeep Dodge Ram
Dealer # 66272
773-334-3400
Agent contacted DM; left message with direct line
Agent heard from DM who has declined to replace owners vehicle. DM believes the dealer has a fix.
Agent contacted dealer, left message with SM Chris. Agent emailed DM:
Hi Jennifer.
Thanks for the call back on this case. I called the dealer and SM Chris is off today. I understand you are declining buyback, so would you mind updating the CAIR ([redacted]? My supervisor will want to see that per our new processes here, that I have utilized all avenues in trying to resolve. What do you think the next step is here? The owner is adamant that if the media center does not work, he no longer wanted the vehicle. I am not sure what he is telling the dealer , but he was very clear to me that he paid 51,000 for this vehicle and wanted to be removed from it if

we couldn t fix the media center.
Thanks,
[redacted]
DM advised agent that dealer tech advisor was involved and suggests to replace the USB port. Tech advisor may be sent out to dealer next week. DM to update file as well.
Agent placed a call into the dealers service dept, spoke with Chris who has ordered a USB module (per Tech rep) and are awaiting its arrival. Rental will be provided by dealer.
6/25/13 TA spoke with SM Chris and advised him to order a new USB port for veh. Chris will install when part comes in and will then QC repair...ASM updating CAIR...jkc7
Agent contacted owner and advised of current status of case.
Agetn spoke with SM Chris who advised that USB module has not arrived as of yet today. Owner continues to drive vehicle.
Agent spoke with SM Chris who advised that USB module has still not arrived; agent then spoke with owner who has been kept up to date.
Agent spoke with SM Chris who advised PM has been working with Parts Specifying but media center and harness still has not arrived. It s has been almost three weeks. Agent was placed on hold for more than ten minutes. Agent was attemptingt o retrieve part number, order number and status. Agent ended call after 15 minutes.
Agent contacted dealer, spoke with SA Juliet, who advised that media center and harness arrived today and is awaiting owner to schedule an appt for install. Owner knows of the arrival and has agents direct line.
Case being closed. Awaiting owner to make appt. Owner knows to contact agent with any concerns.
Owner contacted agent after picking up vehicle (media center replaced). He stated that it does not switch sources on its own, but now it runs up and down the stations of AM, FM and Sirius by itself.
Agent contacted owner and he confirmed current issue with media center. Owner is on vacation till next week but plans on bring vehicle back to dealer then. This will be the fifth repair attempt. Owner is now hinting at being removed from the vehicle. Agent advised owner that I would contact DM for assistance.
Email to DM JKC7:
Hi Jennifer..
Mr[redacted] continues to have issues with his media center. The most recent replacement now surfs up and down the frequencies on AM, FM and Sirius. Its time to think of other avenues for this owner. We are on 5 repair attempts:
Two media centers, a USB module and a software update. I know you aren t the DM for dealer 66272 (Napleton s) I was wondering if you knew who was and point me to him/her to discuss our next step.
DM JKC7 contacted agent and is assigned to dealer and will handle case with SM Chris.
Agent contacted dealer, left message for SM Chris inquiring if DM JKC7 had contacted him to review case.
SM Chris indicated that he spoke with DM JKC7 and will meet with her next week and review possible buyback template. Owner is still on vacation until next week.
Agent contacted dealer, left message for SM Chris
Agent contacted dealer, left message for SM Chris
Agent contacted dealer, spoke with SM Chris, who hasnt heard from DM. He will email her today
Agent contacted dealer, spoke with SM Chris, who still has not heard from DM JKC7. Chris advised that he had spoken with owner this past Friday and confirmed that the media center is working fine now. However, the forward collision system still does not work. SM Chris has invited owner to return to dealer later this week. Loaner will be provided.
Agent contacted owner. He advised that he will take vehicle to dealer tomorrow for repair. Dealer will be providing rental. Owner said that he would follow up with agent after appt with outcome. Owner appreciated call.
Agent spoke with owner who just left dealer and advised that the Forward Collision Center still does not work. Dealer wrote on the repair order

that the systemn worked 2 out of 5 times. In addition, media center has been repaired 5 times and inrior headliner needs replacing. Gas filler door also needs replacing. Owner would like the vehicle reviewed for buyback and does not feel he should be responsible for any usage (mileage) fees, since all of these issues have been present since the date of purchase.

CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
Agent spoke with SAM143 who advised that he has left a message with SM Chris; he has not heard back. Agent contacted dealer, spoke with SM Chris. Agent recommended to Chris to contact SAM143 to review and possibly invite a Tech to dealer.
SAM143 advised agent that SM Chris has not yet reached out to him for further tech assistance. Agent contacted dealer, spoke with SM Chris and recommended calling SAM143. Chris plans on reaching SAM143 tomorrow. A sunshade has arrived for owners vehicle to repiar headliner issue. Owner has been informed. Vehicle will return to dealer this week for this repair.
SAM143 advised agent that SM Chris has not yet reached out to him for further tech assistance. Agent contacted dealer, spoke with SM Chris and recommended calling SAM143. Chris plans on reaching SAM143 tomorrow. A sunshade has arrived for owner s vehicle to repair headliner issue. Owner has been informed. Vehicle will return to dealer this week for this repair.
447-452 is duplicate narrative due to AW service error.
SAM143 advised agent that SM Chris has not yet reached out to him, still. Agent contacted SM Chris, again, and asked him to please contact SAM143 to resolve customers concerns, so that possible ISG buyback template may be introduced if vehicle cannot be fixed. Chris advised that he will contact SAM143 right now.
****
According to publish STAR case report:
The forward facing radar using input from several other sensor to understand both driver intent and vehicle dynamics. These sensors included steering wheel angle, vehicle yaw rate, brake switch status, and throttle input. If the system determines the driver is actively driving and aware of the environmental conditions, it will suppress the warning assuming the driver is in control. Environmental factors also have impact on the function including snow, rain, fog, road condition and road slope.
According to findings, vehicle system is acting as designed. Agent contacted dealer, left message with SM.
These systems should never be tested by the customer or dealer on public roads with real vehicles as the target vehicles for the system to warn on. The system is intended to warn the driver of an impending collision and is purposely designed warn the driver when the situation is absolutely critical.
The Forward Collision Warning system receives multiple inputs from the vehicle to recognize if the driver is actively in control of the vehicle before providing a warning. A few examples of these driver related inputs are gas pedal input, steering wheel input and brake pedal input. If the system recognizes the driver is actively engaged than the warnings will be delayed until a more critical timing or cancelled.
Per Engineering:
It is not abnormal that we get contacted from individuals thinking that their FCW is not working. FCW is a warning that is provided when the vehicle is on the collision course with another vehicle. Every driver has a different opinion on the timing for these warnings to activate. A driver should not be receiving these warnings on a daily basis. If they do receive these warnings on a regular basis then the driver is either driving their vehicle very aggressively or unsafely.
BASED ON THIS INFORMATION, JMS201 DOES NOT FEEL THAT VEHICLE MEETS BUYBUCK CRITERIA. FCW IS FUNCTIONING NORMALLY. OWNER HAS BEEN INFORMED.

****

Per SAM143:
Good Morning Jonathan,
The information provided by Doug was very clear on how the system works and that the system is designed to react to vehicles when the customer is not actively in control of the vehicle. The system is working as it is designed to when compared with the narrative provided by the customer and no repairs should be made. At this point we need to be sure the customer is completely informed of what his system is providing. I thank our engineering team for providing a clear understanding of the system behaviors and don t feel we need to request anymore assistance from them at this point.
Thanks,
Steve

Question about Quadra Lift Park Mode
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
Hi, got my 2014 Jeep GC on Friday and I love it! One question tho: Is there a way to make the Quadra Lift automatically go into Park Mode when the car is put into park, or does it really have to be manually done very time? I didn t see a setting for it in the uConnect Settings screen, so I m guessing no, but it seems like it should be able to do that automatically, no?
***** END OF CUSTOMER EMAIL *****
Dear [redacted]:
Thank you for contacting the Jeep Customer Assistance Center.
Regrettably the feature you are seeking is not available for the feature on your vehicle. We are sorry we cannot provide a more favorable reply in this matter and thank you for taking the time to contact us about this matter.
Thanks again for your email.
Sincerely,
Steve
Customer Service Representative
Jeep Customer Assistance Center
***** END OF CAC EMAIL RESPONSE *****
Ok, thanks. One other unrelated question for you:
I m a little unclear on what triggers the Frontal Collision Warning at low speeds. Yesterday I did have it go off on the highway when the traffic ahead of me was stopped, but it has never gone off at lower speeds even when I approach a stopped car rather quickly. I ve pushed it pretty far trying to see what will set it off, and so far nothing does.
I know in the uConnect settings you can set the Frontal Collision Warning to 'Near' or 'Far', but I assume that even if it s set to Far it ll still go off if it s a close situation, right? Just for grins I did set it to Near to see if that did anything different, but it didn t.
Thanks,
-Brian
***** END OF CUSTOMER EMAIL *****
Dear [redacted]
Thank you for contacting the Jeep Customer Assistance Center.
I was able to locate the following information about the system. The

system is designed to aid the driver of the vehicle in avoiding collisions.
Available Forward Collision Warning System with Mitigation* uses forward-facing radar sensors and a special camera to detect when the vehicle may be approaching another vehicle too rapidly:
Alerts driver by sounding chime and displaying message in the instrument cluster
System can apply the brakes if a collision is imminent and the driver is not adequately responding to the situation
System is always active unless disabled by driver
Disclaimer: *FCW system is solely an alert system for the front of the vehicle which does not take any actions to change vehicle dynamics to avoid a collision, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use brakes to avoid collisions.
The technology behind the scenes that powers the system we cannot disclose as it is considered to proprietary.
Thanks again for your email.
Sincerely,
Steve

Status update provided via email to the following email address:
[redacted],
My name is Josh and I m contacting you from the Jeep Uconnect Center here at Chrysler.
I m contacting you in reference to a case that was sent to me stating that you have some inquiries on the uconnect system.
If your would like to contact me back my number is 1-877-855-8400 ext. 4718031.
Thank you so much for your time.
End of Status Update
CONTACT UPDATE - contact attempt, number dialed [redacted], and was able to get a hold of the customer.
Cm advised the customer that the case has been sent to the CM to answer

any questions that he may have on the system.
Customer states that he doesn t have any questions but that he does have to go to the dealership to have an update done on the radio.
CM asked the customer if the customer wants the CM to book the appointment.
Customer states that he can make the appointment himself, however, he would like to keep the case open and have a follow up provided to him.
CM agreed to follow up with the customer in a week.
Customer thanked the CM for the assistance and has no further questions or concerns at this time.
CM will follow up with the customer on May 30th 2013 to see if the vehicle has been diagnosed.
Cm will follow up with the customer on May 30th as per lines 31-32.
**** Dealer Contact ****
Writer contacted Keith in service and was advised Star case opened did a software update and the customer states the text is still is not working and navigation is working however seems to be taking a different route then the customer would like. The STAR file is closed and the dealership states it s operating as designed.
CONTACT UPDATE - contact attempt, number dialed [redacted], and was able to reach the customer.
CM advised the customer that there has been information provided by the dealership in regards to the radio.
CM advised the customer that the navigation is working as designed in the vehicle.
Customer states that it is not, as he puts in the destination into the radio is it does not draw out the closest route.
CM advised the customer that the system will draw out the quickest route that it can detect, which is normal operation of the vehicle.
Customer states that his phone will also not send text messages through the system.
CM asked the customer as to what phone he is using on the system.
Customer states that it is a iPhone 5 with AT&T running iOS 6.1.4.
CM advised the customer that the software he is running on his phone is not on our compatibility listing and that the CM clicked on the software that is, which is iOS 6.0 and that the website states that voice texting and regular texting is not compatible on the system.
Customer then compared the Jeep to the BMW that he owns and states that he is not impressed at all.
Customer states that the Sirius radio is not working properly and that it will cut in and out on the radio.
CM asked the customer about weather conditions, roads etc.
Customer states that all signs prove that everything should be working.
CM offered to contact the dealership to schedule the appointment.
Customer states that he wants the CM to contact the service manager and have the manager provide the customer a call to schedule the appointment.
CM advised that, the CM will do so for the customer and then provide a follow up in a week in order to see if the vehicle has been diagnosed.
Customer understands and disconnected the call.
CONTACT UPDATE - contact attempt to the dealership, number dialed 860-536-2666, and was able to reach the service manager.
Cm advised Paul the service manager that the customer would like the manager to provide him a call to schedule an appointment for the Sirius radio in the vehicle as the radio is cutting in and out.
Paul took down the customer s phone number and that he will provide the customer with a call to schedule the appointment.
CM advised the manager that the CM will follow up with him and the customer in a week to see if the issue has been resolved.
CM will follow up with the customer on June 7th 2013 to see if the diagnoses has been completed on the vehicle.
CONTACT UPDATE - contact attempt, number dialed [redacted], and was able to get a hold of the customer.
CM asked the customer if he was able to bring the vehicle into the dealership for diagnoses on the radio.
Customer states that he was able to and that the deaelrship has ordered a new radio for the vehicle.

CM advised the customer that the CM will follow up with the dealership on Tuesday June 11th 2013 in order to see if the radio has been received. Customer understands and has no further questions or concerns at this time.
CONTACT UPDATE - contact attempt, number dialed [redacted] and was able to get a hold of the customer.
CM asked the customer if he was able to reach the dealership regarding the radio for the vehicle.
Customer states that they were suppose to call him today, but they have not.
CM offered to contact them for the customer.
CM spoke to Paul in parts and found out that the radio has not been received and that there is no ETA on the radio or information regarding the radio.
CM advised the customer of the information and advised the customer that the case will be forwarded off for a parts expiditing to obtain the radio sooner.
Customer thanked the CM for the assistance and has no further questions or concerns at this time.
Writer contacted 68087 and spoke with Paul in Parts.
Paul stated part information for order is as follows:
Part #: not available.
Part Description: Radio for vehicle.
Order #: Not available.
ETA: No ETA
Is customer in rental? No
If yes, who authorized rental?
Is the vehicle off road? No
Writer advised customer that their parts concern will be escalated to the Parts Support team for parts resolution, and that their Case Manager will provide them updates on the status of the case.
Assigned case to 96W (Parts Only) or 88F for handling
Assigned case to 88F for handling part cannot be escalated

Writer contacted Deaiership. SM Paul stated the radio was replaced 8/14/13. Part # Z8190240AF order # 33309. And customer is waiting for repair to seat belt retractor passenger side to arrive,part# 1VL06DX9AD order# 3330. Customer will be contacted at that time for repair. SM stated mileage as 1187. Writer will up date mileage in coin.
CONTACT UPDATE - 1st Contact attempt, phone number dialed [redacted]
Customer stated he is still having the same issues, and feels the system is out dated. Dealership stated customer needs to request that Chrysler pay for the Map Star up grade, as this is the reason customer waited to purchase the 2014. Writer stated we will do more research and contact customer with an up date 6/19/13.
Status update provided via email to the following email address: [redacted]
My name is Wanda and I have been assigned as your Case Manager. Here is some information that will be helpful for you to have:
Case Number is [redacted] Chrysler Case Management telephone number: 800-763-8422
My work hours: 8am-4:30pm EDT Monday- Friday My direct extension: 66101
I will contact within 1 business day by telephone to review your case with you.
End of Status Update
Writer contacted customer. Mr. [redacted] stated he is requesting Chrysler to contact the navigation company and pay to have the system up graded in his vehicle at Chrysler expense. As the radio has been replaced and is steel having issues with the navigation. Customer also stated he purchased a new 2012 Chrysler product and it has no problems with the navigation or phone pairing. Customer stated the seat belt part will be at the dealership 6/20/13. Writer stated we will do more research about

customer request and do a follow up 6/21/13.
Writer contacted Dealership, spoke with Service Advisor (SA) Ted. SA stated the Service Manager (SM) is not in at this and requested writers contact numbers. Writer stated 800-763-8422 ext. 66101.
Service Manager(SM) Paul contacted Chrysler, left a message requesting a call back. Writer contacted SM Paul. SM stated customers issue with the navigation system is the software and phone pairing. Customer owns a I phone 5. Also the navigation is not taking the customer on the most direct route and is going to restaurants that have been closed for 3 or more years. SM states customer has the best system Chrysler makes. SM stated he is going to compare the system with another vehicle. Writer stated we will inform the customer of comparing.
writer contacted customer [redacted]. Left message stating case and contact numbers, requesting a call back.
Customer contact Chrysler requesting the phone or email to the mapping navigation supplier for Chrysler.
Information found: www.navigation.com,1-866-4NAVTEQ (866-462-8837)
Writer contacted customer left messagr stating case and contact numbers and line 169.
Writer contacted customer, left message stating case and contact numbers and line 169. Requesting a call back.
Customer advised he has 3 outstanding concerns going on and the CM WD151 is only discussing the part replacement
Part Replacement is as follows:
Seat Belt was defective and could not be opened.
Antenna in not working and needs replacement.
The Customer s 3 Outstanding Concerns are:
Voice Texting
Anti Collision System being deactivated when it is an option on the vehicle.
Navigation Concerns
Customer advised no longer wants to work with CM WD151 and wants CM MC1452 back on his case. Writer advised has already spoken to CM CB903 in regards to the request of taking over the case and has been advised that cannot occur.
CM NEEDS TO ADDRESS ALL 3 OF THE CUSTOMER S CONCERNS. CUSTOMER HAS ADVISED THE SM JOHN HAS NOT BEEN ABLE TO GET TO LINES 157-164. CUSTOMER ADVISED THAT EVEN WHEN THE SM GETS TO THESE CONCERNS, IT STILL DOES NOT ADDRESS THE CONCERN OF VOICE TEXTING. PLEASE ADDRESS THESE CONCERNS SO THAT THE CUSTOMER CAN BE HAPPY WITH THE CM.
Customer requested to speak to CM MC1452 s supervisor. While supervisor was pulling up the case, call was disconnected.
Writer contacted Dealership. Spoke with Service Manager (SM) Paul. SM stated customer did come to the dealership and it was confirmed that the talk to text does not work and the navigation system does not compare to customers older vehicle. SM states the radio has been replaced as advised by STAR. This did repair the issue with the screen going blank, but did not up date the navteq or the talk to text. SM states Chrysler is aware of the issues, and as of this time there is no repair or up date for this vehicle.
Writer contacted customer stating lines 195-202. Customer stated he is going to have to think about this as this is why he sold his 2012. Customer states the technology is out dated and he will contact the SM and discuss this with him. Writer stated we will do a follow up 7/9/13.
Customer is considering selling the vehicle.

End of Status Update
Writer contacted customer, customer states he wants the vehicle repaired and customer is busy now and writer will have to call him back, customer disconnected.
The writer received a call from the customer. He was advised the writer will be his new CM. He stated that the maps for his navigation are outdated, the radio loses signal, and the antennae is defective. He stated he was advised that the antennae is on national back order. He went on to say that he read in the literature he would be able to do text messaging, however he cannot. He stated he was advised by Uconnect that his phone is not compatible with the system. He stated that Apple told him it is compatible.The customer stated when he is driving and he comes to a stop sign or traffic light the transmission does not adapt to the stop and the vehicle jerks forward. He stated the dealership reset something and the problem was resolved temporarily and now has returned. He stated that he received a replacement radio that was used and he is still having the same problems. The writer stated the dealership will be contacted for more information. Additionally, he was advised we can use the resources available to us to resolve his concerns. The writer will contact the dealership for the part number and order number for the antennae so we can get parts expediting to assist in getting the part to the customer sooner. The customer was informed that Navteq will be contacted on his behalf to find out if there is any software that can be purchased to update his system. He would also like the writer to get more information about the radio to see if it was indeed a used radio and see if a new one can be installed. Follow-up on 7/12/13.
The writer contacted Navteq at 866-462-8837. The writer spoke to Jason who stated that the customer has the most current maps available. He went on to say that the customer can report the map errors to mapreporter.navteq.com. This will provide Navteq with the information they need in order to update the system. He stated there is no update at this time for the customer to purchase.
The writer contacted the dealership at 860-536-2666. A voicemail message was left for the SM Paul.
The writer contacted the customer at [redacted]. The customer was advised that errors for his navigation can be reported to mapreporter.navteq.com. He stated that he does not have time to do that. He was advised that we can see if the writer is able to report these errors on behalf of the customer. He went on to say that he does not have time to discuss the information and requested a return call on 7/11/13.
Status update provided via email to the following email address:
[redacted],
I would like to report the map errors you have experienced ono your behalf to Navteq. I am relying on the information you have provided to me during our phone calls. If you have any additional errors or information you would like me to add to your case, please let me know.
I will contact you by telephone on 7/12/13 to discuss your case.
End of Status Update
The writer contacted the dealership at 860-536-2666. A VM was left for the SM.
The writer contacted the customer at [redacted]. The customer stated

that the SM Paul is on vacation. He stated that he will contact the writer right back due to a bad connection.
The customer stated that the errors are so numerous that he would have to take a lot of time to report them all. He stated that he does not think that it is a software issue with his phone because the dealership tried an Android which should be compatible and it did not work either. Since he was advised by the dealership that the radio he received is used, he would like to know what was wrong with the used radio before it was refurbished. He was advised that we may not be able to provide him with this information, however his request will be documented. The customer would like the writer to contact Uconnect on his behalf. He would like the texting concern, antennae, transmission and navigation concerns resolved.
Follow-up on 7/15/13.
The writer contacted the dealership at 860-536-2666. The writer spoke to the SM Paul who stated that the biggest problem with the customer s navigation is when he goes to his own address. The navigation avoids the fastest route because it will not choose side streets. The route provided by the navigation puts 10 minutes on the drive time. He stated that antenna for the customer has arrived. He will contact the customer to advise him. The writer stated that according to the research it is the customer s AT&T software that is not compatible however his phone is. The SM Paul would like the website information emailed to him to paulp@bobvalentiautomall.com
The writer contacted the customer at [redacted]. A voicemail message was left for the customer. Follow-up on 7/16/13.
The writer contacted the customer at 4[redacted]. A voicemail message was left for the customer. Follow-up on 7/18/13.
Writer received a voicemail message from the customer.
The writer contacted the customer at [redacted]. A voicemail message was left for the customer. Follow-up on 7/22/13.
The writer received a return call from the customer. He was advised that at this time it has been determined that his phone is compatible with our system. The problem lies with the software used by his carrier AT&T. The dealership tested an Android to see if it would allow voice texting and it did not. The writer is to verify if the Android uses AT&T to narrow down what is causing the concern. Follow-up on 7/23/13. Customer stated that he will have the repair on his antenna next week.
The writer contacted the dealership at 860-536-2666. A voicemail message was left for the SM Paul.
Status update provided via email to the following email address:
[redacted],
I have left a message for the Service Manager Paul about the Android service provider. I will contact you by telephone on 7/24/13 to discuss your case.
End of Status Update
The writer contacted the dealership at 860-536-2666. The writer spoke to the SM Paul who stated that the Android that was tested on the customer s vehicle is also with AT&T. AT&T software is not compatible with the system for voice texting. He stated the customer has not contacted him for an appointment. The writer contacted the customer at [redacted] A voicemail message was left for the customer. Follow-up on 7/29/13.
The writer contacted the dealership at 860-536-2666. A voicemail message was left for the SM Paul.
Status update provided via email to the following email address:
[redacted]
Please let me know if you have scheduled an appointment for repairs.
I will contact you by telephone on 7/31/13 to discuss your case.
End of Status Update
The writer received a return call from the SM stating that the customer was at the dealership today for repairs. He stated that the customer is getting better reception now that the antennae has been replaced. He stated that he updated the radio however he was not able to get his phone

to use voice texting with the system.
Begin Customer Message reviewed:
Hi Christine. I received service today regarding the antenna issue and the voice texting. Paul, the service manager, used his phone with verizon as the carrier. So the texting does not work with iphone or android, on ATT or Verizon. It is a feature I purchased from Jeep and Jeep will not deliver the product. It is obviously a jeep software issue. The antenna was replaced. The radio loses signal more and cuts out. There is still the outdated navigation software which is frustrating and unacceptable for a car of this price and stature. What do you propose?
End of Reviewed Customer message
The writer contacted the dealership at 860-536-2666. A message was left for the SM with SA Doug. Writer to discuss TSB 08-049-13 RA3 And RA4 Radio Enhancements.
The writer contacted the dealership at 860-536-2666. The SM stated he spoke tech advisor for assistance. He stated he is expecting a follow-up from the TA.
The writer contacted the customer at [redacted]. The customer stated he went into his Navigation system he stated that it gives him the message that the version is 2nd quarter of 2012. He stated there must be newer versions. He went on to say that his system does not have voice texting. He was advised that we have contacted our corporate resources for assistance. He stated it has been costly and time consuming to make multiple trips to the dealership. He was advised we will research what we are able to offer him to thank him for choosing Jeep. Follow-up on 8/2/13.
The customer s address was verified and updated.

Writer contacted dealer 68087 at 860-536-2666. Writer left message for Service Manager Paul requesting callback in regards to customer s concern.
Writer contacted dealer 68087 at 860-536-2666. SM Paul informed TA is doing more research regarding the transmission issues. SM advised the issues with the talk to text cannot be resolved as there is not a way for dealer to update the software. SM stated the issue with the transmission will be researched and SM will contact writer with an update. Writer advised follow-up 08/08.
Writer contacted customer at [redacted] Writer left message and left customer with writer s phone number. Writer stated dealer researching the issues with the transmission. Writer stated follow-up 08/08.
Writer contacted dealer 68087 at 860-536-2666. SM Paul informed TA found some information regarding the radio issues that might help the customer s concerns. SM stated has not heard back from TA in regards to the transmission issues. SM stated customer has vehicle. SM advised once hears back from TA regarding the transmission, dealer will have customer take vehicle in for repairs.
Status update provided via email to the following email address:
[redacted]
We definitely appreciate your patience and understanding. We are working with the dealership and our resources, to find a resolution for your vehicle s issues. We will continue to do the best we can to keep you updated and resolve the concerns. We will contact you by phone no later than Monday, 08/12, to discuss the case further. Thank you for working with Jeep.
End of Status Update
Writer contacted dealer 68087 at 860-536-2666. SM Paul informed has not heard back from TA yet. SM stated TA advised would contact SM with information and SM has not received a call.
Writer sent email to AM MD19. Writer requested assistance to get information from TA.

Writer contacted customer a[redacted] Customer stated took vehicle into the dealership today because the clock on the navigation system froze. Customer requested compensation for gas on the vehicle because customer has had to take vehicle to dealership for so many concerns. Writer made no guarantees. Writer stated follow-up 08/15.
**** 8/12 AM received note from TT434 seeking info on owner complaint of Down Shift Quality & TA response. AM review = Shift quality for customers SRT8 is normal and characteristic for all SRT8s, it is following our design and programming for this vehicle / application. Owner should be informed by any corporate source that shift quality he is experiencing is Normal & by Design. Md19
*****
Per TA and AM, vehicle is running as designed.
Writer contacted customer a[redacted]. Writer informed customer of information per lines 423-425. Customer stated still having issues with the radio and antenna. Writer stated will be willing to work with dealer to get the issues resolved with radio. Writer informed no compensation is going to be given at this time, vehicle is working as designed. Customer hung up.
Status update provided via email to the following email address:
[redacted],
I understand from our previous conversation that you are currently having issues with the radio and antenna. We would be more than happy to assist you in getting those issues resolved. We would need you to take the vehicle to the dealership for a recent diagnosis for the concerns. We will contact you no later than Tuesday, 08/20 to discuss your case further. Thank you for working with Jeep.
End of Status Update
Writer contacted dealer 68087 at 860-536-2666. SM Paul stated has been working with the customer in regards to the radio. SM advised spoke with customer yesterday and will be speaking with customer again today to discuss the radio concerns. SM informed will get customer s concern taken care of.
Writer contacted customer at [redacted]Writer left message requesting callback. Writer stated customer working with dealership and case will be closed if customer needs nothing more from CAC. Writer stated 2 day close out and case will close 08/22 if no callback.
Status update provided via email to the following email address:
[redacted],
I understand that you have been working with the dealership to resolve the concerns that you are having with your vehicle. We will be closing your case on Thursday, 08/22 if there is nothing more you will need from Jeep Customer Care. Please contact 1-800-763-8422 ext 66178, or reply to the link below, if you would like to keep the case open. If we do not hear back from you by Thursday, 08/22, your case will be closed. Thank you for working with Jeep.
End of Status Update
Begin Customer Message reviewed:
Tina;
I have worked with the dealership since purchasing the SRT 2014. The problems with the car have not been resolved. The radio/satelite reception was a problem before the antenna replacement. After the replacement, the reception is worse. The rebuilt radio or whatever was installed is worse than the previous defective one. The dealer is aware first hand of the clock locking up and aspects of the touch to talk still DO NOT function properly and sometimes not at all. The screen now has started to go blank, then come back up, then go blank and repeat. The NAV system provides very poor directions and destinations that have gone out of business over 3 years. On my travels today, it was displaying roads overlaying the ocean. Text messaging has been an issue with chrysler for a few years. The dealer assured me this was to be corrected in my 2014. It wasn t. I owned a 2012 Overland for one month then sold it because of some of these same technical issues. Finally, (for now), I continue to spend time, mileage and gas $$ to bring my car to the dealer for

continuing defects in my $72,000 vehicle.
End of Reviewed Customer message
Writer contacted dealer 68087 at 860-536-2666. SM Paul informed dealership is working with STAR. SM advised customer went into the dealership for a diagnosis yesterday, 08/21. SM stated dealer waiting for STAR to release a radio for the vehicle.
Writer contacted customer [redacted] Customer informed the navigation system is showing customer that there are roads on the ocean. Customer advised not happy with the radio system. Writer stated waiting for STAR to reply with an update. Writer advised follow-up 08/26.
Writer contacted dealer 68087 at 860-536-2666. SM Paul stated not able to order the radio part#: Z8190240AD. SM advised will continue to work with STAR to see why radio cannot be ordered.
Status update provided via email to the following email address:
[redacted],
We appreciate your patience and understanding at this time. We are currently waiting for the dealership for order parts for the repairs. We will contact you no later than Wednesday, 08/28, with an update for the resolution. Please contact 1-800-763-8422 ext 66178, if you have any further questions or concerns. Thank you for working with Jeep.
End of Status Update
Part#: Z8190240AG, Order#: 3309, ETA: 08/29. Tracking#:
[redacted]
Writer contacted dealer 68087 at 860-536-2666. Writer left message for SM Paul. Writer advised part is on the vehicle for delivery today and dealer will be receiving part by end of business day today.
Writer contacted customer at [redacted]4. Writer left message and stated part is arriving at dealer by end of business day today. Writer stated dealer will contact customer once part arrived to schedule appointment. Writer advised follow-up 09/03.
Writer contacted dealer 68087 at 860-536-2666. SM Paul stated dealer installed radio on Friday and radio is no longer freezing up, however, the satellite radio cuts in and out, and dealer was able to duplicate the problem. SM advised customer states the brake system does not work as designed, however, SM and customer took a like vehicle on a test drive and found the vehicle working like customer s vehicle therefore, SM informed customer that the vehicle is working as designed however, customer is not satisfied with that answer. Writer requested SM open a STAR case and contact AM for further assistance.
Writer sent email to AM MD19 for further assistance regarding customer s concerns.
Writer contacted customer at [redacted] Customer stated the satellite radio still does not work correctly and cuts in and out. Customer advised while driving in the like vehicle with the SM, the radio did not cut out once. Customer informed the anti-collision system would come on prematurely and brakes would engage. Customer advised turned the anti-collision system off and a week later, customer turned the anti-collision system back on and it worked fine for 1 week. Customer stated the text to talk doesn t work, the navigation system does not work, and the weather map will not work at all. Customer is expecting Chrysler to resolve the issues with the vehicle or replace the vehicle. Writer made no guarantees and stated will do more research with SM and resources. Writer stated follow-up no later than 09/09.
*** AM has reviewed CAIR & Contacted SM for Details of owners brake concern. Owner feels that the Collision Warning system should operate differently than it does. Dealer Took owner out in his and a like vehicle from the Dealership Inventory, Both exhibit the exact same function on the road. Svc Mgr described that both operate as designed by Chrysler. Owner wants it to operate differently, SM again describe that the system operates as it was designed by Chrysler. md19
Writer received email from AM MD19. AM advised would not get a TA involved with the issues. AM stated if dealer test drove the like vehicle with the customer and showed, that the concerns are characteristics of the vehicle, there would be nothing more that can be done to resolve the issue. AM advised nothing can be done for the brake system.

Writer contacted dealer 68087 at 860-536-2666. SM Paul stated customer would need to contact dealer to schedule an appointment for diagnosis on the radio cutting in and out and navigation system not working. SM stated dealer had STAR case opened for the talk to text and confirmed with the carrier customer has, it does not work. SM advised some carriers work and some do not. Writer stated will contact customer to advise.
Writer contacted customer at [redacted] Writer informed customer of information per lines 537-554. Writer advised customer must take vehicle to dealership for diagnosis. Customer agreed. Customer requested compensation for gas. Writer declined and stated customer must take vehicle to dealer for diagnosis at customer s expense. Customer requested reimbursement for the broke items in the vehicle such as brakes and talk to text. Writer stated they are working as designed and there are no signs of defects in the products. Writer stated follow-up 09/09.
Writer contacted dealer 68087 at 860-536-2666. SM stated customer has not taken vehicle to dealer for diagnosis and no appointment is scheduled.
Writer contacted customer at [redacted]. Customer stated runs a business and customer does now know when customer can take vehicle to get diagnosis. Customer informed dealer is 1 hr away from customer. Customer advised may take it in later this week but not sure. Writer advised due to no diagnosis case will be closed. Customer disagreed. Writer stated will send email to customer with phone numbers to contact, to reopen a case. Customer agreed. Writer stated once diagnosis is completed, customer can reopen a case.
Status update provided via email to the following email address:
[redacted]
As we discussed earlier, your case will be closed until there is a recent diagnosis on the vehicle. Please contact 1-877-426-5337 for Jeep Customer Care to reopen a case. We appreciate your business and understanding. Thank you for working with Jeep.
End of Status Update
CLOSED LOOP UPDATE - no need for additional follow-up.

t is described in the manual and by the sales person.
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
I was in the dealer for 3 hours and they do not know the difference
between the Adaptive Cruise Control and the FCW. No one seems to be able
to check the FCW system. I need someone to explain to me how it works and
how to check it. Thanks.
*****END OF CUSTOMER EMAIL*****
LSRS Forward Collision Warning Plus
RA4S Uconnect 8.4AN AM/FM/BT/Access/NAV
Dear[redacted]
Thank you for contacting the Jeep Customer Assistance Center.
In regards to the operation of the Forward Collision Warning (FCW) with
Mitigation.
I have copied the description and instructions for how to operate and
check from the owners manual for the operation of the system. This
information can be viewed in the online owners manual at
http://www.jeep.com/en/owners/manuals/
UNDERSTANDING THE FEATURES OF YOUR VEHICLE Pages 213 to 218
FORWARD COLLISION WARNING (FCW) WITH
MITIGATION IF EQUIPPED
Forward Collision Warning (FCW) With Mitigation

Operation

The Forward Collision Warning (FCW) system with mitigation provides the driver with audible warnings, visual warnings (within the EVIC), and may apply a brake jerk to warn the driver when it detects a potential frontal collision. The warnings and limited braking are intended to provide the driver with enough time to react, avoid or mitigate the potential collision.

NOTE: FCW monitors the information from the forward looking sensors as well as the Electronic Brake Controller (EBC), to calculate the probability of a forward collision. When the system determines that a forward collision is probable, the driver will be provided with audible and visual warnings and may provide a brake jerk warning. If the driver does not take action based upon these progressive warnings, then the system will provide a limited level of autonomous braking to help slow the vehicle and mitigate the potential forward collision. If the driver reacts to the warnings by braking and the system determines that the driver intends to avoid the collision by braking but has not applied sufficient brake force, the system will compensate and provide additional brake force as required.

When the system determines a collision with the vehicle in front of you is no longer probable, the warning message will be deactivated.

NOTE:

The minimum speed for FCW activation is 5 mph (10 km/h).

The FCW alerts may be triggered on objects other than vehicles such as guard rails or sign posts based on the course prediction. This is expected and is a part of normal FCW activation and functionality.

WARNING!

Forward Collision Warning (FCW) is not intended to avoid a collision on its own, nor can FCW detect every type of potential collision. The driver has the responsibility to avoid a collision by controlling the vehicle via braking and steering. Failure to follow this warning could lead to serious injury or death.

Turning FCW ON Or OFF

NOTE: The default status of FCW is On , this allows the system to warn you of a possible collision with the vehicle in front of you.

The forward collision button is located on the switch panel below the Uconnect display.

To turn the FCW system OFF, press the forward collision button once to turn the system OFF (led turns on).

To turn the FCW system back ON, press the forward collision button again to turn the system ON (led turns off).

Changing the FCW status to Off prevents the system from warning you of a possible collision with the vehicle in front of you.

Changing the Active Braking status to Off prevents the system from providing limited autonomous braking, or additional brake support if the driver is not braking adequately in the event of a potential frontal collision.

NOTE: The FCW system state is kept in memory from one key cycle to the next. If the system is turned OFF, it will remain off when the vehicle is restarted.

Changing FCW And Active Braking Status

To change the FCW and Active Braking settings with Uconnect 8.4/8.4A System Screen if equipped.

NOTE: The settings can only be changed when the vehicle is in PARK.

Follow these steps to set the FCW and Active Braking:

1. Press the Controls soft-key located on the bottom of the Uconnect display.
2. Press the Settings soft-key.
3. Press the Safety & Driving Assistance soft-key.
4. Press the FWD Collision Warning , Far or Near soft-key for your desired preference.
5. Press the Active Braking On or Off soft-key.
NOTE: A check mark will appear in the selection box to indicate the setting.
The default status of FCW is the Far setting and the Active Braking is the On setting, this allows the system to warn you of a possible collision with the vehicle in front of you when you are farther away and it applies limited braking. This gives you the most reaction time to avoid a possible collision.
Changing the FCW status to the Near setting, allows the system to warn you of a possible collision with the vehicle in front of you when you are much closer. This setting provides less reaction time than the Far setting, which allows for a more dynamic driving experience.
NOTE:
The system will retain the last setting selected by the driver after ignition shut down.
FCW may not react to irrelevant objects such as overhead objects, ground reflections, objects not in the path of the car, stationary objects that are far away, oncoming traffic, or leading vehicles with the same or higher rate of speed.
FCW will be disabled like ACC, with the unavailable screens.
FCW Limited Warning
If the system turns off, and the EVIC displays ACC/ FCW Limited Functionality or ACC/FCW Limited Functionality Clean Front Windshield momentarily, there may be a condition that limits FCW functionality. Although the vehicle is still drivable under normal conditions, the active braking may not be fully available. Once the condition that limited the system performance is no longer present, the system will return to its full performance state. If the problem persists, see your authorized dealer.
Service FCW Warning
If the system turns off, and the EVIC displays:
ACC/FCW Unavailable Service Required
Cruise/FCW Unavailable Service Required
This indicates there is an internal system fault. Although the vehicle is still drivable under normal conditions, have the system checked by an authorized dealer.
We appreciate the time you took to write to us and we hope this was of assistance to you.
Sincerely,
Eileen

Jeep Customer Assistance Center
*****END OF CAC EMAIL RESPONSE*****
Dealer Name : JEFF WYLER CHRYSLER JEEP DODGE Dealer Phone : 859-441-7800: SA Daniel said that the customer brought the vehicle in for the Forward Collision Warning Mitigataion (FCW). They road tested vehicle and it was found to be working normal. Daniel feels the customer might not understand how it should work. Daniel said that if the customer wants to bring the vehicle back into the dealership, he will look at it again as long as Chrysler agrees. Daniel said it is really hard to get diagnosis time from Chrysler but, if we agree he will look at it again. Agent advised SA Daniel that the customer will be informed of the contact and advised if he feels that the vehicle is not working properly, please contact the dealership to have the vehicle diagnosed.

SA Daniel informed that he doesn t see on the notes regarding the customers Uconnect system. When the customer came in, it wasn t saving his personal settings. When the customer turns the vehicle off, he has to put his personal settings in again. Daniel asked if we can advise the customer if he still has this issue, please contact him. Agent asked Daniel if this would have any affect on the FCW. Daniel said no do not confuse this and open a can of worms, they are not the same thing. Agent advised that there are instructions for setting the FCW on the Uconnect and just want to be able to make sure on the file if the personal settings not saving will affect the FCW. Daniel said that no the personal settings does not affect the FCW, they are two different things.
personal setting not saving.
Dear J[redacted]
Thank you for contacting the Jeep Customer Assistance Center. Unfortunately, we are unable to provide technical assistance. I have contacted Service Advisor Daniel at Jeff Wyler Chrysler Dodge Jeep. Daniel has advised if you are having a problem with the Forward Collision Warning system, to bring it in for diagnosis. Daniel also requested for you to contact him if you are still having an issue with the personal settings on your Uconnect system.
You may contact your local dealership for further assistance, or you may refer to the vehicle s Service Manual.
Service Manuals provide all the information technicians need to diagnose, troubleshoot, maintain, service and repair Chrysler Group vehicles. You can call Tech Authority to purchase Service Manuals at 1-800-890-4038. You may also order Service Manuals online at www.techauthority.com
Thanks again for your email.

Cruise control system is broken/not working.
I understand the 'problem' can t be found when it s operative, however I
cannot drive around the dealership waiting for it to stop!
periodically the steering wheel button seems to not work.
System does not respond to voice commands.
I am however disappointed in the intermitent problems with the adaptive
cruise and regular cruise.
CONTACT UPDATE - 1st Contact attempt, phone number dialed,
[redacted] writer calling customer to see if there is anything that he
wanted to add. Customer states that he is happy with the Jeep. Customer
has had to have them look at his adaptive cruise control 3 times.
Customer states that it is now working. Writer stated that we do
understand and know that it is frustrating and we do apologize. Writer
stated that based by the trips that he has made to the dealership to try
and get repair completed that we would like to offer him 2 years 8 oil
changes for his inconvenience. Customer stated that would be nice. Writer
stated that the oil changes do take a few days and that they do get
attached to customers vin#. Writer stated that it can be used at any
authorized Chrysler Dodge Jeep Ram in the United States. Writer stated
that if in the future that he continues to have issues to please give us
a call back 1877iamjeep to see if we are able to be of assistance.

My work hours are 6:30-3:00 MST Monday-Friday.
End of Status Update
[redacted] called requesting to speak to CM LT707. Writer warm transferred customer to CM for further handling.
Customer called and asked what the update is from the dealership. Writer said that writer spoke with Jorge and and was informed customer will need to come in and speak with Jorge, or Brad and a copy will be ordered through Chrysler.
Writer called EAST HILLS CHRYSLER JEEP DODGE at 516-621-9191, spoke with Eric and asked about the customer s concern with the windshield, and the scratches. Eric asked writer hold while Eric spoke with the service writer that assisted the customer, writer agreed. Eric sad that service writer spoke with sales, and sales will be contacting the customer.
Customer calls to speak with their Case Manager. Customer states that he spoke with the GM about the issue with the Window and is looking to speak with the CM.
Transferred the customer to LT707Ù at ext 66011Ù
Customer called in requesting to speak to his CM . Agent called the extension of LT707 but he was only in the office untill 5 today. Agent left a message on the voice mail askign CM to call teh customer back. Agent gave the customer his case number and the number to his case manager for followup tomorrow.
Writer called customer at [redacted]3, customer asked if it would be okay for the customer to call the writer back in about 1 hour 45 minutes. Writer agreed to customer call back time.
Writer called customer at [redacted], left message for the customer.
[redacted] called requesting to speak to CM LT707. Writer warm transferred customer to CM for further handling.
Customer called and said that customer has purchased 7 Jeeps, and the General Manager says that there is nothing that can be done to repair the windshield due to the hot and cold weather causing the glass to expand, and contract. Customer said that the tech at the dealership told the customer to tell the Geico insurance that there is a chip, and a crack. Customer said not going to lie to insurance company, but customer does not pay due to insurance company. Writer said that in order for the

repair to be covered under warranty, the repair will need to be determined to be a defect in factory parts, and workmanship of materials. Writer said that with the repair not being found to be a defect, warranty does not cover the repair. Customer said then the insurance company will, and all customer wants is the chip repaired, not the windshield replaced. Writer said that writer will call the dealership, and inform the service manager that all customer wants is the chip repaired, which will be covered under customer s insurance, and then call customer with the information the service manager provides to the writer, customer agreed.
Writer called EAST HILLS CHRYSLER JEEP DODGE at 516-621-9191, spoke with Mike and asked about the customer s windshield. Mike transferred writer to Steve. Writer asked Steve about the customer s vehicle. Steve said that the customer s insurance company was called, and the chip was repaired.
Writer called customer at 5[redacted] asked about the repair to the customer s vehicle. Customer said that customer was informed the chip was repaired, but customer will nit be able to pick the vehicle up until tomorrow sometime. Writer said that writer will follow up with the customer on Monday, customer agreed.
Writer called customer at[redacted], left message for the customer.
Caller[redacted] requesting to speak with Case Manager.
transferred to nic LT707 voice mail
[redacted] calling to speak with case manager LT707. Writer advised [redacted]ustomer that cm is currently unavailable at this time. Writer transferred customer over to SC167 at ext 66359,
Secondary number: declined
Email: [redacted]
Customer called in and confirmed chip was repaired, however, alleges that vehicle was supposed to have been detailed and was filthy, customer washed it himself and found a scratch on the front fender that he claims was caused by the dealership. Customer states dlr closes at 5. Customer states that on Sunday he spoke with salesman who said they would fix it, but that now they are refusing to saying the customer caused it. Customer wants this taken care of. Customer wants CM to call back between 8:30 and 9 AM Eastern Time.
Customer states he is frustrated over being unable to reach his CM. Customer states he has purchased 7 Jeeps and he expects better service from Jeep and the dealership. Customer states he is very unhappy with the dealership, stating the dealer would not provide a loaner vehicle nor would they take responsibility for damage to his vehicle. Customer states he just wants a resolution.
Writer informed customer that the CM will contact customer after speaking further with the dealership and the case has been documented that customer is requesting a call back as soon as possible.
Writer informed customer that writer will be escalating customer s concern to the Chrysler Business Center and the Dealer will be notified of the issue as well.
**** Dealer Notification Sent ****
Writer called customer at[redacted], rang twice, and the line went dead.
Caller[redacted] requesting to speak with Case Manager.
transferred to nic LT707 voice mail
[redacted] called requesting to speak to CM LT707. Writer warm transferred customer to CM for further assistance.
Customer called to let writer know that when customer went in to the dealership to get the vehicle, after the windshield was repaired, the vehicle was dirty, and there is a scratch on the fender. Customer asked what needs to be done in this situation. Writer said that writer will call the dealership, speak with the service manager, let the service manager know what the customer has found, and see what can be done for the customer. Writer said that when writer has gathered this information, customer will be contacted back.
Writer called EAST HILLS CHRYSLER JEEP DODGE at 516-621-9191, spoke with Mike and asked about the customer s vehicle. Mike asked writer to hold, and Steve answered the call. Spoke with Steve and asked about the scratch in the fender. Steve said that the customer let Steve know that same day

about the scratch, and Steve informed customer to bring the vehicle in and the scratch will be taken care of for the customer.
Writer called customer at [redacted], left message for the customer.
Writer called customer at [redacted], customer said that customer has an appointment for Wednesday to get the scratch repaired. Writer said that writer will follow up with customer on Thursday, customer agreed to follow up time frame.
The customer was transferred to the agent from Tenisha in Mopar who stated that the customer was very upset and seeking to speak to someone in Jeep about his vehicle issues and dealer complaint.
The customer stated that the windsheild has been repaired. The customer stated that this was an insurance claim as he wanted to get it completed in a timely fashion. The customer stated that when the service people were driving the vehicle into the garage the service department technican did a little scratch which they attempted to buff out but this did not work. The customer stated that the service department did not advise him of this chip or scratch. The customer stated that he is frustrated as it is dishonest and not a good way for them to handle the customer. The customer stated that he has purchased 7 Jeeps from this dealership and is very loyal. The customer stated that he has never had a problem before. The customer stated that the vehicle was not detailed at all from the windsheild repair which is how he discovered the chip in the paint from the windsheild replacement. The customer stated that he is very disappointed with the customer service and sales at EAST HILLS CHRYSLER JEEP.
The customer stated that he is going to go to his appointment on Wed. The customer wants someone to do something to get his vehicle concerns addressed. The customer stated that they are going to attend to the chip and do this repair but he has no promise or guarantee made by the EAST HILLS CHRYSLER JEEP Dealership or anyone in Jeep that they are going to repair the small ding because the East Hills CDJ Dealership SA have advised him that he should have notified them sooner. The customer stated that this is a new vehicle and that it should not already be needing body work. The customer stated that he is requesting that Jeep do something for him as he did not do anything to the vehicle.
The agent advised the customer that the case manager has indicated that the case manager would follow up with the customer on Thursday and the customer agreed to this follow up. The agent advised the customer that when the CM calls him Thursday that he should advise the CM about the repair and any resolved items. The customer stated that he would keep the appointment and thanked the agent for listening. The agent advised the customer that he needs to work with his CM who has been working with him and the dealership in an attempt to resolve his vehicle concerns. The customer stated that he would look forward to speaking to his case manager on Thursday.
Writer called EAST HILLS CHRYSLER JEEP DODGE at 516-621-9191, spoke with Mike, and was transferred to Steve where writer asked about the customer chip in the paint. Steve said that the chip is being covered due to lot damage, and should be done today.
Writer called customer [redacted], left message for the customer.
Customer called stating he is frustrated with Dealership 65674, because they wont cover the cost for damage that was done to the driver side door at the bottom before he got the vehicle in his possession. Customer stated when he picked up his vehicle and drove it home he hadnt noticed it. Customer said he took the car to the car wash and seen there had been dent in the bottom of the door that he didnt do and it looked like its been banged out and buffed and painted again. Customer stated he brought it to the dealerships attention and they said they will see what they can do for him. Dealership told customer they will repair it but at customer cost. Customer is a loyal customer, this is his 7th jeep vehicle he has boughten and doesn t appreciate how he has been dealt with at the dealership and expects the dealership to take responsibility for the this repair. Agent apologized and informed customer that he has a CM already assigned to him he should discuss this with him. Customer stated he wanted to file a complaint about he dealership. Agent informed customer that i would document this call in his file but he needs to discuss this

with his CM since he still has a file open. Customer understood and said he was going to be talking with his CM later today. Customer thanked agent for assistance.
Writer called customer at [redacted], customer asked if writer will be available around quarter to 11 so customer can return writer s call?
Writer said will be waiting to speak with the customer.

I am 99% sure that is the correct part # for my vehicle.
End of Reviewed Customer message
[redacted] called to speak to CM JP1353; Customer states he has been waiting for a call back today and has not been contacted. Writer verified Customer contact info:
Primary/only contact phone number is cell [redacted],
Alternate contact method is e-mai[redacted].
Writer warm transferred customer to CM EJ126.
Mr. [redacted]b states to have expected a call from CA JP1353 advised CA is working on obtaining information for parts ordered, once CA is aware if parts are available or if they will be replaced, CA will be contacted, Customer also states that radio reset two times over the weekend, the screen went blank and 30 seconds later it came back up again, customer advised to set up an appointment with dealership and CA would contact CA next bossiness day.
Writer contacting the SM/Kim and was advised she is in a meeting with No time to come back. Nash/SA took the information about the customer radio resetting about every 20 mins. And also about the error code for the air suspension on the display. And will advised SM/Kim about it and see if she will contact the customer.
Writer [redacted] Left a message explaining the Sm was left a message asking to contact the customer to best resovle the dash concerns.
[redacted]called requesting to spe akw with CM JP1353. CM was unavailable. Writer warm transferred customer to CM MS1882 for further handling.
Customer contacted writer requesting an update. Writer advised that the SM has been in meetings all day but if the customer is having a concern the customer should make an appointment for a diagnosis. Customer states that the customer will wait until CA contacts customer. Customer requests a call back tomorrow morning.
Begin Customer Message reviewed:
To give you more info radio reset this evening. Lost all presets...navigation is out of sync. While trying to re register uconnect got vehicle vin encountered critical trouble with database. Talked at length with uconnect. They opened a critical ticket on there end. Ticket number [redacted]6. I will be calling the dealer to set up an appointment yet again. I am requesting a grand Cherokee or same size SUV as a loaner. I am trying to be patient and understanding, but its hard. Three radios, over 10 days out of service in less than 2 months of ownership. Damaged trim pieces, minor rip in the leather dash, air suspension issues....vehicle has been in more than 3 times for same issue which means it could qualify as a lemon. I love the vehicle, rides great, looks awesome, but those pluses don t help when the uconnect

system doesn t work. Please call me tomorrow to discuss other options.
Thanks

Dialed [redacted]2 Customer is saying he made appointment with Nash/SA for 7/19. But the SA did offer to try and look at the customer concerns if he was to drop the vehicle now. Customer did not wish to do this and will keep the appointment for 7/19. Customer is stating he fix the flash light bracket and no longer needs the part that is ordered. Customer sent in photo s of the radio concerns to the SM Kim.
Writer will contact the Sm and discuss the issue with the marks on the dash.
Begin Customer Message reviewed:
Hi...I can t attach the video s but wanted to give you the text of the email that I sent Kim:
Hi Kim:
Let me start off by saying I am sorry and I know yourself, Nash and the techs are doing what you can, but it s getting frustrating to say the least. My replacement radio is still acting up. Screen blanking out, not being able to enter a city to use the navigation and the vehicle phone requires service message.
Anyways yesterday after it reset I was setting everything up again, presets, vehicle settings, etc and had to re-register with uconnect. It was connecting and trying to register I guess and I got a message stating vehicle vin encountered an error with the database and to call uconnect. So I called the uconnect care team and was on the phone with about an hour for them. They said they have seen this issue before and it needed to go to another department for further research. They gave me a case # of [redacted]30716. They said they were going to review the hardware, what s been done and the issues I am still having and I guess work with you/Chrysler to determine the next steps.
A buddy of mine has a friend who is a tech at a jeep dealer out of state. He mentioned to him some of the issues I am having and he said to mention two star cases which I listed below. You guys very well could have looked at these already, but I am just trying to do anything I can to get to a resolution. As much as I love the vehicle and how it drives, the radio resetting and navigation issues are very frustrating.

SEE STAR CASE# 6[redacted] FOR INFORMATION
Writer contacting SA/Nash, is saying he is working with star and they have him ordering a replacement radio with a build date of June 12.2013 or after. SA is not sure how to get one with a specific build date.
CA is contacting TS to see if the radio can be order by a specific build date.
Writer contacting Nash/SA and advising he needs to contact the TS working with ECS T5929DH.
Begin Customer Message reviewed:
Hi Janeen:
I started to compile a message earlier and I think I forgot to send it, if I did I appologize. Anyways Nash called me yesterday to give me an updated. Stated they are replacing the radio again with a unit built after June 12th and this 'should' resolve the issues. Anyways since it looks like this should hopefully be the last radio replaced have you talked with Kim about getting the trim piece ordered? From what I can see online it looks like it is back ordered so would like to get it ordered at least...
Also if you can start to talk with management about how you can compensate for all these issues. We are pushing 20 days my Jeep has been out of service in less than 2 months and its still there. Extended Warranty up to 100K would be great plus anything else. Needless to say I have been trying to be patient but feel Chrysler needs to step up to the plate.

Writer attempted to contact Sm/Kim who is saying the radio part did seem to take care of the issue and she has also order both trim peices but they seem to be on B/O. SM will email the part numbers as well as order number for CA to expedite.
Dialed[redacted] Customer was advised CA will look into a Max Care and offered to reimburse for a vehicle payment of $525.00. customer accepted the offer. Customer is aware of the trim parts being on B/O.
Begin Customer Message reviewed:
In reviewing the plans I believe this is the one you are discussing correct:
http://www.factoryplans.com/assets/cms/files/5100_Maximum_Care.pdf
If so that would be fantastic if you are able to get that approved for 100,000 miles. If you are able to do the $0.00 deductible that would even be better.
But honestly whatever you are able to get would be most appreciated. I am just excited to get my Jeep back and be able to enjoy it!!
I really appreciate all your help so far with this.

Good Morning....
I got the Jeep this morning, so far so good, but I only drove a few miles. Anyways the trim pieces did not come in which is probably a good thing so I can try it out for a few days to make sure everything is OK.
I did have another question that maybe you could check with the sales department at the dealer on. When I purchased the vehicle I was given a 3 year oil change / Tire Rotation Package. I have the slip signed by the sales manager stating I have it, but it is not registered in the system as me having it. I did mention it to Nash and he was going to see what he could do, but wasn t sure since it was from the sales side. If you are able to check on it I would appreciate it.
Thanks,
[redacted]
End of Reviewed Customer message
Begin Customer Message reviewed:
Just a quick update...Navigation still seems to be fine, but the remote start is not working as it should. I already talked to Nash and explained to him what it is/isn t doing. Basically when I remote start the vehicle it turns the climate control system off...so the remote start is kind of pointless. It will not either cool or warm up the vehicle.
The display even says climate control off. I can turn it on once I get in the vehicle, but the remote start is 100% useless if it can t cool off or warm up the vehicle.
End of Reviewed Customer message

CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
Dialed [redacted] 2 Spoke to Mr [redacted] b who stated he is on Vacation for the rest of the week. And will be making an appointment for the parts to be installed the week of 19th.
Writer spoke to Kim, Warranty Administrator. Dealer has requested assistance for payment of 3 repair orders. 7/12/13 labor for radio installation in the amount of $37.41, 7/31/13 labor for radio installation in the amount of $37.60 and 8/9/13 labor for PCM flash update in the amount of $18.71
As a one-time goodwill gesture, Chrysler will be approving this out of warranty repair. According to the dealer, the warranty costs of the repair are as follows:
Parts = $0.00
Labor = $93.72
Total = $93.72
Co-pay = $0.00
########## DIRECT-TO-DEALER ##############
Customer Care is sending this file to your dealership because a joint goodwill decision has been made on behalf of our mutual customer.
If this repair falls under the Digital Imaging (DI) process you will need to follow the DI process of submitting images or the required DI documents to the Powertrain Service Center for repair pre-authorization. Include in your comments that Customer Care is involved. Customer Care will add DM Notes to the VIN describing our decision. These notes are available to the DI group for reference.
When repairs are completed, submit your claim as you would normally.
If you need assistance with claim payment, please refer to Warranty Bulletins D-11-19, D-13-03 or D-13-11
Please update CAIR when complete.

Part # 68109987AE is needed to be ordered.
Begin Customer Message reviewed:
Hi:
The dealer replaced the trim pieces yesterday and everything seems to be good. There were some other issues, that they had to order parts for, but hopefully they won t take too long to come in. I told Nash the issues were not a big deal, so whenever they made it, they made it.
Just wanted to follow up on the reimbursement of a payment and also updating the extended warranty to a six year term. Please get back to me when you can.
Thanks,
[redacted]

End of Reviewed Customer message
[redacted] Left a message that the 5year service contract has already been place on the vehicle VIN and if customer is ok with cair being closed that the reimbursment for paymnet can be processed.
Begin Customer Message reviewed:
I just got your message, but I am in meetings most of the day so I can t take the call, sorry. As far as the payment I am fine with waiting until all issues are resolved. Not sure if you talked to Nash, but they ordered an air suspension control module and a new switch for the adaptive cruise control. Nash said both parts are on backorder, but he was going to see what he could do. I told him that there was no need to expedite them.
As far as the warranty, I got your message and do understand, but reading online I see that my warranty that you added could be extended when it is due to expire. I really would you appreciate if you could check with your manager on any other options to extend it. The milage term is fine, just would prefer the warranty to expire in 2019 instead of 2018.
End of Reviewed Customer message
Begin Customer Message reviewed:
Hi:
Just wanted to see if you are able to check on the status of the software update for the remote start system. Nash and the dealer is well aware of the problem and I was orginally told the software update for the HVAC module would be out late 2nd quarter or early 3rd quarter. It still has not been released yet which is very dissapointing since there is really no use in having a remote start if it won t either cool off or heat up the vehicle. Being that we will be coming into winter soon I would really like it to work as it was designed. Can you please check with your resources to see when the software update for teh HVAC module will be out.
Thanks

[redacted],
I spoke to SA Chis and as he is working on a rental with a NAV and seems to be having a issue getting one but is hoping the Manager of the rental company is in today and he is still working on it.
End of Status Update
Begin Customer Message reviewed:
Sounds good, thanks. Two things one weird, one good I wanted to bring

up. Yesterday on TWO occassions while driving home with nobody in front of me the Forward COllission warning system activated and started beeping like crazy...first time it ever went off..the 2nd time it actually applied the brakes, but there was not a car within 100 yards of me...little disturbing there...
2nd thing is I disconnected the battery on the vehicle for 10 min and low and behold when I connected it back up the radio was not 'locked' so it is back to where it was before uconnect talked with me yesterday....so maybe it will be fine for me to drive until the replacement radio comes in....
I am concerned though about the FCW system activating for no reason...could be a major safety issue if somebody would have been behind me when it put on the brakes...I was on the PA turnpike going 70 mph when it activated....
End of Reviewed Customer message
Writer dialed 724-295-9000 was wrong number rediaed 724-295-5000 SA/Chris was left a message explaining the customer disconnected the battery and the radio is back to where is was but now the FCW went off on its own twice and the second time it applied the brakes.
Radio is order from Dealer code 45570 Part# Z8190240AG Order number 0910U

66380 took the call.
Writer took call from customer who will take vehicle back to the dealership on 9/14/ or 9/16 would like his CA to call the dealership to have the speedometer checked up on. Customer inquired about lemon law, writer explained could send to another CM for review, customer declined loves his vehicle just wants it fixed once and for all. Customer wouls like CA to call dealership to get something comparable for him like and SUV with navigation, writer advised would authorize a third party navigation if needed. Customer would like his CA to call him before EOB at [redacted]
Begin Customer Message reviewed:
I understand that is what you recommend, but I will not continue to take the vehicle in. They are unable to provide a similar rental and it is getting to be a pain in the a@# to continue to this. They can review the speedometer issues when I take it in for everything else. I just wanted to make you aware, but we need to get this escalated more. I am getting

sick and tired of this...
I talked with another rep a bit ago, and if you could call me today I would appreciate it. I will take my Jeep in on Monday, but want an SUV as a rental. It does not have to have nav, but if they have the portable Garmin system etc that would be fine. If not I will deal without having Nav, but with the number of issues and time the vehicle has been in the shop I honestly feel once this is resolved Chrysler needs to look into sending me the equivlent of two car payments. With the time, aggrivation I have spent on this, plus let alone the number of the days the Jeep as been at the dealer this is the least that can be done.
Thanks

Writer contacting SA/Chris was advised to try and get the customer a rental for Monday and to let the customer know.
Begin Customer Message reviewed:
Thank You...I have to be at work early on Monday so I won t be able to drop it off until the afternoon.....
End of Reviewed Customer message
Dialed [redacted] customer was advised a rental will be ready and SA /Chris will contact him about the rental.
Begin Customer Message reviewed:
Hi. Hope you had a nice weekend. I talked with Chris yesterday and they are having issues still with a rental. They found a Patriot but that is too small. Also a Chrysler 200 but that s small as well. If you are able to approve a non Chrysler vehicle I m sure it will make it easier. He mentioned they had Ford Explorers etc.. If that s something you can do please let Chris know. He was hoping to find something for me by late Monday afternoon.
Also I didn t want to say anything but could you maybe mention that they are extra careful when replacing the radio? Don t want to deal with damage to the vehicle. Once was enough.
Thanks

Writer contacting SA/Chris is saying he found the customer a rental from another rental company and if the dealership can not submit through the TS CA will direct check the dealership for the rental of a chevy vehicle.
Customer: [redacted] calling to speak with any CA as JP1353 not available at this time. Call transferred to ext 66281.
Customer stated that he is upset that the he was put in a rental that is 8 years old and has 160,000 miles. Customer stated that he has only driven 5 miles and the vehicle sounds like its falling apart. Customer has requested that we find another rental for the customer especially if he is going to have it longer then a couple days. Writer advised that research will need to be done to see if there is another rental company that may have a rental that is in better shape for the customer. Customer stated that the SA did all they could. Customer would like his CA to contact him before contacting the dealership
Begin Customer Message reviewed:
Hi.
Please call me when you get in tomorrow. I called in and left a message....but I m not happy and I m sure Chris had no idea about the age, condition, miles etc. I do have a full size sedan...but it s a 2007 with 157000 miles on it. Yes I m being picky, but this is crazy. No rental company should be renting cars with this type of mileage. I told them I might need to take out of state on Friday, and they said we might need to swap vehicles as they are not comfortable with this car going far. Anyways if my jeep will be repaired by Friday fantastic. Otherwise I need a different car. I am not trying to act stuck up, but this is putting me over the edge. If Chris can t find a full size put me a mid size from enterprise. I will swap, juggle my schedule around to get kids where tet need to be in multiple trips.
I honestly hope you understand where I am coming from. Please give me a call in the am before you talk to Chris. I want to reiterate I don t think this is in any way his fault as I requested a full size sedan, but I expected it to be a newer model like enterprise has.
Thanks
End of Reviewed Customer message
Writer received call from Kim at dealer wishing to speak to Janeen about authorizations for repairs. Writer transfered to CA JP1353.

Writer received a call from SM Kim about claim payment CA advised Sm to contact the TS who worked with the SA for all the repairs to the radio.
Writer contacting SA/Chris, is saying he has address most of the customer concerns and is expecting the radio to be installed today as well. Sa was un aware of the age of the rental and feels really bad about that.
Writer dialed [redacted] Customer was apologizedto about the rental being a 2007 with 157000 miles on it but did have great news and the radio is due in today and Sa really feels like the repair will be done.
Customer is ok with staying in the rental but if his vehicle is staying later then friday morning the customer would like to swap out of the 2007 rental vehicle.
Dialed 724-295-5000 SA/Chris was advised customer is ok with the rental as long as the rental does not go past 9/20 Am.
CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted] FOR INFORMATION
Mr Milgrub called in saying he has picked up his vehicle and the remote start works but now the radio is displaying a message Can not log in-account locked.
CA will look into this can contact customer back.
Dialed 724-295-5000 SA/Chris was advised of the customer not being able to get parts of his radio to work. saying (can not log in) account locked.SA is saying to have customer contact uconnect and if the customer wants to he can come by the dealership and do it. SA will fax over the receipts for the rental and a new account to sent a direct check to the dealership.
Writer dialed [redacted] and spoke to [redacted] and customer is comfortable with contacting Uconnect.
Begin Customer Message reviewed:
Hi:
I called Uconnect and they were clueless to say the least. They opened up a ticket again and said somebody would call me in 5-7 business days after reviewing the account etc. They did verify everything on the account and said the new radio WAS registered so they really are not sure why it is not working. I do not think it is hardware related, but still annoying as it was working prior to the radio being replaced. The ticket # uconnect gave me is: [redacted].
Thanks,
[redacted]
End of Reviewed Customer message
Begin Customer Message reviewed:
Its me again...OK after doing more research on my own since Uconnect was not very helpful I think it is an actual issue with the Mobile App for Ios (Apple) devices. I went on the unconnect site to submit my concerns, but I think it will be coming to Chysler and not Uconnect, so maybe if you have any contacts it would be helpful. This is speculation, but I believe that the mobile app for Iphones, Ipad s etc is NOT compatibile with the latest software from Apple Ios7. I installed the app on an Android Device and it worked properly. Issue is I use Apple devices and I am sure many other Chrysler owners do as well. Apple pushed out the new operating system yesterday to the devices and I didn t put two and two together until now. So if you have any contacts at Uconnect that would be great. We need to get in connect with the mobile app developers and advise them the application for Apple devices needs to be enhanced/upgraded to work with Ios7.
Thanks,
Adam

Writer contacting SA/Nash, is saying the parts are all in but he would like it if the customer goes someplace else. The SA is saying the customer should have received a call like on Friday.
Begin Customer Message reviewed:
Uconnect pushed a software update out for Apple devices this weekend so the functionality from my phone is now working again....
Any update on the air suspension control module and switch yet?
Thanks
End of Reviewed Customer message
Dialed 724-295-5000 SA/Chris, is saying he would like to have the other dealership take care of the issue as his dealership did not diagnose the concern. But if the customer wants to work with his dealership to bring in and they would be happy to diagnose and resolve the issue.
Writer dialed 4[redacted] and spoke to[redacted], and explained that the parts are in.
Customer will contact the dealership to have the air suspension control module and switch installed.
Begin Customer Message reviewed:
Dropped the vehicle off at Cranberry this morning...Very weird and will def not be going back there. Pulled in, Nash asked for the keys and said enterprise was waiting. Did not say another word to me, so I can tell he is obviously upset about something, but whatever. Chris from Cochran has been so nice, understand and seems to actually care what I have to say. Nash on the other hand not a bit. So hopefully these two parts are installed with no issues today and all future work will be done at Cochran. Yeah it is kind of out of the way, but it is all about customer service and personality. Sad to say but Nash has none, doesn t seem to care at all. Kind of got that vibe from you as well when you said he is always busy when you call. Anyways if you hear anything regarding the vehicle today let me know. I am sure they will be in contact once they start working on it.

Thanks

Customer Document Reviewed.
Begin Customer Message reviewed:
Sounds good thank you!! I am really hopefull everything will be working
as designed...only took 5 months..ha...
Anyways I am hoping all is good and hoping you can review with mangement
possibly refunding me for two car payments due to the amount of time it
took for all issues to be resolved. I was orginally told in early July
that one payment would be refunded when we assumed everything was going
to be fixed by mid July....We are now at the end of September and I am
'hoping' all is good now...but took almost 10 weeks longer than we
expected. My car has been in service for well over 30 days, but the
countless hours talking with you, service departments, rental car
companies switching car seats etc...
If two payments can t be refunded if you could look into one payment and
possibly some service credits for oil changes, tire rotations etc...
Thanks,
Adam

CONTACT UPDATE - 1st Contact attempt, phone number dialed,
[redacted]
Summary of Survey
Customer states had to have the front axel replaced with 300 miles on his SRT which was kind of shocking to the Customer. Customer states the concern was fixed after a week in the shop. Customer states in auto shift mode, the shifts are rough to the point the Customer s head jerks back and forth. Customer states in order to alleviate this concern, he needs to go into sport shifting mode instead of auto shift. Customer states it seems odd that the default auto mode should be so completely different than the sport mode. Customer states he enjoys his vehicle, but that it is too rough around the edges for most people. Customer states when he is parked in his darkened garage and backing out during the daylight hours, the auto headlight switch turns on the headlights (which is fine) but also dims the rearview camera screen so much that I have to wait several seconds for it to detect daylight again and brighten back up or if the Customer is in more of a hurry, Customer states has to turn off the headlights manually so that he can see behind again. Customer states there should be some way to force the rearview camera screen to stay brightly lit when simply backing out of a garage. Customer states with

the Collision Avoidance System, there are too many false alarms. Customer states when a car ahead is turning out of his lane and slowing down the system overreacts with beeps and hard braking even when the Customer has turned off the warning system in the menus. Customer states this is a huge problem and is very annoying and jarring to have the car goes into emergency mode when there s nothing to freak out about. Customer states does not like the white stitching on the upper part of the dashboard. Customer states that it creates a visual distraction for the driver on the windshield due to the reflection. Customer states he attempted to deal with it and look past the concern, without success. Customer states he used a Sharpie and colored the stitching black, which alleviated the concern. Customer feels this is a shameful and careless design due to interfering with the Driver s view through the windshield. Customer states he took delivery of the vehicle and immediately noticed that the small speaker covers on the left and right did not match. Customer states the speaker on the right was silver with small holes and the one on the left was solid black with larger holes. Customer states this is careless assembly and quality control. Customer states the check engine light came on and the Dealer said there was a fluid leak. Customer states the Dealer fixed that and the front axel at the same time. Customer states the SRT is a large improvement in some ways over the 2013 he used to own, but it has some large concerns that should have been addressed prior to production and during assembly. Customer states the vehicle has a great engine and electronics. Customer feels the vehicle has a cool interior design.
2nd attempt made to contact customer at [redacted]. Left message advising Writer s contact phone number 1-800-763-8422 Ext. 66032. Writer advised would attempt to contact the Customer one more time on 07/08 prior to case closure.
Writer called Dealer 23578 at 847-446-5100. Spoke to Service Advisor Ken. Writer inquired if the Dealer had any additional contact phone numbers for the Customer. SA advised the only contact phone number available is [redacted] Writer thanked SA for the information.
3rd attempt made to contact customer at [redacted]. Left message advising that the survey case would be closing today due to this being the third call attempt. Writer advised if the Customer would like assistance with his concerns through Jeep Customer Care, he can always contact us at any time at contact phone number 1-877-426-5337.
CLOSED LOOP UPDATE - no need for additional follow-up.

Briefly summarize why the customer is contacting Chrysler:customer states his u connect system screen reads vehicle phone needs servicing , he wants to know what this means.
Briefly summarize what the customer is expecting: u connect error information
Agent placed customer on hold, to look for information and attempt to contact u connect
Call was lost, agent attempted to call customer and received busy signal at [redacted]
Customer called in again. Customer had a message that read vehicle phone requires service 911 and then called this number. Now the screen says transferring vehicle information. Transferred to Uconnect team Jason.
****uConnect Case Management****
Agent advised customer vehicle called us advising that the 911 needs service. CM took over call. Customer advised if he has to bring the vehicle into the dealership this will be the third time in 1044 miles. Customer stated the dealership just put a massive update on his UConnect. CM advised this is probably not related as this might be hardware related. CM advised customer vehicle needs to be diagnosed by a dealership. Customer stated he cannot make an appointment right now as he does not know what his schedule is like but wants CM to call and let them know he will be bringing the vehicle back in. Customer stated he wanted CM to email him CM s contact information. CM advised will follow up with customer one week from today on Friday July 12th.
Status update provided via email to the following email address:
[redacted]
My name is Jason and I have been assigned as your UConnect Case Manager.

Here is some information that will be helpful for you to have:
Your case number is listed above.
The UConnect Case Management telephone number is: 1-877-855-8400.
My direct extension: 4718554.
My work hours are: 8:15am - 4:30pm Eastern Time Monday - Friday.
As per our conversation earlier today please find above my contact information. I will follow up with you and the dealership one week from today on Julu 12th to see what the diagnosis was and what we are doing for you. If you have any further questions or concerns in the meantime please use the above information to contact me.
End of Status Update
DEALER UPDATE - CM contacted dealer 60458 at 727-437-0775 and spoke with SM Jaime. SM Jaime advised customer was having this problem before the update was applied. SM Jaime advised they could not pull any codes off the vehicle and can t duplicate the problem. CM advised in past experiences it has been a loose connection or a module that has gone inside the radio. SM Jaime advised at what point are they supposed to replace something. CM advised CM cannot tell SM Jaime what to do however at this point then a STAR case should be opened and have them advise what to do. SM Jaime advised would open STAR case. CM advised would follow up one week from today.
CM allowing time for diagnosis to be completed.
CUSTOMER CONTACT - CM received call from customer. Customer stated they replaced the radio yesterday and there zero changes. Customer stated this time they were able to duplicate it with 3 different people.
Customer stated it definitely is interacting with the braking system and adaptive cruise. Customer stated the entire radio will reboot. Customer stated it reboots while driving and is very random. Customer stated the navigation has completely lost customer location. Customer stated the navigation has put customer in water going in the right direction.
Customer stated all of these issues occurred no matter what state the vehicle is in, driving or in park. Customer stated the seat settings will change however nothing else will. Customer stated this started occurring within 2-3 days of taking possession of the vehicle. Customer stated there was a note in the system for a 4gig update to the UConnect system. Customer stated they did a reboot with the new computer system.
Customer stated he is scared to drive the vehicle. Customer stated dealership was going to look further into the issue and might need to put customer in a rental. Customer stated they offered him a Dodge Avenger with 50k miles on it or a low level Chrysler 200. Customer stated he bought a 50 thousand dollar vehicle and expects to get a better rental then that. Customer stated when he owned a Ford Escape and had issues the dealership gave him a Ford Escape Rental. Customer stated that is what he expects from Chrysler. Customer stated the dealership is talking with the regional person today or tomorrow. Customer stated he is upset that when STAR is contacted it takes a day or more for a response. Customer stated where is at right now is he does not trust any of the forums unless he has met the person in person. Customer stated he did not want to work with CM any longer. Customer stated it was no reflection on what CM has or has not done however customer wants to try and cut out the middle man. Customer stated he wants to be put in direct contact with STAR. CM advised this is not possible as CM talks to dealership and dealership talks to STAR. Customer advised he is staying clam through this and between customer and myself customer advised he has worked with equipment in the past and knows what's going on. Customer stated when he got the error message on the phone the first individual he spoke with hung up on him. Customer stated he was upset however did not cuss or anything. Customer stated he wants CM to look into this for him. CM advised would forward information to appropriate sources. CM advised customer at this time case will be closed since customer advised does not want to work with CM any more. Customer stated he wants case to remain open so that he can cover all his bases and contact CM back when he wants to add things to the file. CM advised if case is to remain open then CM will be in contact with dealership and will touch base with customer next week. Customer stated this was okay.
DEALER UPDATE - CM contacted dealer 60458 at 727-437-0775 and spoke with

SM Jaime. CM advised looking for an update and what we are going to do next for customer. SM Jaime advised she is not very versed with this unit. SM Jaime advised they took customer to another brand new vehicle that was the same as the customer and it was not doing the same things that the customer s vehicle was doing. SM Jaime advised the customer is giving her deadlines. SM Jaime advised it is taking STAR 23 hours to respond which is not to the customer s liking. SM Jaime advised the customer had some complaints about the back up camera and how it beeps and how he wants that to stop. CM advised SM Jaime that STAR needs to be updated with all this information. CM advised SM Jaime STAR needs to be kept in the loop as to what is going on and to be able to give directions. SM Jaime advised she is fine contacting STAR again. SM Jaime advised she is getting a lot of calls and issues with these radios. CM advised they are new radios with new technology and software and are going to have issues out of the gate. CM advised the other line of radios is older and has had time to work out the kinks. CM and SM Jaime discussed customer s concerns over a rental. SM Jaime advised she can t get customer the specific rental that he wants. CM advised CM cannot authorized a specific vehicle either. SM Jaime advised at this point the customer is making demands of the dealership. CM advised to update STAR and provided CM s contact information for contact. SM Jaime advised would update STAR right now. CM will follow up on Monday July 15th to see response from STAR.
DEALER UPDATE - CM contacted dealer 60458 at 727-437-0775. CM was advised that SM Jaime is out of the office until Thursday and CM would need to call back on Thursday July 18th to get any updates from STAR regarding this customer.
Customer called in requesting to find out the Star Case that was created for their vehicle. Agent advised the customer that the Star case was 60292843
DEALER UPDATE - CM contacted dealer 60458 at 727-437-0775 and received SM Jaime s voicemail. CM left message advising doing follow up for customer. CM advised CM is looking for any updates on STAR case. CM provided CM s contact information and requested a callback.
DEALER UPDATE - CM contacted dealer 60458 at 727-437-0775 and spoke with SM Jaime. SM Jaime advised the customer is there and has been for an hour and a half. SM Jaime advised the customer is apparently a programmer of some sort and that he is not dumb. SM Jaime advised apparently he has been on some type of forums with some type of engineer. SM Jaime advised the customer feels as though the radio does not operate the same as the stock unit. SM Jaime advised she wants somebody sent out to the dealership to deal with this customer. SM Jaime advised when the customer checkmarks a setting it does not stay. SM Jaime advised the settings do not always stay. SM Jaime advised the customer set the checkmark on the forward collision. SM Jaime advised it set and held it, turned off the vehicle waited 2 minutes and the checkmarks do not stay. SM Jaime passed the phone to customer. Customer stated when they set the settings they seem to return to 1 or 2. Customer stated it s not keeping the remote start of the VOB to unlock it or the handles. Customer stated he is able to set 1 or 2 and the seat settings did work and move. Customer stated the way the engineer explained it to him was because of cost and design, if the customer remote starts the vehicle it will go to a neutral setting no matter what customer had it set at. Customer stated the key VOBS do not recognize the preset settings that he has in his radio. Customer stated he had to go get driving and requested CM contact him back.
CUSTOMER UPDATE - CM contacted customer at [redacted] Customer stated when he has the UConnect on and presses the driver assist mode. Customer stated the tilt mirror option does not stay on. Customer stated it comes on, he touches nothing in the car, in about 15 seconds the checkmark turns off. Customer stated the same thing is happening in the forward collision. Customer stated the sound and display settings are also not staying. Customer stated the sound and display section will also not stay to the settings customer selected. Customer stated his complaints with the remote start is separate from my problems with the pushing a checkmark all on its own.

Customer stated the problem is with the software. Customer stated he purchased an Overland Summit with the towing package. Customer stated it s supposed to have every feature that is available. Customer stated it s the top of the line without being an SRT. Customer stated it does have tilt mirrors. Customer stated it does have the easy/entry exit feature. Customer stated the sensors in the front and the back and it has side warning sensors.
Customer stated the main issues are the below features are unchecking themselves:
Tilt Mirror
Forward Collison Warning
Lights and sound display for the parking sensor
Customer stated this has been happening even before the radio was replaced. Customer stated he does not feel safe driving the vehicle as he feels some of the features and software are used in emergency braking conditions and customer feels they might not work properly. Customer stated this is the 3rd attempt within 15 days for lemon law. We re on day 11. Customer stated he is paying 48k for a vehicle that he does not currently have possession of. Customer stated the dealership currently has the vehicle.
CM advised customer would do research and speak with SM Jaime and make sure the STAR case gets updated. CM advised would be in touch in the next couple of days.
DEALER UPDATE - CM contacted dealer 60458 at 727-437-0775 and spoke with SM Jaime. CM advised SM Jaime CM was speaking with customer. CM advised SM Jaime that the main issue is the options that uncheck themselves. CM advised SM Jaime that the preset is tied to the vehicle not the key and that he would not be able to set different presets to different keys. CM advised using the remote start is only going to turn the vehicle on with neutral climate control and nothing else. CM advised the when putting the key in and turning the vehicle on should only control the climate and the seat settings. CM advised the radio stations will not change by themselves. CM advised STAR needs to be updated with the new information about the options unchecking themselves. CM advised this was happening before the radio was replaced and is now happening with the new software. CM advised would follow up in a couple days after doing research.
DEALER UPDATE - CM contacted dealer 60458 at 727-437-0775 and received SM Jaime s voicemail. CM left message advising STAR case has been updated and CM is wondering if customer has been contacted. CM provided CM s contact information.
DEALER CONTACT - CM was contacted by SM Jaime. SM Jaime advised SM Jaime advised the module STAR wanted them to replace was on backorder so they took the module out of a like vehicle and installed it in the customer s. SM Jaime advised the issue is still unresolved. SM Jaime advised she updated STAR with this information and is waiting for a response from them. SM Jaime advised customer refuses to take his vehicle off the lot and is actively pursuing Lemon Law at this time. CM advised would follow up with SM Jaime in a couple days to see what STAR s response is. CM to contact customer to follow up.
CUSTOMER UPDATE - CM contacted customer at [redacted] CM received voicemail. CM left message advising customer CM has been in contact with SM Jaime and CM wishes to discuss issue further with customer. CM provided CM s contact information and requested a call back.
CUSTOMER CONTACT - CM received call from customer. CM advised customer CM spoke with SM Jaime and CM is informed on the repair of the vehicle and the fact that it did not work. Customer stated today would have been the 5th attempt to fix the vehicle. Customer stated there have been no significant changes in the state of the vehicle. Customer stated they attempted to change out the module and there is no change. Customer stated he can see it in the eyes of the service members at the dealership that they do not know what is going on with the vehicle. Customer stated he does not think it is going to get better at this point. Customer stated he is tired of the months of not having his vehicle. Customer stated he is actively pursuing lemon law at this time. Customer stated he has submitted the paper work at this time. CM advised at this time CM can forward information to our Lemon Law department who will talk to

customer about this procedure or CM has to close the case. CM advised since customer is pursuing Lemon Law CM can no longer work the case for customer. Customer requested case be forwarded to Lemon Law department. CM apologized for situation and thanked customer for his time.
Customer informed a call back is required and will take place within 1-2 business days.

*********Case Escalated to I2R**********
Reviewed Warranty History which determined this case should be escalated to I2R for case management.
***Aleshia Wallace with the I2R Customer Resolution Team is now responsible for this CAIR. If the customer should call, please request they contact Aleshia Wallace at 888-542-7239, extension 430. Thank you. ***
Contacted the customer to complete initial call. customer requested a call back in 15 mins.
Contacted the customer to complete initial call. Customer advised that he has a list of concerns with the vehicle, nut main concerns are with navigation not working properly, 911 service messages, a/c not coming automatically on when using remote start, key fob not recognized. Customer advised that since the vehicle has been in on last visit, he has received 3 calls and made 3 trips to the dealer, being advised it was repaired, and when testing in the parking lot, it was not repaired. Apologized to the customer as I understand his frustrations and concerns. Advised that I would like to review with dealer service history and also get escalated technical assistance involved. Customer advised that according to the dealer there has already been escalated assistance involved. Advised the customer I will review with dealer and follow=up no later than 7/30. Advised the customer I will be unavailable 7/25-7/29.
Contacted Fitzgerald s Countryside Chrysler Jeep, left message for Doug Service Advisor, requesting return call as Jamie Burger, service Manager, was unavailable. initial call needs to be completed.
*** If the customer should call, please request they contact Aleshia Wallace at 888-542-7239, extension 430. Thank you. ***
Contacted Fitzgerald s Countryside Chrysler Jeep, Jamie Burger, service Manager, was unavailable, Left message.
Received a call back from Jaime, Service Manager who advised that the customer is refusing to pick up vehicle as he feels it is a safety concern. Jamie advised she has been waiting on an update since STAR case was supposed to be escalated to FTS. Jaime advised on 2 repairs on file and one current RO, which is still open. Jamie advised that AM DJK18 was aware of customers case and now AM is WFS3. Jamie advised that the customer is done and has advised them that he will be seeking Lemon Law. Advised Jamie I would look into escalating the STAR case and follow-up.
Contacted Jamie, Service Manager at Fitzgerald s Countryside Chrysler Jeep. left voicemail advising that I will not be able to escalate the STAR case, as I will be digressing from case.
*** If the customer should call, please request they contact Aleshia Wallace at 888-542-7239, extension 2158. Thank you. ***

VEHICLE BRAKING FOR NO REASON
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
***** CUSTOMER EMAIL *****
I have copied and pasted below the letter I have written to the dealership that is servicing my vehicle, to be given once I drop my vehicle off on Monday 07/15/2013. I have been to the dealership multiple times for the aligning situation but have had this BRAKING issue for about two weeks. I m going to try this one last time but if nothing is corrected I m going to file a complaint with National Highway Safety Traffic Commission (NHSTF) and obtain a lawyer to look into the NC lemon law for having to bring my vehicle into the shop multiple times for the same problem without resolution. To: Kernersville Jeep Regards: 2014 Jeep Grand Cherokee Issue: 1. HUGE ISSUE – Four times now, as I'm driving down the road, the dashboard has lite up "BRAKE" in red and the vehicle will start braking for NO REASON. I will NOT have the cruise control on and two of the four times, there were NO cars around me. This would seem to be a huge safety hazard for myself and other drivers on the road. I have brought the car into the shop twice for alignment issues, which have been corrected and, as well, brought up the defect issue once. I have contacted Chrysler Jeep directly about this problem and they have recorded the issue. I'm being told to call them once I drop the car off and they will contact you. As well, they have informed me to tell you that if you could not find the root cause of the issue that they should be contacted. Thanks! [redacted]

Dear C[redacted]
Thank you for contacting the Jeep Customer Assistance Center.
Our records show that you have contacted us by telephone and we have addressed your concern. We have updated your file to reflect the latest information you provided in the email message. Should the dealership be

unable to diagnose the issue and have it corrected, we have a special team of engineers and technicians known as 'STAR'. Should the dealership be unable to diagnose or correct the issue, we can dispatch this team to have the vehicle thoroughly inspected and diagnosed.
If your concerns have not been addressed, or you have other concerns, please email or contact the Chrysler Group Customer Care Center by telephone at 1-877-IAM-JEEP (426-5337).
Thanks again for your email.
Sincerely,
Tyler
Customer Service Representative
Jeep Customer Assistance Center
***** END OF CAC EMAIL *****
Customer called in stating that the dealership stated they could not duplicate the issue. Agent called the dealership to see if they contacted STAR for the customer, but the service deptartment was closed so agent advised the customer of the case number and advised the customer to call the dealer to see what Star has advised and if he had any other issues an agent would be able to address the issue further at that time.

Briefly summarize why the customer is contacting Chrysler: Customer states that his ongoing symptoms with his braking system has just happened again this morning after he has been to the dealer yesterday. Again customer said that the EVIC shows a message stating 'brake' and then the vehicle starts to lose propulsion as if braking on its own.
Briefly summarize what the customer is expecting: Writer contacted dealer and reached SA Tom at Kernersville CJD. Tom stated that this week was the first time they have been made aware of this issue and that, as of yet, they have been unable to duplicate the condition. Tom suggested that the customer bring in the vehicle at his convenience to the dealer and that, when he does, he should leave the vehicle running to enable the service techs to review what s going on under real time conditions. Writer returned to customer with this suggestion. Customer indicated that dropping by the dealer with the vehicle involves some inconvenience. Customer states that he has brought it in for servicing four times and he wants some resolution on this given the seriousness of the problem. Writer indicated that his vehicle file will be escalated to a case manager to further assist the dealer in pinpointing the root cause and resolving the concern.
Customer advised a call back is required and will take place within one business day by COB their time

Spoke with customer informed me of the braking issues he has had with his vehicle. Customer stated that he will be driving and the vehicle will automatically start applying pressure to the brakes and on the dash it will state alert brake. Customer stated this is dangerous and he is afraid he may be rear-ended. Customer stated this is the only issue he is having with the vehicle. Informed customer I will follow-up with the dealership tomorrow 7/18/13 to see if they have a data recorder to put in the vehicle. Apologized to customer for the inconvenience. Apologized to customer for the inconvenience, as I can certainly understand his/her frustration and/or concerns. Advised customer that his case has been forwarded to me for Special Handling to assist with vehicle repair per the Terms of the Warranty, including Escalated Technical assistance, parts expediting and Rental authorization if necessary. Advised customer that I would like to review his case with the Dealer and will call him back as soon as a plan of action has been assessed towards a resolve, if he/she would allow me the opportunity to do so. Customer accepted my offer and was satisfied with plan of action. Customer had a pleasant demeanor during the call and expects to hear back from me by 7/18/13.
Spoke with Service Advisor Laurie regarding the braking issue customer has been experience. She did inform me they have not been able to duplicate the customer s concern. Inquired if they are able to put a data recorder in the vehicle and when can the customer bring the vehicle in, stated she would need to speak with her Service Manager John Powell and she will have him contact me, provided her my contact information and

thanked her for her time.
Left voicemail for Service Advisor Laurie, requested a return phone call and provided my contact information. Advised I spoke with her 7/18/13 and she advised she would have her Service Manager John Powell give me a return phone call advised I have not heard back from him or her.
Left voicemail for Service Director John Powell requested a return phone call, provided my contact information. Informed him of the issue the customer is experiencing. Did advise I contacted Service Advisor Laurie on Thursday 7/18/13 and I was informed she was going to provide him my contact information and he would follow-up with me regarding the data recorder. Thanked him for his time.
Email Correspondence to Customer:
Good Afternoon,
This is LaTasha with Chrysler your case manager, I have tried to reach you on [redacted] and was not able to leave a voicemail due to your voicemail has not been set-up. I wanted to provide you an update on the status of your case. I have contacted the dealership 3 times and I am waiting for a return phone call from the Service Director John Powell regarding the data recorder. On 7/18/13 I spoke with Service Advisor Laurie who stated she would have to escalate my request to her Service Director John. I am yet to hear back from either one and I have left both messages today. I will allow them time to respond to my request and give me a call once I have an update I will contact you in the meantime if you need me please contact me @ [redacted] Thank you for your patience.
Left voicemail for Service Director John Powell requested a return phone call and provided my contact information. Informed him I left him a voicemail on Monday 7/22/13 regarding the customer s vehicle concerns. Informed him I am with Chrysler and customer s case has been escalated up to me for special handling. Inquired on data recorder to be placed in the vehicle. Thanked him for his time.
Left voicemail for Service Advisor Laurie requested a return phone call, informed her I spoke with her on Thursday 7/18/13 and she advised she would have the Service Director John Powell contact me regarding my request. Informed her I have not heard back from him or her regarding the customer s vehicle concerned. Requested a return phone call at her earliest convenience. Provided my contact information and thanked her for her time.
Called customer @ [redacted] unable to leave a voice message due to voicemail is not set-up. Emailed customer on 7/22/13 email ([redacted] was returned. If customer calls in please update the email address and provide customer my contact information toll free # 1-888-542-3475 extension 2152. Will follow-up with customer on 7/26/13.
Received voicemail from Service Director John Powell, returned his phone call and received voicemail. Left message requested a return phone call and thanked him for his time.
Left voicemail for Service Director John Powell requested a returned phone call inquired on the status of data recorder. Thanked him for his time.
Spoke with customer informed him I have tried to reach Service Manager John Powell and we have been playing a little phone tag. Inquired if he has heard from the dealership and customer stated no. Also, stated he hasn t had any brake issues since we last spoke on 7/17/13. Informed customer I have also tried to reach him and I was not able to leave a voice message because his voicemail was not set-up, advised I emailed him and it was returned. Customer stated he just set-up his voicemail and now I should be able to leave him a message if need be. He also provided me the correct email address [redacted].state.edu thanked customer for the updated information. Customer also stated he would be willing to go to another dealership, advised him if I don t hear back from current dealership by Monday 7/29/13 we try another dealership. Customer had pleasant demeanor. Thanked customer for his patience and his time.
Left voicemail for Service Manager John Powell requested a return phone call and inquired if he will be able to put a data recorder on the customer s vehicle. Thanked him for his time.
Left voicemail for Service Manager John Powell requested a return phone

call. Provided my contact information and thanked him for his time.
Spoke with customer advised him I have been unable to speak with Service Director John Powell regarding the data recorder. Inquired if customer is willing to try another dealership, customer stated he would be ok with that. Informed him the closest dealership to him is Ilderton Dodge Chrysler located @ 701 S. Main St. High Point, NC 27260. Customer stated he knows where the dealership is located. Informed customer let me contact the dealership to see if they have a data recorder and will call him back with an update. Thanked the customer for his patience.
Contacted IIdeton Dodge Chrysler @ 336-841-6100 left voice message for Service Manager Bob Shore inquired on a data recorder and explained customer s concern. Provided my contact information and thanked him for his time.
Left voicemail for Service Director John Powell requested a return phone call and inquired on customer s RO history and if he will be able to put a data recorder on the customer s vehicle. Provided my contact information. Thanked him for his time.
Contacted IIdeton Dodge Chrysler @ 336-841-6100 left voice message for Service Manager Bob Shore inquired on a data recorder and explained customer s concern. Provided my contact information and thanked him for his time.
Emailed Area Manager JAH175 for assistance.
Spoke with Service Manager John informed him of customer s concerns. He stated that they were unable to duplicate the customer s issue. I inquired on a data recorder he stated they only have one and it is currently in another customer s vehicle and he is not sure if the data recorder is compatible with the 2014 vehicles. Also, stated it would only state the brakes were applied and wouldn t tell you why. Inquired on what is his best recommendation for the customer, stated unless it is an active code there is nothing he can do at this point, but if the customer has another issue just drive the vehicle to the dealership and no appointment would be necessary. Went over RO history with the dealership and there have not been any repairs regarding the customer s issue. Thanked him for his time.
Spoke with customer informed him of my conversation with Service Manager John customer stated he was almost hit on Sunday 8/4/13. The vehicle started braking on its own no warning lights came on on the screen it read Brake in bold letters. Customer worried he is going to cause an accident in vehicle and is nervous to drive the vehicle. Customer wants to be taken out of his lease and wants something else. Informed customer I will contact him tomorrow when I can determine the best course of action. Customer agreed. Apologized to customer for his frustration.
Left voicemail for Service Manager John informing him of the incident customer had on Sunday 8/4/13. Requested a return phone call or for him to contact the customer and have him bring the vehicle in. Provided my contact information and thanked him for his time.
Spoke with Service Advisor Laurie informed her of customer s current incident and when can the customer bring the vehicle in for diagnosis. Stated customer can bring in @ any time. Inquired if John Powell was available and she stated he is on vacation till next week.
Left voicemail for customer requested a return phone call. Advised I spoke with Service Advisor Laurie and informed her of his vehicle concerns inquired on when he could bring the vehicle down for diagnosis informed customer Laurie stated he can bring the vehicle down at any time. Informed customer to contact me when has dropped off his vehicle and provided my contact information. Thanked him for his time.
Left voicemail for customer inquired if he took vehicle to dealership for diagnosis. Requested a return phone call and provided my contact information. Thanked the customer for his time.
Left voicemail for customer inquired if he has spoken with the dealership and he has taken the vehicle down for diagnosis. Advised to contact Service Advisor Laurie and requested a return phone call. Thanked him for his time.
Spoke with customer stated he has not spoken with Service Advisor Laurie at this time, but will give her a call later today when he gets home from work. Advised him it may be easier for him to drop his vehicle off in the

evening advised him to set-up appointment and give me a call once appointment has been made. Advised I have approved to put him in a rental. Authorized customer to be placed in a CDJ Rental or up to five days at $35 per day while vehicle is in for Service, which does not include Insurance or gas. Thanked the customer for his time.
Left voicemail for customer inquired if he took his vehicle in for diagnosis and repair. Provided my contact information and requested a return phone call. Thanked him for his time.
Spoke with Service Advisor Lenny inquired if customer has an appointment scheduled for diagnosis of his vehicle concerns stated customer does not have an appointment and last time vehicle was in was on 7/15/13. Thanked him for his time.

Writer left a voicemail for the Service Manager (SM) Ron at 60439. Writer requested information on what is going on with the customer s vehicle.
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted] Left message. Writer informed the customer that additional information needs to be gathered from the dealership. Writer informed the customer that a call [redacted] requesting to speak to case manager. CM not available. Writer transferred call to CM MP977 for further assistance.
Email address is: [redacted]
Writer Mp977 took call from customer and he stated that he is so frustrated that everything is falling apart on this new vehicle.
Customer stated that he is working with Curtis SA and does not like the SM.
Customer stated that he is terrified and cannot fathom the idea of his brand new vehicle actually needing to be painted and having the flares all replaced. Customer stated that there is a laundry list of repairs that need to be done. He does not want to wait for Weeks or years to get this taken care of.
Customer alleges that if it cannot be repaired in a short time and get all the things repaired then he will be looking at asking for buyback).
Customer stated that he does not want to go that route if does not have to. He had a buyback already from us and does not want the dealership to think that he is a crazy customer.
Customer alleges also that he was placed in a loaner which was nice, however he does not fit in the loaner. He is seeking a larger loaner vehicle if possible.
****
*****
Customer alleges that Jeep has done one thing right and that would be to call the customer s before they call in.
Customer applauds us for that.
Writer advised that we will get this information to the case manager and she will follow up
DEALERSHIP:
Voicemail received from the SM Ron at 60439. SM requested a call back at 630-573-5353 ext 106 in regards to the customer.
CUSTOMER:
Voicemail received from the customer requesting a call back at [redacted]
CUSTOMER:
Voicemail received from the customer stating that he spoke with the Service Advisor (SA) Curtis at 60439. Customer stated that the SA provided him with a list of parts that need to be ordered and some of them are on backorder. Customer stated that he just wants his vehicle back however he is afraid to drive it the way it is. Customer stated that he is going on a trip this weekend and he needs to be able to tow with it. Customer stated that he either wants his vehicle repaired or replaced at this point. Customer requested a call back with any information with what we can do to assist.
DEALERSHIP: Writer attempted to contact the SM Ron at 60439 however was unavailable. Writer left a voicemail for the SM requesting a call back in reference to the customer.
Writer was informed that the General Manager (GM) will not be available until after 11:00 CST.
DEALERSHIP: SM Ron at 60439 called in. SM stated that the customer purchased a demo vehicle and he got a better deal on the vehicle for that reason. SM stated that the flare moldings and interior trim pieces need to be replaced. SM stated that he is not aware of anything that is currently on backorder for the vehicle however he will look into it and make sure. SM stated that they are looking to have the vehicle completed by the end of the day. SM stated that the customer can drive the vehicle at any time. SM stated that the vehicle is not disabled. SM stated that they were working with the customer at a later date to schedule an appointment with the body shop. SM stated that he would e-mail the part

information when available.
DEALERSHIP: Writer contacted the SM Ron at 60439. SM stated that they got some repairs completed today. SM stated that the majority of them will come in tomorrow. SM stated that the door trim panel is on backorder. SM stated that as soon as he gets information he will send it to me. SM stated that the customer will be fine to drive the vehicle this weekend.
CUSTOMER: Writer contacted the customer at [redacted]8. Writer informed the customer that parts had come in today and they got some of them taken care of. Writer informed the customer that the majority of the parts should be in tomorrow. Writer informed the customer that it appears that one part is on backorder. Customer stated that the dashboard is locking up. Customer stated that it is an electrical concern. Customer stated that he is concerned that while he has the vehicle that the wheel flares will come off while driving down the road. Writer informed the customer that contact with the dealership will occur in regards to the wheel flares to make sure that they will not be a concern while he has the vehicle. Customer stated that he is supposed to leave on 7/26 however he will need to wait until he has his vehicle back. Customer stated that he will be back on 8/2. Phone call dropped.
Writer called the customer back and left a voicemail stating that a call back will be made on 7/26 after speaking with the dealership.
DEALERSHIP:
Writer left a voicemail for the SM Ron at 60439. Writer requested if the parts made it into the dealership.
DEALERSHIP: SM Ron at 60439 called in. SM stated that not all of the parts made it in. SM stated that the parts have been shipped however they will not be at the dealership until 7/29. SM provided the part number for the backordered part: 68143075AB. SM stated that there is nothing on the vehicle that will come off if he drives it. SM stated that in regards to the wheel flares they are waiting for corporate to come back and tell them what to do. SM stated that all of the parts that have come in are already installed and the customer can come and get the vehicle. Writer informed the SM that contact with the customer will occur to let him know that he can go get the vehicle.
CUSTOMER: Writer contacted the customer at [redacted]. Writer informed the customer that the parts that have made it in have been installed. Writer informed the customer that the dealership has made sure that everything on the vehicle is secure enough that it will not fall off while driving. Writer informed the customer that the case will be sent to parts expediting to get the part there quicker. Writer informed the customer that updates will be provided as they become available. Writer informed the customer that the dealership is still working with STAR in regards to the body work and the direction that they need to go. Customer stated that he will be back in town on 8/1 and will drop the vehicle off at the dealership on 8/2 for further work.
Will follow up with the customer on 8/2.
Per GPOP ETA is for 8/8.
CUSTOMER: Writer contacted the customer at [redacted]. Writer informed the customer that the part ETA is for 8/8. Customer stated that he is taking the vehicle back to the dealership. Customer stated that more parts have come in for the repair of the dealership. Customer stated that he has noticed that an interior panel is a different color then the rest of the interior. Customer stated that parts on the back of the rearview mirror one of them are a different texture than the other one and the grill. Customer stated that there is another part that needs to be ordered and he is concerned that they will be on backorder. Writer informed the customer that contact with the dealership will occur on 8/5 to see if any other parts that have been ordered are on backorder. Writer informed the customer that a call back will be made on 8/5 after speaking with the dealership.

Customer states that is main issue is getting a rental as the dealership is looking at his vehicle. Customer would like to know about their first car payment they needed to pay for but needs a rental first. Writer advised the customer that we can look into a rental but will need to call the dealership. Customer states to speak with Curtis.
Writer called Dealer 60439 to speak with Service Manager Ron. Sm Ron advised that the repair is only a minor flair and a windshield crack that his insurance will pay for. SM Ron does not want to assist the customer with a rental.
Writer called customer. Writer advised that we would be able to assist with 5 days of rental through reimbursement. Writer advised the customer that when he picks up a rental that Chrysler will assist with $35 per day for a Chrysler vehicle and $20 for a non-Chrysler. Customer advised that he will go and pick up the rental.
Scheduled Delivery:
Monday, 08/12/2013, by 10:30 A.M.

UPS[redacted]
CUSTOMER:
Voicemail received from customer stating that he dropped his vehicle off however he is going to go rent a vehicle. Customer stated that he has already made the first payment on a vehicle that has been at the dealership most the time.
CUSTOMER:
Voicemail received from the customer stating that he wants a call back in reference to his vehicle. Customer stated that he is not getting any assistance from the dealership. Customer stated that he wants to know what Chrysler is going to do to help him.
DEALERSHIP: Writer contacted the SM Ron at 60439. SM stated that they are still waiting on parts. SM stated that there are some scratches and dents that are going to be looked at. SM transferred the phone to the parts department to get additional information.
Writer spoke with Derrick in parts. Derrick provided part number: 1XN97LU5AA that is a seat adjust shield that has no ETA. Derrick stated that for the seat adjust shield that expediting had to push the order through due to it stating that it was an export part. Derrick provided the part number: 5PS42LU5AA that is an arm rest and it has an ETA of 10/15. Derrick stated that both orders are in special handling. Derrick transferred the call to SA Curtis for further assistance.
SA stated that they have someone coming out to look at the scratches and dent in the vehicle on 8/15. SA stated that they are still waiting on the grill and some trim panels.
CUSTOMER: Writer contacted the customer [redacted] Writer informed the customer that the dealership has someone coming out to look at the vehicle s scratches and dent on 8/15. Writer informed the customer that the dealership is having concerns with the order of two different parts on the vehicle. Customer stated that there is a brand new Summit at the dealership that has all of the parts needed for the repair of the vehicle. Customer stated that he would like to see the vehicle either his or the parts swapped out for his vehicle. Writer informed the customer that a call to the GM will be made to see if it is something that he would be willing to assist with however as the vehicle is the dealership s vehicle it would be their decision. Customer stated that the vehicle is falling apart and he wants his vehicle repaired quickly. Customer stated that he will have nothing to do with the SM at all. Customer stated that he is embarrassed whenever he has someone in the vehicle. Customer stated that he has made his first car payment and the dealership has had it more than he has. Writer informed the customer that his vehicle payment is something that we may be able to assist him with. Customer stated that the dealership is not getting back to him in reference to any information on what is going on with his vehicle. Customer stated that some of the repairs need to be done at a body shop however he does not want any repainted parts on his vehicle. Customer stated that he has informed the dealership but wants it told to them again that he does not want his vehicle repainted. Writer informed the customer that the dealership will be notified that he does not want his vehicle painted in any way. Writer informed the customer that a call back will be made by 8/14 after getting hold of the GM and the service department.

DEALERSHIP:
Writer left a voicemail for the General Manager (GM) Carlos at 60439 due to him not being in yet. Writer requested a call back in reference to the customer.
DEALERSHIP: Writer contacted the GM Carlos at 60439. GM stated that using parts out of another vehicle is not something they can do right now because it is the only Summit they have on the lot. GM transferred the call to service for more assistance.
Writer attempted to speak with the SM Ron however was informed that he is unavailable.
Writer spoke with SA Curtis and informed him that the customer is requesting that there be no paint repairs completed on the vehicle.
CUSTOMER: Writer contacted the customer at [redacted] Customer stated that the GM had contacted him in regards to his concern. Customer stated that most of the repairs are workable however his main concern is getting the cladding taken care of on the vehicle this week. Customer stated that he has also noticed that the speakers are different in the doors. Customer stated that he can send in the documentation for the first months payment. Writer informed the customer that the documentation link is only good for 7 days. Customer requested that the documentation link not be sent until he is ready to send it. Customer stated that there is a concern with the paint and the primer coming through however is unsure as to how that will be repaired without the vehicle being painted. Customer stated that he is more upset with the vehicle just sitting at the dealership and nothing is getting done. Writer informed the customer that a call to the dealership will occur and a call back will be made on 8/15 after speaking with the dealership.
DEALERSHIP: Writer contacted the SA Curtis at 60439. SA stated that the cladding is a plastic piece that goes over the wheel well. SA stated that if they took them off for now the truck would not look good however they are unsure as to whether the part can be put back on or needs to be replaced. Writer informed the SA that the customer s concern is mainly with the cladding. Writer informed the customer that the customer would like to have the cladding taken care of by the end of the week as he needs his vehicle next week for work. Writer informed the SA that a call back will be made on 8/15 to check on the progress of the vehicle.
DEALERSHIP: Writer contacted the SM Ron at 60439. SM stated that the body shop has been out and the dent has been taken care of in the vehicle. SM stated that the cladding on the vehicle is done. Writer informed the SM that the customer is going to need his vehicle back for next week.
CUSTOMER:
Writer left a voicemail for the customer at [redacted] Writer informed the customer that the dealership has stated that the body shop came out and the dent and the cladding has been repaired on the vehicle. Writer informed the customer that a call back will be made on 8/19 with an update on the parts.
CUSTOMER: Voicemail received from the customer stating that he went and looked at his vehicle. Customer stated that he found the wheel flares in worse shape than what they started. Customer stated that the adhesive that keeps these together aren t doing the job. Customer stated that he looked at other Summits at another dealership and found the same concern that he is having with his. Customer stated that the wheel flares have been reaffixed with a compound to stick them back on but it looks bad. Customer requested a call back at [redacted]
Pending parts receipt for 5PS42LU5AA
DEALERSHIP: Writer contacted the SM Ron at 60439. SM stated that the customer is supposed to be picking the vehicle up today. SM stated that the left front wheel flare was taken care of this morning as they did not have the right adhesive for it yesterday. SM stated that the rest of them are intact.
CUSTOMER:
Writer left a voicemail for the customer at [redacted] Writer informed the customer that the dealership had ran out of adhesive yesterday and they had completed the left front wheel flare this morning. Writer

informed the customer that the dealership is under the impression that he is going to get his vehicle today. Writer informed the customer that a call back will be made on 8/19 with an update on the parts that are on backorder.

DEALERSHIP: Writer attempted to contact the SM Ron at 60439 however he was on another line.
Writer spoke with SA Curtis who stated that the vehicle was picked up on 8/16 and he is dropping the vehicle back off on 8/23. Writer informed the SA that the seat shield does not have an ETA however the arm rest has an ETA of 9/3.
CUSTOMER: Writer contacted the customer [redacted]. Customer stated that the concerns that he wanted addressed have been taken care of however there are a list of new concerns. Customer stated that he has e-mailed the dealership with the concerns with the vehicle. Customer stated that the radio is still rebooting itself and the clock will not keep time. Writer informed the customer that an update is in the works for the radio concern however more investigation will have to be done to see if his vehicle is one that is involved. Customer stated that the front left wheel flare is still coming off. Customer stated that he had gotten some directions from a friend on how to take the center console off so that he can repair it himself. Customer stated that he received a message on his display that he phone needs to be serviced. Customer stated that the front left fender has scratches where they repaired the flares. Customer stated that the wheel flares are something that he will have to deal with because he feels that they are a design flaw. Customer stated that both headlights are fogged now and need to be replaced. Customer stated that the blind spot detection seems to be progressively getting better. Customer stated that he is unsure if the dealership is going to be assisting with a rental or a loaner vehicle during the repairs. Writer informed the customer that a call to the dealership will occur to see if they will be assisting with the rental vehicle. Customer stated that he likes the appearance of the vehicle and wants to love his vehicle however he just wants it fixed. Customer stated that when he gets back into town he will fax over the receipts for the rental vehicle.
Customer provided e-mail address: [redacted]. Writer informed the customer that the fax number will be e-mailed to him. Writer informed the customer that a call back will be made by 8/21 with information on the radio and the rental vehicle.

CUSTOMER: Writer contacted the customer at [redacted]. Writer informed the customer that the dealership is checking into the radio to see if the update that is being worked on is in relation to his radio. Writer informed the customer that as the vehicle is drivable and they do not currently have parts to install on the vehicle that it would sit there without any work being done. Writer informed the customer that the dealership would prefer until a number of parts have come in so that they can get the vehicle in for repairs all at once as opposed to the vehicle sitting at the dealership, not being driven while waiting on parts.
Writer informed the customer that the dealership has ordered the second headlight for the vehicle. Customer stated that he would like to be notified when the parts come in so that he is aware that they are there. Writer informed the customer that a call to the Parts department will be made to see how the customer is notified when parts come in for repair.
Customer stated that he is having concerns with the vehicle shifting hard. Customer stated that it is worse in eco mode, that it idles in low gear and feels like it is going to die. Customer stated that he will turn eco mode off and when he starts the vehicle again eco mode is back on. Customer requested if there is a way to lock eco mode so it doesn t turn on every time the vehicle is started. Writer informed the customer that additional investigation needs to be completed on his requests. Writer informed the customer that a call back will be made by 8/23 with any additional information.
DEALERSHIP: Writer contacted the Parts Manager (PM) Derrek at 60439. PM stated that if the part was ordered on a repair that the SA would contact the customer when the part comes in.
25 PCS expected
DEALERSHIP: Writer contacted the SM Ron at 60439. SM stated that all of the vehicles have the same characteristic with the eco mode and the shifting. SM stated that the eco mode will turn on every time the vehicle turns on. SM suggested that it may not come on if he sets it up with the

memory of the vehicle along with the seat adjustments. SM stated that he is unsure if the customers vehicle has the memory option. SM stated that he has never driven the vehicle without the eco mode on and he would need to try it to determine if it does occur.
CUSTOMER: Writer contacted the customer at [redacted]. Writer informed the customer of the information on lines 476-487. Customer requested if there was a software push on the vehicle where the software was updated wirelessly. Customer stated that he got into the vehicle this morning and everything was back at factory settings. Writer informed the customer that the information was not found that the software update occurred however contact with the dealership will occur to see if they are aware of anything that could have occurred. Writer informed the customer that a call back will be made by 8/23 with any available information.
DEALERSHIP: Writer contacted the SM Ron at 60439. Writer informed the SM that the customer had a concern this morning with the vehicle being back to factory defaults. SM stated that it is possible that an update had occurred however he is not aware of any current updates. SM stated that it may also be the wireless module in connection to the memory and the clock and radio. SM stated that he would look into the information on the module.
CUSTOMER: Writer contacted the customer at [redacted]. Writer informed the customer that the dealership is not aware of a software update push but it is possible that it happened. Writer informed the customer that the concerns could be in relation to the wireless module. Writer informed the customer that the SM is looking into the information. Customer stated that he had received an error message on the phone receiver. Writer informed the customer that a call back will be made on 8/26 after speaking with the dealership.

CUSTOMER:
Writer left a voicemail for the customer at [redacted]. Writer informed the customer that a call back will be made on 9/3.
CUSTOMER:
Voicemail received from the customer requesting a call back.
CUSTOMER: Writer contacted the customer at [redacted]. Writer informed the customer that one of the parts made it into the dealership. Customer stated that his vehicle is at the dealership right now. Customer stated that there is something wrong with the radio programming still. Customer stated that the dealership had performed an update on it and it is still not working. Customer stated that his vehicle also was driving down the road with nobody around him and it stopped on its own. Customer stated that the dealership had informed him that it is possible that there is a concern with a module in the vehicle. Writer informed the customer that contact with the dealership needs to occur to see what update was put on the vehicle as there is an update that will be coming out soon. Writer informed the customer that additional information needs to be gathered from the dealership on the brakes. Writer informed the customer that a call back will be made by 9/5 with any additional information.
DEALERSHIP: Writer contacted the SM Ron at 60439. SM stated that the update for the radio did not work. SM stated that they had installed the update Revision C into the radio. SM stated that they had sent information to STAR however he has been working with his AM and the TA in regards to the concerns with the radio.
CUSTOMER: Writer contacted the customer at [redacted]. Writer informed the customer that the dealership is getting additional information from the TA and the AM. Customer stated that he received a call about a survey that he had filled out. Writer informed the customer that typically when a survey is taken we call the customer to make sure that everything is all right. Writer informed the customer that a call to the dealership will occur on 9/6. Writer informed the customer that a call back will be made on 9/6 after speaking with the dealership.
Caller [redacted] requesting to speak with Case Manager.
He stated vehicle is at the dealer now.
transferred to nic LV162
CUSTOMER: Customer called in. Customer stated that the dealership had informed him that parts specifying is saying that the right part for the vehicle is the wrong part. Customer stated that there is supposed to be a decorative trim around the tweeter speakers and specifying is saying that the feature is only available on European model. Customer stated that the dealership currently has 10 Summits in stock and all of them have the trim ring around the speakers. Customer stated that he will not pick his vehicle up until after it is completed and he wants the vehicle the way that it is supposed to be. Writer informed the customer that additional research needs to be done to check on what we can do to assist as specifying is involved. Writer informed the customer that a call back will be made once additional information is gathered.
DEALERSHIP: Writer contacted Laura in the parts department who provided the parts number for the parts ordered: 1JW74PRM. Laura provided the part number for the part that specifying is stating should be on the vehicle: 5LX58DX9AA. Laura stated that the part that was ordered is chrome and the part that specifying is stating should be on the vehicle is black. Laura stated that all the parts that have been ordered for the vehicle has been pushed through specifying because they have not been the right parts for the vehicle.
DEALERSHIP:
Writer left a voicemail for the SM Ron at 60439. Writer requested information on what part is being ordered for the trim around the tweeter speakers.
DEALERSHIP: Writer contacted the SM Ron at 60439. SM stated that the concern with the tweeter speakers was resolved as they took them off of

another vehicle. SM stated that the only concern that the customer is having right now is with the radio. SM stated that they are waiting for authorization to replace the radio. SM stated that he will need assistance with the rental vehicle that the customer is currently in. SM stated that he came and got the vehicle on Friday 9/6 and will be in it until Wednesday 9/11. SM stated that the customer needed something he could tow in. SM stated that at this time he does not know how much the customer is being charged.
CUSTOMER:
Writer left a voicemail for the customer at [redacted]. Writer informed the customer that the dealership was able to resolve the concerns with the part. Writer informed the customer that the SM had stated that he is out of town until 9/11. Writer informed the customer that a call back will be made on 9/12 after he gets back into town.
OMC# 87220138Order# 0809LB FOR PN: 5PS42LU5AA IS RESOLVED
OMC# 87220138Order# 0809LB FOR PN: 5PS42LU5AA IS RESOLVED
DEALERSHIP: Writer contacted the SM Ron at 60439. SM stated that the customer has not picked up his vehicle yet. Customer stated that they got the radio installed and most of the trim pieces installed as well. Writer informed the SM that a call back will be made on 9/13 to see if the customer was able to pick the vehicle up.
CUSTOMER: Writer contacted the customer at [redacted] however call dropped.
Writer contacted customer back. Customer stated that he will pick the vehicle up either tonight or tomorrow morning. Writer informed the customer that a follow up will be made on 9/13 to make sure that everything is all right so far.
[redacted] called requesting to LV162. Writer warm transferred customer to CM LV162 for further handling.
CUSTOMER: Customer called in. Customer stated that he spent an hour with the dealership over his vehicle this morning. Customer stated that the vehicle s wheel flares are falling off the vehicle again. Customer stated that the paint is falling off where the flares have been reinstalled. Customer stated that he has been to three different dealerships and the vehicle has the same concern anywhere he goes. Customer stated that he has also tried to trade in his vehicle however they are not willing to give him what he currently own on it. Customer stated that there is also a concern with the Bluetooth on the vehicle as well. Customer stated that he would like his vehicle repaired however if they cannot repair it to his satisfaction then he will want Chrysler to replace his vehicle. Customer stated that if Jeep will not do either then he has a lawyer that he has already spoken with however he does not want to go that route. Writer informed the customer that a call back to the dealership will be made to see if they will get back in contact with our technical assistance team and see if there is an alternative repair for the wheel flares. Writer informed the customer that a call back will be made by 9/17 with any information.
DEALERSHIP: Writer contacted the SM Ron at 60439. SM stated that the flares are not falling off however with how big the part is he does see that the double stick tape that is being recommended for repair is not working. SM stated that they had repaired the control head and they wanted to make sure that the instrumentation was taken care of on the vehicle before addressing the flares. Writer informed the SM that the customer had stated that if nothing is going to be done with the flares that he will be looking at Chrysler to repurchase the vehicle. SM stated that he will input information in the STAR case to see if there is a different repair that they can attempt on the wheel flares.
DEALERSHIP: Writer contacted the SM Ron at 60439. SM stated that on 9/6 they were having concerns with DealerConnect and therefore is unsure whether the STAR case got updated. SM stated that he will make sure that the STAR case gets updated.
CUSTOMER: Customer called in. Customer stated that he has made sure to keep the dealership up to date on the concerns with the vehicle. Customer stated that he has been taking video of the concerns with his vehicle as well. Customer stated that the concerns with the video in his vehicle have been fixed however there are new concerns with it. Customer stated

that the dash now sticks in aero and flashes: raising. Customer stated that when the dash starts flashing the vehicle feels like it has no suspension. Customer stated that he feels that it is a safety concern with the vehicle. Customer stated that at this time with all of the concerns he is afraid of his vehicle. Customer stated that he loves his vehicle however he does not like to drive it. Customer stated that he does not like the shifter in the vehicle. Customer stated that the wheel flare is now flapping again. Customer stated that there is water buildup in the headlights again. Customer stated that he doesn t want to trade the vehicle in due to him not getting what he paid back on the loan. Customer stated that he wants a newer like vehicle for his without all of the accessories. Writer informed the customer that due to the nature of his request that he will be sent to our Care Analyst Team who will review his case and get back to him in one to two business days.
********** 91L Review **********
*********Case Escalated to I2R**********
Reviewed Warranty History which determined this case should be escalated to I2R for case management.
Initial call customer stated he has the vehicle and he is still having the same concerns with the vehicle. Customer stated he feels the issues are a safety concern. Customer stated the vehicle has been to the dealership at least 10 times and it is not repaired and continues to have the same issues and now customer has some new concerns. Customer stated at his point he is looking for a replacement. CM advised at this time a replacement is not being offered but I am here to assist with the repair process and if at any time the vehicle cannot be repaired after escalating to all available resources then we can review the case again and make further recommendations at that time. Customer stated he will take the vehicle to the dealership but it is getting to the point that he feels he should get his lawyer involved because of all the times the vehicle has already been to the dealership. CM advised customer I will contact the dealership to get RO history, see how I can be of further assistance and find the best action plan for his vehicle. *****Follow up with dealership on 9/20/13 to get RO history**********
[redacted] F called in stating that he is wanting to speak with his CM. Customer is frustrated that he has not received a call from anyone in a week.
[redacted] called requesting to speak to CM AG1341. Customer is very upset as he has not heard of any update to his request. Writer provided number to I2R 800-215-6230.
CUSTOMER:
Voicemail received from the customer stating that they have not heard from anyone yet. Customer stated that the dealership will not touch the vehicle anymore as they are not getting paid for the work. Customer stated that the vehicle is still trying to brake on its own. Customer stated that at this time he has gotten a warning and a ticket for a headlight being out. Customer stated that the headlight is out because it is full of water. Customer requested a call back at [redacted]
Spoke with SA Randy at dealership, confirmed RO s up to date.Vehicle has only been in twice for repairs since purchase.Vehicle currently has one RRT and one Recall incomplete at this time
Called customer. Advised I am contacting him on behalf of his CM and apologized he s had no contact from anyone as his CM had personal emergency this week. He informed the dealership wont touch this vehicle anymore as it s had so many repairs and parts put into it since he purchased the vehicle July 20. He said dealer only has 2 ROs open but his vehicle has had nearly $12,000 worth of parts put into it. Last he heard, the SM informed him the Regional Chrysler Rep agreed to do a replacement vehicle. I advised I was not aware of that and don t see it in the case so will check with dealer. Customer states he has one of the very first Summits that were made. Vehicle has many issues: headliner falling down, grill flaps in wind, wheel arches are falling off, center console misaligned, constant error messages on dash for the wifi through head unit in vehicle, dust in paint of panels.
.....called dealership. SM Ron unavailable so left message for him to call me Monday morning with an update on this vehicle and whether

customer has been offered a replacement. Let him know Amanda is the CM; however she s been out all week so would like him to call me.
.....let customer know I would contact him Monday after I hear from SM so I can make sure we re proceeding correctly with his case. Customer thanked me.
Spoke with SM Ron at St. Charles Chrysler Dodge Jeep. He states this customer will continue to be unhappy with this vehicle as a lot of the molding and fenders, panels, etc don t fit as well as customer wants them to. SM said when he looks at the other Jeeps, they all fit the same way. Ron said on the current open RO, in addition to all the above being replaced, they ve put on a second set of headlights--at $2,000/each because customer states headlights fog up. Also, the radio has been replaced. On the first RO the vehicle had several molding and trim pieces replaced as well. His AM is aware of the situation and SM feels he should be looking into a replacement as customer has a high line $60,000 vehicle he s never going to be happy with.
Spoke with AM (DSB11): He is aware customer wants out of Jeep and states customer wants a Ford instead. AM informed me this customer buys high line vehicles and once before he got his vehicle bought back as he wasn t happy with his purchase. AM informs vehicle has 13,000 miles. After much discussion, AM would like ISG to offer Buy Back and charge 35 cents/mile. Told him I d research the case and email him before contacting the customer.
LVM for customer requesting a call back to apprise him of where things stand in this process.
*****will offer customer a replacement****
Customer LVM twice yesterday returning my call. States he ll call again in the morning.
Customer LVM this morning needing a phone call from me as what will be done with this vehicle. As of this morning, he states the vehicle won t start.
Voicemail received from MK933 requesting information on the reimbursement for the car payment. MK933 requested a call back at 214-583-2153.
Called customer to advise I received his message that vehicle is not starting. He says he has a push button start and uses a key FOB....started having issues over the weekend with vehicle not locking correctly as well. He has a Town & Country that had same issue and dealer replaced the Wireless Control Module. Informed customer I am offering him a Repurchase. We discussed his options and that he would have mileage fees assessed but in meantime I could assist in getting the vehicle repaired. Customer reminds me dealer doesn t want to work on this vehicle anymore as they have many outstanding warranty claims that haven t been paid. Customer has an older Jeep Wagoneer he ll drive in the meantime. Customer inquires about the 2 payment reimbursements and rental reimbursements he was to get from previous CM Lisa. Advised customer I would contact her to see whether she s processed anything but I don t see any notes in the CAIR. Also advised that by offering a Repurchase, most likely I won t be able to offer any kind of reimbursement to him. He ll contact me if he feels he needs my assistance again.
Writer left a voicemail for MK933 stating that once the case went to them we are required to stay hands off. Writer informed MK933 that if she would like us to reimburse that a new case would need to be opened for the reimbursement. Writer informed MK933 to decide on how to proceed and to let CM know.
MK933 called in. Writer informed MK933 that we cannot do reimbursement for the customer. MK933 stated that they are looking at repurchasing the vehicle from the customer. MK933 stated that she can look at reimbursement for the rental. Writer verified that she has the documents for the rental vehicle.
Spoke with SM Ron at St. Charles CDJ to inquire on car rental dates. He verified they provided several days rental and then customer paid for several days of his own rental. I let him know I have rental reimbursement from 8/12-8/16. Ron verified customer was not covered by dealer at that time. I advised SM customer is being taken out of this vehicle; however, he may need to bring his vehicle back in for service during the interim as the process can take many weeks. SM understands.

He said customer was in Saturday for oil change and mentioned he was having an intermittent no start but they didn t evaluate for concern.
SUBMIT CRO: Customer had to rent vehicle while his car was at dealer for so long waiting on parts. Dealership did not cover rental during 8/12-8/16. CAC had promised rental reimbursement before I got the case. I m following through on their promise to customer. 5 days @ $49.01/day=$245.07.
Spoke with customer to verify his address and apprise I m reimbursing for car rental. He let me know he was at dealer Saturday and vehicle wouldn t start for dealer or himself while there. Dealer did not make any repairs as customer apprised them he is being taken out of vehicle. I reminded customer it may take several weeks and he might need to take his vehicle in for repair while he s waiting for the process to finalize.
Briefly summarize why the customer is contacting Chrysler:
Customer is contacting Chrysler to document issues with his vehicle so dealership is kept up to date.
Briefly summarize what the customer is expecting:
Customer is expecting dealership to buy back vehicle.
Customer states issues includes getting new error paddle shifter not available even when paddle shifter isn t in use.
Customer states Head liner hanging, plastic trim hanging obstructing drivers view.
Customer states front center console, dealership scratch door, door not aliened.
Customer states wheel flare keeps falling off, 4 times repaired, front passenger side still hanging off.
Customer states brand new headlight fogging up looks as if the brights are on due to condensation build up.
Customer states Adaptive cruise control, keeps trying to kill him, will lock the breaks up for no reason.
Customer states he has had 2 warning from state police to have them fixed.
Customer states Cargo panel on driver side improperly installed that the headliner is broken, and panel not aligned properly.
Customer also states remote start is not detecting key.
Customer states he has to take key and shove it under steering column.
Customer states car will stall when driving, says key not recognized.
Customer states hitting remote button nothing happens, has to lock doors manually
Customer dealing with SA RON
On RO [redacted], dealer covered part of rental coverage then took customer out of vehicle as they weren t getting paid for their warranty claims. Customer then had to get his own rental from 8/12-8/16 while dealership waiting on parts. SM verified all of this. Reimbursing customer rental coverage for those dates for customer satisfaction.
****** Below Customer Contacted for Documentation Request ******

Product - Body / Trim / Paint Finish - Air Bag - Other - Unknown	No air bags.
Product - Electrical - Lamps and Switches - Other - Default	No high beams

Briefly summarize why the customer is contacting Chrysler:
Customer calling regarding issues with vehicle. Customer stated shortly after purchasing vehicle, he was having some problems. Customer stated his vehicle does not have high beams and no air bags. Customer stated he no longer wants his vehicle and would like to do buy-back. Agent apologized and advised that he would need to speak with his I2R Coordinator Stephanie Morrison at 888-542-7239 ext 442. Customer stated he didn t want to speak with her. Agent apologized and advised that due to the nature of his situation he would need to speak with Stephanie. Agent transferred customer to Stephanie s voice mail, since she was not available.
**

Briefly summarize what the customer is expecting:
Customer is calling because he no longer wants his vehicle. Received voicemail from customer outlining his customer requesting a return call. >> Spoke with customer who stated that the vehicle is TMU (true mileage unknown). He stated that the General Manager told him that the vehicle is TMU and he should call us and request a buy out or swap. Customer stated that the vehicle is not correctly counting the mileage as he made a very long trip and only three miles were added to the vehicle. Customer stated that he provided video of this occurring to the dealership. Customer is concerned that it could become legal concern for him if he signs the title saying that the mileage is accurate. Customer is requesting a replacement. Customer states that : 1)when he tries to start the vehicle with the fob he gets an error 2) the high beams are inoperative 3) the heated seats don t work 4)air bags are broken 5)all warning lights come on 6) touchscreen inoperative 7) Bluetooth does not recognize commands 8) excessive engine noise. Empathized with the customer and apologized for all of his concerns. Customer stated that the

dealership has video of the vehicle of driving but not adding any mileage or calculating miles per hour. Customer stated that he is willing to trade but does not want to lose any money. Customer stated that Jeff Hoositz is the General Manager that told him to contact Chrysler to request a buyback. Advised customer that at this point the plan of action would be to repair the vehicle which requires it to be taken in for service. Customer agreed to take the vehicle in for service. >> Called Lia Chrysler and spoke with General Manager Jeff Hossitz. He stated that he spoke with the Area Manager who advised they take the vehicle to another dealership. He stated that the mileage is correct on the vehicle and he never told the customer that it was not. They have been unable to duplicate the heated seat concern and stated that customers radio is not meeting expectations because the radio does not have the features the customer is looking for. >> Spoke with Service Manager Gene and requested copies of the customers repair orders. Service Manager confirmed the vehicle is not TMU. He stated that there was a cam/bus concern where the speedometer wasn t reading appropriately. Technical Advisor GWV was a t the dealership that day ad they compared the pcm with the instrument cluster and determined that the mileage is within the specifications for variance. Service Manager also stated that they have an open repair order for the high beams, adaptive cruise control, and air bag. In an attempt to duplicate the customer intermittent high beam operation the Service manager will be driving the vehicle home at night. He states that it is an auto high beam that comes on when it is pitch black and goes off when oncoming traffic is sensed. For the adaptive cruise concern they have been unable to duplicate but made some adjustment to the front distance sensors. There were no codes for either of those concerns. While they were looking at the cruise control the airbag light came on and they have ordered a clock spring. Service Managers will fax the repair orders for further review. Will contact customer by 7/29 as scheduled. Will check for repair orders 7/26.
*** If the customer should call, please advise to contact their I2R Coordinator Stephanie Morrison at 888-542-7239, extension 2160. Thank you ***

Will contact customer by 7/29 as scheduled. Will check for repair orders 7/26. Spoke with customer and advised that based on the review of the computer system the mileage variance is within acceptable range. He stated that he does not want the Service Manager to drive the vehicle as he drives too fast. Advised customer that it will be necessary in order to duplicate any issues with the remote start, hvac, abs, adaptive cruise control, auto high beams, memory seat before moving forward. Customer understood but still wants out of the vehicle. Advised customer I will follow up with him and the dealership 7/30. Customer agreed. >> Called Lia Chrysler and left voicemail for Service Manager Gene informing him that the customer would prefer someone else drive the vehicle for the adaptive cruise control an auto high beam concerns. Also advised that we can authorize a rental if needed. Requested a return call. Will follow up with customer and dealership 7/30.
*** If the customer should call, please advise to contact their I2R Coordinator Stephanie Morrison at 888-542-7239, extension 2160. Thank you ***

Called Lia Chrysler and left voicemail for Service Manager Gene and was informed that the customer is waiting for the vehicle. He stated that they will be replacing the clock spring and they ran a scan and found no code that matched the customer s concern. They plan to compete the clock spring repair then walk through each of the customers additional concerns. >> Spoke with customer who confirmed that he prefers to wait for the repairs to be completed. Advised that he ha the option of a rental. Customer understood and was appreciative. Will follow up with dealership and customer 7/31.
*** If the customer should call, please advise to contact their I2R Coordinator Stephanie Morrison at 888-542-7239, extension 2160. Thank you ***

Called Lia Chrysler to speak with Service Manager and determine their findings. Spoke with Service Manager Gene who stated that they completed a like model comparison. Also replaced the clock spring and completed customer education on different aspects of the vehicle. They were unable to duplicate the rest of the customers concerns and walked through basic voice commands with the uconnect. Service Manager will fax the repair order that outlines all of the customers concerns. >> Spoke with customer who stated that he was told that he didn t know why the vehicle was behaving the way it did and suggested the customer take the vehicle to another dealership. Customer stated that he was advised that he was told that he could do the things manually. Customer will be taking his vehicle to Armory Garage Inc as he does not feel this dealership took him seriously as there have been disagreements in the past. >> Called Armory Garage Inc spoke with Mike Turner, Service Manager who stated that the will see the vehicle. Scheduled customer appointment for 8AM 8/6. >> Spoke with customer and advised of appointment. Customer agreed. Will follow up with customer 8/5 to remind of appointment.
*** If the customer should call, please advise to contact their I2R Coordinator Stephanie Morrison at 888-542-7239, extension 2160. Thank you ***

Spoke with customer who stated that he took the vehicle in to Armory today and showed him things that Lia had damaged. He was told the concern is not repairable and all rims would need to be replaced. The rim doctor came out and said that it cannot be repaired. He had to wait an hour for the guy to come out. Customer stated that Armory told him it would be hard to duplicate the high beam concerns as the vehicle has to be in motion and it has to be dark. Custoerm stated that Lia admitted responsibility for the rims, Tim, and Gene were there to confirm that they completed the balance. They took pictures and left it up to the Body Shop Service Manager. He stated that Armory told him to take it back to where he purchased it and see what they can offer. Apologized to customer for the inconvenience and advised that I will follow up with both dealerships then contact him by 8/6. >> Called Armory Garage Inc to speak with Service Advisor Steve. He was gone for the day. Left message requesting a return call. >> Called Lia Chrysler and was informed that the Service Advisor Gene was gone for the day. Spoke with General Manager Jeff Hoositz who stated that the damage occurred in April so he is not sure how the customer would not have noticed it. Will follow up with both dealerships 8/6.
*** If the customer should call, please advise to contact their I2R Coordinator Stephanie Morrison at 888-542-7239, extension 2160. Thank you ***
Called Lia Chrysler to speak with Service Manager Gene. Spoke with Gene to determine plan of action for customers rim concern. He stated that they will fix it. He stated that they have another wheel repair guy coming out to repair the rims. He stated that there are very minor scratches on the rims. He stated that HE thinks they can be polished as the only damage they saw that was irreparable was the rim that was damaged by the customers accident. He thinks there may have been a miscommunication between the rim person and the dealership as he thinks the damage to the remaining rims may be superficial. He stated that the body shop already had a rim on order for the rim that was damaged from the accident and once that is in they will have the second rim person look at the other rims to determine the repair. Will follow up with dealership 8/12 to determine part status. >> Called Armory Garage Inc and spoke with Steve, Service Advisor. He stated that they found nothing wrong with the vehicle. The customer plans to bring the vehicle in for service 8/7. They have also duplicated a radio concern. >> Spoke with customer who stated that he will take the vehicle in for the radio concern 8/8. Customer stated that there is no music and none of the music/buttons work on the steering wheel. Customer asked where we are going from here. Advised that at this point the recommendation is repair as the only concerns that have been duplicated are the radio and the damage to the rims. Will follow up with customer and dealership 8/9.
*** If the customer should call, please advise to contact their I2R Coordinator Stephanie Morrison at 888-542-7239, extension 2160. Thank you ***
Called customer to determine vehicle status. Spoke with customer who stated that when he went to get in the vehicle it was working properly and was advised to bring it in when it is not acting property. Customer stated that he spoke with Derek Loki, a body shop manager at Lia who confirmed that they damaged the vehicle when they installed the mudflaps. He stated that they accepted full responsibility for the rim damage but they have not made a solid offer. Advised customer that I will follow up with the dealership 8/12 and him 8/14 as he is requesting a service contract.
*** If the customer should call, please advise to contact their I2R Coordinator Stephanie Morrison at 888-542-7239, extension 2160. Thank you ***
Called Lia Chrysler to speak with Body Shop Manager Dan Wheeler. Spoke with Body Shop Manager who stated that they will be taking care of it and are waiting for the customer to back in for service. >> Called customer to schedule appointment. Spoke with customer who stated that h can take the vehicle in tomorrow. Customer stated that the high beams do not activate automatically as they should. Advised that I will authorize the rental and follow up with him by 8/15 to confirm,. >> Spoke with Service

Manager Danny who accepted authorization of the rental and agreed to work with the customer. He was very aware of the customer and his concerns and is more than willing to assist the customer. Advised that customer will come in 8/19.He agreed. >> Left message for customer advising. Will follow up with customer 8/16 to remind of appointment.
*** If the customer should call, please advise to contact their I2R Coordinator Stephanie Morrison at 888-542-7239, extension 2160. Thank you ***
Called customer to remind of 8/19 appointment. Customer still plans to go. Will follow up with customer and dealership 8/20.
*** If the customer should call, please advise to contact their I2R Coordinator Stephanie Morrison at 888-542-7239, extension 2160. Thank you ***
Spoke with customer who stated that the vehicle is in for service. He was placed in a loaner as they said no rental was set up. But they placed him in a rental. He was informed that they will drive it to confirm his high beam concern once the wheels come back. Will follow up with dealership 8/21 and customer by 8/23.
*** If the customer should call, please advise to contact their I2R Coordinator Stephanie Morrison at 888-542-7239, extension 2160. Thank you ***
Called Lia Chrysler to speak with Service Manager to . He stated that they have wheels back and he will test driving tonight to test the auto high beam feature. Will follow up with dealership and customer 8/23.
Called Lia Chrysler to speak with Service Manager Dan Wheeler. Spoke with Service Manager who confirmed that there was an issue with the high beams. He stated that he was told by STAR that as it was a full moon it may have affected that feature. They were able to verify the climate control issue ad have an update pending. He believes the radio is fixed. He is going to keep the vehicle to try it on a darker night per STAR, as the full moon is enough light to prevent the smart beams from coming on. Will follow up with dealership 8/27 as it is expected to be a full moon all weekend. >> Spoke with customer and reviewed the findings to this point. Will follow up with customer 8/27 as well.
Called Lia Chrysler to speak with Service Manager Dan Wheeler. He was able to duplicate the automatic high beams not coming on but is not confident he was going fast enough. He will try again tonight and has two of the three sensors taped up to simulate the low light conditions. Requested they update the STAR case with his findings. Will follow up with dealership 8/28. >> Called customer to review plan of action. No answer, left message advising I will follow up by 8/29.
Called Lia CDJ to speak with Service Manager and determine the results of the test drive. Spoke with Service Manager who stated that they were able to duplicate the concern and it is now repaired. He stated that there is a TSB for the climate concern was released May of 2013. There will be an update coming. The vehicle has been released. He stated that the customer as placed in a non-Chrysler rental as there were no Chrysler products available due to track season. >> Called customer to confirm he is back in his vehicle. Customer stated that at this this point he is pleased. Customer is aware he will have to wait for the update on the a/c system. Advised we will follow up 9/3.
Called customer to confirm repair. Left voicemail requesting a return call if we can be of further assistance. Will follow up 9/5.
Called customer to confirm repair. Left voicemail requesting a return call if we can be of further assistance. Advised that if I haven t heard from him by 9/10 I will be closing his case. Requested a return call if we can be of further assistance.
Closing CAIR as customer has not responded to contact attempts. Called customer 8/27, 8/28, and 9/3. On 9/5 left voicemail requesting a return call if we can be of further assistance. Customer has not responded. Customer states that he received a survey from Chrsyler and it has expired.
Agent advised customer that I will not be able to send another survey. Customer states that that is ok he would just like documented that he is now pleased with the dealership and states that they are actually going above and beyond to help him.

Corporate - Product Information - Default - Default - Default	UConnect Access packages
Product - Electrical - uConnect Cellular System - Phone Pairing Compatibility - Android (LG/HTC/Motorola/Samsung)	verizon

Briefly summarize why the customer is contacting Chrysler: Customer called needing assistance with phone compatibility. Customer states that he has received a text once and answered it and then it stopped. Agent checked on uconnectphone.com and the phone is not fully compatible because of the version software which customer has a 4.1.2 and the version that it needs to be is 4.0.4. Customer also wanted to know the price packages for UConnect Access. Agent provided the customer with the contact information through UConnect Care Q & A
Briefly summarize what the customer is expecting: Customer called needing assistance with phone compatibility and questions about package prices UConnect Access.
Customer called stating he got a text message through his system and he was able to answer it through the system. Customer stated it does not do it anymore since that one time. Agent advised customer his phone is not completly compatible and that is why it is not working again. Agent advised customer to keep looking at the website he has for system updates.
Briefly summarize why the customer is contacting Chrysler: Customer is upset that his $65,000 vehicle has seen the dealership more than him. Customer has had the vehicle twice for the radio and 3 times for the adaptive cruise. Customer is very loyal to Chrysler has owned 11 new vehicles over the years. Customers best contact number is [redacted] homeÙ and 5[redacted]
cellÙ. Customer states the dealership was at his home today to install a refurbished radio. The radio had issues when they were booting it up, it was very slow. Customer states it did finally load. Dealership left and customer reprogrammed everything for nearly an hour. Shut the vehicle

off, when he went back out to it and started it the radio had quit totally. Customer does not feel that it is too much to ask for a new radio. Customer is very upset. Customer is scheduled for an appointment at the dealership 8/15/13 @1:30 PM. Customer is working with SM Bill Stanley. SM explained to the customer that he will see him tomorrow there is no more they can do at this time. SM s direct number is 586.983.4345.
Briefly summarize what the customer is expecting: Brand new radio.
CAC updated COIN.
CAC informed customer that agent will escalate his case for further assistance and an agent will contact him within 1 business day.
OUTBOUND CALL TO JIM RIEHL S FRIENDLY CHRY JEEP INC, left VM for Bill SM @586.983.4345, informing him of the customers concern and that his case will be escalated for further assistance. Chrysler is aware of the customers appointment and he will be contacted shortly.

CM attempted to contact the SM Bill but reached a voice mail. CM left the direct number 1-877-855-8400 ext 4718355.
SM Bill contacting to speak with his CM. SM Bill stated he received message but CM did not give extension. Agent transferred SM Bill to CM extension 4718355 to either speak to CM or leave voice mail.
CM recevied a voice mail from the SM Bill who stated they replaced the customer radio and tested the new radio and everything was working fine. SM Bill stated after that the radio went completely blank and they are now waiting on star to update them with new information.
CM attempted to contact the SM Bill but reached a voice mail. CM left a message informing the SM Bill that the only information the CM has about radios going blank in all modes for the RA4 radios is make sure the software version 13.19.0 and if the symptom reoccurs, replace radio with one built after June 12, 2013 or with a purple dot on the top.
CM attempted to contact the SM Bill but reached a voice mail. CM left the direct number 1-877-855-8400 ext 4718355.
CM received a message stating the radio has been installed.
CM received a message from SM Bill stating to call him at 586-983-4345.
CM contacted the SM Bill and the CM was informed the radio came in yesterday and they installed it. Bill stated everything seemed to be working completely fine when the customer left. CM thanked Bill and the call was ended.
CM contacted the customer seeking if the radio is working fine and the customer stated everything seems to be working great. CM informed the customer that his case would be closed. Customer thanked the CM.

Customer email address for case updates: chrisdyar@yahoo.com
Reassigned to: 88f
Reassigned CAIR to 86U based on issue. Next agent: Please advise dealer that RRT 13-056 2013 D-SERIES 2014 WK RA3/RA4 RADIO ENHANCEMENT showing as not performed. Please request RRT be performed. Discs were sent to

dealerships last week dcp15
Briefly summarize why the customer is contacting Chrysler: The customer had called in to check the status of his case. The customer stated that the radio had been replaced in his vehicle but the same thing had happened. The customer wants to know if this is a known issue with Chrysler.
Briefly summarize what the customer is expecting: To have his vehicle repaired.
Agent had called the dealership 68510 to advise them of an incomplete RRT on this vehicle. Agent spoke with SA Sam and he verified that the RRT had been completed Aug. 10th. Agent had put the customer on a 3 way to speak with Sam. The customer told Sam that it is doing the same thing. Sam said that he would speak with Collin in regards to Collin calling the customer back. Agent did find an open Star case number [redacted] where the dealership was advised to change the radio in the vehicle. The customer wanted to know if this could be sent up to someone higher. Agent advised the customer that his vehicle has to be at the dealership in order to have this sent up. Agent advised the customer to call back if that is what he decides to do.

****CONTACT UPDATE****
Writer contacted the dealership at 3:28 pm on 08/22/13 at 770-945-0839 and spoke with Shirley and then was placed on hold for 10 minutes. Writer ended call.
Writer contacted the dealership back at 3:37 pm on 08/22/13 at 770-945-0839 and spoke with Amanda and let her know that the customer is still having preset issues at this time and would like an update on the file from the dealership. Amanda stated that Sam was working with the customer and transferred her to the VM. Writer left a message for the SA to contact the CM back with an update on the customer s file. Writer provided her contact information of 877-855-8400 ext 4718259 to contact back when he has the chance and ended call.

****CONTACT UPDATE****
Writer contacted the dealership at 11:48 am on 08/23/13 at 770-945-0839 and spoke with Morgan and was transferred to Sam s VM. Writer left a message for the SA to contact her back about the customer s vehicle and asked to be contacted back at 877-855-8400 ext 4718259. Writer thanked dealer and ended call.
****DEALER UPDATE****
The dealership contacted the writer at 12:17 pm on 08/23/13 as per message left for him. Writer was unable to speak with the dealer as she was on the other line. Sam stated that they have been in contact with STAR and they were told to replace the radio and they did this and it did not fix the issue. They then went ahead and updated STAR and have been informed that they are to order a memory seat module. The customer is setting the presets in his vehicle on driver seat #1 and then switches over to driver seat #2 and then returns and all is erased at that time. They tried this on another brand new Jeep on the lot and found that the exact same thing happens. The dealership is ordering a memory seat module today and they will contact the customer when it comes in. Sam stated that if there were any other questions she can contact him at [redacted].
****CONTACT UPDATE****
Writer called customer at 2:48 pm on 08/23/13 at 4[redacted] and spoke with the customer and let him know that the memory seat module is on order at this time and she will contact him end of next week to inform him of the arrival or not of the part. Customer thanked writer and ended call.
****CONTACT UPDATE****
Writer contacted the dealership at 2:24 pm on 08/27/13 at 770-945-0839 and spoke with Corrine and found that the part has been shipped and is expecting to arrive on 08/29/13. Writer thanked dealer and ended call.
****CONTACT UPDATE****
Writer contacted the dealership at 11:21 am on 08/29/13 at 770-945-0839 and spoke with Robert and found that the part is in at this time. Writer thanked dealer and ended call.
****CONTACT UPDATE****
Writer called customer at 11:24 am on 08/29/13 at 4[redacted] and spoke with the customer and found that the customer was already informed that his part is in and he has an appointment for 08/30/13 at 3:30 pm. Writer let him know that she would go forth and follow up after the appointment of on the following business day. Customer thanked writer for the update and ended call.
****CONTACT UPDATE****
Writer contacted the dealership at 11:56 am on 08/30/13 at 770-945-0839 and could not speak with anyone in the dealership. Writer will follow up with the customer.
****CONTACT UPDATE****
Writer called customer at 12:00 pm on 08/30/13 at [redacted]8 and spoke with the customer and found that the appointment is for today not 08/29/13. Writer apologized for the confusion and let him know that she would follow up with him on 09/03/13. Customer thanked writer and ended call.
****CONTACT UPDATE****
Writer contacted the dealership at 6:01 pm on 09/03/13 at 770-945-0839 and spoke with Cynthia and was transferred to Sam s VM. Writer left a message for the SA to contact her back at 877-855-8400 ext 4718259. Writer thanked dealer and ended call.
****DEALER UPDATE****
The dealership contacted the writer at 1:21 pm on 09/04/13 as per message left for him. Writer spoke with Sam and found that the memory seat module did not fix the customer s problem. Sam stated that the park sense and forward collision is set on seat one. The customer then sets up seat two and then goes back to seat one and the settings for the park sense and collision warning are reset. It is only these 2 components that do not stick. Writer let the dealership know that there is an update coming out on 09/16/13 for the radio and would find out if this will assist in helping this particular issue. Sam asked to be kept informed. Writer

agreed to do so. Sam thanked writer and ended call.
Begin Customer Message reviewed:
Kristin,
Just wanted to give you an update. I took the GC to the dealer last Friday. They replaced the seat memory module however this had no affect on the problem. They said they would get in touch with chrysler, and then get back with me.
Please let me know if you hear from them. I have not heard back from them yet.
Thanks,

Per STAR file as of 9/3/13:
no other codes in any modules. tested wiring, ok. replaced module. no change. I have tested 3 or 4 other jeeps, they all do the same thing.
T3216MK
****
Agent contacted dealer, spoke with SM who confirmed that Park sense and collision warning settings lost when using remote start. Both Media Center and Memory Seat module have been replaced.
STAR case [redacted] shows that dealership has tested other vehicles, which exhibit the same behavior. STAR agent advises that vehicle *may* be operating as designed. No updates since.
THE LAST TIME VEHICLE WAS AT DEALER WAS AUGUST 23RD AND DEALER HAS NOT HEARD FROM OWNER SINCE VEHICLE LEFT THAT DAY.
Agent will email SM attached SOL. Agent contacted SAM143; left message with direct line. Agent will contact owner and have him scheudle a follow up appt to dealer. At that point, SAM143 will work with SM to resolve.
Owner to be contacted once agent confirms status of repair history.
SAM143 will then contact SM to review and schedule a follow up appt and possible T/A
****
Spoke with SAM143 on this one and STAR is considering this normal operation. No further repairs will be authorized; like vehicles were tested on the dealer lot and all of them did the same thing. Owner has not been back to dealer since then, which was Aug 23rd
Agent informed owner.
Owner stated that he installed a Uconnect software update from the owners portal this morning and everything is working as designed.
Agent provided direct line for any future issues.

UConnect 8.4AN Issues
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
I am having stability issues on my 2014 Grand Cherokee Summit. Menu items in the settings are changing at random and some cannot be selected at all, the check mark just disappears. The main issue is with the heated/ventilated seats at remote start option, this option will not stay selected. Also having problems with the ParkSense and Forward Collision systems unselected at random times. Very unstable in the settings menu, otherwise system is working as promised.

***** EMAIL BRIEF DESCRIPTION CONTENT *****
Problem with my new Grand Cherokee
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
I just bought my new Grand Cherokee 2014 last week. I bought limite version with 'Advanced Technology Group'. I just found that 'Forward Collision Warning with Crash Mitigation' is not working in my new vehicle. I am taking it for service this Friday. While buying the Jeep, I heard lot of safety features which we cannot experience it unless there is an emergency. 'How could I trust those features will work properly when it required ?'
*****END OF CUSTOMER EMAIL*****
Dear [redacted]:
Thank you for contacting the Jeep Customer Assistance Center regarding your 2014 JEEP GRAND CHEROKEE LIMITED.
Firstly, congratulations on the purchase of your new vehicle.
Unfortunately, we are unable to provide technical assistance. You may refer to your local dealership for further assistance, or you may refer to the vehicle s service manual if you feel this feature is not functioning as it should.
FORWARD COLLISION WARNING (FCW) WITH MITIGATION OPERATION
The Forward Collision Warning (FCW) system with mitigation provides the driver with audible warnings, visual warnings (within the EVIC), and may apply a brake jerk to warn the driver when it detects a potential frontal collision. The warnings and limited braking are intended to provide the

driver with enough time to react, avoid or mitigate the potential collision.

FCW monitors the information from the forward looking sensors as well as the Electronic Brake Controller (EBC), to calculate the probability of a forward collision. When the system determines that a forward collision is probable, the driver will be provided with audible and visual warnings and may provide a brake jerk warning. If the driver does not take action based upon these progressive warnings, then the system will provide a limited level of active braking to help slow the vehicle and mitigate the potential forward collision. If the driver reacts to the warnings by braking and the system determines that the driver intends to avoid the collision by braking but has not applied sufficient brake force, the system will compensate and provide additional brake force as required. When the system determines a collision with the vehicle in front of you is no longer probable, the warning message will be deactivated.

The minimum speed for FCW activation is 5 mph (10 km/h). The FCW alerts may be triggered on objects other than vehicles such as guard rails or sign posts based on the course prediction. This is expected and is a part of normal FCW activation and functionality. It is unsafe to test the FCW system. To prevent such misuse of the system, after 4 Active Braking events within a key cycle, the Active Braking portion of FCW will be deactivated until the next key cycle. The FCW system is intended for on-road use only. If the vehicle is taken off-road, the FCW system should be deactivated to prevent unnecessary warnings to the surroundings. If the vehicle enters 4WD Low Range, the FCW system will be automatically deactivated.

WARNING!

Forward Collision Warning (FCW) is not intended to avoid a collision on its own, nor can FCW detect every type of potential collision. The driver has the responsibility to avoid a collision by controlling the vehicle via braking and steering. Failure to follow this warning could lead to serious injury or death.

Turning FCW ON Or OFF

The default status of FCW is On , this allows the system to warn you of a possible collision with the vehicle in front of you. The forward collision button is located on the switch panel below the uconnect display.

To turn the FCW system OFF, press the forward collision button once to turn the system OFF (led turns on).

To turn the FCW system back ON, press the forward collision button again to turn the system ON (led turns off).

Changing the FCW status to Off prevents the system from warning you of a possible collision with the vehicle in front of you.

Changing the Active Braking status to Off prevents the system from providing limited autonomous braking, or additional brake support if the driver is not braking adequately in the event of a potential frontal collision.

The FCW system state is kept in memory from one key cycle to the next. If the system is turned OFF, it will remain off when the vehicle is restarted.

Changing FCW And Active Braking Status

To change the FCW and Active Braking settings with uconnect 8.4/8.4A System Screen

The settings can only be changed when the vehicle is in PARK.

Follow these steps to set the FCW and Active Braking:

1. Press the Controls soft-key located on the bottom of the uconnect display.
2. Press the Settings soft-key.
3. Press the Safety & Driving Assistance soft-key.
4. Press the FWD Collision Warning , Far or Near soft-key for your desired preference.
5. Press the Active Braking On or Off soft-key.

A check mark will appear in the selection box to indicate the setting. The system will retain the last setting selected by the driver after ignition shut down.

FCW may not react to irrelevant objects such as overhead objects, ground

reflections, objects not in the path of the car, stationary objects that are far away, oncoming traffic, or leading vehicles with the same or higher rate of speed.
FCW will be disabled like ACC, with the unavailable screens.
Thanks again for your email.

Product - Electrical - Unknown - Other - Default	Customer states forward collision warning system is not working

This writer was at Dealer 42344 on 8/28/13 and test drove vehicle with Dealer Tech. Customer concern is that the forward collision warning system is not working properly. On vehicle test drive, writer actuated Adaptive Cruise Control System (ACC) and verified that Forward Collision Warning System (FCW) is working as designed. On test drive, vehicle maintained an appropriate distance with vehicles in front when the ACC is activated. Additionally, the FCW worked properly as well, as a audible warning and a message on the EVIC was illuminated when the vehicle sensed it was getting too close a vehicle that was stopping/stopped. Additionally, the FCW system applied the brakes to the vehicle as well as necessary.
Based upon this test drive and comparison to Dealer Stock-VIN # EC[redacted] the customer s vehicle is operating properly, as designed.
From conversation with the Dealer, it sounds like maybe the customer has a different expectation for what the FCW System is supposed to do.
Writer advised that the FCW System does not function like Park Sense Back-Up Assistance. It is this writer s understanding that maybe they think the FCW System should alert them to objects in front of them at all times (like Park Sense does when you are in reverse).
Writer exlained that FCW only works when the Adaptive Cruise System is engaged. It was recommended that the Dealer review the operation/function of the ACC & FCW System with the customer...mam50-Matt Maertens _

Enhanced Adaptive cruise control and Adaptive cruise control with stop
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
Comments:
Could you please explain the difference between NH1P and NH3P and how they both operate. Any other info on ACC would be appreciated. Thanks NB: I really love this jeep!!!
Dear Walter:
Thank you for contacting the Jeep Customer Assistance Center.
Adaptive Cruise Control (ACC) increases the driving convenience provided by cruise control while traveling on highways and major roadways. However, it is not a safety system and not designed to prevent collisions.
ACC will allow you to keep cruise control engaged in light to moderate traffic conditions without the constant need to reset your cruise control. ACC utilizes a radar sensor and a forward facing camera designed to detect a vehicle directly ahead of you.
NOTE:
If the sensor does not detect a vehicle ahead of you, ACC will maintain a fixed set speed.
If the ACC sensor detects a vehicle ahead, ACC will apply limited braking or acceleration (not to exceed the original set speed) automatically to maintain a preset following distance, while matching the speed of the vehicle ahead.
Enchanced Adaptive Cruise includes ACC plus Forward Collision Warning.
The Forward Collision Warning (FCW) system with mitigation provides the driver with audible warnings, visual warnings (within the EVIC), and may apply a brake jerk to warn the driver when it detects a potential frontal collision. The warnings and limited braking are intended to provide the driver with enough time to react, avoid or mitigate the potential collision.
NOTE: FCW monitors the information from the forward looking sensors as well as the Electronic Brake Controller (EBC), to calculate the probability of a forward collision. When the system determines that a forward collision is probable, the driver will be provided with audible and visual warnings and may provide a brake jerk warning. If the driver does not take action based upon these progressive warnings, then the system will provide a limited level of active braking to help slow the

vehicle and mitigate the potential forward collision. If the driver reacts to the warnings by braking and the system determines that the driver intends to avoid the collision by braking but has not applied sufficient brake force, the system will compensate and provide additional brake force as required.
When the system determines a collision with the vehicle in front of you is no longer probable, the warning message will be deactivated.
The Forward Collision Warning Plus (FCW+) system is an enhancement to the current vehicles equipped with Adaptive Cruise Control (ACC) and a Forward Facing Camera (FFC). This system uses the FFC for enhanced sensitivity to objects in front of the vehicle. The system utilizes radar and video input to detect whether the vehicle is approaching another vehicle or large obstacle in its path too rapidly and warn/assist the driver in avoiding the incident. The system communicates with other components on the vehicle to apply the brakes and/or to alert the driver through visual and audible warnings.
Forward Collision Warning options and Active Braking settings can be changed. When the vehicle is equipped with a Uconnect 8.4/8.4A system screen, the Safety and Driving Assistance soft key needs to be selected to access the options menu. When the vehicle is equipped with the Uconnect 5.0 system, pressing the + MORE hard-key located on the lower right side of the Uconnect system will bring you to the Settings soft key.
The system also monitors the torque sensor inside the EPS to verify the driver s hands remain on the wheel. If no driver s steering input is received for 3 5 seconds, the system alert the driver with audio and visual warning. If the steering wheel continues to receive no torque input from the driver, the FCW+, ACC+ and LDW+ will deactivate. Once the vehicle has achieved road speeds of 60 km/h (37 mph) and below 160 km/h (100 mph), sense the drivers steering input and the FFC can clearly detect the lines in the road, the system will enable again. The system will also disable when the drivers seatbelt is unbuckled while the vehicle is travelling at speeds of 10 mph or greater.
Thanks again for your email.

Product - Electrical - Unknown - Other - Default	Forward Collision Warning

Briefly summarize why the customer is contacting Chrysler:
See CAIR[redacted] for history.
Customer intentionally put a cardboard box in front of his vehicle 3 ft tall by 3 ft wide, and tried to run it over so that he could test his FORWARD COLLISION WARNING (FCW) WITH MITIGATION. Customer states he was driving 24mph and the FCW did not warn him of the box in front of his vehicle.
Customer took his vehicle to dealer 26405 earlier today.
Customer is not satisfied with the answers provided by the dealership.
Agent called to the dealership and spoke to Dan-SA.
Dan-SA said that there was a language barrier with the customer.
SA explained that they told the customer that the FCW did not engage as it only works when the Adaptive Cruise Control is engaged. The SM even came out to try to explain to him that the FCW only works when the ACC is engaged.
Agent tried to explain to the customer that the ACC has to be turned on for the FCW to work. Customer is disagreeing.
Customer asked for a supervisor and agent explained that the supervisor does not have access to any other information than the agent has access to.
-
Customer has requested Supervisor callback
Preferred daytime number: [redacted]1
Preferred evening number: [redacted]
Reason for request: Customer stated he wanted to make a complaint against CAC agent.
CAIR assigned to: BA215
CSR has informed customer a Supervisor callback request has been made, and the customer will receive a callback within 24 hours.
Supervisor scheduled to call customer pertaining to lines 11-17.
Supervisor called customer @[redacted], supervisor advised of lines

12-17 during voice mail. Supervisor scheduled to call customer back within 1 business day.
Supervisor called customer and left another voice mail message stating lines 12-17. Supervisor advised if customer had any further questions or concerns they could call anytime provided contact number 1-877-426-5337.
LT684 please close case.

*****END OF CUSTOMER EMAIL*****
Dear [redacted]:
Thank you for contacting the Jeep Customer Assistance Center.
We regret the problem your vehicle has experienced and appreciate the
time and effort you took to bring this matter to our attention. Comments
like yours are one way we have to learn of problems that may develop and
improvements desired by customers.
Unfortunately, given the many variables involved, we are unable to
diagnose your vehicle s problem via email. We recommend contacting your
authorized dealership to arrange an appointment for proper diagnosis and
repair.

We do see there is an enhancement needed for the specific system that was in your vehicle from factory. If the same unit was replaced, perhaps this is something the dealership could look into performing.
Our dealerships have the factory training, equipment and information available to them to diagnose and correct problems with our vehicles. Should your dealer require factory assistance they may contact our Technical Operations Resource Group (STAR) or contact their regional Business Center.
Thanks again for your email.
Sincerely,
Jennifer
Customer Service Representative
Jeep Customer Assistance Center

9/13 - escalated to Exec Referral for handling; please close this cair..thx
*******Top Care case was closed due to no contact.**********
Briefly summarize why the customer is contacting Chrysler:
Customer is calling in as he had enough of this Jeep.
Agent asked the customer if he has read the blue and white booklet in the glove box of his Jeep.
It tells him about the Lemon Law and how it works.
Customer had his wife retrieve that booklet for review after.
He has had the radio media center replaced 3 times and now he is looking for a 4th one to go in.
His cruise control is always too fast when you set it.
His brakes will be braking him for no reason when the cruise control is on.
His dealership has had Chrysler engineers looking into the media/radio system and yet all they can say is replace it.
This Jeep has been in the shop at least 20 times since he has owned it.
He does not feel safe in it at all and he worries about his family that travels in it also.
His navigation, climate control don t operate either.
Customer would just like to be in a safe and reliable Jeep.
Briefly summarize what the customer is expecting:
Customer is expecting that this Jeep be replaced with a much better working Jeep.
Customer informed a call back is required and will take place within 1-2 business days.
Preferred Morning/Midday call back number is [redacted]
Preferred Afternoon/Evening call back number is [redacted]
Customer email address for case updates: [redacted]

Who has possession of the vehicle? Owner

Briefly summarize why the customer is contacting Chrysler: Customer called in stating that he has been experiencing an issue with the vehicle while he is driving the vehicle will brake on its own. Customer states that this has happened 5 times now while driving and does not feel safe operating the vehicle. Customer states that he is dropping the vehicle off tonight and a diagnosis will be performed tomorrow. Customer is seeking possible rental assistance.
Briefly summarize what the customer is expecting: Customer seeking possible rental assistance.
Agent contacted the dealership and was advised they will not use the warranty bulletin D-11-53 for they do not get paid back for these claims. Agent was advised they will diagnose the vehicle tomorrow and go from there.
Agent provided the customer with the CAIR number and advised he needs to have a diagnosis completed on the vehicle before we can look into rental assistance. Agent advised the customer to contact us back tomorrow once a diagnosis has been determined for possible further assistance.
Customer called again seeking rental. Agent advised that the vehicle needs to be diagnosed.
Agent called TETERBORO CHRYSLER PLYMOUTH JEEP Dealer Phone : 201-440-0222 and spoke with Jim who advised that the customer has the braking system for when he gets too close to another vehicle.
Jim advised customer has two other issues including a backup camera - which has already been replaced once, and a ride high suspension which was also replaced once.

Jim advised that Dealership has contacted Star and is waiting to hear
from Star but does not believe vehicle will be ready today.
Agent advised customer of the braking issue who advised that this braking
takes place even when something is no in front of the vehicle.
Customer is seeking rental.
DEALERSHIP CONTACT: TETERBORO CHRYSLER PLYMOUTH JEEP at 201-440-0222
Spoke with SA Jim as the SM was not available. SA Jim states he is not
sure how long they will have the vehicle, but they have contacted STAR
and are working with them. Agent inquired if I can authorize three (3)
days rental for the customer. SA Jim states he will not put the customer
in a rental as they do not get paid for them. Agent advised SA Jim that
I will be authorizing the rental, and am not asking him to provide the
rental. SA Jim states he will need something in writing stating that
Chrysler is authorizing the rental. Agent informed SA Jim that I will
send an email with the authorization. SA Jim states there has to be an
authorization number, not just a CAIR number. Agent advised SA Jim that
the CAIR number is the authorization number. Agent advised Jim that I
will send the authorization via email, as I will be escalating the case
to a CM for further assistance. SA Jim states he will speak with his SM
regarding the rental before providing agent with an answer. SA Jim
provided agent with email address TETERBOROSERVICE@AOL.com
Customer seeking rental assistance because vehicle is at dealership with
an issue with the vehicle braking on it s own, as well as a back up
camera issue and a suspension issue. Contacted Service Manager, SA Jim
as the SM was not available at 62012 to
discuss the customer s request for rental assistance. Confirmed
customer s concern and with Service Manager concurrence, authorized
three (3) days of rental per guidelines in Warranty Bulletin D-11-53.
Rental authorization will be processed by CAC
DEALERSHIP CONTACT: TETERBORO CHRYSLER PLYMOUTH JEEP at 201-440-0222 Left
a message for the SM requesting a return call at 1-855-675-9291 ext
4718201. Informed SM that I had spoken with SA Jim earlier and
authorized a rental for three (3) days for the customer, but SA Jim would
not say whether he would set up the rental for the customer under the
authorization that I have sent. Advised the SM that I need to know
whether they are going to put the customer in the rental so I can contact
them and let them know.
Customer advised a call back is required and will take place
within one business day by COB their time

DEALERSHIP CONTACT: TETERBORO CHRYSLER PLYMOUTH JEEP at 201-440-0222
Requested to speak with the SM, and was advised that he is in a meeting.
Agent is unable to contact customer with rental authorization
information, as SA Jim would not say whether he would set up the rental
for the customer, and I have not been able to speak with the SM.
Please insert after line 46. Agent requested to speak with the SM, but
SA Jim informed me that he will speak with the SM and did not transfer
agent.
Customer called seeking his rental vehicle, agent advised the CM has not
authorized anything, and he has until 8 pm est.
Voice mail received from SM Dave on 9/17/2013 at 4:38 PM stating they
will put the customer in a rental under the authorization sent by agent.
CUSTOMER CONTACT: [redacted] Informed customer that
I have authorized rental for three (3) days and then escalated his case
up to a CM for further assistance, and he will receive a call by COB
today. Customer states he is being charged $5/day for the rental for an
admin fee, and inquired if there is anything we can do regarding that.
Agent informed customer that, if it is a fee charged by Enterprise, there
is nothing we can do, as we have no control over Enterprise fees.

Customer states he feels he shouldn t have to pay anything for the rental. Agent informed customer that he can speak with his CM regarding the $5 fee, but, as stated before, we have no control over Enterprise fees. Customer thanked agent.

Status update provided via email to the following email address:
[redacted]
Thank you for being with Jeep, I will be your reference manager, my name is Debbie my number is 1800-763-8422 ext 66266, my hours of operation 8:00 am to 4:00 pm EST. Your reference number is [redacted].
End of Status Update
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted] Left message for customer that writer will be following up with the dealership and the customer.
Customer called with concerns about a new Jeep, when customer has owned others and did not have problems so soon after purchase. Customer advised writer that he did give the dealership a list of customers problems like the brake system that will just brake when driving 50 MPH or less and the rear camera that just goes blue not working again and the Jeep raising light flashing that the vehicle is still raising while driving. Customer feels there is a leak somewhere in the suspension. Customer advised writer that the rental company Enterprise is charging customer $5 a day and advised customer that the dealership does not pay that it is a administration fee. Writer advised customer that writer wants to check into that but needs the invoice at the end when repairs are completed so writer can see what customer is being charged for. Customer advised writer that the he is leasing the vehicle and wants to check into a lease payment or because the vehicle may be down for 15 days lower the lease payment amount. Writer advised customer this can be looked at after the repairs are completed. Customer advised writer that the dealership called the customer to get permission to have a tech take customer vehicle home for a test drive to see about duplicating the problem, and the the drive is about 200 miles round trip, customer advised writer that this is a lease and has to watch the mileage, but felt he had to say yes because he wants the vehicle fixed. Writer advised customer that writer will be following up with the dealership on 9-20 and if there are any results will contact customer, other wise writer will call customer back on 9-23.
Dave sm left message on writers voicemail that the customer got into a rental no problem, but the vehicle is the problem. Dave sm requested a callback 201-440-3760.
Dave sm has left for the day and service department is busy, writer advised will callback later. Writer asked what time the service department closed. Writer was advised at 6:00 pm.
Left message [redacted] 8 to call writer back before 5:15 EST and if customer does not callback writer will call back on 9-23.
Customer called in advised writer that the dealership had customer pick vehicle up and advised that at this time after driving for 200 miles was unable to duplicate the customers concern. Customer advised writer that he had a the vehicle for a couple of days and the braking issue started again but it does not last long it just all of a sudden brakes and customer is unable to video tape because it happens real quick, but per the customer was able to video tape the suspension raising and lower. Customer advised writer that he gave the dealership a 3 page of problems and also advised of TSB, and the dealership advised customer that they did work with STAR and when the dealership can not duplicate customers concerns there is nothing they can do. Writer advised customer that writer does have another similar vehicle with the suspension problem.

Writer asked customer on when he could take the vehicle back in. Customer advised writer that he could drop off tonight around 6 pm if the dealership will have a rental available for him. Writer advised customer that writer will contact the dealership and call customer back. Writer asked customer the best number to call him back on customer gave writer [redacted]
Spoke with Dave sm to advise that the customer case, and that the customer after taking possession of the vehicle had the problem with brakes again but it happens to quick and also the suspension rising and lowering the customer was able to video tape that when it happened. Writer advised Dave sm of the RRT that writer found another customer having a problem with the suspension and the California dealership there thinks that the rrt 13-066 2014 WK 3.6L TRANS/TRANSFER CASE SHIFT ENHANCEMENT 09/11/2013 INCOMPLETE would be able to take care of that problem, but the RRT is not on this customers vehicle. Dave sm advised writer he will check into that. Writer advised of the RRT 13-056 2013 D-SERIES 2014 WK RA3/RA4 RADIO ENHANCEMENT 08/02/2013 INCOMPLETE also. Writer asked Dave sm about having a rental available for customer when customer drops the vehicle off at 6 pm. Dave sm advised writer that the customer can bring the vehicle in anytime, but the dealership closes at 6 pm and Enterprise closes at 5:30 pm and the dealership does not insurance for loners.
Spoke with Jim sa to see if customer has set up an appointment as of yet? Jim sa advised writer that customer has an appointment for 9-30, but per Jim the sm and the DM have both said if the customer comes in and there is not 1 symptom duplicated they will not get customer in a rental and will not take possession of the vehicle because the dealership has test drove the vehicle for 200 miles and was not able to duplicate any of the problems customer advised he is having. Jim sa advised writer that he is going to call the customer and advise that the tech is going to go a 10 minute test drive to see if any of the symptoms come up.
Left message for Jim sa to call writer checking to see if customer took vehicle in and if the dealership was able to duplicate any of customers concerns.
Spoke with Jim sa who advised writer that the vehicle is there and customer did not take a rental. Jim sa advised writer that the customer advised the dealership after a lengthy talk that the only time the brake problem happens is when the customer is on River Road in his town. Jim sa advised writer he is going to have a tech take a drive there and see if there is something in the area that would cause the interference. Jim sa advised writer that the radio and the back up camera work fine, but the customer air suspension light flashes so the tech is going to look into that.
Spoke with Jim sa who advised writer that they did take vehicle out for another test drive and they did find nothing wrong with the brakes sensor. Jim sa advised writer that the dealer has taken the vehicle on about 200 miles test drive and did not have it happen to them. Writer asked if the vehicle was taken out to River Road. Jim sa advised writer it was not was advised if it does not do it in town or anywhere else it is not a defect it is something in the area causing the problem. Jim sa advised writer that he did confirm the ride heighth concern and the light did come on so the dealer is going to a calibrator that they did find in dealerconnect to see if that works. Jim sa advised writer that writer should be called back 10-3 in the afternoon.
Left [redacted] for customer that writer did speak with Jim sa and was advised that the dealer will be working on customers vehicle tomorrow and writer will follow up on 10-3 in the afternoon and writer will contact customer again.
Spoke with Jim sa who advised writer that the vehicle is completed and customer has been called to pick vehicle up. Jim sa advised writer that the low and high raise if fixed but there is no condition on the brakes. Customer advised writer that the dealership has put about 250 miles on vehicle and the brake system did not have a problem so it could be in the area customer advised it was happening that has something that is interfering with the system, but there is nothing dealer can do to fix that. Jim sa advised writer that the suspension that was just worked on

could play a part on fixing the brake system because the right front was at 85% and the left front was 100% so they will see what happens.
Left message [redacted]0 for customer that writer did speak with Jim sa who advised that the repairs are completed, so if everything is to customers satisfaction there is no need to call writer back, but writer will leave the case open for 2 business days so if customer does have any comments, concerns or questions customer can call writer back.
CLOSED LOOP UPDATE - confirmed repairs with Jim sa no callback from customer.

Corporate - Complaint Contact - Default - Default - Default	Customer having issues with dealership regarding Collision Warning system
Corporate - Survey By-Pass - No Authorization - Default - Default	Customer is refusing to work with CM on information requested
Product - Electrical - Global Position Sensor - Other - Default	Customer states he is having issues with the Front Control Sensor
Product - Electrical - Unknown - Other - Default	Customer tested collision warning system, believes it does not work

Briefly summarize why the customer is contacting Chrysler: Customer states he is having issues with the Front Control Sensor not working properly. Customer states he brought the vehicle into the dealership to find out what is wrong with the vehicle. Customer states the dealership told him that there is an issue with the vehicle then he received a call today from SM Nick saying there is nothing wrong with his vehicle. Customer states when he first purchased the vehicle he asked the dealership to look over the vehicle to make sure there are no issues. Customer states the dealership told him they looked it over and everything was fine. Customer states he later found out that the vehicle was send over from another dealership.
Agent contacted Crystal Chrysler Jeep Dodge 64804 and spoke with SM Nick. Nick advised the customer is having issues with the front collision sensor. Nick states the issue is not easy to reproduce because it is unsafe. Nick states he is in contact with STAR to see if they can find a way to correct the customer s issue. Nick states he is still working on the vehicle to find the issue. Nick states they were able to get the Front Control Sensor to work with the cruise on. Nick states STAR informed him that if it works with the cruise on then there should not be any other issues.
Briefly summarize what the customer is expecting: Customer is seeking assistance with his vehicle.
Caller [redacted], husband of owner) expressing concern about the Forward Collision Warning system (FCW). Caller says he has personally tested the

vehicle several times to see if the FCW system becomes activated at 5 mph to speeds over 50 mph and caller says it does not come on. Caller has taken the vehicle to Crystal Chrysler Jeep Dodge (64804) last week and several people did a test drive and said the FCW does not work and does not come on when it should. Caller talked to SM Nick this week and caller says he referred the matter to Chrysler technicians who said the FCW does work and is only supposed to work at 30 mph.
-
Agent looked up owner manual and the manual reads as follows: 'The FCW system includes Advanced Brake Assist (ABA). When this feature is selected, the ABA applies additional brake pressure when the driver requests insufficient brake pressure to avoid a potential frontal collision. The ABA system becomes active at 5 mph (8 km/h).' Customer is upset that there is a disagreement amont people at the dealership and that some of the people in the service department were saying that the FCW system was not working and they then seem to change their minds and now are saying it does work. Caller is also confused about what speed the FCW should be activated at - the owner manual says 5 mph and caller says he was told by SM Nick it is 30 mph,
-
Agent attempted to contact 64804 but the serviced department was closed. Agent advised the case will be escalated due to the safety concerns of the customer.
-
Customer advised a call back is required and will take place within one business day by COB their time
Preferred Morning/Midday call back number is [redacted]
Preferred Afternoon/Evening call back number is [redacted]
Customer email address for case updates: [redacted]
Who has possession of the vehicle? (Owner/Dealer/IRF) Dealer
Has the vehicle been diagnosed by a CDJ dealer? (Yes/No) Yes
If a CDJ dealer has diagnosed, what is the dealer name or code? Crystal Chrysler Jeep Dodge (64804)
Reassigned to 88F
Customer called back to follow up on his conversation with PT253. Customer emphasized again that his basic question and concern with the vehicle has not been answered even after much testing and diagnosis by the dealer and many calls to Jeep Customer Care. Customer states that he has been told that the vehicle is fine but that operating the vehicle requires activating Adaptive Cruise Control for the Forward Collision Warning system to be activated. Customer states this is contrary to his own study of ACC and FCW in the full owner s manual. Customer states he is mistrustful of the dealer assurances that the car can be picked up and nothing is wrong with its operation. Writer informed customer that his ongoing, unresolved vehicle concern has been escalalated to the case management team. Customer was told that someone will contact him either today or by the end of business on Monday, September 23.
Writer provided CAIR # 2[redacted] for customer reference.
Customer states he has a case number for 2014 Jeep Overland and was told he would be contacted and 24-48 hours and he has not heard from anyone and there is a safety issue and needs to speak to someone right now from the higher technicians.
Mr. [redacted], customer spoke to an agent Paul on Thursday and since then he has gotten back his vehicle and the information he got was false and unsafe from the DRL.
Customer states he has a simple question and no one can answer it and the DLR advised him that the information came directly from Chrysler.
Customer inquiry must the forward collision control warning FCW with mitigation if equipped. Customer states as far as he knows his vehicle is equipped and he has 400 miles and had 90 miles when he got it and 270 miles has been put on in the service department.
Must the adaptive cruise control be active or in use for the forward collision warning to operate. Customer states the manual says No.
Car owner wants to speak to the Chrysler technicians directly customer does not feel safe driving this vehicle and it is brand new and does not know what to do at this time.

Customer states the DLR looked at the Jeep and Checked all system is okay at this time and he can drive with the cruise control on and the DLR advised him it was safe and not to believe the owners manual as the manual information is not correct.
Customer states he can not drive a vehicle that he has spent $50000.00 for and it is unsafe and no one can help him and he will be getting his attorney involved if someone get killed in his family or hurt Chrysler will pay for it.
Customer states the DLR he has been using is not providing him with the proper information and the vehicle is not safe and telling him to do things different then the warnings signs in the manual.
Customer states he did go to an alternate DLR to discuss this information and was told to the best of there knowledge the owners manual would be correct.
Customer is seeking resolution and a callback regarding this issue.
Writer offered to contact an alternate DLR to have his vehicle concern looked at but customer did not want that.
Customer wants to know if he is suppose to drive his vehicle.
Writer advised customer that he should bring it to an alternate DLR or not to drive the vehicle if he does not feel safe but it would be up to his discretion and once he gets more follow up with the case manager to make a better decision in regards to his concerning issue and how to properly operate the vehicle safely.
Writer advised customer that we are not trained technicians at the USCAC and we can only advise him of the information provided by the owners manual
Writer advised customer that his case is open and has been escalated to a case manager.
Customer upset but will wait for his callback and is expecting one by Monday.

*STAR Case [redacted]:
-Per STAR technician concerning this vehicle, it appears the system is working as designed. I also advised him to show the customer the description of the Forward Collision Warning Plus as written in the owner s manual.
*STAR Case [redacted]
- If the system determines the driver is actively driving and aware of the environmental conditions, it will suppress the warning assuming the driver is in control.
- The vehicle must be traveling greater than 5mph.
*Answer ID 21747: 2011 Chrysler Technology & Safety Highlights
- The FCW function operates regardless of whether ACC is active or not, notifying the driver, both visually and audibly, when he/she is getting too close to a preceding vehicle or object.
*Owners Manual
-FORWARD COLLISION WARNING (FCW) information is under ADAPTIVE CRUISE CONTROL (ACC) section which starts on Pg 194. FCW subsection starts on Pg 218.
-Pg 220, The minimum speed for FCW activation is 5 mph.
-Pg 220, To prevent testing of the FCW system, after 4 Active Braking events within a key cycle, the Active Braking portion of FCW will be deactivated until the next key cycle.
-Pg 220, Forward Collision Warning (FCW) is not intended to avoid a collision on its own, nor can FCW detect
every type of potential collision. The driver has the responsibility to avoid a collision by controlling the vehicle via braking and steering.

Forward Collision Warning This feature, part of the Advanced Warning and Adaptive Cruise Control Group
Writer contacted dealer 64804. SA JJ states Service Manager (SM) Nick is not in today.
Writer left voicemail for SM Nick requesting he contact CM Jarrod concerning possibly printing STAR Case 1[redacted]4 to show customer lines 133-135.
Writer notes that system will not allow email to [redacted]
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted]
Writer notes customer was disrespectful throughout call.
Writer informed customer: case was escalated to Top Care West and customer assigned a CM, Jarrod, the case number, CM contact information, and TCW waiting on information from dealer as to how customer can be provided documentation.
Writer confirmed email address on file is correct. Writer informed customer that system will not allow email to be sent to his email address.
Customer wants CM to see invoice that shows mileage in and mileage out because he states that there is no way that the dealer test drove the vehicle when it shows both as the same. Customer insists that TCW obtain invoice from dealer.
Customer read from Owners Manual. His owners manual does not match online copy writer was reading.
Customer interprets information in manual as ACC and FCW are two different things. Writer acknowledged that wording was not clear and informed customer of lines 132-135.
Customer states SM Nick told him that he cannot provide written documentation of what the technicians have stated. Writer informed customer that CM will research options.
Customer informed writer that the General Manager had agreed to take back new vehicle and give back the old one if customer can provide documentation stating the FCW is only active when ACC is active. Writer offered to forward this information to CM so that CM can follow up with GM. Customer declined.
Writer set follow up for no later then 09-24-13.
Customer called in for clarification of the two features Adaptive Cruise Control and the Forward Warning Collision Features. Customer seeking if the two features can be active at same time and if the FWC feature is still active if the ACC is disabled. Customer seeks also clarification on a bulletin that is referred to at the DLR that the customer has been unable to view.
*****
Agent advised when the ACC is active, it can trip the FWC to engage if circumstances arise. Agent advised these are two separate features though they work together almost acting as one feature at times but both perform two separate functions.
* * * * * CASE MANAGER TEAM - District Top Care West * * * * * *
Writer contacted dealer 64804, op 2. Writer left voicemail for SM Nick
Writer left voicemail for SM Nick requesting call back concerning possibly printing STAR Cases.
SM Nick left voicemail stating that customer has seen bulletins and dealer is attempting to locate similar vehicle with same systems for comparison. Customer met with them yesterday.
Writer contacted dealer 64804, op 2. Writer left voicemail for SM Nick asking if the STAR cases can be printed because customer would like documentation and requested timeframe for finding vehicle to test drive.
SM Nick left voicemail stating that he has previously provided copies to the customer a day or 2 ago.
CONTACT UPDATE - 1st Contact attempt, phone number dialed [redacted]
Writer informed customer that writer was assigned as CM and provided contact information. Writer informed customer that writer has been informed that dealer provided documents to customer and that they will be doing a test drive once a similar vehicle is found.
Customer attempted to argue about documents and conclusion that ACC must be active for FCW to be active. Writer informed customer that according

to the information provided, nothing is wrong with his vehicle. Customer called writer stupid. Writer informed customer that he needed to keep the call professional. Customer continued to be disrespectful. Writer informed customer that call would be disconnected. Writer disconnected call.
Writer contacted dealer 64804, op 2. Writer left voicemail for SM Nick asking for update on finding similar vehicle.
Writer contacted dealer 64804, op 2. Writer left voicemail for SM Nick requesting update.
Writer contacted dealer 64804, op 2. Writer left voicemail for SM Nick requesting update.
Writer contacted dealer 64804, op 2. SM Nick states that there was a test drive and they have found that there was something wrong with customers vehicle. SM Nick states that the ACC does not have to be active for the FCW to be activated. SM Nick states that he will be working on the vehicle and writer can contact him for update on 10-01-13.
SM Nick states customer provided vehicle from lot.
Writer contacted dealer 64804, op 2. Writer left voicemail for SM Nick requesting update.
SM Nick states diagnosis that pin in a connector in sensor was not in all the way. Vehicle repaired, road tested with customer after, and it has been returned.
*Owners Manual
-Pg 216 It is unsafe to test the FCW system. To prevent such misuse of the system, after 4 Active Braking events within a key cycle, the Active Braking portion of FCW will be deactivated until the next key cycle.
*STAR case [redacted] 5 as of 10-03-13
Dealer 9/19/2013 10:44. collision control inop.
STAR 9/19/2013 10:44. Stephen per the concern. How are you testing the system? Have you read the following document: FORWARD COLLISION WARNING PLUS. I am not there, but since there are no codes it would appear the system is working correctly. Report back if further assistance is required. Mike K
Dealer 9/19/2013 13:42. reviewed system info. system dose work with cruse on but can not get it to activate with it off. know it shuts of if it feels cust. is actively driveing. seems like that would make it difficult to activate intenisonaly. cust wants to see it activate. would seem if it works with cruse then the system is working. is this correct. just trying to make cust happy. he has already contacted chrysler on this.
STAR 9/19/2013 13:42. Stephen I called your cell # and got no answer. I also called the dealer and could not get throught to 'anyone' in service. Can you call the Star center and ask for my extension # 4720248, I would like to speak to you about this vehicle. Mike
STAR 9/19/2013 15:51. Stephen called back on this. I advised him it appears the system is working as designed. I also advised him to show the customer the description of the Forward Collision Warning Plus as written in the owner s manual. Mike
Dealer 10/1/2013 11:55. system working but insisting on distance specs for short and long range settings. thank you.
STAR 10/1/2013 11:55. Stephen has the vehicle returned? If so what can I help you with? Mike
Dealer 10/1/2013 15:00. yes cust still not satified. wants to know the distance at which it is suppose to ingauge system.
STAR 10/1/2013 15:00. Stephen, all I can suggest it to compare to other like known good vehicles. It appears to me (and you) that the system is working correctly. There are no specs that I am aware of. Mike
Writer contacted dealer 64804, op 2. SM Nick states vehicle came back in and dealer went through system. Found issue with pin (lines 242-244). After that vehicle was compared to like vehicle and it performed the same. Customer wanted specifications for system. Writer informed SM Nick that STAR case states there are no specs that they are aware of. Writer informed SM Nick that writer will inform customer.
Writer contacted customer [redacted]. Writer message with Nancy informing customer that vehicle was repaired and that vehicle is operating as designed. Writer advised that writer seeking to verify repairs are to his satisfaction and that no further contact is needed if

there is no issue and that case will automatically close in 2 business days if there is no further contact.
Writer contacted [redacted]. Writer message with Nancy that writer seeking to verify his issues were taken care of. Writer requests call back and set follow up 10-14-13.
Writer contacted customer, [redacted] Customer states that he wants more information on how it is supposed to work. Customer would like specification on distances on when this would engage.
Writer was discussing with customer about what information can be provided, from where, and how. Customer requested that writer not contact dealership. Writer advised customer that dealership has the information requested from the technicians. Customer disagrees.
Customer called writer a pain in the neck. Writer advised that customer would need to keep call professional or writer would disconnect. Customer requests no further contact.
Customer stated they wish no further correspondence from KM887.
Customer stated that KM887 was not assisting him with his request/requirements.
Agent advised customer should continue to work with dealership 64804 to seek potential resolution for their concerns.
Customer stated that they will continue to work with dealership to seek information until satisfied.
Writer notes that per lines 301-310, customer refuses to authorize writer permission to continue working case.
CLOSED LOOP UPDATE - no need for additional follow-up.

Product - Electrical - Unknown - Intermittent or Inoperative - Default	alam went off for no reason and vehicle would not start
Product - Brakes - Power Brake Booster - Other - Default	auto brake went off for no reason.
Product - Electrical - Navigation System - Intermittent/Cuts In and Out - Default	navigation cut out

Briefly summarize why the customer is contacting Chrysler: Customer stated her new vehicle has had numerous issues and she no longer is feeling safe in it. Customer stated he engine light has come on twice, the GPS froze until the next morning, the alarm went off for no reason and the vehicle could not be started and the alarm could not be shut off, the raise and lower suspension feature makes a popping noise and the automatic brake went off and there were no cars in front of them.
Briefly summarize what the customer is expecting: Customer is seeking resolution for the issues with her vehicle or an even swap for the one she has.
Writer advised the customer to take the vehicle to the dealership and have a full diagnostic done and then she can proceed from there.
Reassigned to KM788 for survey bypass undiagnosed within warranty
Jim, SM at dealer 45478, called to speak to CM. Writer advised dealer that this case is being handled by the Jeep specialty department. Writer transferred dealer to Jeep brand line: 1-877-426-5337.
Dealership called in following up on case because customer thought someone from CAC called her and told her the vehicle was not at the dealership. Agent stated that no one at CAC called the customer and told her that. Dealership thanked agent and vehicle is in getting diagnosis done now.
Information forwarded to DCP15
Writer called and spoke to SM Jim and SM stated that they are waiting for a Fuel Filler neck right now. SM stated that they were unable to duplicate the customers concerns and there were no failure codes. SM informed writer that they got in contact with STAR and they told him not to do any repairs since no codes came on.

CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted]. Writer called and spoke to customer and writer informed her of the fuel filler neck being replaced. Writer informed customer that we will get more people involved and give her a call no later then 9/30

Writer attempted to call SM but he was out of the office so writer will call back tomorrow
Status update provided via email to the following email address:
[redacted]
I do apologize but at this time I have no new information for you. I will be calling the dealership again tomorrow to get more information. Thank you for your patience in this matter
End of Status Update
Begin Customer Message reviewed:
I have now called and left two voice mails which neither has been returned. We called the dealership and they told us they haven t even really began to look at our car. THIS IS UNACCEPTABLE, they have had the car for over a week! We have had our car for less then 2 months and its been at the dealership for almost half that time. There isn t even 5,000 miles on the car! Plain and simple we want a new car. We don t feel safe in the car we have, and no one can seem to figure out whats wrong or seems to care. For a new car this is ridiculous. I am a firm believer that even with issues as long as customer service is good then we will be loyal customers, but frankly the customer services at the dealer level up to the Chrysler customer care has been poor. If there is a return policy we would return the vehicle and will never buy a Chrysler vehicle again. Please let us know what our option are.

Status update provided via email to the following email address:
[redacted]
I do apologize that you have had this kind of experience. I was out of the office on Tuesday and unable to follow up with the dealership. I have gotten our business center involved in your case and have not gotten any response as of today. I just spoke to the Service Manager and he let me know that they returned your Jeep back to you. Are you still having the electrical problems at this time?
End of Status Update
Spoke with customer, customer stated she has not heard from her CM. Customer stated they do not feel safe in the vehicle and stated the vehicle almost caused them to get into an accident. Customer stated she wants to look into getting another vehicle as she does not feel safe and her expectations are to get into another vehicle at this point as no one can figure out what the problem is and stated she doesn t want to wait until they do get into an accident. Customer stated the they had just purchased the vehicle on Labor Day stated the dealer has had the vehicle more than they had. Advised writer will have CM follow up per her request to get into another vehicle as CM will need to confirm next steps on request.
M[redacted] called requesting to speak to CM MJ444. Writer warm transferred customer to CM TT434 for further handling.
Customer contacted writer. Customer advised the vehicle has been having many issues and customer has been in rental for 2 weeks. Customer stated received an email from CM and customer does not have vehicle back like CM stated in the email. Customer feels unsafe in the vehicle and feels that the dealership is lying. Customer confirmed vehicle only has 3,000 miles on the vehicle. Customer requested a repalcement vehicle. Writer made no

guarantees and stated case will be sent to Care Analyst Team for review. Customer agreed. Customer upset that no one has been contacting customer to give updates. Writer reassured case will be sent to correct department at this time. Customer requested **No more EMAILS** and requested to only be contacted through phone. Writer stated case will be documented. Customer advised if no call from Care Analyst Team by 10/09, customer will contact writer.
Begin Customer Message reviewed:
I just received this email and we have not had the car returned to us. So either the dealership gave our car to someone else or they have lied to you. Please call me immediately!
End of Reviewed Customer message
********** 91L Review **********
AM replied to an email from the CAIR handler stating that although the customer s concerns are very valid, at this time we just don t have any info that will help identify the cause of the intermittent failures. It is difficult to 'guess' what to fix on a computerized system with no fault codes. Despite the customer s demand of being provided a new or replacement vehicle, Chrysler will not offer a replacement vehicle at this time with no repair history or even one instance of being able to duplicate the customer s concerns while the vehicle was in the dealer s posession. sab20,AM. _
*********Case Escalated to I2R**********

Caller Mr [redacted] requesting to speak with Case Manager.
Impartial Services Group, LLC (ISG)
Writer gave number and connected.
Phone: (800) 215-6230
I got a message from Elaine for me to call [redacted] because the dealer was calling him to tell him his vehicle was NTF and that he needed to pick it up and take back the rental vehicle. I called customer back and apologized for the inconvenience and let him know I was his CAIR case manager and that he did not need to pick up his vehicle or return the rental until I talked with the dealer and had his vehicle fixed. Customer stated Tina TT434 told him he could get a replacement so I read her notes and let him know that she was not able to give the replacement since Chrysler was not offering it at this time. I let him know my first priority was to make sure his vehicle was safe then if I was unable to give it back to him as a safe vehicle then we would look into other options. He mentioned that he was to make his first car payment but he has not had the vehicle in 2 weeks. I let him know that after we were done with fixing his vehicle I would look into giving him a car payment reimbursement. I asked him to make his payment normally. Customer understood. I offered further assistance and customer stated he was happy to be able to talk to someone that was willing to assist him since the dealer was not willing to. I gave him my contact info and let him know I would contact the dealer and get back to him before I left on Monday 10/7. Customer requested I contact him on his cell phone with any updates I let him know I would.
I called dealer and spoke with SA Matt first and was told that the fuel tank filler tube was replaced on the vehicle. I let him know the customer had a concern because he was told NTF. I authorized the rental car and was asked to send the authorization to ema[redacted] Jdirosa@gillmanauto.com. I was trans to SA Kevin that was in charge of the case and was told he never told the customer NTF but that hey could not duplicate the breaking problem. SA kevin stated he believes the customer accidently hit the down slap shifter located behind the steering wheel of the vehicle. I asked if he would mind taking a test drive with the customer and use the shifter to show him how that feels and see if that would help the customer understand if that is what happend or not. SA Kevin agreed to do the test drive but said he does not have time today. I let him know I would call the customer and ask him to go on the test drive with him and would allow him to keep the rental until Monday if needed. I offered my contact info and was asked to email it to him at kbrown@gillmanauto.com. SA stated customer has had the rental car from 9-23 until 10-7 I let him know I

would send the email for the time allowed and would like him to contact me with any updates.
I called customer and let him know SA Kevin stated the fuel tank filler tube was replaced and that the SA would call him to come in for a test drive and that it may not be until Monday. I told customer the SA thinks he knows why the vehicle is automatically braking and wants to test drive it with him to see if that is the reason. Customer stated he would go on the test drive and was glad they fixed the other problem. I asked the customer to follow up with me if he went on the test drive before I called him back.
Mr [redacted] LVM asking me to call him back regarding the test drive with SM Jim Deroso. I called customer back and was told that he went on the test drive with SM Jim Deroso today and that during the test drive they were unable to duplicate the initial problem but that a light flashed on during the test drive that said Air suspension cooling down please wait. Customer stated that when he asked the SM what that meant he was told it was not a big deal and that it wouldn t even show up on the computer since it just flashed on quickly. I asked the customer if the slap shifters behind the steering wheel were used during the test drive and he stated they were not. Customer stated SM told him that the technical advisor told him to give the customer his car back. The customer refused to take his car back and told SM that his customer care manager told him not to take the car back until she said it was OK. I let the customer know I would follow up with him by tomorrow.
I spoke with SM Jim Deroso who test drove with the customer. SM stated that during the test drive he couldn t duplicate the problem. I asked if SM used the paddle shifters to try to duplicate the problem and he told me no he did not. I asked about the Air suspension cooling code that flashed during the test drive and he stated he never saw it but the customer did so he test drove it another 8 miles and could not get the car to duplicate the new code or the braking issue. SA stated the code was part of the OBD system self checks and that the car is not showing any codes. SA stated STAR told him to give the vehicle back to the customer as NTF. I let SA know I would talk to my manager and get back to him today with info on the case.

Writer is suggesting reimbursement as a goodwill gesture for customer satisfaction.
Customer s proof of payment attached to CAIR (Y/N): Y
Mileage: 3293
Date of repair(s): 10/3/13
Additional pertinent information: Reimbursng customer half of one month payment $879.96/2 = $439.98, as vehicle has been down 16 days, filler neck has been replaced and numerous repairs have been performed with STAR involved
Writer is submitting check for approval in the amount of: $439.98
CNA flag (Y/N): N
***** Customer Document Received *****
SM Jim stated he was talking with an agent that informed him he will send the SM an email with the Cair # and authorization for the rental vehicle reimbursement. SM stated he has not receiving any information and he wanted to know who is going to pay for that. Writer gave Jim the phone number notated on line 122 and transferred him to that department.
Customer was approved for 11 days of rental covered by Chrysler up to $35 a day. Gas an insurance are not covered.
10/11/2013 10:17:44 AM: User Comment by Elisabeth Doyle: I received a VM from Jim dirosa SA requesting I email him a rental reimbursement letter stating I will cover the 15 day rental. I sent him the email below.
Jim,
-
I will pay for a 15 day rental from Enterprise for Rebekah Truong for up to $35 a day. Insurance and Gas are not included in the rental and will be taken care of by Rebekah Truong.
CAIR [redacted]. If you need any other information please let me know
-

Thanks
Immediate Supervisor Call
Writer took call from customer who states the vehicle is still at the dealer and they can not duplicate his concern. Customer states that he knows the dealer has contacted STAR and they told him nothing can be done until the concern is duplicated. Customer stated he brought a video of the problems he is having. Customer stated he had the same concerns back in October. Customer stated he does not want to pay for a vehicle that he does not feel safe in. Customer stated he feels that no one cares about his concerns and that he is tired of hearing everyone tell him they can not keep throwing resources at his vehicle. Customer stated the speedometer goes blank, the vehicle raises and lower and brakes on its own. Customer states the airbag light and ABS is inop. The customer stated he refuses to pick the vehicle up. Customer stated that he has left messages for his Case Manager and does not get called back. Customer stated there is no pattern as to when his problems happen and that it is completely random. Writer advised customer that a data recorder can be put in the vehicle to duplicate the concerns. Customer declined stating he will not drive the vehicle. Customer stated he wants a new vehicle. Writer offered 1 month s vehicle payment to continue with duplication process. Customer declined. Writer advised customer the case can be sent to a CARE ANYLIST TEAM for further review. Customer declined and asked to speak with writer s supervisor. Writer transferred call to HH261 at ext 66326.

Product - Electrical - Unknown - Intermittent or Inoperative - Default	Intermittent issue that causes the vehicle to brake suddenly
Product - Electrical - Cruise Control - Defective - Default	Intermittent issue with cruise control

Briefly summarize why the customer is contacting Chrysler: Customer contacting Chrysler seeking address. Customer states they are seeking lemon law. Customer states the issue they are having is that their vehicle is equipped with a collision warning system but it is going off when no need. Customer states the vehicle just brakes on its own, a warning message comes up and the center console flashes. Customer states this is the third time they have had to go to the dealer about it and they had other issues before so they have been to dealer almost 6 times already. Agent appologized to customer. Agent advised customer that by contacting Chrysler they are not starting any formal process. Agent advised customer that if they are seeking replacement/repurchase/buy-back we would have to send case for review. Customer states that is something they are thinking about and what really want is a working vehicle. Agent appologized to customer. Agent advised customer that what we can do to help resolve there issue is if they go to the dealer and have it diagnosed and call us while the vehicle is at the dealer we could get a case manager involved to help correct this unresolved issue (AC 18734). Customer states they would like to give the dealer another chance to fix the vehicle but after that they might have to take another route. Agent appologized to customer for their experience. Customer still wanted mailing address so agent provided;
Chrysler Group Customer Care
P.O. Box 21-8004
Auburn Hills MI 48321-8004
Agent advised customer of recall, customer states it has been completed.
Briefly summarize what the customer is expecting: Customer expecting mailing address for complaint.
Customer contacting CAC stating the vehicle is still having concerns with the cruise control and collision warning system. Agent contacted Jason at

Tate DLR (54194) at 410-766-2560 who stated they are currently working with the customer and will contact STAR to seek a resolution. Agent confirmed with the customer of the course of action for a resolution, customer understood and agreed.

Product - Electrical - Cruise Control - Intermittent or Inoperative - Default	Adaptive cruise control states front lens not clean
Product - Brakes - Unknown - Other - Unknown	Brake indicator came on three times
Corporate - Survey By-Pass - No Diagnosis - Default - Default	no diagnosis at this time

Customer has a service concern with a 2014 Jeep Grand Cherokee.
Briefly summarize why the customer is contacting Chrysler: Customer states that the adaptive cruise control will cut out and a message will display clean front lens. Customer states that he brought the vehicle to the dealership and they did not test drive his vehicle. Customer states that he got onto the highway and the indicator came back on. Customer states that he is also having concerns with the brakes as the brake indicator has come on three times. Customer states that dealer is not aware of this concern.
Briefly summarize what the customer is expecting:
Called dealership 44435 to confirm details of diagnosis. Spoke with Service Advisor McKenzie.
What is the diagnosis? No diagnosis
*If unable to duplicate concern,
*Have you had an opportunity to do a test drive with the customer? Test drove but not with customer
*Has STAR been contacted? (If yes, obtain STAR case #) No
SA states that there were no codes were displayed and there were no Technical Service Bulletins or star cases that provided information for this concern. SA states that they had cleaned the lens and test drove the vehicle before leasing the vehicle back to the customer. SA would like customer to schedule an appointment for a diagnosis.
Customer states he will schedule an appointment when he has available time as he is leaving in a week to visit out of town for six weeks. Agent advised customer to contact Jeep CAC when vehicle is at dealer to have his concerns escalated.
Reassigned to JR1305 for Unresolved/Intermittent/Cannot Duplicate Repair

Issues
The AnswerCONNECT article that was referenced to provide the answer to the customer was # 18734
Dealership called because the customer informed them that they needed to call us when the customer went into the dealership so we could send a team out to look at his vehicle. Agent advised the dealership that we need to have a diagnosis completed on the vehicle so we can send the case off for further review. Dealership advised the agent they would call back once the diagnosis is completed.
Dealership called back referring to diagnostic on customers vehicle. No codes, came up, looked into further, found sensor was loose, reconnected loose sensor, drove vehicle and everything is fine with vehicle.
Dealership is going to contact customer to pick up vehicle.

Customer states he previously bought a 2013 Jeep Grand Cherokee and was very impressed.
He then bought the 2014 JEEP GRAND CHEROKEE OVERLAND 4X4 SPORT UTILITY 4-DR in November
Customer states the vehicle has been in for:
-2 side mirrors had to be replaced
-Rear view mirror had to be replaced
-Door handle on lift gate replaced (twice)
-14 tsds update to radio
-Transmission shifting hard
-Radio went out
-Life gate had gap – gab by radio trim
-Headlight is fogging up condensation. (Issues go away in 3-5 hours).
***Vehicle is at the DLR
***No complaint with DLR

Briefly summarize why the customer is contacting Chrysler: Customer is concerned regarding the issues already at 3000 miles.
*Customer wondering if there is any option other than selling. Customer unsure what to do, loves the truck but doesn t want the issues.

CUSTOMER LOOKING FOR OPTIONS
*
Agent contacted SA Chris Dealer Code: 51- 66804
Dealer Name : MANCARI S CHRYSLER JEEP DODGE, Dealer Phone : 708-423-0910
Customer has been to the DLR 4 times already/ Customer had a 5 page repair history.
Chris states rear view mirror keeps falling down, rear window (the seam was pealing).
*DLR contacted STAR on the headlight assembles. STAR, states it is a normal condition no authorization through star to replace. (Condition due to the venting) .
*DLR contacted STAR on the Radio- STAR replace radio.
Also, customers lift gate elevated. Adjusted the rubber stopper.
Bezzle around radio flap needed to be pulled in.
DLR states all cosmetic/ body lines.
* All repairs have been done under warranty.
* Next month vehicle will have a recall
* Customer has had to go to the DLR a lot for the issue/ understands its an inconvenience.
* * * * * CASE MANAGER TEAM Top Care West* * * * *
[redacted]
My name is Kala and I am contacting you on behalf of your new Top Care West Case Manager, Jessica.
Here is some information that you may find helpful:
The Chrysler Case Management telephone number is 1-800-763-8422.
Jessicas direct extension is 66140.
Jessicas work hours are 6:30 a.m. 3:00 p.m. MST, Monday Friday.
Top Care is currently researching your case and will be contacting you by telephone no later then 10-10-13 to review it with you.
Thank you for your patience in this matter and for being a valued member of the Jeep family!
End of Status Update
Writer contacted customer, who stated that all of the issues have been resolved except the condensation in headlights. Customer is concerned about the condensation, though STAR and owner s manual states that this is normal as these are vented headlights. Customer is looking to have Chrysler replace the headlights even if the issue persists in those as customer would be more comfortable with knowing that the headlights are new.
CORRECTION: line 54 should read, writer contacted Chris, service advisor at 66804.
Correct email: [redacted]
Customer called in requesting a call back. Agent advised customer that it stated in the customers case that a callback could still be provided today 10/10/2013. Agent gave customer case number for future references.
Status update provided via email to the following email address:
[redacted]
My name is Kala and I am contacting you on behalf of your Top Care West Case Manager, Jessica.
I do apologize that we were not able to contact you by phone due to the late hour that your callback request was received.
Jessica was informed by the dealership that you are requesting that your headlights be replaced and will be contacting you no later then 10-14-13 to discuss this with you.
If you have any questions, please feel free to email Jessica using the link provided or contact her by phone 6:30 a.m. 3:00 p.m. MST, M F.
Thank you for your patience and for being a valued member of the Jeep family!
End of Status Update
Writer contacted Chris, service advisor at 66804 (service manager unavailable), who stated that the anti coating mists that are available for the outside of the headlight and the customer s concern is with condensation on the inside and would have no effect on the complaint.
Writer was advised that the only thing that can be recommended is replacing the headlights. As this is a normal condition, dealership is

not able to replace the headlights unless Chrysler authorizes it.
Writer contacted customer, who stated that vehicle only has 3,200 miles, and has had so many issues with the vehicle. Customer states that a few of the issues included the rear handles that were replaced twice, the hatch was misaligned and needed to be repaired, steering wheel was replaced, the rear view and side mirrors, headliner loose, etc. Customer states that customer is starting to lose track of all that has been done because there are so many. Customer knows that a vehicle is not going to be built perfectly, but with as many things that have been wrong with the vehicle customer is starting to be apprehensive of what the future may hold for vehicle. Customer states that just a couple days ago, the ACC service light came on for the cruise control and has to take vehicle back in. Customer will need to take vehicle to dealership again next month when the recall is released. Customer states that if customer keeps the vehicle, there will just be many trips to the dealership and shouldn t have to in a brand new vehicle. The vehicle was traded for a 2013 Jeep Grand Cherokee which customer was very happy and impressed with. This vehicle has given customer more trouble than any other vehicle owned. Customer is reaching out to Chrysler as customer is not sure what to expect with the vehicle in the future. Customer would like the issue with condensation in headlights resolved as it is not normal for the condensation to last 3-5 hours. Customer stated that if the issue cannot be repaired, requests that the headlights be replaced with the ones that are in the SRT8 model as those are black inside and the fog will be less visible. Writer will research the headlight issue further to determine options. Writer asked customer what expectations are, customer states that customer is not comfortable in vehicle and would really like to see Jeep replace the vehicle with one that does not have these issues. Writer will forward case to a Care Analyst who will contact customer within 1-2 business days.
Customer was advised that due to the nature of their request a call back is required and will take place within one to two business days.
Preferred call back number is [redacted].
Who has possession of the vehicle? Customer
Is this a request for Lemon Law, buy-back, or replacement? Replacement.
********** 91L Review **********
*********Case Escalated to I2R**********
Reviewed Warranty History which determined this case should be escalated to I2R for case management.
The I2R Customer Resolution Team is now responsible for the CAIR. If the customer should call, please advise them to contact their I2R Coordinator Jaime Wiley at 1-888-542-7239, extension 2155. Thank you in advance
Called the customer on his home contact number and that he currently has his vehicle and that he really has not test driven the vehicle because he has been so embarrassed with his vehicle because of the issues with his headlights and the condensation that keeps occurring. The customer advised that he would like to see what can be done to replace his headlights with the alternative blackouts. The customer advised that he traded his 2013 for this 2014 and this has been nothing but a letdown in his eyes. I apologized to customer for the inconvenience, as I can certainly understand their frustrations and concerns. I advised the customer that their case has been forwarded to me for special handling. The customer advised that he did not want to take the vehicle back to the dealership for service until he has to for the recall on his vehicle. I advised to the customer that I am not showing that his vehicle is set to have a recall done. The customer advised that he will fax a copy of his repair orders to me, and I advised to him that I will give the dealership a call in reference to the other issues that he has advised are occurring in reference to the hard shifting in the transmission and that warning light when trying to engage the adaptive cruise control. I have also advised the customer that I would like to review his/her case with the dealership, and will call them back to review a plan of action towards a resolution. Customer has accepted my offer and was appreciative. Advised customer I will contact their dealers and follow up with them by 10/16/13
Called the customer on his home contact number and I advised to the

customer that at this time we will not be replacing his headlamps on the vehicle. I advised to the customer that per STAR that the issues are a normal characteristic of the headlamps and that there is not a repair deemed necessary. I advised to the customer that if there are any other issues to please give me a call and I will be more than happy to assist.

Product - Electrical - Navigation System - Unknown - Default	Owner seeks out of vehicle

10/11/2013 AM contacted by General Manager of Dealership Eric Goodwin, Owner seeking to get out of the vehicle, they crunched # with customer, Owner did not want to take such a large loss. Asked GM to contact his rep to see if Chrysler will Replace his vehicle.
AM explained to Eric that based on review of owner concerns and issues (satellite/radio reception / Nav mapping program / Trans Shift programming / Safety - Collision detection - Brake programming) are functioning as designed. Chrysler does not typically offer replacements for properly operating vehicles.
AM took Customer Cell # and attempted contact, lft msg with My Cell # md19
10/11 Owner contacted AM, Seeks Replacement, AM informed Chrysler does not replace vehicle that we have tested and investigated and found to be operating as designed. Owner stated he feels it does not operate properly & wants AM to work with dealer to make them provide a better offer for him to get into a different vehicle. AM explained that Dealers are independent businesses and Chrysler cannot dictate or control a dealers Sale or Trade offer. Owner disagreed and stated he knows that this can be done, much like Chrysler should make the changes to his vehicle to make it operate the way he would like. Again AM described that Chrysler is not considering a Replacement offer as our position is that his vehicle is operating / functioning as designed. Owner stated he knows AM could get the dealer to make a better trade offer and unknown why AM won t do this for him. AM assured the owner that what he seeks it not something AM / Chrysler can do...we can not dictate to a dealer the terms of a vehicle trade in / Sales deal that is between the dealer & a customer. Owner took AM Name and ended the call. Md19
Customer contacted CM. Customer stated he is almost out of gas and is 40 miles from his house. Customer is at gas station and the nozzle will not go down the filler tube to allow filing the tank. Customer stated he contacted his local dealer and they are closed and unable to assist. CM

acknowledged, apologized for the situation and recommended CM contact RA to assist the customer. Customer reluctant to do that stating RA would not have the aptitude to repair - they mostly fill the tank with gas and that is not possible because the flap is not opening on the fill tube. CM stated RA can tow vehicle to the dealer and CM can research providing a rental. Customer stated he needs this vehicle and the dealer is not open so no need to have it towed. Customer stated he will take out the tire iron and break the flap in order to fill up with gas and get home. CM strongly recommended against doing so. Customer stated he needs to put gas in the vehicle to get home, does not want to wait for RA, stated calling RA would be useless, and asked if breaking the flap would disable the vehicle. CM stated CM not qualified to answer and again strongly recommended that course of action. Customer stated he will break the flap in order to put gas in the vehicle , wanted this documented, and ended call.

Corporate - Enhanced Customer Satisfaction Program (ECS) - Default - Default - Default	forward collision warning system issue

****Begin structured narrative T2 - Beginning Narrative
Briefly summarize why the customer is contacting Chrysler:
Mr. [redacted]states that while he was driving the vehicle the other day another vehicle was making a left turn in front of him before he was to go thru the intersection and without warning his forward collision warning activated and automatically put his vehicle in neutral and received the message to press button and put into gear. Customer states with the collision avoidance it would provide a warning and apply the brake but for unknown reasons it put his vehicle in neutral gear.
Briefly summarize what the customer is expecting:
Customer wanted to know with the updates that were done on his vehicle would that have caused this to happen or is there another explanation.
Customer states that he advised the dealer of this too.
****End structured narrative T2 - Beginning Narrative
Customer advised a call back is required and will take place within one business day by COB their time

CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted].
Customer state that forward colision system did activate and brakes were appllied but it also put the customer into neutral. Customer stated that he would discuss this further but he has another call that he needs to

finish. Customer requested call back in fifteen minutes.
Writer called customer at [redacted]. Customer inquiring on if the recent updates that were done to the transmission system affected the forward collision system. Writer informed customer that writer would be more than happy to research this for the customer to see if it is normal function. Writer informed customer that writer s recomendation would be to take the vehicle in. Customer stated that he would like clarification of if this is normal function before he takes the vehicle in again. Writer informed customer that writer would follow up with customer. Customer stated that if he does take the vehicle in he would like to be in a Jeep product. Writer informed customer that we would do our best to arrange that.
Status update provided via email to the following email address:
[redacted]
My name is Spencer and I have been assigned as your Customer Advocate as part of the Enhanced Customer Satisfaction program. I would just like to reiterate that it is my suggestion that the vehicle be taken in as soon as possible at lest until we can determine whether or not it is a normal function after the recent update. The dealer is better equiped to make this determination than I am, as I can only ready what the updates are suppposed to improve or change. As part of the program we will be involving a Technical Specialist to help the dealer with the repairs on your vehicle. Also, should you desire, we will make a rental vehicle available for you for the entire duration the vehicle is in for repairs at no cost to you. Here is some information that will be helpful for you to have.
Your case number is [redacted]
Chrysler Case Management telephone- 800-763-8422
My direct extension is 66214.
My work hours are from 8am-4:15pm Eastern Time.
I will contact you back tomorrow.
End of Status Update
Writer called customer at [redacted]. Left message stating that recent flash to the transmission should not have affected the Forward collision system in any way. Writer stated that customer should take the vehicle into the dealer as soon as possible.
Writer called customer at [redacted]63. Left message stating that recent flash to the transmission should not have affected the Forward collision system in any way. Writer stated that customer should take the vehicle into the dealer as soon as possible.
Writer received voicemail from customer. Customer stated that he has called dealer and should be taking the vehicle in later today or early tomorrow. Customer asked if writer could call dealer to help get rental arranged so dropping the vehicle off at the dealer goes as smooth as possible.
Writer called dealer 42244 FRED BEANS CHRYSLER DODGE JEEP RAM. Writer left message for Service Advisor(SA) Justin.
Writer called customer at [redacted]. Left message.
Writer received voicemail from customer. Customer stated that the vehicle was just dropped off. Customer stated that he was placed in a rental.
Writer called dealer 42244 FRED BEANS CHRYSLER DODGE JEEP RAM. Writer spoke to Service Advisor(SA) Gus. Writer inquiring to speak to best POC for customer s vehicle so correct information is gathered to get TS involved. SA informed writer that SA Justin would be best POC. Writer requested to speak to SA justin. Writer was informed that SA Justin is not available. Writer left contact information and requested for SA Justin to call writer back.
Dealer code: 42244
POC Name: SA/Justin

SA Justin calling about the vehicle. SA stated that they were not able to find any issues with any of the systems or get the vehicle to duplicate the concern. Writer informed SA that just due to the nature of this concern writer does want the TS involved to review the information. Writer informed SA that case is sent up for their involvement and they should be getting in contact with SA soon.
Writer received call from customer. Writer informed customer on the update from SA but that we are still wanting to review this information with TS before the vehicle is released. Customer stated that he is on his way to Enterprise to get into a different rental. Customer stated that he just wants to get into something different and was told that the customer s rental allowance wouldn t cover it. Writer informed customer that writer would contact dealer to request that they are aware that there is no rental limit for this instance as long as we are getting the customer into something that the customer is comfortable getting into.
Writer called dealer 42244 FRED BEANS CHRYSLER DODGE JEEP RAM. Writer spoke to Service Advisor(SA) Justin. Writer requested SA contact Enterprise to make sure to let them know that we will be providing full coverage for any rental for the customer. SA stated that he would let them know. SA inquired about if there is any information from the TS. Writer informed SA that escalation has not yet picked up the case but should do so soon.
CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
Writer received call from customer. Customer stated that he did get into a different rental vehicle. Writer informed customer of the update that the TS is seeking more information. Customer stated that he is very concerned about the vehicle. Customer stated that he has been speaking to Chrysler Finance who advised the customer to try to reach out to DM. Customer stated that he called the general manager of the dealer in attempt to have the DM contacted. Customer inquired if writer could assist in bringing this to the DM s attention and request that the DM call the customer. Writer informed customer that writer would attempt to reach out to the DM but writer could not gaurantee a call back. Customer stated that he has received the check for reimbursement of a car payment from previous case. Customer stated that he does not want to cash the check as he feels that doing so would show that he is satisfied when he is not. Writer informed customer that writer would keep in touch with customer on the case.
Writer received voicemail from customer requesting call back.
Writer called customer at [redacted]. Customer stated that the dealer has contacted the customer stating that the vehicle is ready for pick up and there was nothing done on the vehicle. Writer informed customer that writer understand that customer would be concerned about no issue being found. Writer informed customer that we do keep a permanent record of all contacts on the vehicle so if a relating issue comes up in the further there will be a record of it. Writer informed customer writer has sent an email to AM at customer s request but writer has not heard back yet. Customer stated that he would be picking up the vehicle.
CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted] 9 FOR INFORMATION
Writer called customer at [redacted] Left message.
Writer called customer [redacted] Left message stating that writer was seeking to follow up on vehicle being returned to the customer. Writer requested that customer call back if issue is not resolved or there are other questions or concerns for writer to address. Writer stated that customer does not need to call writer back if everything is resolved and case would just be closed on 11/5/13.

CLOSED LOOP UPDATE - no need for additional follow-up.
Warranty Administrator Jenny calling about rejected claim. Writer reviewed claim and DI notes. Writer informed WA that writer would enter ECS notes for that approval.

Writer spoke to customer regarding concerns with the vehicle. Customer states his concern is with the 'forward collision' feature. Customer states he isn t aware of anything wrong with the system, just that he doesn t know how to use it. Customer states he will take the vehicle to the dealer next week for assistance in understanding the feature. Writer advised customer writer will follow up with him next Thursday 11/07
Next follow up date is set for 11/07 to confirm if customer has had the vehicle in to discuss 'forward collision' feature.
Writer attempted to follow up with customer on whether vehicle has been to the dealer for explanations on how to work the 'forward collision'.
Left message for return call for update.
Writer left message for SA, requesting call back to confirm if customer has brought the vehicle in yet to discuss the feature.
No email address in Coin.
Writer spoke to customer regarding vehicle going to dealer to address his request for information on the 'forward collision' feature. Customer states he has not contacted the dealer yet, but this morning he had a problem with Uconnect hanging up his call. Writer advised customer he ll need to take the vehicle to the dealer for diagnosis, but if no appointment has been made by Tuesday, writer will close the survey case.
Writer spoke to Joe in service to verify if customer has made an appointment for Uconnect yet. Joe states customer was last in 10/21, and there are no appointments set for him.
Writer attempted to contact customer to discuss case. Writer left message advising customer, his case will be closed for no diagnosis at this time, but he can call, if he needs CAC to be involved, otherwise he will need to work with the dealer. Writer advised customer in the message, of the N58 recall on his vehicle and that he should contact the dealer for a time to bring the vehicle in to dealer for the recall.
Status update provided via email to the following email address:
[redacted]
I am attempting to contact you to find out when you ll be taking your 2014 JEEP GRAND CHEROKEE to the dealer for information on the forward collision feature, and your uconnect concerns. If I don t hear from you today, I will close the case until the vehicle is taken to the dealer.
End of Status Update
Writer spoke to Joe in service to confirm customer has not made an appointment for the diagnosis. [redacted]
Adaptive Cruise Control (ACC) / Forward Collision Warning (FCW)
Adaptive Cruise Control (ACC) can greatly increase the value and comfort of cruise control, especially in congested traffic situations. The driver engages the system similar to traditional cruise control and has the option to set a following distance of short, medium, or long.
The system uses a single radar sensor mounted at the front of the vehicle (located in lower portion of the front fascia) to detect objects in its path. If the lane ahead is clear, the system will maintain the set speed. If there is slower traffic ahead, ACC slows the vehicle by coasting or using the brakes to maintain the driver s set following distance.
The ACC system also incorporates grade braking and Forward Collision Warning (FCW). With grade braking, the transmission will automatically downshift to maintain selected vehicle speed and distance, preventing overheating of the brakes.
The FCW function operates regardless of whether ACC is active or not, notifying the driver, both visually and audibly,
when he/she is getting too close to a preceding vehicle or object. All

Adaptive Cruise Displays are shown through the instrument cluster display.
End of Status Update
Customer states he just purchased the vehicle 3 days ago and it has been in the shop for 2 days. Customer states dealer has ordered a new radio and once it is replaced it should be fine.
Customer states he is trying to find information on the FCW (Forward Collision Warning). Customer states it is not working. Customer states dealer told him the cruise control has to be on for it to work. Customer states he has owned other vehicles and it worked without the cruise control. Customer states he knows that the cruise control does not need to be on and wants to verify this.
Agent referred to owners manual and could find nothing that states cruise control must be on for the FCW to be active.
Agent referred to Answer ID 21747 which has a document for 2011 Chrysler. Customer asked for it to be emailed. Agent informed customer that it is from 2011 Chryslers.
Customer would like someone to look into the Forward Collision Warning Feature.
REQUEST FOR SPECIAL HANDLING
NIC of TL consulted: SJ372
Reason for special handling request: vehicle in service for 3 days and has been at dealer for 2. STAR case open for inoperative Radio. Customer states (FCW) Forward Collision Warning is also inoperative.
What customer is expecting: FCW diagnosis & radio replacement
Customer s preferred method of contact: phone
Customer phone number (Morning): [redacted]
Customer phone number (Evening): same
Customer email address: [redacted]
Dealer code (if applicable): 45473
Dealer personnel involved (if applicable):
Assigned case to 86S for Special Handling
CM is reassigning to 88F for proper handling as Uconnect CM s do not handle the FCW.
Status update provided via email to the following email address: [redacted]
Hello, my name is Lafe and I will be your case manager.
Here is some information that you might find helpful.
Your case number is [redacted]
I work from 6:30am until 3:00pm Mountain Standard Time, and am available Monday through Friday.
Phone number to contact me is 1-800-763-8422 extension 66011.
Thank you.
End of Status Update
[redacted] called to speak to CM LT707. Writer warm transferred customer to CM JL1355.
CONTACT UPDATE - 1st Contact attempt, Received call from Customer Monsour Arekat, Customer stated he purchased this vehicle 5 days ago and has only been able to drive it for maybe one day, Customer stated there was a problem with the Radio and the dealership replaced the radio, Customer stated he got the vehicle back and it had a problem with the Collision system, Customer stated the dealership told him they don t know how to fix the Collision system and they will have to contact the Engineers, Customer stated the car needs to be dismantled and put back together and he does not feel comfortable with that, Customer stated the Manager has offered to replace the vehicle and he will be going back to the dealership this afternoon, Customer stated he wanted all of this documented in case the offer is not what he wants, Writer advised customer we do recommend following up with the dealership manager on the offer and we will document his concerns, Customer asked if the offer of another vehicle is from Jeep or the Dealer, Writer advised customer Jeep has not had an opportunity to look into this yet, so the offer is from the dealership, Writer offered follow up call for Monday, Customer accepted
Writer verified Contact number as [redacted]
[redacted] requesting to speak with Case Manager

Case manager not available, nic OS533
66301 took the call.
Writer took inbound call from customer. Customer states that dealership swap out the vehicle and the new Vin number is EC264644. Customer states that he is having the same issue with the new jeep that the Forward Collision Warning (FCW) also the front parking assist is not working.
Writer advised customer that I would document the case but his next step would need to give the dealership a call get the vehicle in for diagnosis. Writer advised customer that case manager will do another follow up no later then 11/6/2013 to get the appt date.
Customer called and said service manager Tom, 808-564-9977, the Front park assist, and the FCW are not working. Writer said will contact the dealership, gather information, and be back in contact with the customer with-in 24 hours.
CLOSED LOOP UPDATE - no need for additional follow-up.

Product - Electrical - Unknown - Defective - Default	Customer stated that the Forward Collision System did not work
Product - Electrical - Heated Seat - Other - Unknown	Customer stated that the heated seats are not properly functioning

Briefly summarize why the customer is contacting Chrysler: Customer stated that he is concerned about the heated seats on the vehicle. Customer stated that the heated seats are completely unoperational on the low settings and that they are barely lukewarm in the high setting. Customer also stated that the Forward Collision System did not work as he almost got into an accident. Writer empathized and offered to call the Manhattan dealership in order to get more information on the issue. Writer spoke to Francis in service who was able to tell the writer that a RRT radio update was completed on the radio and that all systems are functioning normally albeit lukewarm. Writer advised Francis that according to the customer, the heated seats do not work at all on the low setting. Francis was unable to confirm or deny and suggested that Curtis, service advisor, be contacted regarding the issue. Writer informed customer of the information received from Francis. Customer stated that it may be a uConnect setting. Writer replied that this is most likely not the case and promised to follow up with Curtis, the uConnect team, as well as the customer himself on 10/04/2013. Customer added that the Forward Collision System was not a major concern.
Briefly summarize what the customer is expecting: Customer seeking repair of heated seats and Forward Collision System .
EK230 please follow-up with customer/dealership 11/04/2013.
Writer spoke to Curtis, service advisor. Curtis stated that the heating seats work perfectly fine in both low and high settings. Curtis stated that he eventually had to turn them off because his back was starting to sweat. Curtis stated they work every bit as well as the heated seats in his own 2013 Ford Edge.
Writer attempted to speak to customer at both numbers and left a voice

mail because he could not reach customer. Writer advised customer that there were no issues with the heated seats whatsoever according to Curtis and that he would have to see any dealership of his choice for future diagnosis/repair.

Briefly summarize why the customer is contacting Chrysler:
Customer called stating his radio is having a lot of issues since 1,000 miles. Customer states his nav system is not working, cellular service cuts out, sprint network is bad, freezing. Agent advised there is a radio enhancement on his vehicle for his radio. Agent advised when he brings it to the dealership to get that looked into and it could possibly fix some of the glitches that he is having. Customer states his front collision warning system he s turned it on and a car had gotten close to him and the collision warning did not go off. Agent advised to write down everything that is going wrong with the vehicle and the times so that the dealership has a better understanding of how often the issues come. Agent advised customer to take the vehicle into the dealership to find out exactly what is going on. Customer requested owners manual. Agent advised customer it will be 7-10 business days to be received.
Briefly summarize what the customer is expecting:
Customer is having issues with his radio system and collision warning system.

Briefly summarize what the customer is expecting:
****End structured narrative T2 - Beginning Narrative
Customer states he is having ongoing intermittent issues with the radio and front end collision system. The customer states the radio head unit is on order and he would appreciate assistance in obtaining it faster. Customer states the dealer has been wonderful, but he s getting frustrated. Customer stated he has an appointment for service tomorrow, 11/9. CM stated she will contact the dealer to see if expediting the radio is necessary and to discuss a recent TSB 08-076-13 (RRT13-072) to see if they may apply. CM alerted the customer to open recall N58 and stated she will e-mail her contact information to the customer at r[redacted]com. CM also stated she ll follow up with the dealer regarding diagnosis on 11/11 and then contact the customer at [redacted]
CM contacted PA Joe who states he doesn t have an order for a radio and transferred the call to SA Michael who states he doesn t have an appointment scheduled for the customer. SA stated he will call the customer (CM confirmed the contact number) and schedule an appointment for the recall and any flash updates, if a new radio is needed, SA agreed to contact CM if there is a back order.
Status update provided via email to the following email address:
[redacted]
Good afternoon,
Thanks for contacting me regarding the concerns with your 2014 Grand Cherokee SRT.
I spoke with Michael in Service at Clovis Chrysler and he said said he s going to give you a call to go over all of your concerns, including the

open recall on your vehicle.
Michael agreed to call me if he needs any parts expedited. In the meantime, I ll still check in with him regarding the diagnosis on 11/11.
If you have any additional questions or concerns, feel free to contact me at the number below or by responding to this message.
Thanks for your patience and for driving SRT!
Bridget - Case Manager - SRT Customer Assistance Center
855-525-5085, ext. 4720258
End of Status Update
CM spoke with SA Michael who confirmed the customer brought the vehicle in on 11/9 - recall N58 was completed and the radio software updates appear to have corrected the freezing issues.
CM left voicemail for customer regarding satisfaction, stating the CAIR will close in two days with no contact. CM provided contact information, office hours and the CAIR number.
CLOSED LOOP UPDATE - no need for additional follow-up.
Customer left voicemail stating the radio is still freezing and he would like the radio replaced.
SM Khalid states he is working with an engineer to determine if the radio needs to be replaced based on the stored codes. SM states he has been working with Mrs. [redacted] to schedule another attempt at diagnosis, she has not replied at this time. SM states if the radio does need to be replaced he has a replacement unit available. SM states the customer will be provided a rental vehicle at no charge.
Status update provided via email to the following email address: [redacted]
Good afternoon,
I m so sorry you re still having issues with your radio. I spoke with Khalid, Service Manager at Clovis. He s been working with an SRT engineer to determine whether or not the radio needs to be replaced. He s very concerned that this repair fixes any and all issues you ve been experiencing.
Khalid said he has a radio in stock if it is determined it needs to be replaced and he ll be happy to install it at the recommendation of the engineer. He d then like to test drive your vehicle for at least a day to confirm the repairs are satisfactory.
You ll be provided a rental vehicle at no charge for the duration of the repair.
I hope this plan is satisfactory to you.
I appreciate your patience and look forward to hearing back from you. My understanding is that Khalid is working with Mrs. Corrente to schedule an appointment for diagnosis/repair.
Thanks again for driving SRT!
Bridget - SRT Specialist
855-778-8326, ext. 4720258
End of Status Update
CM left a message for SM Khalid requesting a call back.
CM left voicemail for customer on [redacted] requesting a call back if further assistance is needed. CM stated if the issues have been resolved, no call back is necessary, the CAIR will close on 12/5 with no contact. CM provided her contact information and the CAIR #.
CLOSED LOOP UPDATE - no need for additional follow-up.

forward collision warning with crash mitigation
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
Comments:
i was wondering if you could tell me if my brand new v8 summit has forward
collision warning with crash mitigation / in my manual it says that to turn
it on and off that there is a button on the panel, as well as a button on
the panel in the same spot for park sense, however, neither of these
buttons are on my panel. They are located in the screen options where you
can find them and turn them on or off but i do not have either button on my
panel and it says if your car is equipped, those buttons are on the panel.
So does my car have both of these or no? I thought they were standard on
the v8 summit 14? My window sticker says it is on the vehicle but i found
it odd that the booklet says i d have the buttons on the button panel as
well...when i do not...thanks! VIN 1C4RJFJT5EC[redacted]

***** EMAIL BRIEF DESCRIPTION CONTENT *****
computer issues with 2014 Jeep Grand Cherokee
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
Purchase the car on May 16, 2013 and 1 week later tire pressure light on dealer had to put in new sensor. From August have had multiple issues with computer, blind spot not working, navigation/radio freezing, brake warning light flashing, bluetooth not working, steering wheel and seat heater automatically came on, wiper sensor not working, speedometer changes from from solid numbers to something different. Had car to dealer 4 times to fix this problem. I am going again for the 5th time on November 15 2013. I paid $50,000.00 for this car and I feel the safety of this car is a very big issue. When the computer malfunctions you need to stop the car, shut it off, get out and walk around then get back in to clear everything. Works for awhile and acts up again. Definitely is a computer issue and 5 times for service for the same problem is a little ridiculous. I am more at the garage than I am driving the car. Please help with this problem. Very concerned for the safety and performance of this car. I feel that at some point the car will break down and I will be stranded someplace. Unacceptable to have service done 5 times for the same problem. I would appreciate immediate attention to this problem.
***** END OF CUSTOMER EMAIL *****
Dear[redacted]:
Thank you for contacting the Jeep Customer Assistance Center.
I regret the problem your vehicle has experienced and appreciate the time and effort you took to bring this matter to my attention. Comments like yours are one way we have to learn of problems that may develop and improvements desired by customers.

Unfortunately, given the many variables involved, we are unable to diagnose your vehicle s problem via email. We recommend contacting the Service Manager at your authorized dealership to review your concerns. Additionally, our review of your vehicle history shows that the dealership has been in contact with our Technical Operations Team about your vehicle, as well you have an open recall that may address some of the concerns.
Thanks again for your email.
Sincerely,
Steve
Customer Service Representative

Product - Electrical - Reverse Camera - Defective - Default	Camera not working properly.
Product - Electrical - uConnect Cellular System - Other - Default	Issues reciving text messages.
Corporate - Survey By-Pass - Default - Default - Default	Speakers cracking.
Product - Electrical - Radio/Spkrs/Clock/Antenna - Defective - Default	Speakers cracking.

Briefly summarize why the customer is contacting Chrysler: Customer called stating that since the vehicle was bought he s had an issue with receiving text messages and with the rear camera. Customer stated he s taken the vehicle into the DLR 3 times for the issue. Customer stated now his speakers are cracking and he does not listen to the music loud and when a text message does come up it will come in over and over. Customer stated he really loves the vehicle and would possibly like a new one, agent advised she can look into that for him. Agent contacted DLR, was unable to speak with SM Jay, agent left a message to have him call back. Agent informed customer and advised she will be in contact with him once the SM calls back, customer agreed.
Briefly summarize what the customer is expecting: Customer is seeking a replacement vehicle.
Customer informed a call back is required and will take place within 1-2 business days.
Preferred Morning/Midday call back number is [redacted]
Preferred Afternoon/Evening call back number is [redacted]

them to contact Elisabeth Doyle at 888-542-7239, extension 2171. Thank you. ***
I called and talked to customer and was told his back up camera does not work properly, his trunk wont open, the abs light comes on then the brakes lock up, his text messaging will come up several times on the radio, the radio turns off when he gets a text and the front right speaker is cracked. Customer stated he also wants to know how to turn the text messages off of his computer screen so other people cant see them. Customer stated he has a blackberry with Verizon service. Customer asked me to make an appointment for him to drop it off at the dealership on 12/3 Tues because he is going out of town and wont be able to take it in until he gets back. Customer stated he is scared to let him wife drive the vehicle and is asking for a replacement. I let him know a replacement was not being offered at this time but I would be happy to repair the vehicle if he can take it in for service. I let him know I could get TAPS involved. I will follow up with customer after I make the appointment to let him know it was set up. Customer will need a rental and requested he get a Jeep product. I let him know I couldn t promise I could get him a Jeep but I would try my best.
I talked to SA Sheng and was told the customer had a new radio come in on 11/15 but he was not sure if they had installed it yet or not. SA stated he will contact the parts department to see if they still had his radio in. SA stated customer had the recall N58 done on the vehicle 11/13. SA set an appointment up for the customer to bring in the vehicle 12/3 at 10am. I let him know I would follow up with him on 12/4 and see that the vehicle came in and get diagnosis from him. I also let him know I would cover the rental for the customer from the 12/3 appointment.
I called customer and let him know I set up the appointment for 12/3 at 10am as he requested. Customer gave me his email address as [redacted] to send him my contact info since he was not able to write down my contact #. Follow up with customer on 12/2 to remind him of his appointment.
Status update provided via email to the following email address:

thanks Beth
End of Status Update
I talked to customer and was told he wanted to update me on the issues he had over the weekend. Customer stated he has intermittent no start issues when its cold, while driving the radio s volume went off and would only come back on when he restarted the vehicle. gps time of travel not correct always said 1 min travel time, passenger window came down but wouldn t go back up all the way and the trunk wont open even with a key. He will take it in for appointment tomorrow.
I called and talked to SA Jay and was told the customer dropped off the vehicle on 12/2. He told me they were looking into 7 different issues then rushed off the phone because he was busy. I will follow up with customer today
I called customer and let him know I called the SA and asked if he had a rental and he stated he picked up a rental 12/3 when he dropped off his vehicle. I let him know after I got an update and diagnosis I would follow up with him. Customer stated he is working with SA Sheng
Sheng called from the dealership (66325) and stated that the customer is going to be in need of a rental extension for two day rental just in case. He stated that they are hoping to have the vehicle repaired by Tuesday at the latest. They are working on diagnosing the other concerns from the customer but did agree that the back up camera does turn blue. Agent advised that she would send this up to the rental department for consideration
-LVM for customer, advising assigned case manager not available on today. Included my contact information.
Called customer and confirmed that the customer is still having Window/ Bluetooth issues with his vehicle, ***follow up on Wednesday***
Customer LVM stating he picked up his vehicle and is still having issues with the window. Customer stated his trunk is working good but he was not

sure of the gps since he has not used it yet.
I LVM for customer to return my call.
I called customer and he stated the window is still not closing all of the way and he can still hear and feel the wind coming in. Customer also stated that his vehicle has the automatic braking sensor is slowing his car down when he is beside a car that is in the lane next to him. Customer asked me if it was normal and I let him know I was not sure but asked him to bring it up when he takes his vehicle back in for the window repair. Customer requested I set up an appointment for him at the dealership for Tuesday to drop it off. Customer stated he needs a rental car. I let him know I would call the dealership 12/13 and get back to him about the appointment.
I called SA and requested customer bring his vehicle back in for service on Tuesday 12/17 to drop it off. SA stated that was fine. I asked if he would have a rental car ready for the customer to use and he stated that was fine too. SA stated he had heard from the customer a couple of days after the repair but he had not brought the vehicle back in yet. I offered TAPS and SA declined stating they were OK. I let him know if he did need TAPS to call me and I would be happy to set it up for him. SA stated if customer could drop his vehicle off before 2pm then he could have a Technician talk to him about how the Automatic braking system in the car works since he had questions about it.
I called customer and let him know that SA said he could drop the vehicle off Tuesday 12/17. Customer agreed and stated he would drop it off for them to repair the window. I let customer know that if he could drop it off or pick it up before 2pm he could get some info on how the Self braking system works. I let the customer know I would follow up with him Tuesday 12/17 after I contacted the SA for an update
LVM asking SA Sheng to return my call regarding customer s vehicle. I will follow up with SA and customer 12/18
Customer LVM stating he picked his vehicle up and the window is still not fixed. I will call SA and customer 12/18
I called SA Sheng and was told the window switch was replaced and the window was fixed. I got RO info and was told customer was in the approved rental from 12-3 - 12-9 for the first repair and 12-16 - 12-18 for the second repair. Customer had the rental a total of 9 days. Authorized customer to be placed in a CDJ Rental at $35 per day while vehicle is in for Service, which does not include Insurance or gas for 9 days. SA stated the customer did call him 5 minutes after leaving the dealership this morning stating the window was still not fixed. SA stated he asked customer to bring the vehicle back so they could look at it real quick and the customer told him he had an appointment this morning and didn t have time. I let SA know I would call the customer and ask him to take it back in. SA stated it may be fixed by rolling it down then back up. I let SA know I would suggest that to the customer then if it didn t work I would ask him to take it back. I updated RO info
I talked to customer and was told he is frustrated that his vehicle s window is still not fixed. I apologized for the customer s frustration with the issue. I let customer know that they replaced the window switch and cleaned off the sensor that slows his car down if it s too close to vehicle in front of him. Customer stated he keeps his car clean and didn t understand how it was dirty. I let customer know that the dealership was willing to look at his window for him to see why it s not working properly. Customer stated he could take it back in today in 20 minutes but only had 30 minutes to spare so if it would take longer than that to fix it he would need a rental. I let customer know that was fine and I would be happy to call the SA Sheng and let him know he was coming back in and would need a rental if it would be longer than 30 minutes to fix it. Customer thanked me. I told him that I would follow up with him after calling the SA.
I called SA and was told customer could bring in the vehicle and they would look at the window and show him where the sensor was so he could clean it if needed. I asked him to give customer a rental if it took longer than 30 minutes and he agreed.
I called customer to update him and was told he is at the dealership now and is picking up a rental to take because they need to keep it for

longer than 30 minutes. Customer stated if when he heard back from them he would call me to update me. I let him know I would follow up with SA and update him when I heard something.

TAPS
on 2013-12-18 @ 11:51
LVM for SA Sheng letting him know I opened the TAPS case to assist him with the window motor. I left my contact info incase he had any questions or update.
I called SA Sheng at Bayside CJD and was told his technician was too busy and would get to the vehicle tomorrow. I let him know I opened the TAPS case and would like them to work with TAPS to make sure it is fixed this time because the customer is requesting a replacement.
CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
I called service department and was told SA Sheng was unavailable but they would take a message and have him call me back. I left my contact info.
SA Sheng called me back to let me know they changed out the window motor and the vehicle was repaired and returned to customer on 12/20. I thanked SA and got RO info. I will follow up with customer
I LVM for customer to return my call and let me know how the window is working after the repair. I will follow up with him if no call back by 12/30
LVM for customer asking him to call me back to confirm his repair by the end of today 12/30. I let him know if I did not hear back from him I would close the case but if he had any of the same issues in the future he can call me back. I left my contact info
I talked to customer and he stated the vehicle is still having issues with the sensor that detects vehicles in front of it. Customer states the vehicle brakes even when no vehicles are around it. Customer also stated the controls in the steering wheel for volume and the radio presets don t work and when he sets up his preset radio stations on the radio then restarts the car it erases them. I asked customer when he could take it back in for diagnosis and he stated he could not take it back in until next week. I let customer know I would contact the dealership on 1/3 and call him back with the appointment day and time 1/3. Customer requested the appointment be set for 1/6 or 1/7. I will follow up with customer on 1/3
CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
I called SA Sheng and let him know the customer is still having issues with his sensor for the auto brake on his vehicle. SA stated he could bring it in Tuesday 1/6 in the morning. I asked him to give the customer a rental. SA agreed and stated he would take care of it. I will follow up with SA 1/6 for diagnosis.
I talked to customer and was told that he is tired of having to take the vehicle in for repairs. Customer stated he does not feel like the SA or service department really care about the customers or if the vehicle is fixed properly. Customer asked who he could contact to complain about the dealership. I let customer know I would contact the AM for him but I was unable to give him contact info. Customer stated he wanted me to file lemon law for him and I let him know he would have to pursue that on his own. Customer stated he is worried about his family s safety with this vehicle since it is braking on it s own due to the sensor malfunctioning. Customer is angry that SA told him the issue was due to his vehicle being dirty when he has the vehicle detailed and cleaned once a week and he knows that is not the issue. I apologized to the customer and let him know I would contact AM for him. Customer stated he would drop off his vehicle Monday afternoon so they could have it to fix on Tuesday morning. Customer stated he wanted a replacement due to too many repairs. I let customer know I could not promise a replacement but that TAPS is working with the Service department to fix his vehicle. I let customer know I would follow up with him 1/7 and asked him to call me if he had any when he dropped it off.
TAPS Karem called me to let me know that the vehicle the service

department called him on is a used vehicle. He asked if I wanted him to close out the case and I asked him to let me talk to the customer first.
I will email Karem after I get an answer for him.
The previous not was not for this case.
I talked to SA Sheng and was told the customer never brought his vehicle in for his appointment 1/6. I let him know I would contact the customer and find out why he never took it back in.
I talked to customer and he stated the roads were too icy for him to take his vehicle in on 1/6 but he will take it back in on 1/13 for repair. I asked him to follow up with me after he drops it off so I can talk to SA and get a diagnosis. If I don t hear back from customer before 1/14 I will follow up with him then the SA to see if vehicle was dropped off.
CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted] FOR INFORMATION
I called and asked for SA Sheng and was told by SA Adriana that he was busy. I left a message for him to call me back regarding the customer s vehicle and repairs. I left my contact info
I LVM for customer to find out if he was able to take his vehicle back in for service. I left my contact info
I talked to SA Sheng and was told the customer never brought his vehicle back in for service. I will follow up with customer on 1/16 if I don t hear back from him by then and give him 7 days to take his vehicle back in for diagnosis and repair for his sensor for auto braking. *****
I LVM for customer asking him to contact me when he has taken his vehicle back in for repair. I will call SA and if no appointment is made I will close out the case until customer takes his vehicle back in for service.
I called SA at Bayside CJD and was told customer has not made an appointment or come back in yet. I will close the case until customer calls back with vehicle in shop. SA stated he thought the customer would just trade out of it anyway.
Customer states that he never took the vehicle back to the dealership because he was frustrated with the issues of the vehicle and the dealership. Customer states that he is done with this vehicle and wants out of it. Customer states that he is trying to get a rental but customer was informed by the dealership that we would have to contact the dealership and possible help with the rental of the vehicle. Customer states that he is still having issues with the vehicle and was informed by his CM that if the issues were not resolved that he was to contact the CM and the CM would further assist the customer with getting out of the vehicle. Agent informed the customer that the agent would try to contact the pervious CM ED630 and speck with her regarding the customer s issues with the vehicle. Customer states that the radio still shuts off all the time, the alarm will go off and will not shut off, the door panel on one of the doors is coming off, a loud noise is coming from the roof, the brakes will activate without warning, the Nav system loses memory and gets stuck on the 1 minutes time frame of when the customer should arrive somewhere. Customer also states that the uconnect system will freeze, and repeat it self when the customer is on a call, other times the system will just shut off. Customer can not access the heat, air conditioning or the radio because the uconnect system always shut off.
Agent contacted 888-542-7239 and was informed that the pervious CM is no longer with that department; a new CM will have to be assigned to the case. Customer s vehicle is at the dealership right now, customer needs someone to handle the loaner bill, handle the case with the issues with the vehicle. Agent was informed that a new CM will be reassigned the case and the customer will be contacted tomorrow morning.
>> Opened new CAIR and I2R Case [redacted] to further assist customer.

CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
CA to follow up with customer Wed, 11/27.
Customer Advocate contacted customer, [redacted] regarding status of issues and left VM. Diagnosis continuing and will update by EOB, Mon 12/2.
Contacted customer to brief on status of repairs. Navigation speed inconsistant with actual posted speed limit. Located on multiple streets and not just one highway. Needs to have vehicle diagnostic for speed limit issue. Rob, SA. Contact to determine status at dealership of update for speed. Needs to have traction on rental vehicle with Enterprise. Passenger front seat belt locks up prematurely. Dealership states designed when seat is fully pushed back.
Use below numbers for response.
[redacted]
Follow up with customer on Tues, 12/03, EOB. Wednesday or Thursaday for vehicle drop off.
Needs SUV for Medical Service dog.
CA contacted SM and left VM regarding nav system and passenger side seat belt. Follow up 12/5 if has not returned call.
CA spoke with customer. No new information at this time. Will call by EOB 12/5.
CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted]8 FOR INFORMATION
Customer stated the closure of Escalation was done before completion of repairs.
- Brake Warning on Navigation System prematurely and unnecessarily engages.
- Documentation to be provided via mail to customer.
- iPhone 4, iOS 7 - Raul
- iPhone 5, iOS 7 Sandra s Pairing disappears upon leaving vehicle.
- Passenger side seat belt locks up with any motion, set up for child car seat
- Nav System still showing incorrect speed vs posted.
Follow up with dealership Fri, 12/6
Dealership closed. Follow up with dealership no later than mon, 12/9
Follow up with dealership 12/11.
Service department closed. Left VM for Rob, SA for return call on

customer issues.
Rob/SM contacted CA regarding issue with vehicle. Continues to have speed showing incorrect on nav system vs posted speed limit (NavTech), passenger seat belt locking on passenger side, uConnect pairing (should have been handled by last update), proximity braking system engaging and documentation from previous work done on vehicle. Contacting customer to have vehicle come in Tuesday, 12/17. Other date available rest of week. Contact SA to confirm date.
CA contacted customer to set up appointment Wed., 12/18. Schedule follow up with customer on Thur, 12/19. Need SUV for lender. Confirmed with SM on appointment date.
dUE TO PREVIUOS HISTORY WITH THIS OWNER AND HER OTHER VEHICLE CONCERNS from other dealerships and the note added to the first cair that she is aware of ways to gain additional compensation for minor concerns - Area manager advised the dealership when vehicle is brought in for appoinment they prior to anything else need to verify the concerns and to compare operation with a like make and model with the owner present. If the concerns can not be duplicated by owner or dealership no repairs attempts to be made. The seat belt complaint is the seat belt locks the passenger into place and not the opposite and by description it appears to be operating as designed - dealer to compare to like make model and equipment with owner.paf
CA contacted Rob/SM regarding vehicle and any repairs made yesterday, 12/18. SM was out of office. Need to discuss AM notes in CAIR, 12/13. Current mileage is 6786. Seat belt operation in two different vehicles shown to owner and then current vehicle. Fully explained proper usage of seat belt. Dealer copied Forward Collision Warning system portion of owners manual and discussed warning may be triggered by guard posts and traffic signage. Test drove vehicle and found speed information correct and speed changing properly as different roads where taken. Chris Gallson / Parts and Service at dealership did an outstanding job with customer explaining issues owner felt were not performing up to design standards. Following up with customer to discuss explanations of vehicle design and how to operate correctly.
CA contacted customer to discuss vehicle is operating within design. Customer stated he was not offered rental. Spent 2-3 hours at dealership. Service person showed FCW explanation in owners manual. Seat belt tested with other vehicles and found no issues and unable to replicate. Service originally stated new seatbelt mechanism could be ordered for replacement. Dealer then went through process to insure customer knew how to correctly use seatbelt and avoid locking up. Make appointment with dealership for Mon, 12/23, late morning or early afternoon. Both Mr. and Mrs [redacted] will be at appointment. Mrs. [redacted] states she will be able to replicate issue [redacted] o s would like to have documentation for last visit. Looking for paper trail.
CA spoke with SM/Rob regarding appointment for Monday, 12/23, late am to late pm. Confirmed only seat belt was to be evaluated. All other issues have been addressed by CA during call with Mercado s on 12/19. SM created work order for activity with Mr. Mercado s visit on 12/19. Sent in mail 12/20.
CA contacted [redacted] to confirm appopintment for 12/23. Left VM confirming appointment and follow up no later than 12/26.
Caller, Agent Stephanie from Uconnect Care Team. Agent Stephanie stated that the customer made a call using the 911 feature on the vehicle and now the vehicle s alarm system keeps engaging. Agent advised Stephanie that the customer will need to have to take the vehicle to a Chrysler dealership for more assistance. Stephanie provided agent with the VIN so the concern could be documented.
Customer called again trying to get the issue in lines 133-135 resolved. Agent advised customer that she will have wait until Monday to take her vehicle to a dealership. Customer very upset with the vehicle stating they cannot even go Christmas shopping now. Agent apologized to customer and informed her that she would get a call from a CM in one business day. Phone: 716-713-9332
Rob/SA called to speak with the CA
Last weekend customer used 911. See lines 133-138. Everytime door locked,

alarm system goes off. Rob / SM at dealership called for approval to proceed with diagnosatic. Will contact CA upon completion.
Rob/SA requested CA to call back.
SM contacted CA to provide diagnostic on vehicle and calling with results. Replacement part for alarm system part will be in for repair of vehicle Friday, 12/27. Will contact AM due to note in lines 92-102. SM will call back 12/26.
CA contacted customer to discuss issues from last visit to dealership 12/24. See lines 134-144. Alarm system was going off due to sensor on engine hood causing anti theft alarm to go off. Part due in Friday to fix alarm system. Went in on appointment on Tuesday, 12/26. SM able to get seat belt problem replicated. Vehicle at dealership. Should be worked on Fri, 12/27. Follow up with customer Fri, 1/3.
Agent attempted to contact dealer Service Manager Robert, however, SM not available. Left message for a return call at extension 66355
Writer contacted customer and spoke to both Mr and Mrs [redacted] and was advised that vehicle has been in customers position and still no repairs have been completed regarding the seat belt on the passenger side that locks. This has been brought up to the dealership from day one of ownership and there has been no fix offered, Customer is also concerned with the inadequate information from the navigation system and that customer is being advised it is a issue with Navtech and not manufacture. Writer advised that tech support will be requested through dealership and that ECS will continue to support customer and offer maintenance contract for inconvenience. Customer is requesting that when rental is pursued it is imperative that customer is offered a SUV per location and weather conditions. Writer advised that CM GB535 will be instructed to set up appointment with dealership to have tech specialist involved and rental provided and that customer will receive follow up on 1-8-14.
CA contacted Rob/SM regarding customer s concern of seat belt locking when fully extended. Service Manager will return call. Out of dealership. Contacted SM. Left VM.
Having been driving van for last day. Mrs [redacted] unable to test drive due to illness. Follow up after test drive on Monday, 1/13. Set appointment to schedule to get Mrs. Mercado and vehicle into dealership.
CA contacted customer to discuss results on seatbelt length problem. Found length in backseat seatbelt was 10' longer then in front passenger seat. Will follow up with customer by EOB Thurs, 1/16. Speak with Rob regarding seatbelt as part of seat or a seperate module. Follow up with SM to further discuss options and set up appointment for TAPS dealership visit.
Writer contacted dealership SM/Rob to receive update on status of vehicle seatbelt issue. Dealer has no further alternatives than a seatbelt extender for front passenger seat. Contacting Parts/TS to determine if extension installation possible. Customer does not want standard seatbelt extender.
Mrs [redacted] called to speak to customer advocate GB535. Writer warm transferred customer to customer advocate GB535.
Customer contacted CA regarding seatbelt issue and NavTech. Contact NavTech before speaking to Mercado s. Check on seatbelt replacement. Follow up on 1/23.
Rob/SM from dealership to discuss [redacted] s rental vehicle and entry of ECS approval in DM notes. Entered information in DM notes. Provided update to SM regarding next steps with Mercado s regarding issues.
Contacted dealership to determine if seat belt extension was a Jeep/Mopar part or after market. SM and PM at dealership unavailable. Follow up Monday, 1/27.

talks.with[redacted]
Hello Mr.[redacted]
Gardner is not in the office today due to personal issues.
I have researched the case and found that he is currently in the process of resolving issues with NavTech and a seat belt.
At this time I do not have any additional information to report. I apologize for any disappointment this may cause; however, I value your patience during this process, and would like to assure you that updates are forthcoming. In the event you need to reach us you may use the link provided in this email or call 800-763-8422 His direct extension: 66273.
Thank you.
End of Status Update
Writer contacted SM and was advised that replacement of seatbelts is not applicable due to seatbelts working as designed. SM advised that seatbelt extenders are in stock and they are made Chrysler. SM advised that there is nothing that can be done about navigation system since issue is with the app. itself and not the part.
Writer contacted Customer and left message advising for a follow up on Friday and if Writer is unavailable, no later than Monday.
Customer contacting to see about problem with the Remote start. Customer states they want it to heat and cool accordingly, customer states it does not heat but puts on defroster, and will not cool at all. Agent inquired if they have tried leaving the settings on that they would prefer prior to remote start, customer states they have. Customer states they need it for their Medic Alert Dog. Customer states their previous vehicle was able to, and feels their new vehicle should. Agent checked information accordingly with owner s manual p. 331 but could not find information. Agent attempted to go through personal settings on uconnect to determine how to set, agent contacted Uconnect CM and spoke with CM Tom who advised that the remote start only starts the fan 1 setting from being off with the remote start and there is not a way to change. Agent contacted DLR 45528 due to time zones and spoke with SA Terry, who advised it should heat/cool accordingly, and depending on if there are 2 remotes could not have settings in. Agent advised customer to bring into DLR and will be able to determine if there is something wrong, or if something needs to be adjusted. Customer is upset that they are having this issue with a simple request as well the initial problems they were having with the vehicle have not been resolved. Agent advised of follow up with AG1370 on Friday. Customer is upset, and has not even spoken with AG1370 at all, it was just passed on to him. Customer wants to be contacted by phone by GB535. Agent advised we could only document the request.
SA Rob called in to speak with CM IL502 who was not available so writer transferred call to 66039

Customer name:[redacted]
Customers concern(s): When using remote start the climate control is not remembering previous settings.
Is customer in rental: No
Is customer waiting: YES
Dealer diagnosis (if completed): None as of yet. Writer advised dealer is welcome to begin diagnosis, and TS will follow-up. Dealer not to complete

repairs until contacted by TS.
** Customer is no longer part of ECS program **
Writer contacted Rob/SA and advised dealer is welcome to proceed normally, vehicle is no longer part of ECS program.
Customer is again part of ECS program*
Writer contacted the dealer 68669, 716-646-5200 ext 215; Writer left a voicemail for SA Rob advising of the customer returning to the ECS program as well as the repair status of the vehicle.
dealer closed unable to contact them.
Writer contacted the customer a[redacted]: The customer is stating that the front passenger seat belt is too small it locks her in leaning forward. It was determined that the vehicle has a seat belt that is too short. She is being told that the seat belt is the child restraint which the customer stated shouldn t be in the front of the vehicle. The customer stated that the climate controls for the auto start presets are not holding. The customer stated that the navigation speed limit posting is not accurate. The vehicle is not currently at the dealership the dealership completed a bunch of software updates that did not seem to work. The customer stated that she wanted writer to listen to a message left by a previous rep. Writer called the customer on her cell phone [redacted]Where an offer was made for the car payment reimbusment.
Writer spoke to the customer who would like to speak about reuimbusment at the end of the case.

Writer advised the customer that we will speak to them no later then 1-13-14
Writer recieved a voicemail from SA Rob requesting a callback at 716-646-5200 ext 215 .
Writer contacted SA Rob at 716-646-5200 ext 215 left a message.
Writer spoke to SA Rob he stated that the seat belt is not long enough and is not allowing any movement. The preset only turns on the driver seat steering wheel and defroster to no matter what you leave it at 72 degrees, when the door is opened after remote auto start it will revert to presets. The navigation is not a software issue. The Navtec is seeing that as a lower speed limit.
Writer contacted SA Rob at 716-646-5200 ext 215 left message advised sending the customer in to have the seat belts looked at.
Writer also advised the SA Rob via voicemail that he will need to contact us per the ECS program.
Writer contacted[redacted] left message for[redacted] left message.
Writer[redacted]: The AC does not match the temperature setting properly. It heats up high and when turning it down it stays hot regardless of how much lower it goes. She has to turn off the vehicle. The customer stated that the collision warning comes on with no pending collision, ACC/FCA not working properly. The customer has an appointment on Wednesday.
Writer contacted SA Rob at 716-646-5200 ext 215: left message advising that the customer does have other concerns that will need to be addressed as well as the seatbelt which should only be tightening if the person jerks it too fast. As a precaution we just want to look at all of her concerns with the TS.
Writer contacted the customer at[redacted]; writer left a message advised calling in to confirm the appointment for today and if not able to keep it please contact writer back so we can discuss schedule another appointment.

Writer contacted the customer at [redacted]0: Writer contacted the customer she requested that writer contact her at [redacted]0 within the next ten mintues.
Writer contacted the customer at [redacted] Writer explained that the seatbelt is long enough and within specs. The customer stated that she wants us to replace the seatbelts. Writer advised that the seatbelts working as designed at this time and we will not be replacing the seatbelt. The customer phone iphone SW is not compatible with the radio SW. Emergency sensor was the FCW warning going off prob. due to customer being too close to an object or vehicle. The could not duplicate the

issue. The customer s feel that the dealer has not tested driven this vehicle to determine if there is the customer stated that the twice it wasn t snowing and twice it was not. The customer would like to have a flight recorder on the vehicle. The customer stated that he is afraid that one day he is going to get into an accident when this goes off without anything causing it to go off. Can not find a common denominator. The hood latch replacement was completed again the customer is frustrated with this having to be completed again. Writer offered a car payment the customer does not have a car payment writer will look into MVP options for the customer.
The auto temp system isn t melting the ice off the windshield as it is supposed to the customer needs to be able to leave the AC running at idle at a cooler temperature in the summer and the heater running in the winter. Writer will look to see if there is a way the A/C heater can work without limitations on the remote start or the auto start. She stated that she has already tested this with SA Rob and he told her that it was not normal. The customer has the latest navagation updates. Writer will research and contact the customer back on 2/28/14.

To Change The FCW Sensitivity And Active Braking Settings With Uconnect 8.4/8.4A System Screen If Equipped
Follow these steps to set the FCW Sensitivity and Active Braking:
Touch the Controls soft-key located on the bottom of the Uconnect display.
Touch the Settings soft-key.
Touch the Safety & Driving Assistance soft-key.
Touch the FWD Collision Warning , Far or Near soft-key for your desired preference.
Touch the Active Braking On or Off soft-key.
NOTE: A check mark will appear in the selection box to indicate the setting.
To Change The FCW Sensitivity And Active Braking Settings With Uconnect 5.0 System Screen If Equipped
Follow these steps to set the FCW Sensitivity and Active Braking:
The default status of FCW is the Far setting and the Active Braking is the On setting, this allows the system to warn you of a possible collision with the vehicle in front of you when you are farther away and it applies limited braking. This gives you the most reaction time to avoid a possible collision.
Changing the FCW status to the Near setting, allows the system to warn you of a possible collision with the vehicle in front of you when you are much closer. This setting provides less reaction time than the Far setting, which allows for a more dynamic driving experience.
End of Status Update
Writer contacted the customer at [redacted] Writer advised that the remote start but I know if they have it in auto mode it will default temp to 72 degrees and maintain (adjust blower speed and temp output regardless of default settings). Writer also sent email about the FCW settings. The customer stated that it does not defrost his windows using auto start. Writer advised we will contact the dealer and advise.
Writer contacted SA Rob at 716-646-5200 ext 215: left message requesting a callback to discuss customer concerns about the auto start not defrosting the windows.
Writer did recieved two voicemail s from the dealer.
Writer contacted SA Rob at 716-646-5200 ext 215 left message requesting a callback to discuss customer concerns about the auto start not defrosting the windows.
Writer contacted SA Rob at 716-646-5200 ext 215 left message.
Writer recieved a voicemail from SA Rob
Writer contacted SA Rob at 716-646-5200 extension 215: SA Rob stated that the remote start with the auto heat/AC are working as designed including the auto defrost the colder the temperature it may take longer than 5 to 10 minutes to fully defrost the windows and heat the vehicle.
Writer contacted the customer at [redacted] Writer explained the FWC system again as well as the autostart system are working as designed

writer advised that the FWC may have been too sensitive and they did turn it down as per Rob writer advised the auto temp should come on if the touch the handle as long as the key fob is on their person they will test that. They still disagree with the seatbelts and are seeking a second opinion.
The customer is requesting that the case remain open until contact back on 3-21-14, the customer stated that she is seeking a second opinon.
Status update provided via email to the following email address:

****End structured narrative T2 - Beginning Narrative
Writer called dealer#67470 and spoke with SA Rudy who said that the vehicle is at the dealer. He said that the recall has been performed by the dealer. However, they performed the RADIO FLASH that did not work and they will replace the radio. He said that the radio is connected to the A/C and customer will not have the A/C for couple days until the part arrive at the dealer.
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted] Writer called the customer and there was not voicemail set up.
Writer called dealer#67470 and spoke with PA Margie who provided the order#58194 and part#Z8190240AG. She said that the order took place early in the morning today 12/03/13 and it has been release from vendor today. She said that the order may arrive within two day. She requested to call her back tomorrow for further information on the part status.
956-203-1560. Writer called the customer and someone answered the phone indicating the customer was not at home and requested to call her back later. Left a message asking to contact the agent and provided the agent s direct extension.
Customer calling requesting to speak with CMIP500, writer transfer to EXT 66100.
Customer called in saying the vehicle is at the dealer waiting for the new radio install on her vehicle. However, customer has no alternative transportation until the part arrive at the dealer. Customer was informed that writer will provide rental car assistance for 5 days and writer will contact dealer to make arrangement to accommodate customer s needs. Writer will call customer back when the rental car is ready for a customer.
Writer called dealer#67470 and spoke with SA Rudy who was informed that CM is authorizing 3 days of rental car assistance until the part arrive at the dealer. He was informed the case will be sent to the dealer with the rental authorization.
Customer seeking rental assistance because dealer is waiting for the radio. Contacted Service Advisor, Rudy at 67470 to discuss the customer s request for rental assistance. Confirmed customer s concern and with Service Manager concurrence, authorized 3 days of rental per guidelines in Warranty Bulletin D-11-53.
Rental authorization will be processed by CAC.
REASSIGNED TO BC/DLR 63 67470 12/03/13 15:33 O [redacted]
Writer called dealer#67470 and spoke with PA Chris who said that the part

has arrived at the dealer. He said that the part is getting installed on the vehicle. Chris transferred the call to Service Department and spoke with SA Scott who has not noticed the part arrived at the dealer. He said that the part will be installing today.
956-203-1560. Writer called the customer and there was not voicemail set up.
transient vehicle will be repaired under the terms of the warranty..1 x only p.a. on rental
Writer called dealer#67470 and spoke with SA Scott who said that the vehicle has been repaired and returned it to customer s possession.
956-203-1560. Writer called customer who said that the vehicle has been returned to her possession. However, customer indicated when she was driving the vehicle the Advanced Brake Assist turn on and there was no vehicle in front of her or on the line. Customer was informed that writer will leave the case open until 12/09/13 to confirm the vehicle is working to her satisfaction.
see lines #106-107
[redacted].Writer called the customer and there was not voicemail set up.
[redacted]Writer called the customer and there was not voicemail set up.
see line #98-99
Customer said that the case could be closed since customer s issue has been resolved to his satisfaction and she will call CAC back if the problem reoccurs. Customer was informed that her concern will be documented for future reference.
CLOSED LOOP UPDATE - no need for additional follow-up.

End of Status Update
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted]. CA contacted Mr.[redacted] and advised of ECS program and process. Customer is very upset and wants a replacement vehicle. CA advised would like TS involvement for issue resolution and can look at compensating the customer for frustrations. Customer willing to go to dealer tomorrow @ 4:00 PM. CA advised will call dealer, notify of concerns, and request that a rental reservation was made for customer.
Customer s concerns:
- Transmission light illuminated, and could not accelerate above 55 MPH.
- Vehicle sputters like it is going to stall intermittently.
- Braking system is more sensitive, ABS light illuminates in improper conditions.
- Radio still locking up, rebooting itself, and switching from Bluetooth to Speaker phone without prompt.
CA to follow-up with customer once per day. Customer is often in meetings with clients and is unable to answer phone. CA to call customer once case escalated to TS on 12/11.
Attempt made to contact Bill/SM. CA was on hold for 6 minutes with no answer.

Attempt made to contact 52382. Voicemail box prompt to enter mailbox number.
CA contacted 52382 and spoke with Jesse/SA who will arrange rental reservation for customer around 4:00 PM. CA provided list of concerns and advised that ECS needs to be notified as soon as customer arrives in.
Status update provided via email to the following email address: [redacted]

CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
Attempt made to contact Mr. [redacted]. Left message.
Customer contacted CAC stating that he had just received messages over his text messages stating that his vehicles alarm was going off at 8:00 PM Central and 8:11 PM central. Customer further was concerned regarding this and wanted to documented for further review in the event that something has happened. Customer further stated that he would contact us back if any thing has happened.
Customer is expecting to learn why his alarm has set off.
Agent advised customer that it would be looked into. Agent further contacted dealer 52382 and there was no one available. Agent advised that

customers concern regarding his alarm would be documented in the case that it needed to be further investigated by case manager and advised that if customer learns of anything that is a concern to further contact us back.
Begin Customer Message reviewed:
This is the worst vehicle experience I have ever had! My vehicles alarm was triggered on Wednesday night and I called in to report and no one ever even called me to ensure my jeep is ok. I will be seeking legal advice and filing this vehicle under my states lemon law if I don t hear from you Monday. I gave you the chance you asked for, now I need my vehicle that I paid good hard earned money for. Also, my car payment is due on the first, please send payment for this as I do not agree that I should pay for something I am not even using.
End of Reviewed Customer message
CA contacted Roland/ASM who advised that vehicle is being reassembled now. Roland/ASM believes the alarm notifications were due to the vehicle losing communication with several modules, but they believe this has been resolved, and there was no harm done to the vehicle. Roland/ASM will contact CA back for claim assistance.
2nd attempt made to contact Mr [redacted]. Left message.
Status update provided via email to the following email address:
[redacted]
I have attempted to reach you by phone twice without success. I would like to discuss your vehicle with you and your request for payment assistance.
At your earliest convenience, please contact me at: 800-763-8422 extension 66039, Monday Friday, 1:30 PM to 10:00 PM EST.
I look forward to speaking with you.
End of Status Update
Agent transferred customer as per lines 52 and 53.
CA contacted Mr [redacted] and advised of 156-160. Customer would like payment assistance. CA advised would like to get update on vehicle. Customer states he is in rental still and vehicle is still at the dealership. CA advised will call customer back.
Attempt made to contact Roland/ASM. No answer. Redialed and spoke with Roland/ASM who advised vehicle is ready for pick up. Dealer is ordering a radio for customer. CA requested part #, order #, and order to be upgraded if not yet received. CA to call dealer tomorrow. 17 days rental if customer turns vehicle in today.
CA contacted Mr. [redacted]. CA requested customer turn in rental vehicle and pick his vehicle up. CA advised of radio on order and that customer will need to go back to dealer again once arrives. Customer requested a SC. CA advised happy to look into SC options, but customer would need to decide between vehicle payment or SC. CA to follow-up with customer 12/31 to review options.
CA contacted Mr. [redacted] CA advised would like to offer LWM100N Lifetime Maximum Care SC with $100 Deduc. Customer accepts and is very pleased at this point. CA advised plan provisions would be mailed and provided website information for review. CA to follow-up when radio information available.
LWM100N Contract created. Contract number is [redacted]
Status update provided via email to the following email address:
[redacted]

Begin Customer Message reviewed:

Hello Christine, I am emailing to report that the transmission light has once again turned on and my vehicle is unable to catch the gears over 55 miles per hour. I am extremely disheartened and extremely frustrated by this. I called this afternoon to report this and add to my case, but the office was closed due to New Years. This was so unfortunate because I was driving with my family to a family function and we ended up late because of this. I really need you to assist me with this, I am not willing to take back to the dealership. Obviously, I was sold a very defective vehicle and I need resolution from Jeep ASAP. I know you have done your best, but now I need Jeep management to act and take ownership of the poor quality vehicle that was sold to me. I look forward to hearing from you. Happy New Year and God Bless.

Customer left a message stating that there were documentation that he needed to submit while the case is being reviewed.
****** Below Customer Contacted for Documentation Request ******
[redacted] on 2014-01-24 @ 17:53
Mr. [redacted] called to speak with Customer Advocate CR913, and asked why the case had been sent to another CM, ML1094. Customer states he tried to reach the Case Manager and she was unavailable. Customer did not wish to speak with anyone else and only had a moment to ask for Writer to note the case: Customer is offering to email the video to ML1094 that CR913 had requested, although customer thought it was an unsafe thing to do (video the vehicle issue while driving). Customer asked for CM s email address. Writer advised customer that we do not have a direct email address to provide to customer, but offered to send a Document Request Link email message to customer. Writer advised customer that this may or may not work for the intended purpose, and if CM is unable to access or view this information, CM would have to advise customer otherwise. Customer agreed, and Writer sent link to [redacted].
Customer requests a call back from CM today or Monday.
Writer contacted the customer and left a message. Writer informed that we are returning the customer s call in regards to his case. Writer informed

the customer that he will need to take the video and vehicle back into the dealership in order for us to move foward on his case. Writer informed customer that a follow up will be made no later than 1/27/14. Writer contacted customer who advised that he feels like his case should go to the customer service manager of North America. Customer alleges he was told on 12/31 that a repair was attempted, but customer alleges that no repairs have actually been done on the vehicle. Customer advised that he took a video of the light that could not be duplicated in the shop. Writer advised that customer should bring the vehicle back to the dealership, customer advises that he doesn t want his vehicle any longer and writer advised on blue and white booklet and bbb.org. Customer wants a callback from a supervisor. Customer would like to reiterate that he loves his Jeep, and wants help above and beyond what we can do here to ECS. Customer will take his vehicle to the dealership on Thursday 1/30.
******* Supervisor Call Back*******
Writer contacted customer at [redacted] who states he video taped the concern he is having and showed it to the dealership in which they did not believe was happening. Customer states the dealer was in awe. Customer states he is concerns for his safety and the safety of his family. Customer states 2 days ago he was driving his vehicle and the vehicle slammed on the brakes on its own and he is happy his wife was not driving the vehicle. Customer states he would like a resolution as his previous CA CR913 advised him repairs are completed. Customer states there have not been any repairs done on his vehicle. Writer advised customer we will be taking over the case and working with customer on a resolution. Customer states he does not want to make vehicle payments while the vehicle is at the dealership. Writer advised customer that is something we can look into at that time. Writer advised customer we will follow up on Tuesday 2/4/14 to see when customer can take the vehicle in. Writer contacted customer, left message. Follow up no later than 2/6/14. Writer spoke with customer and he states he has been sick and has not been able to take the vehicle in. Customer states he will take it in next week. Writer states we will follow up on Tuesday 2/11/14.

Recall - N58: REPROGRAM INSTRUMENT CLUSTER & ABS / ALT. GROUND - Information Request	REPROGRAM INSTRUMENT CLUSTER & ABS / ALT. GROUND

Briefly summarize why the customer is contacting Chrysler: Customer called because he was in a minor accident where he rear ended someone. Customer states he did not get a warning from his Forward collision warning which would have prevented the accident. Briefly summarize what the customer is expecting: Investigation into the Forward collision warning system. (FCW for remainder of CAIR)
Writer advised customer that the FCW is a safety feature designed to increase customer safety and prevent accidents that are preventable. whether or not the FCW system is working or any other feature, the driver must remain focused on the road.
Customer requests again to have an investigation done.
Writer went to check with a supervisor, supervisor agrees that this is not a case for special investigation.
Writer advised the customer that we cannot send someone to investigate however the writer is willing to call the dealer and ensure that they check the FCW system before he gets the vehicle back.
Writer called dealer 23102 and spoke with SA Bob who stated that the customer did $2500 in damage to the compressor and fascia. SA Bob states warranty work was denied do to the accident and so was rental coverage.
Reassigned to BR379 for survey bypass for incomplete recall
Customer seeking information regarding the air compressor. Customer states since the accident there has been issues with the air compressor. Customer states the vehicle should not have been affected by such a minor collision. Customer states he is also having electronic issues. Customer states he would like to file a complaint in regards to the air compressor location. Customer states the front of the vehicle should have more impact suppression.
Agent advised the air compressor assembly is located near the front right of the bumper. Agent advised there was no more specific information. Agent advised dealership may have access to a diagram with the air

compressor locations.
Agent informed customer of incomplete recall REPROGRAM INSTRUMENT CLUSTER & ABS / ALT. GROUND
Briefly summarize why the customer is contacting Chrysler: The customer is contacting Chrysler regarding the air suspension. The customer states that shortly after the accident the air suspension stopped working. The customer states that the air suspension went out because of the front end collision, it ruptured the cylinder. The dealership is stating that the vehicle needs to be taken to the body shop. The customer states he is not very believing that the accident cause the air suspension to stop working. The customer states that the dealership advised him that the vehicle shouldn t be driven.
Agent called to the dealership 23102 and spoke with the service advisor. The service advisor states that the customer brought the vehicle in for an air suspension low and after the diagnosis they found out that it was in an accident. The service advisor states that there is a compressor behind the damaged area which caused the air suspension to go out. Agent advised the customer of this.
Briefly summarize what the customer is expecting: The customer is expecting to get more information on why the air suspension went out.
CAIR RE-OPENED AND FOLLOWING REASON CODE(S) REMOVED
Survey By Pass - No Diagnosis
Briefly summarize why the customer is contacting Chrysler:was told the body shop has to do the repairs.
The dealership repair was to the air suspension control module, which not fix the problem. Also the dealership stated it is the air compressor. The dealership does not want to work with owner to fix the problem.
Owner feels that the accident happened due to not having the Enhanced Accident Response System working, due to the recall N58 (REPROGRAM INSTRUMENT CLUSTER & ABS / ALT. GROUND).
Owner also advised that the dealership told him that he had to take the vehicle himself to the auto body shop.
Briefly summarize what the customer is expecting:to have the vehicle.
Agent advised owner will call the dealership to follow up on the problem.
[redacted]
Customer calling and expecting a call back a[redacted]
Customer called inquiring about if there is an update on the case.
Customer inquiring about taking the vehicle to another DLR. Customer states that he suppose to be called back and will wait for that call back. custoemr disconnected when agent said there was no updates
SM Bob ASCM replaced did not resolve needs an air compressor due to accident.
All damage done were done by the accident and not a defect in the vehicle.
The SM advised the vehicle has to be removed and brought to the body shop by the owner, or it will be towed.
Also advised the owner s insurance advised that will work with owner to fix the vehicle.
Agent left voicemail with owner that the SM advised owner has to work with the insurance company and to pick up the vehicle.

***** EMAIL BRIEF DESCRIPTION CONTENT *****
Cold Temp System Issues
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
I have a new 2014 Jeep GC Overland manufactured 7/13 purchased 11/17 (with less than 1200 miles) (software version 13.38.52). When I parked outside overnight (three nights in a row) to see if the cold problem/issue was repeatable and the outside temperature was between 12F to 25F, the blue screen appeared when using the back up camera. In addition, the following issues/problems occurred at the same time; turning on my seat heater/ heated steering wheel (they wont stay on after 3 seconds), my airbag warning indicator illuminates (stays on), the heater will not work, the passenger side blind spot indicator operates randomly, the FCW forward collision warning 'OFF' LED illuminates and can t be turned off; the ACC status flashes that it needs service in the display. All the aforementioned problems 'start to function properly' when the car has been operating for approximately 15 minutes and the engine temp gauge indicator is near the middle of the gauge display. When I park inside my garage with the temperature at 46F I have not had any of the aforementioned issues/problems. Any ideas Jeep Engineer s? Perhaps a upcoming SW update?
********** END OF CUSTOMER EMAIL********
Dear[redacted]
Thank you for contacting the Jeep Assistance Center.
We would advise that you bring your vehicle to an authorized Jeep dealership to see if they are able to diagnose the issue.
Thanks again for your email.
Sincerely,
Natasha
Customer Service Representative

Jeep Customer Assistance Center

Corporate - Dealer Information - Default - Default - Default	customer unhappy with product

Briefly summarize why the customer is contacting Chrysler: Customer called stating he has a vehicle and he had a recall. Customer states he took it to the dealership and it was supposed to be fixed. Customer states the adaptive cruise control didn t work and they needed a part. Customer states he dropped it off today and they need another part. Customer states he is not happy with the Chrysler product. Customer states he just wanted to let us know. Agent advised his concerns will be documented.
Briefly summarize what the customer is expecting: To let us know what is going on with his vehicle.
Customer calling back to complain about his vehicle taking so long to be repaired. Customer stated the vehicle has been there since Monday and it sill might not be ready by tomorrow.
-
Agent called DOAN DODGE and spoke to SM Chris who stated that the wrong part was accidentally order and the right one has been ordered and will be in tomorrow morning. SM Chris stated that he will do everything he can in order to get the vehicle repaired for the customer tomorrow. Customer is not in rental.
-
Agent explained to customer what SM stated and that he is working his best to have the vehicle ready for him by tomorrow. Customer is very unhappy with the situation and stated that he will never buy a Chrysler product again.

********** 91L Review **********
>> A new I2R Case have been opened to further assist customer. Original CAIR number is [redacted]
Reassigned for handling.
LVM for customer advising the case has been reviewed by Chrysler and referred to me for special handling to assist with the repair of his vehicle and requested a return call.
Received incoming call from customer. I advised customer his case has been referred to me by Chrysler to assist with the repair of his vehicle. I apologized for the inconvenience and understand the warning lights on the dash are coming on. Customer said the vehicle has gone in five times for this. Customer said he picked the vehicle up yesterday and the

lights have not come back on but he wants Chrysler to do something about this and to compensate him for this because he is paying almost $600 a month for this vehicle and it is at the shop too much. I reminded customer of the warranty on his vehicle and suggested we confirm this repair and I would be happy to compensate him for one of his monthly payment. I advised him that I will contact the dealership to request his RO history. I advised I will follow up with him next week to confirm repair.
LVM for customer requesting a return call to confirm repair and offer compensation.
LVM for customer requesting a return call to confirm repair and offer compensation.
>>>Received voicemail from customer thanking me for the follow up and requesting a return call.
>>>Spoke with customer to confirm repair of this vehicle. Customer said he is still having electrical issues with the vehicle. Customer said while he is driving the park sensor and rear wiper sensor goes off. Customer says the vehicle will tell him to brake when he is 500 yards from the next vehicle. Customer said is a very busy person and doesn t have time to take the vehicle in for service as much as he has too. Customer said he has patients to see. I advised customer my recommendation is to take the vehicle in for service. Customer said he will need a rental vehicle. I advised him I will authorize the rental for him while the vehicle is in for service. I advised him I will review his case to see if there are any other options of resolution. Customer said he will try to get the vehicle in tomorrow. I requested he give me a call once the vehicle is at the dealership.
Received incoming call from customer stating he thought the senor was not reading properly because the bumper was dirty so he cleaned the bumper but it only made it worse. Customer said he drove about 40 miles and the warning for braking and front collision came on. Customer said he has left a message of the service department to give him a call so he can schedule an appointment. I advised customer to give me a call once the vehicle is in for service.
Spoke with Scott at Autoland Chrysler Jeep Dodge Inc. to see if customer s vehicle is in for service. Scott said the vehicle is not there.
LVM for customer regarding his vehicle status and requested a return call.
Received voicemail from customer stating he did take the vehicle in for service and was told the front and rear collision system needed to be adjusted. Customer said he picked the vehicle up yesterday afternoon and is test driving it.
Received voicemail from customer stating he is having problems with the vehicle again. He said it starts with an error message with the 911 button stating to resurface the car. Customer said it is worse since they adjusted the sensor. Customer said the adjustment did not workand the brake light has come on 6 times. Customer said this is very inconvenient. Customer said he needs something different because the service department cannot bring his vehicle up to speed and he needs a sound resolution.
>>>Received incoming call from customer stating he is stilling having problems with the vehicle. He said the 911 button is not functioning properly and this is how things started to being with. Customer said the brake warning light came on 6 times. Customer said something else has to be done. I advised customer I will review his repair history to see if there are any other options for resolution and that I cannot guarantee anything at this time.
>>>LVM for Service Manager David to return my call regarding this case.
Spoke with Sales Manager Jerome regarding CDI participation. I explained the CDI offers the customer a 4% discount off the invoice price of a new vehicle plus any incentives and rebates the dealership if offering and they customer will use his vehicle as a trade. Jerome said he will speak with his GM about it and give me a call back.
Spoke with Jerome at Autoland Chrysler Jeep Dodge Inc. regarding the CDI offer. He said he would have Paula to give me a call.

LVM for Paula requesting a return call regarding CDI participation.
>>>Received incoming call from Paula regarding the CDI offer. I advised Paula that Chrysler is offering the customer a CDI which stands for Certain Designated Individual and that this customer is being offered a 4% discount off the invoice price of a new vehicle. She said she has looked at this customers case and he is in a lease vehicle and unless we are doing a substitute of collateral this is not going to work for this customer and if the vehicle has problem they won t be able to sell. She said she has been working with Vanessa at ISG with the replacement and repurchases and she is not familiar with this process. I explained to Paula this is not a buyback or replacement and that we are offering to assist the customer with trading his vehicle. I advised I will give her a call back regarding the lease on the vehicle.
Spoke with Service Advisor Michael regarding customer s last visit for service. Michael said customer came in on 12/21 with a senor concern. He said they adjusted the impact senor. He said the vehicle was released back to the customer 12/23. RO # [redacted]
Spoke with customer and offered replacement. I advised customer he should be contacted by a replacement coordinator within 7/10 business days and they will go over the details of the replacement with him. Customer was very appreciative of my assistance.

Product - Brakes - Unknown - Other - Unknown	Customer doesn't know if distance brake is working
Product - Fuel System - Unknown - Poor Fuel Economy - Default	Customer feels he is not getting good mileage
Corporate - Product Information - Default - Default - Default	Customer inquired about the forward collision warning system.
Recall - N58: REPROGRAM INSTRUMENT CLUSTER & ABS / ALT. GROUND - Advise Owner/Incomplete Recall	Customer states he just had the recall completed.
Product - Electrical - Unknown - Other - Default	heated steering wheel does not work with remote
Product - Air Conditioning / Heater - Auto Temp Control System - Other - Default	vents blow heat when nothing is on
Dealer - By-Pass - Default - Default - Default	

Briefly summarize why the customer is contacting Chrysler: Customer is calling seeking information about the Forward Collision Warning system.
Briefly summarize what the customer is expecting: Customer is expecting to find out the difference between the far and near settings. Writer advised customer as per page 218 of his owner s manual that the far setting will detect collisions from farther away and apply limited braking. Writer advised customer the far setting allows for more response time. Writer advised customer the near setting will warn you of a possible collision with the vehicle in front of you when you are much closer. Writer advised customer as per the owner s manual this allows for a more dynamic driving experience.
Briefly summarize why the customer is contacting Chrysler: Customer stated that he is not sure his distance brake is working. Customer proceeded to say that getting hot air out of his vents and the whole vehicle would get hot, and he feels he is not getting very good mileage. Heated steering wheel does not work with the remote start.
Briefly summarize what the customer is expecting: Customer is seeking resolution with his issues.
Writer advised the customer to go to the dealership and have them test

his braking system to make sure it is working. Writer informed the customer she would escalate his case to a case manager to look into his other issues further.
REQUEST FOR SPECIAL HANDLING
NIC of TL consulted: PG725
Reason for special handling request: Customer is not happy with his vehicle, he feels he is having too many issues for such a new vehicle.
What customer is expecting: Customer is seeking resolution for the issues and overall satisfaction.

[redacted]
My name is Tina. I have been assigned as your Case Manager. Here is some information that will be helpful to you.
Your case number is [redacted]
Chrysler Case Management telephone number is 1-800-763-8422.
My direct extension is 66178.
My work hours are 7:00-3:30pm Mountain Standard Time Monday-Friday.
We understand that you are having concerns with the vehicle. We will need you to contact the dealership and get a diagnosis for the concerns. We will contact you and the dealership no later than Friday, 01/03. We appreciate your understanding.
End of Status Update
CONTACT UPDATE - 1st Contact attempt. Per lines 45-54.
Begin Customer Message reviewed:
Please call me at [redacted]8. Been to the dealership many times. You can see this by looking up at the records. There is always something going wrong with the car and I have spent too much time, money and effort bringing it back and forth for servicing. Now, the heated seat module needs to be replaced. I ve had it .... the car is too expensive for me to be going through this. I d like to have the car replaced or return it without penalty. I am also looking if this can be used for California s 'lemon law.' I understand all new vehicles have some problems, but this is ridiculous.
End of Reviewed Customer message
Writer contacted customer [redacted]. Writer left message and advised would like to discuss information with customer.
Customer contacted writer. Customer explained having so many problems with the vehicle. Customer informed does not want the vehicle anymore and problems keep occurring. Writer offered customer to continue working with Jeep for resolution and 1 month s car payment. Customer declined and requested replacement vehicle. Writer informed case will be reviewed by Care Analyst Team and customer will be receiving a callback within 3-4 business days. Customer advised vehicle has had many repairs and customer does not want to get stuck with it.
********** 91L Review **********
Called owner and explained have forwarded case to Dealer to use all corporate resources to resolve vehicle issue. Advised owner to keep in touch with SM for most current status and if he is not contacted within 5 business days to call me at 888-542-7239, ext 2166.
********** 91L Review **********
Owner is seeking relief under the California state
1. What does the customer allege is wrong with the vehicle? COLLISION

WARNING SYSTEM
2. Was the vehicle purchased new and used? NEW
3. If used, what number owner is the customer and what was the mileage? N/A
4. Is customer claiming # of repair attempts or # of days out of service? SERVICE
5. Does the condition described by the customer still exist? YES
Customer has been referred back to the dealership.
Reassigned to the West Business Center (TMT).
Customer was contacted today at (1:23pm).
Customer was provided with agent s name and extension if the customer needs to re-contact the agent.
Customer was informed they should be contacted within 5 business days.
010614 reassigned to am jsc9 to review and respond to owners request for lemon law relief tmt
1/13/14 AM JSC9 attempted to contact customer today, but was only able to leave a message for return phone call. Please note that AM JSC9 has reviewed service records and at this time, Chrysler Group, LLC would not be responsible to replace or repurchase the vehicle. Customer will be notified of decision once customer returns phone call. AM JSC9 is closing and tracking this CAIR as final resolution has been determined. JSC9
Spoke with owner and he stated he is upset because he called AM back and he has not returned his call. I read the notes to him and told him would have AM call him. He asked me if Jeep is not replacing or repurchasing what will they do. I explained to him he could be assigned a case manager who will assist with another repair and oversee things for him. He said never mind that how do I get compensated. I told him a case manager may be able to assist with that, depending on his repairs. He interrupted me and said he just wants to be compensated, not do any more repairs and said he will just call his original case manager back because she offered him lease payment and for me to also give AM message to call him.

Writer contacted dealer 57778, Graham Service Advisor. SA states that the customer is concerned with the system getting stuck in Recirculation. SA advised that when the vehicle is placed in the Auto system it will go straight Recirculation air. SA states that the customer advised that it can only be taken out of Recirculation by manual pressing it out. SA was informed by the customer that this creates a noise. Writer conformed that the customer was placed in a rental under the Service Contract. SA advised that the customer will be picking up the vehicle tomorrow. Writer confirmed that if any repairs are found that the vehicle will be fixed.

Customer concern: The Sirius radio receptions cut out. The radio will not load at times. The collision warning system light on
Is customer in a rental? No
Is customer waiting? Yes
All customer contact numbers: [redacted]
Best time of day to contact customer: During the day
Dealer diagnoses: Have not diagnose yet
Call received from Graham/SA requesting to put customer into a rental vehicle. Writer approved rental and advised SA to contact ECS back once a diagnosis is available for next steps.
-- Customer not waiting. Rental approved.
SA Gram DC 57778, called to speak with their Case Manager. Transferred the customer to CR1312 at ext 66039, because DH785 was not available
Correction to 233: CR913.
Graham/SA advised that they are recommending TSB #: 08-089-13 for antenna replacement. Once antenna is replaced, the dealer will then be able to continue diagnostics on the radio not loading at times. Graham/SA requested a TS contact the customer to explain the Collision Warning System. Writer advised this is not an option. Graham/SA states there is no issue with the warning system, it is only the customer s belief that he knows how the system is supposed to work. Dealer says NPF and TS previously has said NPF with system. Graham/SA is very frustrated and would like customer to be able to comprehend system and receive specifics on how the system is supposed to function.
TS has advised: This system will only warn the customer when all conditions are met. It is not designed to replace the custmoer paying attention to the road and will only warn the customer when it feels that a collision is likely.
Requested specifics from TS.
Pages 216-219 in Owner s Manual.

Body control module problems
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
We have been having problems with our 2014 SRT Jeep since 3,800 miles and still haven t been able to get problem fixed and were going on 12,000 miles
now. It has been at Firkins dodge at least 12 times.b We understand that it
qualifies for the lemon law. But we love our Jeep. We need to speak with someone that has the ability to tell us what is the best route for us and Jeep. We don t want to get rid of our jeep but someone has to understand the frustration of paying 73,000 for a new vehicle and not having any peace
of mind in the last 6 months that something is going to go wrong again this
week. Please can someone asist.
*****END OF CUSTOMER EMAIL*****
Dear [redacted]
Thank you for contacting the Jeep Customer Assistance Center.
I regret the problem your vehicle has experienced and appreciate the time and effort you took to bring this matter to my attention. Comments like yours are one way we have to learn of problems that may develop and improvements desired by customers.
I would like to look into your concerns further however in order to do this I would need to contact the dealership and get more information on

the issues that your vehicle has been having and what repairs have been done up until this point. The dealership is currently closed however what I will do is contact them tomorrow (12/24/2013) and provide you with an update via email as soon as I have obtained more information.
We apologize for any inconvenience this delay may cause you, and sincerely thank you for your patience.
Thanks again for your email.
Sincerely,
Sarah

Agent contacted Firkins Chrysler (23955) and spoke with service advisor Brian. Agent asked for the dates and concerns that customer has been in for. Brian provided the following information:
09/18/2013 horn not working correctly, checked for inoperable horn, bcm was bad and replaced.
09/19/2013 horn not working again, replaced bcm module
10/01/2013 - bcm had to be replaced again
11/11/2013 replaced bcm again
11/18/2013 front impact sensors were not working properly, recall was completed for this concern
11/27/2013- seat memory not holding, acc failure light came on, park sensor issue p0585 code showed up, no repaired needed, cleared codes
12/02/2013 park assist not working, flickering between the sensors, - update available for the radio, did update, fixed concerns
12/11/2013 impact sensor not working when they completed the radio update on 12/02/2013 and it changed the system functions and they showed the customer how to understand it.
-
[redacted]
Thank you for contacting the Jeep Customer Assistance Center.
Thank you for your patience while we looked into this further for you. I have been in contact with Firkins Chrysler and discussed the issues with your vehicle and the repairs that have been done. At this time I am going to be escalating your information to case manager for further review.
Your case manager will be in contact with you within one business day to discuss your concerns more. Please keep in kind that because of the holidays, the contact could take a little bit longer.
Thanks again for your email.

M[redacted]e lef VM and asked for a callback.
Agent attempted to contact dealer SA Mike, 9/18/2013 was the first time.
SA Mike transferred the call to Service Tech Donald. Service Tech advised that Dealer has replaced the BCM and performed a flash. Customer was not happy with the way the vehicle was braking due to the collision warning prior to the flash. After the flash it is working differently and customer was not happy with the way it worked. The customer now wants the vehicle to work the way it before the flash. Agent Advised that this vehicle has been selected for ECS team. Agent advised Tech that he will most likely receive a call from a TS.
Attempt made to contact customer at [redacted]3. Left message that this vehicle has been selected for the Enhanced Customer Satisfaction and that customer would be contacted within 24-48 hours.
Writer contacted Tech Donald who advised he doesn t see where there is an actual issue. Tech Donald advised the vehicle is not in the dealership at this time, writer advised it does need to be in the dealership before we can escalate the case up to a TS. Spoke with SM Brian and advised customer s vehicle will need to be back in the dealership and they need to be put in a rental if they need one. in a Tech Donald Brian is the contact.
Writer spoke with customer who said there are additional issues not addressed. Customer advised that after the last flash, the backup camera is grainy and choppy and also the memory seats are set and cannot be reset and that the navigation is also having issues. Customer advised the best time to reach him is in the afternoon at [redacted] or email [redacted]. Customer advised that for every time that is documented that it has had been in the dealership it has actually been in the shop 4 times. The adaptive cruise doesn t have an issue, the crash warning has the issues. Customer will be bringing vehicle in on Monday and writer will contact then to have the case escalated to a TS.
Enhanced Customer Satisfaction Team (ECS) *
The customer is being handled by the ECS Team
Writer attempted to reach customer, left message.
Customer left message informing writer that his wife will bring vehicle in to dealership tomorrow morning.
Writer spoke to SM Keith. SM states that the customer is complaining about the power seats being programmable, and on the warning light in the center of cluster does not come on when approaching objects in front. SM states AM and TA were at the dealership and have concluded that there is nothing further to be done. SM will discuss with customer. SM states no further escalation needed.
Writer attempted to reach SM Keith. Left message to ensure that customer has picked up vehicle and has been updated by SM.
Writer attempted to reach customer, left message.
Writer attempted to reach customer, left message that case will be closed in two days if no contact.

Product - Electrical - Unknown - Other - Default	customer states error msg appears on dash about FCW
Product - Electrical - Cruise Control - Other - Default	customer states error msg on dash appears for ACC
Product - Drivability - Unknown - Stalling - Default	customer states vehicle stops while driving

Briefly summarize why the customer is contacting Chrysler: Customer states he keeps receiving error messages stating there is an error with the Auto Cruise Control and the Forward Collision Warning. Customer states once the messages appear the vehicle s shift locks and the vehicle stops completely. Customer stated this had happened in Aug, in Sept and again today. Customer stated he is upset this has been happening and wants to know who he can speak to about the issue.
Briefly summarize what the customer is expecting: Customer seeking a fix for the issue.
Agent inquired where the vehicle was. Customer states he had the vehicle and is taking it to the DLR when he is done work. Customer states he was told by the DLR they would not be able to look at the vehicle until next week. Agent stated to further assist a DLR diagnosis would be needed. Agent informed the customer of the open N58 recall, which could affect the issues he is having with the vehicle. Customer stated he would speak with a DLR and call back in once the vehicle was diagnosed.

Product - Fuel System - Fuel Tank - Other - Default	door does not close tight
Product - Electrical - Trip Computer / EVIC - Other - Default	fcw does not work properly
Corporate - Survey By-Pass - No Response - Default - Default	

Briefly summarize why the customer is contacting Chrysler: Customer stated that he had the vehicle serviced at the dealership because the fuel door does not close tight and stated that the inside sticks out and can push on it and bounces. Customer states that the dealership stated that this is the way the vehicle is designed. Customer states he showed the salesman another diesel vehicle and showed him that it closed tight. Customer states that the dealership stated that once it warms up that it will close tight. Customer states that the other issue was with the front collision warning does not work properly and the dealership stated that it will only work with the adaptive cruise control on. Customer states that he read other forums with people having the same issues.
Briefly summarize what the customer is expecting: Customer is seeking to have the door on the fuel tank closed tight and also to have the issue with the front collision resolved.
Agent advised customer that we would have to contact the dealership for the diagnosis and will contact him back once we speak to them. Customer would like to be contacted back at home [redacted]
cell [redacted]
Agent contacted the dealership 65146Ù to confirm details of diagnosis. Spoke with Service Advisor ToddÙ.
What is the diagnosis? Todd stated that the Shop foreman was looking at the vehicle and stated that the fuel door over flushed by design and the diesel model has a seal around the door and they compared to other vehicles on the lot and it is the same as the vehicles on the lot. The Shop forman advised customer that this was the way the vehicle is designed. Todd stated that regarding the front collision warning light. Shop foreman road tested the vehicle to verify the operation of the forward collision warning system and what he found was that the braking option was turned off and that was modified in the radio control screen.

Shop foreman printed off the STAR case and gave further details on how the system works and gave the customer a copy of it
*Have you had an opportunity to do a test drive with the customer? Yes for the front collision warning light.
*Has STAR been contacted? Yes for the issue with the forward collision warning system. STAR case #[redacted]
Agent contacted the customer and advised of above information.
Customer stated that he went out in the parking lot with the sales man George Davenport and stated that the fuel doors were all flushed with the body and tight when he went out with the sales person and his vehicle is not. Customer also stated that the dealership said that the Adaptive cruise control had to be on for it to work correctly and the customer stated that in the paperwork from STAR and also in the owner s manual it does not say to do that. Customer states he is still having issues with the front collision warning light not working correctly. Agent contacted the dealership back and spoke to the Service director Brian to advise that the customer is still having issues with the front collision warning light not working properly and that the sales man showed him the vehicles and that the fuel doors on the other ones on the lot were flushed with the vehicle and not loose. Customer stated that the dealership told him that the adaptive cruise control had to be on in order for the front collision warning light to work properly.
Brian Service Director will be in touch with the customer tomorrow morning regarding these issues. Agent advised customer that Service Director will contact him back tomorrow and if he has further issues to contact us back.
Agent contacted customer back to touch base and spoke to his wife Sue who stated she will forward a text to her husband to contact us back. Next agent just document to see if the dealership contacted him back and if he got his issues resolved.
The customer called back and stated the dealership contact the customer and he stated they said it is working correctly but the customer stated he still doesn t think its working right. The customer stated a service person took a Summit for a driver and he couldn t get the warning to go off either.
Customer called back and stated that the dealership has not contacted him and his adaptive warning works but the forward collision warning does not work.
Customer further stated that the dealership stated it worked as designed the last time he spoke to them but he disagrees.
Customer advised a call back is required and will take place within one business day by COB their time

Product - Electrical - Navigation System - Intermittent/Cuts In and Out - Default	Navigation freezes and provides wrong directions
Corporate - CNA Change - Default - Default - Default	Updated customer information
Product - Electrical - Reverse Camera - Other - Default	Vehicle warning system not functioning properly

Customer contacted CAC stating that he has been undergoing concerns on his vehicle with his blind spot monitor/forward collision system. Customer states that it is supposed to have an option on it where it is supposed to have audio options as well as visual but the customer is unable to access the audio option. Customer states that it is a 1 and a half hour drive to the dealership every time he needs to see them regarding this concern. Customer further states that his navigation has concerns on it where it visually informs him of the wrong direction to take but the audio tells him the correct direction and also stated that his uconnect navigation screen will freeze on him quite often. Customer states that his concern was brought to the dealers attention twice and at this time customer was informed by the dealership SM that they are looking to get a module replaced on the vehicle and stated that he was told that there may be several modules that need to be replaced and the dealership is unsure of which module will actually resolve the concern. Customer states that he would just like to have the whole unit replaced and further does not wish to make that many trips to the dealership because it is an hour and a half drive. Customer states that there is one module which was already ordered for the customer but it will be 2 weeks before they can be reached. Customer further states that he would be looking for a call back regarding this concern very soon.
Assigned to 86T
Agent attempted to reach the service manager regarding this concern. Agent was only able to leave a detailed message with service manager Matthew. Agent advised that he would like detailed confirmation of the customers concerns and provided the jeep line number and case number and advised he would be able to call back and leave detailed information

regarding this concern. Next agent please gather detailed information about the concerns on the customers navigation unit and forward collision system on the vehicle so concerns can be further escalated.
SM Matthew from dealer 24002 called in and stated they have a star case open and they have a blind spot module ordered. The vehicle will illuminate in the mirror but will not chime. SM could not confirm the navigation issues. They did a radio update for the software. SM states the navigation is not the initial concern of the customer and it was added later. SM stated that he has the vehicle so they could not confirm the issues. SM states the START case number is 605063 and the part number for the Blind Spot Module is 68137930AF, which should be in on Tuesday.
Reassign 86S

Owner is being handled by the Enhanced Customer Satisfaction Team. Warm transfer customer to 866-275-1420.
CONTACT UPDATE - 1st Contact attempt, phone number dialed, dealership was contacted, SM Matthew
was left a detail message explaining the vehicle is now part of ECS team and to please contact CA.
Writer dialed [redacted] eft a message with Ca contact information.
SM Matthew called writer and states that he has recieved the blind spot module. SM states that he has customer in a rental and have picked up the vehicle from the customer. SM requests a call back from CA at 828-242-8151.
Writer contacting SM Matthew is saying the part is on but the customer vehicle is still at the dealership.
Sm will be calling in the AM with total for DM notes.
WA/Don called for authorization. Writer advised that there is a case open.
WA/Don is asking for payment for the repair to a blind spot sensor left side and two days rental $716.50.
Writer advised that the CA will be notified and advised of her extension.
Dm notes have been added.
Writer dialed dealership and spoke to WA Don and advised that Dm notes are done.
Writer Dialed [redacted] wrong number. redialed [redacted] Left a message asking if customer is satisfied with repair.
Writer Dialed [redacted] wrong number redialed [redacted] Customer is on vacation and has not drove the vehicle. But the customer is saying only 1 out of three issues. Customer just wants the radio unit replaced.
CA advised when customer get back from vacation to contact the CA and will look into the concern. Customer is also saying the vehicle does not have lane assist but the customer thought it did have. Customer would like to know if this can be added. CA will look into this. Customer is due back on the 27th and will be contacting the CA.
CA will be sending the customer an email with CA contact information.
Writer dialed dealership and spoke to SM Matthew, will look up if lane assist can be put on this customer vehicle. And call CA back.
Writer dialed dealership and spoke to SM Matthew, Left a message asking for a call back onif lane asssit can be added to this customer vehicle.
Writer received a voice mail from SM Don stating the customer does NOT have lane assit and it can not be put on this vehicle.
Writer dialed [redacted], Ca left customer a message about the lane assist not being on his vehicle and left contact information.
Follow up call 2/7/2014.

Writer dialed [redacted], Customer is not sure if the vehicle is repaired or not as he has not driving enough. Customer is ill and cann ot drive the vehicle right now to get a diagnoses.
Customer is working with his Sales person to get into the Summit.
Customer is ok with cair being closed until he is well enough to get in for a diagnoses.
CLOSED LOOP UPDATE - no need for additional follow-up.

Dealer - Service/Body Shop - Personnel - Discourteous/ Rude - Service Management	unsatisfactory customer service

Briefly summarize why the customer is contacting Chrysler: Customer is calling in to make us aware of the situation he is experiencing with his vehicle. Customer states that he just purchased a new 2014 Jeep Grand Cherokee, and has experienced some issues ever since delivery. Customer states that when he purchased the vehicle and took delivery, he noticed that at only 8 or 9 miles, the headlights already had condensation inside. Customer brought this to the attention of the DLR, who stated that this was a design characteristic, and that it would eventually burn itself out and be fine. Customer states that after a week he still noticed the condensation in the lights, and brought it back to DLR 42631 to have repairs done. DLR took a look at the vehicle and fixed the lights. Customer states that at the same time as his lights repair, they were working on his heating unit, as the climate control was not calibrated properly. Customer states that he was placed in a rental for 3 - 4 days, and is appreciative. Customer states that when he picked up his vehicle, he left the parking lot, and within 10 feet, his transmission hose blew off, and nearly caused him to crash into on-coming traffic. Customer states that he was left stranded by DLR at the store down the street for over 3 hours. Customer states that he had hose replaced and fixed, but now since that repair, he has noticed a rattle, which sounds like a nut is loose in his underbody. Customer is getting very frustrated with this DLR and does not want to return there for service. Customer loves the vehicle, and works with Chrysler through his company and would like to work with a different dealership. Agent advised customer that any CJDR dealer can perform warranty work, or any work on his vehicle. Agent offered to contact a different local DLR for the customer, however

customer states that he will be out of town for a few days and won t be able to schedule an appointment until he returns. Agent advised customer of DLR 66999 Ed Voyles who is local to customer. Customer stated he would like to have his concerns documented, and will call back once he returns from his business. Agent have customer CAIR#, and advised we would be happy to assist further.
Briefly summarize what the customer is expecting: Customer is expecting us to document his concerns, and to help fix his vehicle issues.
Briefly summarize why the customer is contacting Chrysler. Customer calling for further information on his file. Customer stated he was speaking with AH1181 and he was going to contact him with dealership information to have his vehicle diagnosed and repaired. Customer states he will never return to his selling dealership and is now having further concerns with the forward collision monitoring not working. There are also issues with back seat, 60/40 split seat, 60 sides does not catch properly and it rocks.
Briefly summarize what the customer is expecting. Calling for the dealership information he was to be provided by AH1181. Customer asked if we can suggest a good dealership. Advised we would not be albe to suggest one over another as all our dealerships and technicians are Chrysler trained and the ability to service our vehicles. Customer understood and did a search to see which is closer. Customer picked Palmer Dodge to go over his vehicle. Placed customer on hold to contact Palmer Dodge.

Palmer Dodge Chrysler Jeep Ram
1460 Alpharetta Hwy
Roswell, GA 30076
(770) 410-1111
SA Roberto said he can diagnose the vehicle but they would not be able to provide a loaner or rental to the customer.

Advised customer of the information provided by SA Roberto regarding the rental. Informed the vehicle will need to stay at the dealership and if he requires a rental, it will be at his expense. Customer understood they would not be able to provide rental, just asked if there is one close to them he can get one at. Advised I will bring him into the conversation with Roberto to get this set up.

Briefly summarize why the customer is contacting Chrysler: Customer states he has an ongoing concern with his vehicle and cannot speak with someone in the VIP Program. Customer states that the collision light is coming on while driving and that the cruise control light is coming on as well. Customer is concerned for safety and states that this may be his last CDJR vehicle because of the concerns he has had.
Briefly summarize what the customer is expecting: Resolution
Called dealership 68286 to confirm details of diagnosis. Spoke with or Service Advisor Bill.
What is the diagnosis? There was a code to clear for the front radar sensor. Cleaned up code and drove vehicle and codes did not come back. Customer took vehicle home and light came back on.
Customer would like to know why the Restriction H (VIP Program, as stated by customer) was removed from his file. Dealer states that the restriction was removed on 01/17/2014.
Who has possession of the vehicle? Customer
Has an authorized dealer diagnosed the vehicle? Yesterday
If a CDJR dealer has diagnosed, what is the dealer name and code? Baker Chrysler, 68286

CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted] FOR INFORMATION
Writer called [redacted] 1[redacted] cell left message that would like customer to drive the vehicle for a few days and CA will follow up on 3/3/14. Writer also advised reimbursement was issued.
Writer received a call from MR [redacted] requesting to speak to case manager. Writer warm transferred call to case manager for further assistance.
Writer took call from Customer who advised the repairs are complete except for the gear shift, and customer has an appointment for the gear shifter over the weekend. Custoemr asked about the buyback process. Wrtier advised would be sent for review. Customer advised may need to consider this option if there is a need for another repair. Writer discussed the option of an extended SC for any repairs in the future.
Writer called [redacted] 4. Customer states he was not able to have the repairs completed as the dealership had no openings. Customer states that he is going back for repairs 3/7. Customer inquired about a SC. Writer inquired about the length of time customer usually keeps vehicle before trading in. Customer states that he usually trades his vehicles in after about 7 years 100,000 miles. Customer requests that CA follow up with him 3/5 to discuss SC.
Writer called [redacted] spoke with customer offered Jeep adventure package and cusotmer accepted will be taking his vehicle back on 3/7/14. Writer advised will follow up with them, and obtain the mileage.
Writer called BAKER CHRYSLER JEEP DODGE who advised customer did not make his appointment today.
Writer called [redacted] 4 spoke with [redacted] who rescheduled his appointment for 3/10/14. Cusotmer will call writer and leave a message as to the mileage on his vehicle.
Service Writer (SW) Kirk from dealer 68286 called to open a new ticket on the vehicle, dropped off at the dealership this morning. Dealership arranged a rental for customer already. Vehicle came back in today for gearshift issue (knob replacement). Writer warm transferred dealership to CA TP405 for details of the new concern.
Writer took call from SA/ Kirk confirmed new mileage and updated. SA stated shift lever repairs, and RRT customer is in a rental.
Writer took call from customer who advised vehicle was taken to sealership,writer advised mileage was added to SC and will have the SC added today 3/10/14. Writer advised if they charge him writer will reimburse.
for the oil change
AP685N Contract created. Contract number is[redacted]
Kirk SW called to advise of repairs completed, RRT 14-014, gear shifter, oil change on an service contract, and 1 day rental. RRT 14-014 cost $15.44 parts and labor, gear shift $198.22 parts and labor, 1 day rental $35.00=total $248.66
DM notes were added.

Status update provided via email to the following email address:
[redacted]
I have been advised by your dealership that all repairs have been completed and your vehicle has been returned to you. I will follow up with you in a few days to ensure you are satisfied with the repairs. In the event you need to reach me you may use the link provided in this email or call 800-763-8422 my direct extension: 66380.
End of Status Update
Marek Honczarenko called requesting to speak to CA TP405. Writer advised CA TP405 is not currently available but will call customer back after their current call.
Writer called [redacted] spoke with customer who asked if SC information would be sent, writer advised 2-3 weeks. Writer advised February payment was issued on 2/24/14. Confirmed address as correct. Customer asked if was still part of the ECS program writer advised it was. Writer advised case would be closed and could receive a survey.
CLOSED LOOP UPDATE - no need for additional follow-up.

CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted]6. Left message and once there is updates I will do another follow up.
SA Mike called in to speak with CM OS533 who was not available writer transferred call to 66045
SA/Mike called for TS authorization to order a part and repair. He states that there is a door panel issue that he has to submit to DI. Writer advised to go ahead and submit the pictures to DI and if approved, order the part, and if approved by DI, he can install if a call back is not received by the TS. Writer advised that no Uconnect repairs can be started until a TS contacts him with authorization.
SA/Mike asked if the ECS restriction can by removed if the customer requests it. Writer advised that it could be if the customer does call to request it.
SA/Mike states that he is ready to repair and release the vehicle tonight but is waiting for TS contact. Writer advised that the cases are taken in order as received. The case has not been assigned to a TS yet but has been escalated.
CAIR ESCALATION CLOSURE
SEE STAR CASE# 6[redacted] FOR INFORMATION
Writer contacted dealership and was advised that the vehicle has been repaired and returned back to the customer.
Attempt made to contact customer. Left message calling to confirm the repairs and the case will stay open for 2 more days if no contact the case will close.
CLOSED LOOP UPDATE - no need for additional follow-up.

Status update provided via email to the following email address:
[redacted]
My name is Tom I ha e been assigned as your Case Manager. Here is some
information that will be helpful for you to have:
Your case number is 2[redacted]
The Uconnect Case Management telephone number is: 877-855-8400.
My direct extension is: 471-8435
My work hours are: 8:00 AM 4:30 PM Monday-Friday EST
Here are the steps to completing the software download:

Step 1) Start downloading the RA4 download from:
https://www.wetransfer.com/downloads/129ee790d0afbd0f5425cbffc672d31c2014
0127190505/390d4e50a63dcfa951cc6f38673a7a2e20140127190505/88ee53
Step 2) Click 'Save' when the option to 'Run' or 'Save' the .exe file
comes up
Step 3) Find the RA4 executable file (should start with RA4 and
computer files are organized alphabetically so it should be with the
other 'R's) in your 'Downloads' folder
Step 4) Run the file
Step 5) When the program shows you where it will extract the files too
(Should show something like 'C:/users/downloads' or something similar)
there should be 3 dots, click the 3 dots and choose where you want the
files extracted to ('Desktop' is recommended so you can easily find the
files or you can simply extract them right to your USB)
Step 6) Once the files are extracted (Should be SWDL.ISO) put
them onto a blank USB (Make sure the USB does not have any other files,
it is okay if the USB has some space taken up even when no programs are
on it)
Step 7) Take the USB with the programs into the vehicle and plug it into
the USB port in the center console
I will contact you within two business days by telephone to review your
case with you.
Thank you for your time.

My name is Kristin and I am contacting you on behalf of Tom, your case manager, as they are out of the office today. We are trying to determine if the download worked for you at this time. Idf we do not hear from you in the next 2 business days we will go ahead and close out the file assuming all is well. If you still need assistance please contact Tom. You can reach them at 877-855-8400 ext. 4718435 if you have any questions or concerns.
Thank you for your time.
End of Status Update
Begin Customer Message reviewed:
the download fixed the following problems:
* passive door lock fixed;
* disappearing check mark for steerable headlights and other menu items fixed.
* phone service required message fixed.
* channel knob now seems to operate at all times.
the download did not fix the following problems:
* automatic dimming of high beams inoperative. doesn t work AND no message when high beams turned off manually.
* cannot disable the collision avoidance braking. if warning is set to either near or far, and automatic braking is not selected, braking still occurs.
End of Reviewed Customer message

CallerMr Pinto requesting to speak with Case Manager.
transferred to nic LT707
Customer called and said that the dealership has diagnosed that the camera needs to be replaced. Customer said that the dealership informed that the camera is on back order, and customer would like to know how to get the camera expedited. Writer said that writer will be in contact with the service department at the dealership to get the part, and order numbers, and then writer will escalate the case for further review on getting the part. Customer asked how long this takes. Writer said can take as late as Tuesday the 11th day of February 2014 to get an ETA on the part. Customer said not happy, why can t the part be taken off one of the vehicle there on the lot, and put in the customer s vehicle. Writer

said that is not the usual process to get repairs completed. Customer ended the call.
CallerMr [redacted] requesting to speak with Case Manager.

*********Case Escalated to I2R**********
Reviewed Warranty History which determined this case
should be escalated to I2R for case management.
Apologized to customer for the inconvenience, as I can certainly
understand the frustration and concerns. Advised customer that their case
has been forwarded to me for Special Handling to assist with vehicle
repair per the Terms of the Warranty, including Escalated Technical
assistance, parts expediting and Rental authorization if necessary.
Advised customer that I would like to review his case with the Dealer and
will call him back to review a plan of action towards a resolution.
Customer accepted my offer and was appreciative. Advised customer I will
contact their dealers and follow up with them by 2/13
I talked to customer s fiance [redacted] and was told she was too upset
to talk with me because of the previous conversation. I let him the know
that conversation was with another customer care representative and that
I would be handling the case from now on. customer stated he is having
issues with the vehicle slamming the brakes on while driving when no one
is in front of him and it caused him to smash into a median the last
time. Customer stated he has the auto braking sensor on his vehicle but
there were no vehicles around him to cause it to brake. Customer stated
when that happened the vehicle had a flashing brake light on. Customer
stated the vehicle would not restart after this incident until he opened
and closed the door. Customer stated whenever he pushes the memory seat
button to get into the vehicle it locks all of the doors and after the
alarm is set and car is locked it will go off by its self 10-15 minutes
later.
I talked to SA Jay and was told the customer came in shook up and told
him about hitting the median after the vehicle slammed on it s brakes and
hit the median. SA stated he was unable to find anything wrong with the
vehicle and the codes were reset when the customer restarted the vehicle.
SA stated he asked the customer not to restart the vehicle next time but
to have it towed in so they can pull the codes and find out what the
issues is.
I called customer and he stated he would like an appointment for
Wednesday 2/19 at 10:30-11:00 am. I let the customer know I would call
and set up his appointment and call him back to let him know for sure the
day and time. Customer stated he was reading the reviews on his vehicle
and is worried because people are saying Chrysler is not helping them
with the repairs. I let the customer know I would take care of him and
make sure his vehicle was taken care of. I will follow up with customer
this afternoon with an appointment
I called SA Jay and asked him if the customer could bring in the vehicle
Wednesday at 1030 am. I asked him to open a STAR case and set up a rental
for the customer and I would take care of it. SA stated he would take
care of the customer.
I LVM for customer letting him know I was able to set up the appointment
he requested and set up a rental vehicle. I let the customer know if he
could not make it to the appointment to call me so I can change the
appointment and reset up his rental. I left my contact info and will
follow up with customer 2/18 to remind him of his wed 2/19 1030 am
appointment
Customer LVM asking me to call him back. I called customer back and he
stated his vehicle is still braking by itself and the vehicle would not
shift gears. Customer stated he had to pull over and open and close the
door for it to start. Customer stated at this point he does not want this
vehicle back because he is scared to drive it. I let the customer know I
would contact SA and request customer to bring the vehicle in today and
get a rental. I let the customer know he can have a tow truck take the
vehicle and him in because it is covered under his warranty. Customer
stated he wants his rental to be a truck or jeep with 4 wheel drive.
I tried to contact Bayside CDJ and got a VM. I will call SA 2/18 to set
up an appointment and rental vehicle for customer.
I called customer and let him know the service department is closed for
the night but I would contact the dealership tomorrow afternoon and call
him after talking with SA.
I called and talked to SA Jay and asked if customer could bring in his

vehicle tonight and he stated he would not have a rental vehicle until tomorrow and he could bring it in tomorrow morning. I let him know I would ask the customer to bring it in tomorrow.
I called customer and let him know SA stated there were no rental vehicles but he could bring it in tomorrow. Customer stated that was fine and he would call me if he had any issues. I will follow up with SA 2/20 to see if vehicle was dropped off
Customer called in stating he was at the dealership and they were not offering him the truck he needed because of the ice in his area. He handed the phone to SA Jay and I was told he would have given the customer a truck if he had known he had needed. I let SA know he sounded in a hurry to get me off of the phone when I spoke to him last and I did not get a chance to ask him. SA became argumentative with me. I asked him if the truck the customer was asking for was going to cost more and he told me it would not cost any more. I asked him to give the customer the truck. I will follow up with customer later this afternoon to make sure he received the truck he requested.
I talked to SA Jay and asked him if he could get the customer a truck today. SA stated the rate would be $60 a day and I let him know that was a little high and I would call enterprise and see if I could get them a cheaper rate with Chrysler. SA stated he would call enterprise and would call me back with the rate that was offered to him.
I talked to SA Jay at Bayside CJD and was told the customer was put on a list to call as soon as a SUV was available and took the regular rental vehicle since there is no snow in the forecast for the next few days. SA stated customer gave SM permission to drive the vehicle and he is driving it to and from home to verify the issue. SA stated they will be getting STAR involved as well. SA stated he would be in touch and update me as soon as he had an update. I will follow up with SA and customer 2/24 If I had not heard from him by then.
I called SA and was told he just got off the phone with customer and let him know he got him a 4 wheel drive vehicle and he could come pick it up today. SA does not have an update on repairs and when asked if he opened a STAR case I was told he had not yet but will open one. I thanked him for the info and will follow up with him 2/25 for an update
I LVM for customer letting him know that I talked to SA Jay and was told he would be given a 4 wheel drive vehicle today and they were still working on a diagnosis on his vehicle. I let customer know I would contact SA and him with an update on 2/25
Customer LVM stating he is sitting at the dealership and wanted me to call back and speak with him asap.
SA Jay called stating they are unable to duplicate the concern on vehicle but a STAR case [redacted] was opened to assist with repairs. SA stated customer has a video of the vehicle having the issue. SA stated the customer and his wife are scared to drive this vehicle.
LVM for SA Jay at Bayside CJD asking him to return my call. I left my contact info
I tried to call customer back but got a recording stating the customer was not taking calls at this time and had no option to LVM.
I tried to call SA and get an update on the customer s repairs but was told he had left for the day and she would not be able to give me info. I will try to reach SA and customer tomorrow 2/27
I LVM for SA Jay to call me back. If I don t hear from him by 2/28 I will call back.
I LVM for customer asking him to return my call. I left my contact info
Customer LVM asking me to return his call in the afternoon. I will follow up with customer.
I received a VM from SA Jay asking for a call back. I will call him back today
I talked to SA Jay at Bayside CJD and was told the customer picked up his vehicle on 2/24 and they were unable to duplicate the issue. I asked for RO info and SA stated he was not near a computer. I asked him to fax the RO to me when he got a chance so I could put it into the case. SA agreed to fax me the RO. SA stated he had another customer come in with the same issues but they were able to pull codes off of the vehicle and they fixed the issue by recalabrating the break sensor eye with a lazer and fixed

the issue. SA stated he would not be able to do this work on the customer s vehicle unless he got an approval from STAR first. I let SA know if the customer brings the vehicle back in I would open a TAPS case and they could assist with the repair.
I LVM for customer to return my call and let me know how his vehicle is running after taking it back from the service department. I left my contact info. I will follow up with customer 3/3
I LVM for customer to return my call and let me know how the vehicle is doing after picking it up from the dealership. I will follow up with customer 3/7
Ms Triose called in stating she went to stop her vehicle and it took a long time to stop. Customer also stated her vehicle is flashing a call 911 code. I let her know I would contact SA Jay and let him know she needs a tow truck to pick up her vehicle and a rental vehicle. Customer requested a rear wheel or four wheel drive rental. I let her know I would have SA Jay call her and if he did not call her within 3 hours to call me and let me know.
I talked to SA Jay and was told to have the customer bring the vehicle in for service. I let him know the customer was uncomfortable driving the vehicle and he told me to have the customer call road side assistance. I let him know I would do that and asked for a rental. SA stated he would set up the rental when they got there.
I called customer and LVM for her stating SA Jay said she would need to call tow assistance and set up the tow and if she had any issues to call SA Jay. I let the customer know that he would set up a rental when she brought it in. I will contact SA and customer on 3/10 for an update on the vehicle.
Mr [redacted] customer called in stating he wanted to make sure I got the whole story on his vehicle. Customer stated last time the repair was done at Bayside CJD he was told by SA Jay that some brake codes came up on the vehicle but they had reset the brake codes and test drove the vehicle and the codes did not come back up so he reset the brake codes. I let the customer know that I was told NTF by SA Jay and customer stated he is being told two different stories. I tried to conference in SA to verify the info but he was unavailable. The customer stated he wants a replacement and I asked him to take it in for diagnosis and then I can review his case. Customer stated he did not want to have to take it in on the weekend because it is his day off. I let him know he could have it towed in and they could get him a rental. Customer told me he would call SA and call me back. If I don t hear back from him before 3/10 I will call SA and him back.
I LVM for SA Jay at Bayside CJD asking him to return my call and let me know if the customer came back in or called about his vehicle. If I don t hear back from him by 3/12 I will call back then.
I LVM for customer to return my call and let me know if he set up an appointment to take his vehicle back in for repair. If I don t hear back from him I will follow up with him on 3/12
I LVM for customer to return my call and let me know if he set up an appointment to take his vehicle back in for repair. If I don t hear back from him I will follow up with him and SA on 3/14
I talked to SA Jay at Bayside CDJ and asked if the customer had brought the vehicle back in for service or made an appointment. SA stated customer has not made an appointment for called about the vehicle. I asked him to have the customer call me if he brought the vehicle back in.
I LVM for customer asking him to return my call by end of today or I will be closing out his case until he is able to take the vehicle in for repair. *****Follow-up close case 3/17 if no voicemail or call from customer.

Product - Electrical - uConnect Cellular System - Other - Default	Customer is seeking Lemon Law
Product - Electrical - Electronic Vehicle Security - Other - Default	Issue with Front Crash Warning system

Briefly summarize why the customer is contacting Chrysler: Caller contacting Chrysler seeking her vehicle to be bought back. Caller states she is scared for her life to drive the vehicle now. Caller states she will not drive this vehicle again. Caller states that at first she kept having issues with Radio 5 times. Now the concern is for braking. Caller states that the vehicle locked up while she was driving 70mph. Caller states vehicle is at the DLR. Agent spoke with Shawn in service who advised that the customer brought the vehicle because it had randomly slammed on the brakes as if there was a vehicle in front of hers. SA Shawn had advised that the tech found a loose connector wrapped around brake and wiring harness under dash was loose. Also there is a code stored for the Front Sensor being blinded.

***Deborah with the I2R Customer Resolution Team is responsible for this CAIR. If the customer should call, please direct them to contact Deborah at 888-542-7239, extension 2123. Thank you. ***
-Called customer to complete initial contact but customer was not able to

speak at this time. Agreed to send customer an email to provide my contact information for a call back. Corrected email address for customer from [redacted]t to [redacted].
Status update provided via email to the following email address:
g[redacted]
Your case has been sent to my office for Special Handling. Please contact Deborah at 888-542-7239 x2123 when you are able to discuss your current vehicle concerns.
End of Status Update
-LVM for customer, including my contact information, and requested a call back to discuss current vehicle concern.
-Received voice message from customer, customer requested a call back.
-Called customer at [redacted] and introduced myself as her CM. Advised customer case has been sent to me for Special Handling. Customer said she has concern with the vehicle braking sensor. Customer said the vehicle is at Whitten Brothers of Ashland at this time and customer said vehicle has been repaired but she is afraid to drive it. Told customer that I will contact Whitten Brothers of Ashland and request a Star Case opened to offer recommendations or to confirm vehicle repaired. Customer said she is using a loaner vehicle since 01/17 and that she has spoken to GSM Zac and the DM. Verified the mileage on the vehicle to be approximately 7,000. Told customer that I am here as her advocate and want to assist with the case resolution. Customer said she will not pick up the vehicle. Told customer that as her CM, I have the authority to offer a final decision on her case including possible trade assistance. Advised that I will contact Whitten Brothers of Ashland and determine how I can better assist and that I will call her back within 2 days to review a plan of action toward a resolution.
-LVM for SA Shawn with Whitten Brothers of Ashland, included my contact information and requested SA Shawn to call back to confirm STAR case opened.
-Received call from SA Shawn with Whitten Brothers and SA Shawn confirmed vehicle has been repaired. Told SA Shawn that we will still want a STAR case opened to show recommendations for repair.
-Received call from SA Shawn who said they did open a STAR case while vehicle was being repaired. SA Shawn provided me with STAR case 628374.
-Reviewed CAIR and confirmed a STAR case was opened on today
-Called customer and told her that the vehicle repairs are in progress and that I have confirmed that SA Shawn with Whitten Brothers has opened a STAR case to receive recommendations for repair. Customer said will not be picking up the vehicle after it is repaired. Told customer that we want to know from her perspective how vehicle is performing after it is repaired. Customer said that the dealership can drive it after it is repaired. Told customer our priority is to ensure the vehicle is repaired for her but that I have the authority to review for a final decision if necessary.
-Called Whitten Brothers and spoke with SA Shawn who said they received recommendations through STAR and were told to release vehicle back to the customer since they are unable to duplicate the concern with random braking and there were no stored codes. SA Shawn said the customer refused a rental so they allowed her to use a loaner vehicle but that she has been in the loaner since 01/20.
-Called customer and explained to her that the diagnosis has been completed and that I have confirmed that STAR was involved with the diagnosis. Customer refuses to pick up vehicle and customer said the diagnosis is incorrect. Told customer at this time, we will request that she pick up her vehicle and return the loaner vehicle to Whitten Brothers.
-Called Whitten Brothers of Ashland and spoke with SA Shawn who said the customer has still not picked up her vehicle yet.
Sent email to customer requesting that she pick up her vehicle today. Also advising that no further action will be taken on the case at this time.
Status update provided via email to the following email address:
[redacted]
Your vehicle diagnosis has been confirmed as unable to duplicate. Please

make arrangements to pick up your vehicle. Since no repairs were made, we will take no further action at this time.
End of Status Update

Reviewed Warranty History which determined this case should be escalated to I2R for case management.
Customer stating that the number to call him back on is [redacted] and not the numbers listed on lines 13 and 14.
Agent referred to AC#17118 and mentioned that due to the heightened sense of awareness and sensitivity related to your concern, we have escalated your case to a more appropriate area for review and that they will be contacted soon regarding their escalated case and that the agent has

noted new contact number which is [redacted]
Customer called for an update. Agent advised 1 to 2 business day timeframe. Customer thanked agent.
Customer called back once again for information on her file. Customer was informed that the information on file needed to be reviewed and that she would get a call back within 1-2 business days.
Caller was Trampas Pierce who also drives the vehicle.
The I2R Customer Resolution Team is now responsible for the CAIR. If the customer should call, please advise them to contact their I2R Coordinator Jaime at 1-888-542-7239, extension 2155. Thank you in advance
Called the customer on his home contact number and she advised that currently the vehicle is at the dealership for service as of 02/14/14. I apologized to customer for the inconvenience, as I can certainly understand their frustrations and concerns. I advised the customer that their case has been forwarded to me for special handling. The customer advised that he almost had and accident with vehicle because the unit would not brake. The customer advised that she has been speaking with Doreen with the Customer Relations department at the dealership to try to get him into another vehicle. The customer advised that at this point he no longer wants to drive the vehicle. I advised the customer that I would like to review his/her case with the dealership, and will call them back to review a plan of action towards a resolution. Customer has accepted my offer and was appreciative. Advised customer I will contact their dealers and follow up with him later in the week.

- Called Bergeron CDJ and spoke with the handling service advisor Rick who advised me that the vehicle is at the dealership for service and that the instrument cluster is completely gone. I questioned if there were any aftermarket items in or on the vehicle and he advised that he did not think so. Rick stated that the vehicle was driven for four months by the Mr. Bergeron the owner of the dealership and he never had any concerns or issues with the unit. I advised that the customer wanted to trade out of the vehicle and Rick stated that he is trying to move from a Summit to an SRT and that is a big jump. I advised that I would possibly be able to assist but if the customer is adamant about an SRT then I will not be able to assist him. I was able to update the repair history and advised that I appreciated the update

CAIR ESCALATION UPDATE
SEE STAR CASE# 60979866 FOR INFORMATION
Called the customer on his home contact number and I advised that the dealership has repaired the vehicle with the assistance of my TAPS tech. I advised to the customer that the dealership is requesting that he test drive the vehicle with the service manager before taking the unit with him. The customer advised that he tried to trade the vehicle in yesterday

but they were going to be upside down by $10k. I advised to the customer that I would like for him to take possession of the vehicle and give it a chance. I advised to the customer that I would like to follow up with him later this week to see how the vehicle is doing. The customer stated that he will give it this one opportunity and I advised that I appreciated it.
Received a call from the customer and he advised that he is extremely unhappy because he is sitting in his vehicle and the unit will not start. The customer advised that he is sitting in front of his boss home and the vehicle is giving him an error message Service Required, and Blind spot unavailable. I advised to the customer that I was very sorry for the inconvenience and to please have the dealership give me a call once they are there to pick up the vehicle. The customer advised that at this point he wants the vehicle replaced.
Vehicle is at the dealership - BERGERON CHRYSLER DODGE JEEP RAM (63509)
Update triggered by S45518C
Called the customer on his home contact number and he advised that the dealership did pick up the vehicle and him and that they are both at the dealership at this time. I was able to speak with Doreen who advised that Enterprise did not have any vehicles that the customer would accept so they are putting him in a loaner vehicle from the dealership. I advised that I understood completely and that I will follow up with the service manager once they have had a chance to diagnose the no start concern.

SA Diane calls to speak with their Customer Advocate.
Transferred the customer to CR913 at ext 66039.
Diane/SA calling to get approval on TSB. Writer advised dealer needs to wait for contact from TS before proceeding.
Dealer (SA) Diane calls to speak with their Case Manager.
Transferred the customer to PR708 at ext 66314.
Writer took call from SM. SM states that there is a flash update TSB to resolve the concern. Writer advised that TS needs to authorize TSB. SM states that she can offer the customer a rental but he will not be happy with the fee of $5.00 a day. Writer advised that SM can advise that ECS will reimburse customer the extra cost of the fee. SM will offer customer rental.
Customer left message requesting call back.
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted] Customer states he was told its a 15 minute repair but they didn t get authorization. Customer states that the issue is ongoing and he live an hour away from the dealership. Writer explained ECS. Customer states he will not be back in New Jersey until Thursday. Writer advised that rental will be provided until Thursday. Customer requests follow up on repairs once available.
Writer attempted to contact SM, left on hold for several minutes. Unable to reach SM or leave a message.

Writer contacted customer at [redacted]. Message left.
Begin Customer Message reviewed:
I also left a voice mail. First thanks for your follow up call, however I got my car back today and within 2 or 3 miles I had the same problem with the forward collision warning light come. on. Needless to say i am VERY upset that this car has been back a few times and it is not fixed. I had other problems when the car had only 500 miles on it that took months to get fixed. I am beginning to think this car is a lemon...
Please call me on my cell [redacted] to discuss.
End of Reviewed Customer message
[redacted] called requesting to speak to CA PR708 .Writer advised customer that CA PR708 is not currently available. Customer does not want to leave a voicemail. Writer advised will notate case for a callback to customer.
Begin Customer Message reviewed:
Please call. 6[redacted]
Case #: [redacted]
VIN: 1C4RJFCT4EC[redacted]
[redacted]
End of Reviewed Customer message
Writer attempted to contact SA, service department is closed.
Writer contacted customer at [redacted]. Message left.
Mr. Charles Epstein called to speak with a Supervisor, not a Customer Advocate. Writer asked the reason and as customer provided explanation, customer s phone dropped the call. Customer states that around 9 AM Thursday 2/20/14 the vehicle was returned to customer after repair, but the issue happened again very soon after leaving the dealership. Customer took the vehicle back to the dealer the same day. At this time, the customer s call dropped from the line. Writer did not have an opportunity to verify customer s contact information or search for an available Supervisor to take the call.
Customer called back in and writer took call and transferred call over to NIC TP405.
***** Supervisor Call ******

Writer took call from customer who feels that his CA is not keeping in contact with him. Writer confirmed phone number for customer to be contacted on as same as given. Customer would like to be called around 11 am his time. Would like CA to find out if dealership can provide him a similar type rental as there are storms expected. The vehicle is experiencing the same concens with the adaptive cruise control shutting itself off; and the forward crash warning is flashing on the dash. Customer expects a resolution or will need to file Lemon law.
Writer contacted customer. Writer inquired what day and time would be best for customer to get back into the dealership. Customer states he will be in New Jersey tomorrow and Thursday. Customer states he also spoke to SA Diane and she is trying to schedule an appointment and arrange a like rental. Writer to follow up with SA and make sure customer is contacted with appointment information.
Writer attempted to contact SA, left on hold for 8 minutes, call disconnected.
Writer contacted SA. SA confirms that she is aware of the concerns. SA states that customer is able to come in any time but will not drop the vehicle off until they have a Jeep available for rental. SA confirms that customer is aware that she will contact him when they do have a Jeep for him.
Customer left message stating that SM advise to him that ECS would not authorize a different brand rental.
Writer contacted SA Diane. Writer advised that ECS will authorize a diffrent brand vehicle. SA states that Enterprise won t take $20.00 a day for rental of another brand. Writer advised that writer can authorize up to $40.00 a day. Writer advised that if there was an issue with the RA a direct check could be sent. SA confirmed with Enterprise that they will provide the AWD for $40.00 a day. SA to set up rental for customer.
Writer contacted customer. Customer confirms that he is in a rental. Customer inquired if vehicle would be done today as he lives an hour away. Writer advised to keep rental as repairs will most likely not be completed today. Wrirter to follow up later if there is repair information.

***** EMAIL BRIEF DESCRIPTION CONTENT *****
2104 Grand Cherokee Overland
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
Comments:
I bought this car from a Jeep dealer with 5000 miles on it (certified and owned by an employee). It has been nothing but problems so far. In addition, they don t seem to know the answers to several things.
Is FCW only supposed to work with ACC on?
I tried to get it to work, but couldn t. Then it worked once with ACC on and not when off. Then one day it worked with ACC off.
Is there any type of criteria you can share about when it is supposed to activate?
What mode, how far from obstacle?
Secondly, when using paddle shifters from D mode, the manual says, it should revert to auto (D) if I accelerate hard. Mine doesn t do that and the dealer says once you use paddle shifters you must put back in to auto mode on your own. When I told them what the manual says, they shrugged.
3/14/14 Q1. According to available information, FCW is not only supposed to work with ACC on.
The customer should refer to the Owner s Manual for detailed information about their vehicle. The Owner s Manual can be viewed online at:
www.jeep.com/en/owners/manuals/
FORWARD COLLISION WARNING (FCW) WITH MITIGATION IF EQUIPPED
Forward Collision Warning (FCW) With Mitigation Operation
The Forward Collision Warning (FCW) system with mitigation provides the driver with audible warnings, visual warnings (within the EVIC), and may apply a brake jerk to warn the driver when it detects a potential frontal collision. The warnings and limited braking are intended to provide the driver with enough time to react, avoid or mitigate the potential collision.

NOTE: FCW monitors the information from the forward looking sensors as well as the Electronic Brake Controller (EBC), to calculate the probability of a forward collision. When the system determines that a forward collision is probable, the driver will be provided with audible and visual warnings and may provide a brake jerk warning. If the driver does not take action based upon these progressive warnings, then the system will provide a limited level of active braking to help slow the vehicle and mitigate the potential forward collision. If the driver reacts to the warnings by braking and the system determines that the driver intends to avoid the collision by braking but has not applied sufficient brake force, the system will compensate and provide additional brake force as required.

When the system determines a collision with the vehicle in front of you is no longer probable, the warning message will be deactivated.

NOTE:

The minimum speed for FCW activation is 5 mph (10 km/h).

The FCW alerts may be triggered on objects other than vehicles such as guard rails or sign posts based on the course prediction. This is expected and is a part of normal FCW activation and functionality.

It is unsafe to test the FCW system. To prevent such misuse of the system, after four Active Braking events within a key cycle, the Active Braking portion of FCW will be deactivated until the next key cycle.

The FCW system is intended for on-road use only. If the vehicle is taken off-road, the FCW system should be deactivated to prevent unnecessary warnings to the surroundings. If the vehicle enters 4WD Low Range, the FCW system will be automatically deactivated.

WARNING!

Forward Collision Warning (FCW) is not intended to avoid a collision on its own, nor can FCW detect every type of potential collision. The driver has the responsibility to avoid a collision by controlling the vehicle via braking and steering. Failure to follow this warning could lead to serious injury or death.

Turning FCW ON Or OFF

NOTE: The default status of FCW is On , this allows the system to warn you of a possible collision with the vehicle in front of you.

The forward collision button is located on the switch panel below the Uconnect display.

To turn the FCW system OFF, press the forward collision button once to turn the system OFF (led turns on).

To turn the FCW system back ON, press the forward collision button again to turn the system ON (led turns off).

Changing the FCW status to Off prevents the system from warning you of a possible collision with the vehicle in front of you.

Changing the Active Braking status to Off prevents the system from providing limited autonomous braking, or additional brake support if the driver is not braking adequately in the event of a potential frontal collision.

NOTE: The FCW system state is kept in memory from one key cycle to the next. If the system is turned OFF, it will remain off when the vehicle is restarted.

Changing FCW And Active Braking Status

The FCW Sensitivity And Active Braking Settings are programmable through the Uconnect System. Refer to Uconnect Settings in Understanding Your Instrument

Panel for further information.
The default status of FCW is the Far setting and the Active Braking is the On setting, this allows the system to warn you of a possible collision with the vehicle in front of you when you are farther away and it applies limited braking. This gives you the most reaction time to avoid a possible collision.
Changing the FCW status to the Near setting, allows the system to warn you of a possible collision with the vehicle in front of you when you are much closer. This setting provides less reaction time than the Far setting, which allows for a more dynamic driving experience.
NOTE:
The system will retain the last setting selected by the driver after ignition shut down.
FCW may not react to irrelevant objects such as overhead objects, ground reflections, objects not in the path of the car, stationary objects that are far away, oncoming traffic, or leading vehicles with the same or higher rate of speed.
FCW will be disabled like ACC, with the unavailable screens.
FCW Limited Warning
If the system turns off, and the EVIC displays ACC/ FCW Limited Functionality or ACC/FCW Limited Functionality Clean Front Windshield momentarily, there may be a condition that limits FCW functionality. Although the vehicle is still drivable under normal conditions, the active braking may not be fully available. Once the condition that limited the system performance is no longer present, the system will return to its full performance state. If the problem persists, see your authorized dealer.
Service FCW Warning
If the system turns off, and the EVIC displays:
ACC/FCW Unavailable Service Required
Cruise/FCW Unavailable Service Required
This indicates there is an internal system fault. Although the vehicle is still drivable under normal conditions, have the system checked by an authorized dealer.
***
Q2. According to available information, if the customer were to accelerate hard, while in paddle shift mode, the vehicle will not exit paddle shift mode and revert back to Drive (D).
***
Reassigned file back to ALM30 for proper handling.
Dear T[redacted]
Thank you for contacting the Jeep Customer Assistance Center.
The Forward Collision Warning (FCW) system with mitigation provides the driver with audible warnings, visual warnings (within the EVIC), and may apply a brake jerk to warn the driver when it detects a potential frontal collision. The warnings and limited braking are intended to provide the driver with enough time to react, avoid or mitigate the potential collision.
FCW monitors the information from the forward looking sensors as well as the Electronic Brake Controller (EBC), to calculate the probability of a forward collision.
When the system determines that a forward collision is probable, the driver will be provided with audible and visual warnings and may provide a brake jerk warning.
If the driver does not take action based upon these progressive warnings, then the system will provide a limited level of active braking to help slow the vehicle and mitigate the potential forward collision. If the driver reacts to the warnings by braking and the system determines that the driver intends to avoid the collision by braking but has not applied sufficient brake force, the system will compensate and provide additional

brake force as required.
When the system determines a collision with the vehicle in front of you is no longer probable, the warning message will be deactivated.
The minimum speed for FCW activation is 5 mph. The FCW alerts may be triggered on objects other than vehicles such as guard rails or sign posts based on the course prediction. This is expected and is a part of normal FCW activation and functionality.
It is unsafe to test the FCW system. To prevent such misuse of the system, after four Active Braking events within a key cycle, the Active Braking portion of FCW will be deactivated until the next key cycle.
The FCW system is intended for on-road use only. If the vehicle is taken off-road, the FCW system should be deactivated to prevent unnecessary warnings to the surroundings. If the vehicle enters 4WD Low Range, the FCW system will be automatically deactivated.
Forward Collision Warning (FCW) is not intended to avoid a collision on its own, nor can FCW detect every type of potential collision. The driver has the responsibility to avoid a collision by controlling the vehicle via braking and steering. Failure to follow this warning could lead to serious injury or death.
The default status of FCW is On , this allows the system to warn you of a possible collision with the vehicle in front of you.
The forward collision button is located on the switch panel below the Uconnect display. To turn the FCW system OFF, press the forward collision button once to turn the system OFF (led turns on).
To turn the FCW system back ON, press the forward collision button again to turn the system ON (led turns off).
Changing the FCW status to Off prevents the system from warning you of a possible collision with the vehicle in front of you.
Changing the Active Braking status to Off prevents the system from providing limited autonomous braking, or additional brake support if the driver is not braking adequately in the event of a potential frontal collision.
The FCW system state is kept in memory from one key cycle to the next. If the system is turned OFF, it will remain off when the vehicle is restarted.
The FCW Sensitivity And Active Braking Settings are programmable through the Uconnect System.
The default status of FCW is the Far setting and the Active Braking is the On setting, this allows the system to warn you of a possible collision with the vehicle in front of you when you are farther away and it applies limited braking. This gives you the most reaction time to avoid a possible collision.
Changing the FCW status to the Near setting, allows the system to warn you of a possible collision with the
vehicle in front of you when you are much closer. This setting provides less reaction time than the Far setting,
which allows for a more dynamic driving experience.
The system will retain the last setting selected by the driver after ignition shut down.
FCW may not react to irrelevant objects such as overhead objects, ground reflections, objects not in the path of the car, stationary objects that are far away, oncoming traffic, or leading vehicles with the same or higher rate of speed.
FCW will be disabled like ACC, with the unavailable screens.
If the system turns off, and the EVIC displays ACC/FCW Limited Functionality or ACC/FCW Limited Functionality Clean Front Windshield momentarily, there may be a condition that limits FCW functionality. Although the vehicle is still drivable under normal conditions, the active braking may not be fully available.
Once the condition that limited the system performance is no longer present, the system will return to its full performance state.
If the FCW system turns off, and the EVIC displays: 'ACC/FCW Unavailable Service Required' or 'Cruise/FCW Unavailable' Service Required; This indicates there is an internal system fault. Although the vehicle is still drivable under normal conditions, have the system checked by an authorized dealer.

Regarding your paddle shifter question, according to available information, if the driver were to accelerate hard while in paddle shift mode, the vehicle will not exit paddle shift mode and revert back to Drive (D) as the system 'thinks' that operator is intending to continue to use of paddle mode shifting.
We hope this information helps you better understand the features of your vehicle. For details on how to operate and maintain your vehicle, please refer to the vehicle owner s manual. You can view, download and print Owner Manuals, Warranty Booklets, and Maintenance Schedules by visiting the Jeep brand website at http://www.jeep.com/en/owners/manuals/
Owner s Manuals have been prepared with the assistance of service and engineering specialists to tell you about specific vehicles. Included are: starting, operating, emergency and maintenance procedures, specifications, capabilities and safety tips.
Thanks again for your email.

Corporate - Survey By-Pass - No Diagnosis - Default - Default	

Briefly summarize why the customer is contacting Chrysler: Customer is having an issue with his front collision warning system in his new vehicle. Had about 2 months, issue cannot get resolved. One thing the customer cannot get working is the front end collision warning system. Dealership has lack of knowledge about his vehicle (sales and service). Customer and agent looked in owners manual to see if we could get this working but no luck. Agent offered to call dealership but customer stated that he would go in and speak with them about this.
Agent advised that if dealership cannot get this working to please give us a call back and we will assist in this matter further.
Customer thanked agent for the help and information.
Briefly summarize what the customer is expecting: to get his front end collision warning system working properly.

CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted]. Line does not ring, it is a fast disconnect signal. CA attempted twice.
Per COIN [redacted]
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted]
Writer received an inbound call from the customer requesting to speak with CM CR913 writer transferred the customer to CM CR913 ext 66039.
CAIR has been sent back because of the following reason:
Rejected per CA request
Call received from Mr. Fortner. CA advised of ECS program/process. Customer states his vehicle is back with him and the dealer is waiting for parts to come in. CA advised will contact dealer and will update customer once parts arrive.
Writer received call from SM Dwight. SM stated he would like to know when customer vehicle had restriction H placed on vehicle. Writer informed SM that restriction shows to have been put on 12/07/13. Writer asked SM if writer could help with anything, SM stated no and disconnected call.
Attempt made to contact Chris/SA & Dwight/SM. No answer and unable to leave a message.
Attempt made to contact Chris/SA. Left message advising case not escalated to TS due to vehicle not being at the dealer. Requested a call back from Chris/SA or Dwight/SM.
Writer received call from SM Dwight. SM stated he was trying to reach CA. Writer transfered SM over to EXT 66039.
Call received from Dwight/SM. CA confirmed we need the accurate vehicle information/status. Dwight/SM advised that flash updates were performed on vehicle. Dealer did diagnose all other concerns.
1) Rattle in front end when slowing down and turning.Customer drove with TECH and was unable to duplicate. Dealer inspected for loose parts. NPF.
2) Adaptive speed control going beyond set speed. Speedometer calibrated and tire pressure adjusted. Speedometer will remain a few MPH off, as the customer has larger tires on the vehicle.
3) Adaptive cruise alerts customer to brake when there is nothing in front of vehicle. This happened only after a car wash. Dealer inspected and could not duplicate issue. Possible guess of a thin layer of ice over the sensor after car wash.
4) Navigation not recognizing destinations. NPF.
5) After recent Uconnect software update, there are duplicate listings for the same contact. Normal operation.
6) Rear washer fluid barely comes out. Dealer found line pinched. Ordered new washer nozzle and trim panel. Parts are currently at dealership; customer will be contacted to bring vehicle in.
7) When turning and accelerating, vehicle intermittently will not upshift, and has to be shifting into neutral and back to shift. Could not duplicate issue.
CA advised ECS needs to be contacted once vehicle is at the dealer for the repair approval process.
Writer took call from SA Chris and normal CA CR913 is available and so writer transfered call to CR913
Call received from Chris/SA who stated the vehicle came back in today and repairs for the washer nozzle have been done. CA inquired why ECS was not contacted, again, after SM was notified we needed to be involved.
Chris/SA there is another repair that is needed, the washer fluid line needs to be replaced. CA advised if ECS is not contacted when vehicle comes back in, no repairs will be approved. Parts being ordered.
Attempt made to contact Chris/SA. Left message.
Voicemail received from Chris/SA advising parts should be in today and

inquiring what to do next.
2nd attempt made to contact Chris/SA. Left message.
3rd attempt made to contact Chris/SA. Left message.
62082 s Service Advisor Chris called to speak with CR913. Writer transferred call to x66039.
Call received from Chris/SA advising it is likely the customer was contacted about part arrival. Customer is not scheduled for repairs. Chris/SA states the final repair of the washer fluid line has not been done as of yet. CA reminded Chris/SA, again, that ECS needs to be contacted once the vehicle arrives for repair approval.
Attempt made to contact Mr. [redacted]. Left message advising customer needs to schedule an appointment for repair.
Writer called [redacted] seeking to confirm if appointment was scheduled.
Writer [redacted] left message
3rd attempt made to contact customer @ [redacted] Left message.
CLOSED LOOP UPDATE - no need for additional follow-up.
[redacted] called to speak with their Case Manager. Transferred the customer to CM CR913 at ext 66039 VM.
Voicemail reeived from Mr. [redacted] requesting a call back. Attempt made to contact customer. Left message.

Corporate - Rental Vehicle - Default - Default - Default	Customer is having rental issues
Product - Cooling System - Radiator - Other - Default	Radiator on back order for 3 weeks.
Corporate - Enhanced Customer Satisfaction Program (ECS) - Default - Default - Default	

Briefly summarize why the customer is contacting Chrysler: Customer states vehicle was taken to dealership that it was determined he would need a new radiator. Customer states that the dealer has a contract with enterprise and customer was required to take a Chrysler brand vehicle and he was provided a Jeep wrangler. Customer states that the wrangler had electrical malfunctions such as the brake lights did not work nor did the signal lights. Customer states that his vehicle will be down for 3 weeks because of back ordered radiator and is at enterprise at time of call and there are no Chrysler vehicles on the lot to provide to customer and customer wants to know if a rental could be provided for this. Customer states he would wait for a call back within 1 business day.
Briefly summarize what the customer is expecting: Customer is expecting replacement rental.
Agent advised customer that concern would be looked into. Agent finds that customer is in the ECS program and referenced AC Doc 22276 out lining a rental would be provided and also verified with team leader scott who advised to say yes and to escalate to ECS. Agent advised customer to obtain a working vehicle and that his concerns would be sent to enhanced customer satisfaction and an agent from that department would look to reach him in 1 business day.
REQUEST FOR SPECIAL HANDLING
NIC of TL consulted: Team Leader Scott
Reason for special handling request: Customers Chrysler brand enterprise rental experienced electrical problem and he needed to swap out for a non chrysler brand product.
Current location of the vehicle: Customers vehicle is at Hawk 45126 and

needs a new radiator and will be down for 3 weeks due to part not being available.

Forward collision warning system
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
I took delivery of a new 2014 Jeep Grand Cherokee Limited last August. Initially the FCWS worked fine. However, it has not since early fall. My local dealer tried on three separate occasions to find the problem, and has consulted by phone and email with Chrysler engineers with no success. Has any progress been made on this problem? (It seems particularly odd sice the Adaptive Cruise Control works fine.)

***** EMAIL BRIEF DESCRIPTION CONTENT *****
Forward Collision Warning
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
I took my new vehicle for servicing last week as the Forward Collision control system doesn t appear to be working properly, nor has it ever since purchasing the vehicle. The warning system has only sounded a couple of times and at times that it does not seem at all appropriate. Other times, no warning or crash mitigation has occurred in situations where I assumed it would clearly be activated. At one time, a warning light appeared on the display about the FC system not working and needing service. Bob Baker Service was absolutely no help and did not offer an knowledge of the system. They said that their computers showed no error codes, but yet nobody was available when asked to demonstrate to me how it works. The only option they offered was that their service tech could drive it home overnight and put about 85 miles on the car - absurd. Can you please help me resolve this issue? I suspect given a comment the service technician made to me in picking up the vehicle too that they had no interest in helping on the issue because the vehicle was purchased from Huntington Beach. I am very frustrated. Thank you.
***** END OF CUSTOMER EMAIL *****
OUTBOUND CONTACT:
Writer contacted BOB BAKER CHRYSLER JEEP DODGE 26550 Service Cashier Eva. No service advisors were available. Eva left a message for the service writer to follow up with CAC to confirm diagnosis steps and next steps for resolution.
OUTBOUND [redacted].
Lisa feels that 26550 does not wish to fully assist her with this concern as she states they made a snarky comment regarding vehicles from her

selling dealership.
Customer reports that her adaptive cruise control is working, but she feels that her Forward Collision Warning is not working.
Customer reports that she has had the BRAKE warning one or twice but not often and seemingly in error.
Writer reviewed Forward Collision Warning system systems on page 219 and 222 of the owners manual. Customer thinks it is possible that the settings have been altered. Customer will go through the settings and test drive the vehicle to confirm concerns.
Writer offered to send the full owners manual, customer accepted. Writer advised to allow 7-10 business days for delivery.
Dear Lisa:
Thank you for contacting the Jeep Assistance Center.
We appreciate the time and effort you took to tell us of your dissatisfaction in your 2014 Jeep Grand Cherokee. We appreciate you taking our call today.
As discussed, we would like for you to review the Forward Collision Warning settings in your vehicle. Please find the full details below:
Turning FCW ON Or OFF
NOTE: The default status of FCW is On , this allows the system to warn you of a possible collision with the vehicle in front of you.
The forward collision button is located on the switch panel below the Uconnect display.
To turn the FCW system OFF, press the forward collision button once to turn the system OFF (led turns on).
To turn the FCW system back ON, press the forward collision button again to turn the system ON (led turns off).
Changing the FCW status to Off prevents the system from warning you of a possible collision with the vehicle in front of you.
Changing the Active Braking status to Off prevents the system from providing limited autonomous braking, or additional brake support if the driver is not braking adequately in the event of a potential frontal collision.
NOTE: The FCW system state is kept in memory from one key cycle to the next. If the system is turned OFF, it
will remain off when the vehicle is restarted.
Changing FCW And Active Braking Status
The FCW Sensitivity And Active Braking Settings are programmable through the Uconnect System. Refer to Uconnect Settings in Understanding Your Instrument Panel for further information.
The default status of FCW is the Far setting and the Active Braking is the On setting, this allows the system
to warn you of a possible collision with the vehicle in front of you when you are farther away and it applies
limited braking. This gives you the most reaction time to avoid a possible collision.
Changing the FCW status to the Near setting, allows the system to warn you of a possible collision with the
vehicle in front of you when you are much closer. This setting provides less reaction time than the Far setting,
which allows for a more dynamic driving experience.
NOTE:
The system will retain the last setting selected by the driver after ignition shut down.
FCW may not react to irrelevant objects such as overhead objects, ground reflections, objects not in the path of the car, stationary objects that are far away, oncoming traffic, or leading vehicles with the same or higher rate of speed.
FCW will be disabled like ACC, with the unavailable screens.
If after adjusting the settings you continue to have a concern with the reaction of the Forward Collision Warning system, please follow up with the Jeep Assistance Center by utilizing the reply link below, or by calling 1-888-426-5337.
Thank you again for your email. Should you require additional assistance, or have any new information to provide, please reply to this email message or call 1-877-I-AM-JEEP (1-888-426-5337).

Sincerely,
Heather

POSTMARK DATE: 031014; DATE RECEIVED: 031114
Top Care customer first contact was 03/13/14 at 11:22 by rk42
Owner is upset that vehicle is having a number of issues. He indicated it was towed in last week and has been back 3x for the adaptive cruise control. The crankshaft position sensor was replaced. He lost money on concert tickets because his vehicle broke down. His remote start will intermittently cause his heated seats not to work. While driving, the dashboard flashes on and off and says his automatic high beam is disabled. He was not driving at night and he did not activate anything related to his lights. Owner is seeking replacement. He has no confidence in the dealer as the SM did not believe he had the issue until the technician rode with him and saw the condition with the adaptive cruise control.
Advised owner per review with Wendall, SM, dealer is working with STAR on the issue. STAR has advised the dealer to order the cruise control lens. The dealer is ordering the part and will contact him when they have an eta on the part.
Wendall indicated they replaced the module for the cruise adapter. The customer drove veh 70 miles and the issue returned. The tech test drove and it kept saying the lens is dirty. It was cleaned off and then driven again and stated the same thing but the lens was not dirty. They have placed owner in a vehicle during the repairs and provided him a truck because he uses a trailer.
Wendall SM stated the part is on backorder 68223771AE order $435934. Order on VOR.
SM Wendall from the dealership is calling in. Wendall advised agent that he would like it notated on file that he did offer the customer a rental vehicle for the 5 day period and customer did not want a rental vehicle when dealership had offered one to the customer.
****** Following Corporate Resource has been contacted ******
PARTS EXPEDITING for
Part#68223771AE,Order#$43593,OMC#88722162
on 2014-03-19 @ 09:18

Wendall stated the owner can in because he stated the brakes locked up. He asked the owner if he had the veh on the cruise control and the owner stated yes but on manual. He asked if the veh slowed down and owner stated yes. He offered a rental for the owner to further ck vehicle but he declined. He advised the part is on priority status.
****
Customer unhappy that he has not been contact by Upper management in the last two days. Customer did not know who the CM is. Customer stated that he was informed by Wendall that the part is not currently available and does not have an ETA. Customer stated that he does not want the part he just wants to return the Jeep and get his money back. Writer apologised for the situation and tried to look up CM in Answer Connect but could not find the number. writer informed the customer that an email will be sent to the department of CM and he will receive a call back by the end of day. Writer confirmed that the best number to contact him is 859 221 8015. Customer reiterated that he does not want the part but just wants to return the Jeep and get his money back.
Customer informed a call back is required and will take place within 1-2 business days.
Preferred Morning/Midday call back number is [redacted]
Preferred Afternoon/Evening call back number is [redacted]
Customer email address for case updates: [redacted]
Who has possession of the vehicle? (Owner/Dealer/IRF)Dealership
Is this a request for Lemon Law, buy-back or replacement?buyback.
Reassigned to 91L
customer is upset because he hasn t heard anything from anyone since last week. customer wants a buyback due to the part. customer is expecting to have RK42 to call customer back with answers on his situation with everything.
Spoke with Wendall and they are attempting to get the part off another Jeep and should know this afternoon. He stated the owner is claiming the brakes are locking up but then stated to the GM the vehicle slowed down. They rechecked his vehicle last night for any codes and nothing was found. They explained to him they are attempting to get the part off another vehicle. But this issue does not affect the ability to drive the vehicle.
Spoke with owner and owner is not happy with the vehicle. Owner stated he driving on the highway and the vehicle just slowed down and the brake light came on in the dash. Advised dealer upon obtaining part will test drive vehicle extensively to make sure issue is resolved. Owner stated he is taking the vehicle in tomorrow.
****** START OF SUPPORT ESCALATION by T1095DG******

Product - Electrical - Unknown - Other - Default	FCW not working
Corporate - Survey By-Pass - No Repair - Default - Default	

Briefly summarize why the customer is contacting Chrysler: Customer is calling in seeking assistance in getting the vehicle repaired. Customer states that after having the FCW repaired the FCW system does not work.
Briefly summarize what the customer is expecting: Customer is expecting assistance in getting the vehicle repaired.
Agent advised the customer the customer that agent will document the compliant on the vehicle. Agent contacted the dealer and was advised that there is nothing they can do to get the vehicle fixed as STARR advised them that the FCW is functioning as designed.
Agent advised the customer that if he feels like the concern has gotten worse of if he stills has concerns he can bring it back to the dealer for another diagnosis.
Customer states that if they are not able to resolve the concern that he will be looking into lemon law.
Reassigned to SG893 for Survey By Pass on going in for another Diagnosis.
Customer is calling back as he says that the call was dropped and he wants this issue taken care of he wants things to be to the way it was before he had the Recall N55 completed.
He would like this sent up and have a CM assigned to you to work this issue out.
Customer never said that he was going in for another diagnoses as he has been to this dealership 4 times already.
Customer also states that the dealership told him to make a complaint with Chrysler as this may be the only way to handle this issue.
Customers preference is to have this issue fixed rather than have to do the **Lemon Law**
This is what the customer would like to have completed for him.
SA Justin is his main contact.
Customer advised a call back is required and will take place within one business day by COB their time

Preferred Morning/Midday call back number is [redacted]
Preferred Afternoon/Evening call back number is 42[redacted]
Customer email address for case updates [redacted]
Who has possession of the vehicle? (Owner)
Has the vehicle been diagnosed by a CDJ dealer? (Yes)
If a CDJ dealer has diagnosed, what is the dealer name or code? RAIRDON S CHRYSLER JEEP DODGE - 60337
Reassigned to 88F
Customer contacting in regards to update on case and who his case manger is. Previous agent didn t reassign case to 88F and left it open in her in basket.
Agent advised customer that we were reviewing the case. Agent advised customer 100% that he will be sending it up and will be hearing from a case manger tomorrow. (3/14/14)
* * * * * CASE MANAGER TEAM - District O * * * * * *
Original Owner: In Warranty
Household: 1 New, 0 Used
Service Contracts: Essential Care - 3 Years / 6 Oil Changes
Writer contacted SA Justin at (60337). SA informed that with the N55 recall it required a software update to the FCW system. He stated once this update has occurred there is no going back, Software cannot work the same way it did before the recall. Customer wants the forward collision warning to occur sooner than it does, like it did prior to updates. SA and STAR say this is just not possible. There is nothing that can be done to change FCW system back to how it worked previously.
Status update provided via email to the following email address: [redacted]
My name is Misty and I have been assigned as your case manager. Here is some information that will be helpful for you to have.
My contact information: 800.763.8422 EXT 66235
My hours in the office: 8:30 am- 4:00 pm
I will review your case and contact you by the end of business today.
End of Status Update
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted] Writer spoke to customer and advised that the vehicle has been in the dealership several times regarding the FCW. Customer has stated that the system has not worked since the flash update was completed. Customer all edges that the system worked at approx 3 car length and at this time the system does not operate at all. Writer provided customer with information from the owners manual on page 217-218 that provides warning and recommendations. Customer is requesting that the Jeep offer a tech to drive the Jeep to insure this is an operating as design and that the system is operating. Customer will contact SA Justin who has been working closely with customer and writer will follow up again on 3-17-14 for next steps.
Writer spoke to Jason SA and was informed that customer did call and advise that CAC would be calling regarding the issues with the FCW and update. Writer confirmed that the update can not be reversed and that was related back to customer. Writer inquired on Tech support for assistance and call was transferred to SM Bob and advised that if CAC would like to instigate the AM for Tech support SM Bob is in agreement.
Writer contacted Area Manager Scott, regarding the issues with customer with the FCW and customers issues with the operation of the system. AM noted that this issue has been addressed at a corporate level and that CAC and dealership are aware of the flash and the change in the system and that Tech support would come up with the same results. Writer was advised to inform customer at this time due to the flash update the vehicle is operating according to the spec s from factory.
Writer contacted customer and left message writer will follow up next day.
Customer calls to speak with their Case Manager.
Transferred the customer to LT702 at ext 66355
Writer contacted customer and provided the information obtained from the AM and the SM of the dealership working with customer and customer did not agree with the information provided and will seek alternate options.
Writer advised that CAC will follow up again on 3-19-14.

Agent attempted to contact dealer Service Adviser Justin, per,
SM not available. Left message for a return call at extension 66355
Writer contacted dealership and spoke to Justin SA that customer stated would be contacting regarding the last diagnosis and next steps. Justin noted that no call has been received from customer since early last week. At this time there is no updates or change in the why vehicle operates.
Writer contacted customer and was informed that customer contacted SM Bob and was advised that SM Bob will be contacting corporate resources for further assistance due to customer still experiencing issues on freeway with cruise control on. Writer advised that CAC will follow up again on 3-25-14.
Agent attempted to contact dealer Service Manager Bob, however,
SM not available. Left message for a return call at extension 66355
Writer spoke to SM Bob and was advised that customer has been advised of the operation of the FCW and at this time customers vehicle is operating as per the update that changed the operation of the feature. SM Bob has inquired through corporate resources and there is no change or update at this time. SM Bob does not need customer to return to dealership per at the last visit system was operating. SM Bob and writer agree that with out a flash update or change from Jeep vehicle will continue to operate as it does.
Writer contacted customer and advised that from the conversation with SM Robert, CAC was advised that the FCW was reviewed with AM and at this time per the recall that was preformed the feature will work the way it has been designed. Customer is adamant that the feature does not function at all and with own research conducted is concerned that the sensors are not working at all due to two instances on the freeway. Customer is requesting that CAC continue to support customer in having another diagnosis completed and having the sensors diagnosed. Writer advised that customer will have a new case manager work with dealership and follow up with customer via email and set up an appointment to have this completed. Writer also offered a Auto Appearance MVP for 3 years and recommend that continued communication with dealership during oil changes to keep customer updated on any possible updates.
Agent attempted to contact customer, phone number dialed, [redacted]
Agent contacted customer inquiring about where customer will be getting a 2nd opinion. Agent left message containing contact information, 8007638422, requesting a call back.
Writer called customer at [redacted] and left a message that advised will contact customer at [redacted]. Writer called [redacted].
Customer stated took vehicle in for a software update, and after the software update was completed, the FCW did not work. Writer advised that Engineering Department is advising that the vehicle is operating as designed. Writer advised would like to do some research, and contact other resources within Jeep, and will contact customer back by Tuesday.
######### DIRECT-TO-DEALER #########
ATTENTION SERVICE DIRECTOR OR SERVICE MANAGER
Please follow your Business Center guidelines in an attempt to resolve this customers concern(s). If needed, seek assistance from your District Manager, Business Center or STAR.
The unresolved concern is:
FCW is functioning differently after having a flash done on vehicle.
Action requested: Area Manager/TA assistance.
Please update this CAIR with resolution.

End of Status Update

4-8 the SM advises that the vehicle is operating as desigend after the _ performace of the recall in question. Make no more attempts to resolve this issue or repair the vehicle. psh
ME1372 contacted Master consultant. As per STAR/AM/Master Consultant, the customer s concern with the FCW is normal.
Writer called customer at [redacted]. Writer left a message with contact information, and advised will follow up with customer on Monday.
Customer called in. Writer advised that Jeep has advised that the vehicle is operating normal/as designed. Customer stated is expecting documentation regarding that, and would like documentation explaining how the FCW is supposed to function. Writer advised cannot provide any documentation, due it being proprietary information. Writer advised willing to reimburse customer for 1 vehicle payment. Customer stated paid cash. Customer verified name/address as per COIN. Writer advised will look into a Service Contract for the customer. Customer stated is unsure of the exact mileage, but can estimate 15,000. Writer advised will need exact mileage. Writer advised will follow up with customer on Wednesday.
Writer contacted customer at [redacted] and left voicemail advising TS919 is no longer in the department and would like to go over a SC as discussed in lines 170-180. Writer requested call back.
Status update provided via email to the following email address: [redacted]
This is Misty with Jeep Customer Care; I am contacting you on behalf of your Case Manager Tara who is no longer in our department. I left a voicemail for you at phone # [redacted] in regards to going over a Service Contract as you discussed with Tara on Friday April 11th. Please contact me at your convenience at 1-800-763-8422 ext. 66211. If I do not hear from you I will follow up with you again on Wednesday April 16th.
End of Status Update
Writer received call from customer [redacted] who stated vehicle has not been repaired and FCW is not functioning. Customer stated unsatisfied that dealer and CAC is stating that vehicle is operating as designed. Writer advised offering WA7100N and customer provided mileage of 15,416 and confirmed email. Customer stated returning to dealer this week to address a trim concern. Writer advised will add SC and leave case open to confirm trim repair. Customer requested writer call back 4/18.
WA7100N Contract created. Contract number is 38325948.
Writer contacted customer at [redacted] and spoke to [redacted] who stated vehicle was taken to dealer and part was ordered for trim repair. Customer stated appointment confirmed for 4/23 for repair. Writer advised SC WA7100N has been added to vehicle and SC details will be delivered by mail. Writer advised follow up on 4/23 to confirm trim repair. Customer advised radio volume is significantly louder while listening to AM/FM than when listening to satellite. Writer advised possibly a characteristic due to reception but writer is not a technician and writer advised to discuss with dealer during appointment on 4/23.
Writer contacted dealer and spoke to Service Advisor John who advised customer had trim repair completed today.
Writer contacted customer and left voicemail advising contacting dealer and confirming trim repair. Writer advised case will be closed if no contact by 4/25.
CLOSED LOOP UPDATE - no need for additional follow-up.

Writer was contacted by SM David and not able to duplicate the concerns.

SM David said drvoe about 30 miles. Writer was informed they spent about .9 hours of diagnosis and SM David will try and ride with customer when customer drops off rental and contact back if able to or not able to duplicate with customer.
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted]. Left message.
Received call from David/SM. Dealer stated he was told diagnostic time and rental fees would be covered since the concern could not be duplicated. 2 days rental @ $35.00 per pay and $68.07 in labor. Total claim is $135.07
Writer called customer at [redacted] Customer states that he has had on going intermittent issues. Customer states that the radio cuts out too much and it doesn t matter where he is at, the adaptive cruise makes a noise in the dash, cell phone won t stay connected, and the adaptive cruise wont slow down the vehicle when another vehicle is in front of the vehicle. Customer states that the dealership took the dash apart and ever since there is a high pitched noise that won t go away at certain speeds. Customer states that the SM was going to call him yesterday or today about a trade in allowance. Writer informed customer that writer will call SM today.
Writer called dealership at 865-932-4144. SM states that he has not been able to recreate any of the issues with the vehicle and the customer never told him that he was having problems with the cell phone not staying connected. SM states that he has gotten the customer $3000 trade in allowance but that it would cost about $9000 to trade the customer. SM has contacted his DM for more assistance. SM states that he will contact customer today with an update. SM states customer told him he was going to file for lemon law.
Writer called customer at [redacted] Writer called customer a voicemail requesting a call back.
Customer called writer and stated that he is still having the same problems with the vehicle and he is thinking about lemon law. Writer referred customer to his blue and white booklet and bbb.org. Customer states that he would rather persue buyback than lemon law. Writer informed customer that writer would contact SM about previous conversation on lines 43-50. Writer set follow up for 03/25.
Writer called dealership at 865-932-4144. SM has left for the night.
Writer called dealership at 865-932-4144. SM will not be available until 03/28.
Writer called customer at [redacted]. Writer left customer a voicemail with follow up for 03/28.
Writer called dealership at 865-932-4144. SM states that he has gotten up to $4000 for a trade in and SM will contact DM again for further information.
Writer called customer at [redacted]4. Writer left customer a voicemail with update and follow up set for 03/31.
CLOSED LOOP UPDATE - no need for additional follow-up.
Writer called dealership at 865-932-4144. SM states that all the DM could offer was the $4000 for a trade in.
Writer called customer at [redacted]. Writer left customer a voicemail stating that writer spoke with SM about offer.

Left message for the Customer asking for a return call on my direct line.
Customer concern:
Front Collision Warning (error) Dealer diagnosed it as non operable
Received call back from the Customer on 3/17. Customer requesting call back [redacted]. Writer will follow up with Customer attempt again on 3/18
No response yet from the Customer will try again on 3/20
3/20
Spoke with owner today. Writer will further review with Service Manager (Chris Greene) 863 679-3933. Field Tech is scheduled to go out to Dealer customer stated.
Customer is referencing the N55 CSN however that is for units through Aug 26th 2013 Customers warranty build date is in Sept. 2013. Verified that TSB 08-003-14 was completed for the installation of the New Integrated Center stack. Customer stated that vehicle shifts harsh after the Center stack installation.
March 25th 2014 Called Chris Greene to see what status would be of TA involvement/ FTS involvement. Left message
March 26th 2014... Spoke with owner today who stated Chris Greene (Service Manager) advised engineering will not pursue repair without a CEL active. Owener says FCW may still be not responding correctly. Customer wants to know where the ACC (adaptive cruise control) sensor is. Writer advised it would be difficult to locate as it is shrouded by a cast aluminum protective box. Writer advised if dealer was not able duplicate and felt it unnecessary to pursue with TA or Engineering

any longer that is something that can revisited & roadtest wouldn t hurt.
Customer stated he would check the vehicle again for any CEL issues or any other message indicator lamps on dashboard and let me know; Writer advised would still contact dealer to further set up more testing if he wished. Called dealership back on 3/26 and left message for Chris Greene SM. Customer called back advised CEL & messaging center is free from any errors
Customer wanted to know more about how or when FCW works. Writer advised owner of the following:
The Forward Collision Warning system is not intended to do the following.
- The system will not bring the vehicle to a complete stop!
- The system cannot account for all driving scenarios!
- The Active Braking will not react on stationary licensable vehicle unless determined by both the Forward Facing Camera and Radar.
- The Active braking will not react on Street Signs, Guard Rails, Pedestrians, Animals, or other stationary objects. You will receive an audible and visual alert only for these objects if conditions are met.
Called back the owner today and advised him of the following. Explained to owner he can either select FAR or NEAR selection on the radio selection (owner usually selects FAR) etc. Customer Went to two dealerships 45632 & Winterhaven CJD and both agree vehicle is operating as designed and there is nothing they found wrong on.

CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted]0 FOR INFORMATION
Writer received a Voice Mail from customer asking for a return call.
Writer contacting customer, is allegling the dealership wrote : engine may be using oil as customer has been adding oil.
Customer is saying the vehicle sat for two days and then check the oil level and it showed low. Customer is also saying the miles per gallon dropped. The soot needed to be burned off. Customer is saying on his way to MI the vehiclelost miles per gallon from 28-30 down to 20-22. Customer is also saying the brakes are seeming a bit loose side, the brakes were growling and vibrating, While driving back from FL. While driving in the rain Customer tried to use crusie control but it would not stay on.
Customer is saying he has adaptive cruise control, But he was not using the adaptive part of the cruise control.
****Begin structured narrative T2 - Beginning Narrative
Briefly summarize why the customer is contacting Chrysler:
Briefly summarize what the customer is expecting:
****End structured narrative T2 - Beginning Narrative
Customer had a hard time to fuel up the vehicle and is asking if after washing the vehicle. If this had anything to do with it .
Customer is also asking about any updates for the radio and Nav.
Customer called in and left a voice mail stating he has an appointment on 3/27/214 at 9am.
Writer received a call from Mr [redacted] customer wanted to make sure the CA knew when the vehicles appointment is for.CA will be here for the dealership when vehicle comes in 3/27/214.
Writer contacted the SM was not available spoke to Rick WA, wrong dealership.
SM\Jim contacted CA stated that claim # 062222 was rejected because he

didn t realize that the TSB flash update wasn t allowed before calling.
CA explained ECS program and received claim information. CA stated that claim will be reviewed and SM\Jim will be contacted on decision on the claim. SM\Jim stated best contact for him is 906-786-1339 and stated that the customer has his vehicle. SM\Jim performed TSB: 08-020-14, 21-009-14.
CA contacted dealer 63720 at 906-786-1339, left message for SM\Jim stating that claim # 062222 has been approved and that DM notes are added.
Jim sm called about the claim still not being able to go through per his warranty administrator. Writer verified that the DM notes are in for claim 062222. Writer advised Jim sm that the claim has to go through a RA.
Called 906-786-1339 Jim sm to advise that the claim with the RA has to go though with the reference number [redacted]. Jim sm on the other line, writer advised Terry sa that the claim needs to be pulled with the reference number[redacted].
Customer called and left a voice mail asking for a call back.
Dialed[redacted], Left a message with CA contact information.
Next follow up date 4/4/2014.
Customer Hm[redacted] Customer is saying he has has a few time when the MPG has dropped and customer does not know why. Also customer went to check the oil and placed the dip stick out of the vehicle and when he came back the oil had drain down the dip stick. Customer is wanting to know if this is normal of if there is a design flaw. CA advised the customer to check with the dealership. CA will place oil changes on the vehicle.
EC36N will be added to the vehicle.
Customer Hm 9[redacted] Customer was advised about the qustion on his oil filler tube will be answered 4/17/2014 and customer also would like to know whats the difference between Quadra drive 2 and Quadra Trax 2 also customer is asking when vehicle is in Auto and it is snowing the vehicle seems to have better grip on the snow. Customer would like to know why?
EC36N not available.
ECPS36N Contract created. Contract number is[redacted]
Notes from TS; It looks like a tight spring or metal wound conduit down to about a 2.5-3 standard metal dipstick with range on the end of it. The only thing of note is that the oil filter housing can take up to 30mins to completely drain
Writer attempted to contact customer, message left.
Customer Hm[redacted]Customer is asking about the chamberlin link home link. has no range, seems the vehicle needs to be between 10-25 ft. Customer is saying with the remote from the door he can be 100 ft plus away to open.
the customer openers ar from before 1995. Ca will look into this and contact the customer back by 4/14/2014
Status update provided via email to the following email address:
[redacted]
Hello Mr [redacted] I need some more time to reasearch your concerns and will call you back by 4/30/2014
End of Status Update
Customer Hm[redacted] Customer was explained about Each of the three transmitter push buttons controls an independent radio transmitter channel. Each of these three channels can be trained to transmit a different radio frequency signal for the remote operation of garage door openers, motorized gate openers, home or office lighting, security systems or just about any other device that can be equipped with a radio receiver in the 286 to 399 Megahertz (MHz) frequency range for remote operation. Customer thanked the agent then asked if there is oil changes left after the years are up what can he do. Agent explained for the customer to call back in to the Jepp line and explain the leght of time rans out and an agent should be able to help him.
CLOSED LOOP UPDATE - no need for additional follow-up.
SA Jim called IN AND LEFT VOICE MAIL ASKING ABOUT THE mvp. Writer called SA back and explained the miles are on his end and that is why its not showing up. Also the Sa was asking about the dollar amount of the MVP

again CA will accept a call back from SA who will get warranty prices on the oil change.
Caller [redacted] insisted to speak with Case Manager and leave a voice mail..
Writer received a call from the customer saying he is wondering why there is no paint on the top/tip of his atenena. The CA stated the customer should go into the dealership for DI photos. the customer also ask about recall P36 SUN VISOR WIRING and why he can not get any parts. Agent advised the part are being released to the dealership is lots of 7. The customer is saying he also feels the vehicle is missing. And has done this a lot of times. while driving in cruise control the vehicle is missing at different times. But now the issue is not happening.
MR [redacted] called to check if tire rotation comes with his oil changes service contract. Writer advised that tire rotations are not included with his oil changes service contact.

Product - Body / Trim / Paint Finish - External Ornamentation - Improper Installation/Missing - Unknown	adaptive cruise control piece/trim falls off
Product - Electrical - Power Seats - Defective - Unknown	easy exit seat feature stopped working
Corporate - Survey By-Pass - No Diagnosis - Default - Default	

Briefly summarize why the customer is contacting Chrysler: Customer states that on the front of the vehicle there is an eye for the adaptive cruise control and around the grill there is a piece of trim that snaps in. Customer states that he has already lost 2 of these trim pieces and believes that it is due to a faulty design that the piece will not stay clipped in.
Briefly summarize what the customer is expecting: Customer is expecting to have trim piece stay on vehicle. Writer spoke with SA Heath who advised that it is the adaptive cruise control piece that clips on to the middle of the front bumper/grill. SA Heath states that the last time they did inspect the vehicle for any impact damage and did not see any. SA Heath states that the only way that the piece would come off once it is clipped in is if the clips were to be damaged. Writer advised the customer of time information. Customer states that he does not know how they would be damaged and inquired about if where he was clipping the piece into is faulty. Writer advised customer that he would need to bring the vehicle to the DLR to have them look at this issue further for him. Customer inquired about if this would be covered under warranty. Writer advised customer that it would need to be determined as a manufacturing defect and cannot be customer caused so we cannot guarantee that it would be covered. Customer also states that he is having an issue with the easy exit seat feature and will let the DLR know about this issue also.
Reassign to TL for survey bypass - no diagnosis.

Product - Suspension - Unknown - Other - Front	Front air suspension is not level and is lower on one side
Dealer - Service/Body Shop - Personnel - Other - Unknown	Service people unable to correct air suspension in vehicle
Dealer - Parts - Transaction - Parts N/A / Backordered - Default	adaptive cruise control module on back order
Dealer - Service/Body Shop - Transaction - Problem Not Resolved - Default	customer stated that 2 CDJ Dealerships unable to repair vehicle
Corporate - CNA Change - Default - Default - Default	updated customer's information in COIN
Dealer - By-Pass - Default - Default - Default	

Briefly summarize why the customer is contacting Chrysler: The customer stated that he has had a problem with his vehicle quadra lift as he stated that when the vehicle drops to the lowest point that the vehicle sags on one side and that not only can you see this but you can measure a difference. The customer stated that the front passenger side will be one level and the front drivers side will be one inch below the passenger side level on the other side. The customer stated that he has taken photos. The customer stated that this has been ongoing for about a month that he noticed and this could have been happening longer. The customer stated that on the drivers side the vehicle wheel well drops below the tire rubber and it is much lower within 30 minutes while it is parked. The customer stated that he believes that this is either an air leak or a sensor that is not functioning properly. The customer stated that he had taken the vehicle to Lindsay CDJ Dealership and that they were unable to duplicate his concern even when he pointed this out to them.
Lindsay Chrysler Dodge Jeep Ram
8100 Centreville Rd.
Manassas, VA 20111
(703) 368-5300
The agent called the Lindsay CDJ Dealership and spoke to SA Kyrin who advised that the customer s vehicle appeared like it was in a collision and that they had suggested to the customer that they were unable to

verify the concern. The SA Kyrin from the Lindsay Chrysler Dodge Jeep Ram advised that the vehicle was brought to them from the body shop as the customer has had a foward collision and a part had been special ordered for the vehicle by the Lindsay CDJ Dealership. The agent was transferred to SM Margaret from Lindsay Chrysler Dodge Jeep Ram
who advised that the customer s vehicle was at their dealership and that they had advised the customer that they were unable to duplicate the concern. The SM Margaret stated that the vehicle needed an adaptive cruise control module and that this part had been ordered however it was on back order. The SM Margaret from Lindsay Chrysler Dodge Jeep Ram stated that they measured the vehicle on both sides and found it to be within the tolerances allowed as well as they had compared this to the three other vehicles that they had on the lot and found that they were all the same.
Part Number: 68223771 AE
Order Number: S0312
ETA: Back ordered- 04/24/14
The agent advised the customer that the agent had called the Lindsay Chrysler Dodge Jeep Ram and had spoken to the SA as well as the SM who advised that the vehilce had been sent to them from the body shop and that they had advised that they were unable to duplicate the customer s concern. The agent advised that the SM Margaret advised that they had ordered the Crusie Control part that the vehicle required however that this was not exptected to arrive until April 24 as it was on back order.
The agent advised that the SM Margaret had indicated that they found that the vehicle was within tolerances allowed and had measured it and found it was about 1/8th of inch difference. The SM Margaret had also advised that the vehicle had not leaks or codes for the system. The customer stated that he did not agree.
The customer stated that he was not in a collision and he wanted this documented. The customer stated that he was parked and sitting in his vehicle and was sideswiped by another vehicle that was going about 5 mph. The customer stated that the vehicle was not damaged other than some outward appearance items that the body shop was quickly able to correct.The customer stated that this is a warranty item that needs to be addressed as it clearly does not function properly. The customer stated that he was at Farrish CDJ Dealership today to have his oil changed and showed this to the SM who advised the customer to return the vehicle tonight so that they could let the vehicle sit and take additional measurements. The customer stated he is concerned as he points out the problems to the technicans but no appears to be interested in actually fixing his vehicle.
The customer stated that he is taking the vehicle back to the Farrish CDJ Dealership today to leave the vehicle so that they can continue to diagnose the vehicle. The customer stated that he had the vehicle previously to the Lindsay CDJ Dealership and that the service person there although they could see this were unable to duplicate this and therefore did not repair anything.
The vehicle has no active Service Contracts.
Briefly summarize what the customer is expecting: Assistance to get a technican that can diagnose and repair his vehicle properly.
Writer advised customer that their parts concern will be escalated to the Parts Support team for parts resolution, and that their Case Manager will provide them updates on the status of the part within 4-5 days.
If an update is received sooner, customer will be contacted sooner.

Your Case Manager will be contacting you within one business day to review this case with you. Thank you for being part of the Jeep Family!
End of Status Update
Keith called from the dealership to be put through to the case manager. Agent transferred caller to: 1-8000763-8422. Extension number: 66070. The dealership called and stated that he was supposed to call before he did any work. Keith Rosenberger, the technician asked the writer to call back Jeep service.
The first contact has already been made. Writer calling the customer and dealership back 03/27/2014.
CONTACT UPDATE - 1st Contact attempt, notes lines 107 - 108.
Writer called the dealership, writer spoke to SA Chris and the air suspension pump failed, and the acc automatic cruise control was not working. Chris stated that all of the repairs are done and the customer just needs to pick up the vehicle. The current mileage is 7,792.
Writer called the customer and left a message with contact information. Writer calling back 03/31/2014.
The customer called the writer and the customer has the vehicle and is has been repaired. The customer stated he has a new concern with his vehicle. The cruise control was reflashed due to a recall. The customer states the adaptive cruise control does not speed up anymore when he turns on his blinker to change lanes. The customer states he took the vehicle to the Lindsay dealership and spoke to Kyrin, SA. The customer states the dealership told him that the cruise control in broken and they ordered a part that was back ordered. Writer offer to call the Lindsay dealership to find out what the part was and why it is broken and offered to call Farrish dealership where the cruise control was flashed to see if the changes he is seeing with the cruise control is normal. The customer stated he is a teacher and on spring break and insisted on calling the dealership himself. Writer is calling the customer back no later than 04/01/2013 to see if the customer needs further assistance with getting the cruise control repaired.
Writer called the customer and left a message with contact information.
The customer called the writer and the suspension seems to be fixed but still has an issue with the cruise control. The customer wants to Lindsay Jeep to still change the part when it comes in. Writer is calling 7035055546 later to give information after the writer calls Lindsay Jeep.
Writer is calling the dealership to see about the part.
Writer called and left a message on a voicemail for Kyrin SA, to call and verify that the part for cruise control for the customer is still coming in. Writer may try to expedite.
Writer called the dealership Farrish to see if the cruise control part has been ordered. Writer spoke to Bill in the parts department and stated that the part was not ordered for the vehicle.
Writer called the Lindsay dealership and spoke to Phil is the parts department. Phil verified the part number 68223771ae and the order number is s0312, 4/24/2014 UTA.
Writer called the customer but was not able to leave a message.
Writer called the customer and after the answering machine picked and said to leave a message the call dropped and was not able to leave a message. Writer is giving the customer a call back 04/09/2014 to provide a status update on the back ordered part.

Product - Electrical - Cruise Control - Other - Default	Cruise control not working
Corporate - Survey By-Pass - No Diagnosis - Default - Default	No diagnosis

Briefly summarize why the customer is contacting Chrysler: Customer stated that he wanted to file a complaint against a dealership. Customer stated that he has had an issue with the transmission shifting roughly from the second to third gear, initially it would only do intermittently but now it happens every time. Customer stated that the Jeep had a minor accident in January. Customer stated that only the plastic from the front right needed replacement. Customer stated that the insurance adjustor came and has given a report that it was only for a plastic. Customer stated that everything has been working fine since until 2-3 weeks ago. Customer stated that the front collision warning system is not working as well as the cruise control. Customer stated that when he took the vehicle to the dealership and they kept it for two days. Customer stated that he was not contacted at all by the dealership and yesterday was told that the issues are because of the accident. Customer stated that the dealership would not release the car unless he paid for diagnostic charges of $280.00 Customer stated that he also had a rental for those two days and wanted his money back for it as well . Writer apologized for the situation and informed the customer that the dealerships are our eyes and ears on the field and once it has been deemed by a dealership that the concern is due to an accident, then Chrysler will not be able to assist. Customer stated that he will post all over the internet.
Briefly summarize what the customer is expecting: Customer is expecting assistance from Chrysler to get his diagnostic money back for the diagnostics fees and the rental from the dealership.

Customer left message for writer to call him on [redacted]90 customer advised in message that he will be in and out of meetings today, so would like writer to leave a message on when writer will be available.
CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted]0 . Left message for customer that writer is on and off the phone, so customer could try and contact writer after 4:00 pm today and writer will try and be available for customers call.
Called 2[redacted] customer who wanted to know what writer wanted. Writer advised customer that writer called customer to advise that writer wanted to let customer know that writer is customers advocate and will be working with the TS and dealer to get customers vehicle working as designed. Customer advised writer that he wants his vehicle working as designed or out of it, because he has had trouble since purchased where the vehicle had a fire going after his wife drove home from work which is 8 minutes away from home and when wife pulled up there was smoke coming from under the front of the vehicle and there was exposed wires hanging out that had shorted out and started the fire in the lower facia, and there is a whistling noise in the throttle body that is loud enough that you can hear it over the volume of 14 when you put your foot on the gas or the brake pedal it stops then you take your foot off to slow down or turn it comes on. Customer advised writer that the eye that the dealer is saying the cause for the cruise control caused problems when driving because it would keep putting the brakes on like there was something in front of him so he was at a light and it would slam on the brake. Customer advised writer that what he wants is collateral for the vehicle. Writer advised customer that writer can reimburse customer for his inconvenience. Customer advised writer that he had the vehicle in the shop for 6-7 weeks since purchased. Customer advised writer that he thinks there a leak in the engine vacuum belt. Writer advised customer that writer is just finding this out so what writer would like to do is contact the TS and advise. Customer advised writer that he would like to talk to the TS so he can hear 1st hand. Writer advised customer that writer can request the TS to call customer but will not guarantee anything Writer will call customer back on 4-1 and writer has expedited the part.
CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted] FOR INFORMATION
Talked to TS AJT36 about line 62-65. TS advised writer to call customer and find out who went out to investigate and chat him back in the meantime TS will call the dealer. Writer advised TS that the customer

would like to also see if the TS will call him. TS advised writer that he can not diagnoses over the phone so if writer could call the customer.
Called [redacted] customer to advise that writer did speak with the TS and the TS will not be contacting the customer but writer needed to know who investigated the customers vehicle when customer had the fire. Customer advised writer the tech at Suburban he did not get the name. Writer advised customer that writer is working with the dealer and the TS and as any other updates come in writer will update customer.

Review completed, returned for repair resolution.
OMC# 88826485Order# $EVOE FOR PN: 68109355AF IS RESOLVED
Spoke with Fred sa to check if part came in. Fred sa advised writer that he will check and call writer back.
Called to check if part had come in. Writer was advised that they where still looking into it and will call writer back.
Left message [redacted] for customer that writer is updating customer on his part, that writer thinks the part came in, but the dealership is checking. Writer advised will check again 4-17 and will contact customer.
George sa left message on writers voicemail that the part did come in, but he has not contacted the customer.
Called George sa to advise that the customer was going for lemon law, but after investigation it shows that they want the vehicle repaired, so writer will call the customer and advise of investigation and that the part is in. George sa advised writer that they will put the part to the side and wait for customer to set up an appointment. Writer advised will call dealer on what customer has decided to do.
Left message [redacted] for customer that writer did speak with the dealership and customers part is in. Writer advised in message that writer wanted to talk to customer about the lemon law investigation. Will follow up on 4-21 unless customer calls sooner.
Customer called to check on update for lemon law and has not been able to get the dealer to get an appointment and has reached out to them 2 times to get the back order part installed. Customer advised in message that they are still having problems.
Called 2[redacted] customer to advise that writer did get customers message but did not understand the last of the message on something back again. Customer advised writer that the same whistling noise is back when driving 45-50 miles an hour and the foot is not on the pedal, just coasting. Customer advised writer that it is so loud that even if the volume to the radio is at 1/2 you can still hear it, but per customer the dealer advised them they could not hear it. Customer wanted to know about the lemon law investigation. Writer advised customer of line 172. Customer requested a copy of why. Writer advised customer that writer has no other information, due to this goes in for investigation on the customers state law. Customer advised writer that he is going to pursue the lemon law and send a letter, because he knows that in the state of Michigan any repairs that go in for the same reason in a 25 day period qualifies. Customer advised writer that his wife called the dealership to get the vehicle in for the back ordered part and they advised him that are 2 weeks back logged at this time. Writer advised customer that writer will talk with the dealer and see what can be done. Writer offered customer reimbursement again for 2 car payments. Customer advised writer that he does not want it, he wants a replacement vehicle just like this and so he will send a letter in for lemon law.
George sa out to lunch per Jim sa, writer advised will callback later.
Writer spoke with George sa to check on appointments out 2 weeks. George sa advised writer that the customers part was on back order and should be able to come in at any time, and will have a rental for customer. Writer

advised George sa that writer will contact customer and advise.
Called [redacted]0 customer to advise of conversation with George. Customer advised writer that he was able to get an appointment scheduled on 4-28. Customer advised writer that the dealership will be able to have a compatible vehicle for his wife to drive as per customer safety reasons. Customer advised writer that they are fine with the appointment on 4-28. Writer advised customer that writer will follow up on 4-28 with dealer on repairs.
Customer scheduled to go in on 4-28.
Called George sa to check if customer had dropped vehicle off. George sa advised writer that the customer has an appointment for today at 4:30 pm. Writer asked George sa if a rental is available for customer. George sa advised writer that they do have Enterprise there and it will be available for customer. Writer advised George sa that writer will follow up on 4-30.
Received call from George/SA. Vehicle is now at the dealership, part for adaptive cruise control has been received. Customer has asked dealer to check for whistling noise coming from driver side of interior and check transmission light has come on twice. New concerns have not been diagnosed. Dealer will call back once completed.
Called George sa to check if a diagnosis has been completed? George sa advised writer that the customer is there and the cruise control sensor is being installed, but they have not addressed customers other concerns as of yet, but when they do which should be today will call writer with diagnosis.
Left message for George sa on Kens voicemail to call writer checking on the diagnosis.
Called [redacted] to advise that writer has not been able to contact George sa at this time to check on the repairs. Customer advised writer that all these problems that are associated with electrical make customer worry that the vehicle is not safe and could start fire. Customer advised writer that all he wants is for the vehicle to be replaced and then Chrysler engineers go through and inspect the vehicle to find problems. Writer advised customer that writers goal is to get customers vehicle working and back out on the road driving as designed, so writer for customers inconvenience writer would like to off customer 1 or 2 car payments. Customer advised writer it is a good gesture, but writer would like to see if Chrysler will replace the vehicle with out going through lawyers. Writer advised customer that writer can send over for investigation to another department and will get back with customer after investigation is done. Customer advised writer that he and his wife are going out of town this weekend and would like to have the vehicle back to see how it works. Writer advised customer that writer will call George sa tomorrow and check.
########## ECS DIRECT-TO-DEALER ##########
ECS/Customer Care is sending this case to your dealership because an ECS warranty repair has been approved. Remember ALL PRE-authorization requirements for Digital Imaging and the Powertrain Service Center still apply. When submitting for pre-authorizations include this case number. DM Notes have been entered into GCS indicating Customer Care approval. When repairs are completed, submit your claim as you would normally and update this case and return it to Customer Care.
##########
REASSIGNED TO BC/DLR 42 45476 05/02/14 14:32 O 2[redacted]
George sa called to advise writer that the did replace the sensor module to fix cruise watch did update to relearn clutches and reprogram adaptive to transmission, and ordered new driverside mirror assembly and it should be in on Monday. George sa advised writer that the customer picked the vehicle up and will bring back when mirror comes in. Cost without the mirror for the update and sensor is labor $285.12 Parts $1136.80 for sensor. Writer advised George sa that writer will send case over to dealer to notate and will add DM notes.
Called George sa to check rental time. Per George sa customer did not want a rental, so the dealership gave customer one of their loaners.
Is there any damage to the vehicle? (if yes, describe) No
Actual/accurate mileage? 4325

Is the vehicle leased or purchased? purchased
Name of lender: Michigan Schools government Credit Union
Is the customer in a rental right now? No
Is this vehicle used as a personal vehicle or for a business? personal
Are there any modifications to this vehicle? (if yes, describe)No
Asked customer how the vehicle is driving now. Customer advised writer that he can not answer that because his wife picked it up and has been driving vehicle, but per customer they are going on a trip 300 miles up and back so he will know more. Writer advised customer that writer will call customer back on 5-7 after investigation.
Need to ask customer this information:
If Chrysler makes an offer to replace the vehicle, what dealer do you prefer to work with?
Left message [redacted]0 for customer that writer needs to talk to customer on his lemon law, will try and get customer back on 5-6.
Customer called back writer asked: If Chrysler makes an offer to replace the vehicle, what dealer do you
prefer to work with? SUBURBAN CHRYSLER JEEP DODGE OF
George sa called to advise writer that the mirror is in. Writer advised George sa that the customer filed lemon law and it is under investigation, but dealer needs to proceed with any repairs while the customer is still in the vehicle. Writer advised George sa that after the repairs are completed, writer will need a callback with the charges for labor and parts. Writer advised that the DM notes are in.
CAlled 248-563-1490 customer to advise that his case is still under investigation, but George sa called and advised writer that the mirror is in so if customer can take the vehicle in to have mirror replaced.
Customer advised writer he will do that and have them look at his cruise control adaptive checked again because it is coming on sporadically.
Writer advised customer that writer will follow up with dealer on 5-9 to check if customer has made an appointment.
Writer contacted dealer 45476 and spoke to Melissa with Guest Services who notated a message for the SM to contact CAC.
Writer contacted dealer 45476 and left a message for SM Tim to fax or email all RO s and to contact CAC.
George sa called 5-8 to advise writer that the customer is going through lemon law, so does not know how to proceed. Writer advised George sa that he should proceed with repairs as usual because the customer is still in possession of the vehicle. George sa advised writer that he has not heard back from customer for an appointment.
Writer called George sa to check if customer has made an appointment.
George sa advised writer that after speaking with writer yesterday, the wife did call in, but did specify that if she did not get a vehicle like hers she can not take the vehicle in. George sa advised writer that his finance manager has one like customers, but it is in use now, and unknown on when it will be available. George sa advised writer that they do have a 300 available but not a Jeep Grand Cherokee, so if customer will accept something else other then a vehicle like hers, they can get started on repairs other wise they will have to wait till the finance managers vehicle becomes available.
Left message [redacted] for customer that writer that writer did speak with George sa who advised writer that he did speak with the Mrs. per George alleges that the customer wants a loaner or rental that is like hers and there is one, but at this time it is not available and unknown on when it will be available, but per George sa they do have a 300 available now. Writer advised customer that writer will call customer back on 5-13 to check on what the decision is unless customer calls writer sooner.
Writer received a message from SM Tim at dealer 45476 on 05/09/2014 requesting a return call regarding RO s.
Writer contacted SM Tim at dealer 45476. SM advised of faxing and / or emailing all RO s to CAC. SM will confirm days out of service on RO s #102723 and #107971 when sending them. SM advised that the vehicle is not currently at the dealer, the vehicle is used of personal use and there are no modifications or damages to the vehicle.
Writer contacted dealer 45476 and left a message for SM Tim advising of

not receiving the RO s yet. Writer requested RO s to be faxed or emailed.
Called [redacted] customer to check on what customer had decided to do.
Customer advised writer that his wife is taking the vehicle in on 5-14
and the dealer did not say they had a 300 all they said was that they do
not have another Grand Cherokee. Customer advised writer that George sa
is who they have been in contact with and they are going to put the
mirror on and check the adaptive cruise control that had problems 2 times
on his last trip. Writer advised customer that at this time writer has
not heard anything back on the buy back, but will update customer when
writer gets any updates.
Spoke with Jim sa to check if customers vehicle went into the dealership
to have the mirror installed and the adaptive cruise control checked. Jim
sa advised writer that the vehicle went in yesterday and they are working
on it today.
SM Tim contacted writer on 05/15/2014 via email to inform that the
customer has an appointment on 05/15/2014 and will fax RO s to CAC when
the customer arrives to the dealer.
Writer contacted dealer 45476 and was transferred to SM Tim s ext. Writer
was unable to leave a message. Writer will email SM Tim today to inquire
about sending the RO s.
Spoke with George sa who advised that the customers vehicle is completed.
Replaced the mirror on the driverside, and road tested for the adaptive
cruise control not active at times, per George sa it happened 2 times per
the customer to Chicago, but the dealership test drove for a couple of
days and could not get the message on, and found not codes. George sa
advised writer service manager is working with MG1439 on the lemon law.
George sa advised writer of the RO [redacted] labor for the mirror is
$31.68 the part $669.20 all repairs are on the same RO.
Called [redacted] customer to check on repairs, customer advised that
the transmission light came back on again, but turned the vehicle off
then back on and it has not returned after going back and forth to their
destination, but his wife has the vehicle today and has not said anything
as of yet if the light came back on. Writer advised customer that he may
have to take the vehicle back into the dealership to check if it stored a
code or a code still active. Customer advised writer that he emailed Jim
sd at dealership. Writer advised that at this time writer has not heard
about the lemon law investigation as of yet, but will check again on
5-22.
Writer contacted dealer 45476 at 248-585-8800 and left a message for SM
Tim to fax RO s to CAC including any non-finalized RO s that may still be
open.
Called 2[redacted] customer to check if the transmission light has come
back on. Customer advised writer it has not and it has been 4 days and he
is on a trip. Customer wanted to know what was going on with the lemon
law. Writer advised it is still under investigation and writer has not
heard anything as of yet, but once writer gets any updates writer will
contact customer. customer asked if he could help by sending his RO.
Writer advised customer that the sm will need to send them, and that is
what the investigation team is waiting for.
Writer received email response from SM Tim on 05/22/2014. Writer
submitted response regarding RO s to SM Tim today.
Per lines 402 - 403. SM Tim from Suburban Chrysler Jeep Dodge (45476).
Email sent to SM Tim at Suburban Chrysler Jeep Dodge (45476) on
5/27/2014.
Writer contacted Suburban Chrysler Jeep Dodge (45476) at 248-585-8800 and
left a message with Heather for SM Tim.
Left message [redacted] for customer that writer is checking on
customers repairs if all is good and to advise that the lemon law
department is still investigating and working with Suburban Chrysler.
Writer advised will follow up again on 6-5.
Review completed, returned for repair resolution.
Begin Customer Message reviewed:
Hi [redacted]
We still haven t heard anything from Chrysler or the dealership. We
received another recall notice on the vehicle though. When Sarah called
George at the dealership they said they didn t have the parts in for the

recall yet.
What is taking them so long on this buyback decision? This is getting increasingly frustrating. Our baby is due July 8th and we re still seeing intermittent electrical problems with the forward collision warning is applying the brakes when the road is clear, the the adaptive cruise control is still throwing an error and saying the system is unavailable at random times, and the transmission has had Service Transmission messages when parking the car three times in the last two weeks.
We love Jeep as a brand and want to stay with the decision we made for the long term - just not THIS one. Between electrical fires within hours of taking it off the dealer lot that continued for over a month before they were resolved and six additional months of electrical problems I think we ve been more than patient, but in six months of ownership our car has been in the dealership for more than two. Now we re looking at the same issues and another recall. I would really appreciate it if we could have a substitute identical vehicle that doesn t have the build quality issues we re seeing here.
Thank you,
[redacted]
End of Reviewed Customer message
POSTMARK DATE: 052814; DATE RECEIVED: 060414
Called [redacted] customer to advise that the case came back from lemon law and it shows returned for repair resolution. Writer advised customer he could go to the Blue and White booklet that came with the vehicle. Customer advised writer that he has worked with cars for 8 years, so he will talk to the lawyers on this. Customer wanted to know what it will take to have this vehicle taken and customer given a new one. Customer advised writer that there is a recall on the brake booster and now no parts are available to do the recall. Customer advised writer that he is still having an issue with the adaptive cruise control, forward collision the transmission from going to park to reverse or drive and or drive reverse- drive to park an error message keeps coming up need to service transmission but all this happens at times about 2-3 times a week, whether the button is on or off that is on the dash. Customer advised writer that the vehicle will just automatically brake with no one if front of them like it detects something is there, and per customer in 5 weeks they will be having their new baby girl and he does not feel comfortable putting his wife and new baby girl in the vehicle for fear if there is someone behind him and the brake automatically stops then they are at risk of getting rear ended. Customer seems to think this all happened after the fire from the fog lights caused all this because it was electrical. Customer advised writer that he tries to capture the codes on video but he can not always have someone driving with him to video tape it. Writer advised customer that the offer for reimbursement on car payments and a service contract still stand. Customer advised writer that he wants a vehicle he can feel safe putting his wife and new baby in, not reimbursement and a service contract. Writer advised customer that writer will check into a few things with the TS and also with the dealership to see if there is something that can put on the vehicle to see if it can pick up codes. Customer advised writer that would be good and he will take his vehicle in when the recall parts come in. Writer advised customer that writer will follow up with customer on 6-9.

Corporate - Rental Vehicle - Default - Default - Default	Customer seeking rental vehicle.

Briefly summarize why the customer is contacting Chrysler: Customer states that his vehicle is at the dealership. Customer states that the dealership is only giving customer rental for one day. Customer states that the adaptive cruise control is not working properly as the vehicle will brake for no reason.
Briefly summarize what the customer is expecting: Customer is seeking further information on the rental of the vehicle.
Agent contacted DICK GREENFIELD DODGE 41007Ù and spoke with Assistant Manager Jim. Agent advised Assistant Manager Jim of D-11-53 5 day rental for customer. Assistant Manager Jim states that the one day rental is currently under the D-11-53. Assistant Manager Jim states that the vehicle may be fixed and completed by 03/28/14 and there will be no need for a weekend rental. Assistant Manager Jim states that if a customer with service contract comes in that customer receives rental before a customer with out a service contract. Assistant Manager Jim states that there are no codes and that he is awaiting further testing and information from STAR. Agent advised customer of the information given. Customer understood and would contact us tomorrow if his vehicle is not completed in seeking a rental for the weekend.
Customer called in stating he would like to place a note on file ,
He has yet to return his loner car. Dealership has vehicle still and dealership stated he would not half to worry about charge
Briefly summarize why the customer is contacting Chrysler: Customer states that the dealership gave him a rental vehicle at no charge and that when he got his vehicle back he seen that he was charged to his credit card a $20.00 Fee.
-
Briefly summarize what the customer is expecting: Customer states that he is expecting to be reimbursed for this fee and that when a rental is free it should be free.
-
Agent was unsure of this cost so they contacted the dealership to inqire

about it .
Dealership advised agent that the cost is a State Tax in New Jersey for rental vehicles that is $5.00
Customer has requested Supervisor callback
Preferred daytime number: [redacted]
Reason for request: customer not happy with the fact that Chrysler doesn t reimburse for the cost of the state rental tax.
CAIR assigned to: RO188
****Supervisor*****
RO188 spoke with the customer about his request for reimbursement for 20 dollar in state taxes. RO188 advised the customer that we would not be able to reimburse the state taxes.

Product - Electrical - Speedo/Gauges/Ometer/EIC - Other - Default	forward collision warning system is possibly defective
Corporate - Survey By-Pass - No Diagnosis - Default - Default	

Agent updated COIN.
Briefly summarize why the customer is contacting Chrysler:Customer says he was testing his Forward Collision Warning (FCW) system and it works when cruise control is on but does not seem to work when cruise control is off. Also, when customer pushes FCW button on the panel below uconnect there is no indication of whether or not FCW is on or off.
-
Agent looked up owner manual and discussed informaton about FCW on pages 216 - 220. Agent advised 'The default status of FCW is On , this allows the system to warn you of a possible collision with the vehicle in front of you' and that ' To turn the FCW system OFF, press the forward collision
button once to turn the system OFF (led turns on). To turn the FCW system back ON, press the forward
collision button again to turn the system ON (led turns off).'
-
Agent advised to take vehicle into a dealer to have FCW system looked at up close. Agent advised dealer was closed at time of customer call. Customer will call dealer himself next week.
-
Briefly summarize what the customer is expecting: Customer will have diagnosis done at local dealer during business hours.
-
Reassigning to LB546 for no diagnosis.

CPS Score : 9
Customer would like to be contacted on Uconnect
Survey states: Customer is very dissatisfied with the quality of the vehicle. Customer states the build quality is poor. There is a piece missing off of the front bumper around the adaptive cruise control bubble. The headlights (that I paid $4000 for) have moisture inside once in a while because they aren t waterproof. For some reason the rear glass does not open like my 2012 grand Cherokee. If I knew this I would not

have bought the car. Customer is very satisfied with the experience at ROCKLAND CHRYSLER JEEP DODGE, and would recommend Jeep to a friend or colleague. Customer would like to be contacted on Uconnect usage or Registration.

4. Uconnect usage or Registration.
Customer states he picked up the vehicle at night, so did not notice it was missing. Customer states he has contacted the dealer many times to get this addressed but the dealer has not called him back. Customer believes that another customer was missing this same piece, and dealer possibly took it off his vehicle to give to the other customer. Customer states he does not have time to take his vehicle to the dealer and wait 3 hours. Customer states also the dealer will ask why he did not notify them when he first purchased the vehicle. Customer wanted writer to send it to him. Writer informed customer that writer would like to assist customer in resolving this matter. Writer asked customer to contact the dealer to schedule an appointment for a diagnosis. Customer states he

does not have time. Customer states he will order it on Amazon and it will cost about $3.00 for a 3 inch piece plastic. Customer states there is moisture in the headlights. Customer states he paid $4000.00 for the headlights. Writer asked customer to contact the dealer to schedule an appointment for a diagnosis. Customer states he does not have time. Writer said he just wants it documented for the future. Customer states the rear glass does not open like customer s 2012 Jeep Grand Cherokee. Customer states he just did not notice at the time of purchase. Customer states he knows nothing can be done, but wants it documented as well, that he likes the ability to open the rear glass. Writer informed customer that writer has documented customer s concerns which will be reviewed by the appropriate personnel within Jeep. Customer states the Uconnect App to Auto start the engine does not work. Writer agreed to transfer customer to Uconnect Care that can assist with that, customer does not have time. Customer requested that the number be emailed to him. Writer informed customer that writer cannot email that number, writer can only transfer the customer. Customer declined assistance. Customer states no further assistance is needed and authorized the case to be closed. Writer informed customer that if you have any other issues, concerns, or if you require further assistance, please contact your local dealer to schedule an appointment for a diagnosis or contact Jeep at the following number. Another case will be created to provide you further assistance. Customer states he does not have time, wants the number emailed. Congratulations on your purchase of a 2014 JEEP GRAND CHEROKEE and thank you for your ongoing loyalty to Jeep.
Writer verified customer s mailing address: 21 Merlin Ave Sleepy Hollow, NY 10591.

Product - Electrical - Cruise Control - Defective - Default	Customer states drivability concerns
Product - Electrical - Cruise Control - Other - Default	Sensor came loose

Briefly summarize why the customer is contacting Chrysler: Customer called states his vehicle is stopping sudenly without driver input. Customer states he has the vehicle at the Dlr for the 4th Saturday in a row. Customer states the error 'cc/fcw unavailable wipe front radar sensor' is displayed in the EVIC as well as the Abs light and airbag light comes on. Agent called the Dlr and spoke with Steven Mahadeo. He advised that the customer originally came in with the ABS light on, then the airbag light, and now this concern. Steven states this is all related to adaptive cruise control system malfunction. Steven also advised it is unsafe to drive as the vehicle will apply the brakes without driver input. Steven also advised the codes will pop up but its not a stored code and there are others experiencing same issue. Agent advised the customer that we will forward this to our case management team for further assistance.

Agent attempted to contact dealer SM Gary, Agent advsed that there is a Tech Tip that pertains to the Adaptive cruise Control TT9002458. Agent advised dealer to open a STAR case to confirm the repair.
Dealer has not been able to come to a conclusive diagnosis. Agent will follow-up in couple of days to confirm a diagnosis and or repair.
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted]3. Customer advised that he has an issue where the the brakes would go and off and this past week the cruise control will not even come on. Customer advised that dealer provided a rental. Agent advisd that dealer will reach out to STAR if needed and a follow-up will be made no later than 4/9/2014 if needed.
Agent attempted to contact dealer SM Gary, however,
SM not available. Left message for a return call at extension 66035
SM Gary advised that the sensor had come loose out of the bracket. Vehicle has been repaired and returned to the customer.
Attempt made to contact customer at [redacted]. Customer advised that issue with the sensor appears to have been resolved but now the Horn does not work. Customer advised that he will take the vehicle in on 4/12/2014. Agent advised that agent will follow-up no later than 4/15/2014.
Writer left a voicemail to check the status of the vehicle.
Agent attempted to contact dealer SM Gary, Advised that this vehicle has not been back since the sensor bracket was repaired.
Attempt made to contact customer at [redacted]. Mr. [redacted]h advised that the vehicle is at the dealer and the dealer has provided a rental. Customer advised that the dealer had to order parts. Agent advised that a follow-up will be made no later than 4/18/2014 to verify the status of the vehicle. Customer is very frustrated that he has had to take the vehicle to the dealer 5 weekends in a row.
Agent attempted to contact dealer SM Gary, repair was completed and is ready for pickup this morning.
Attempt made to contact customer at [redacted]3. Customer advised that the dealer has contacted him and informed him that the vehicle has been repaired. Customer advised that vehicle will be picked up in the morning. Agent advised that a tfollow-up will be made on 4/23/2014 to verify repairs.
Attempt made to contact customer at [redacted]. Customer advised that all repairs including the Horn have been taken care of. Agent advised that has vehicle has been placed into the ECS program so for any future repairs he will be taken care until 7/18/2014. Agent asked if case can be closed. Custoner agreed.
CLOSED LOOP UPDATE - customer contacted today to confirm repairs.
Dealer is calling for approval of a rental vehicle. Agent advised if it is a warranty repair the dealer is authorized to provide up to 5 days of rental as per the warranty bulletin D 11 53 . Agent advised the dealer to speak with his SM or his AM
Dealer 68680 looking for an extra 2 days of rental,
Agent provided case number and transferd SA to CM
Steve SA #68680 Dealer Called requesting to speak to CM JS1561 regarding rental coverage that the customer is being charged for on credit car .
Writer transferred the customer to CM JS1561for further assistance.
SA Steve called in from dealer. Wanted to know what to do as the customer has a rental charge for repairs that were performed by the dealer in April. Agent advised that an RA can be put in for rental. SA Steve advised that customer already paid for the rental. Agent advised that the customer will need to contact Customer Care and open a new case to seek reimbursement of the rental charges.

Product - Air Conditioning / Heater - Auto Temp Control System - Other - Default	Climate controls not working properly
Corporate - Enhanced Customer Satisfaction Program (ECS) - Default - Default - Default	Restriction H

Briefly summarize why the customer is contacting: Customer contacted Ram because his climate control feature is not working properly. Customer states that he set his climate control for 65 degrees with the fan on, but the air that blows out is 90 degree. Customer states to get it to stop this he has to put the air conditioning on or press the recycle air button. Customer did recently upgrade the software in his radio, but doesn t believe this has anything to do with it. Writer informed customer that it is an issue he would have to get his dealership to look at. Writer informed customer that she would assign this case to a case manager and who will be in contact with him and help him to resolve this issue.
Briefly summarize what the customer is expecting: Customer is seeking information about why his climate controls aren t working properly.

Customer is in rental.
Justin Green, SA at dealer 26856, called to speak with Customer Advocate (CA) MG1246. Writer provided the CAIR number to SA, then warm transferred dealership to CA MG1246.
SA Justin contacted writer stating they could not duplicate the customer concerns, writer informed SA that TS will be contacting them and we will document this but to further discuss this with them as well.
CAIR ESCALATION UPDATE
SEE STAR CASE# 61135042 FOR INFORMATION
Begin Customer Message reviewed:
MELBA. I thought I would briefly describe my problems with my new JGC 14 Summit (Diesel). In the last week I have numerous issues with my new JGC 14 Summit (Diesel). Entire radio function (Sirus, and regular radio) went out. I updated the software at the suggestion of the Jeep customer care call center to this >>>>> (UCONNECT 8.4AN_RA4 (14.05.03). So the upgrade fixed the radio only functionality but subsequently other issues have popped up. I set the temperature control at 65 at bi-level and or front and the system returned hot hot air. I tried everything and the only way to get cool air was to turn on the actual air conditioning system. It happened to be 37 degrees outside so perhaps the computer thought I wanted hot air (I did not have auto climate control on either!!). Then hours later my phone lost connectivity via bluetooth. Then I turned the car off and on and phone worked via bluetooth but I could not stream music via bluetooth. I have an Apple iPhone 4S. I have owned the vehicle for two months and only in the last four days have a begun to experience all these issues. To me it sounds like software issues.
End of Reviewed Customer message
CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted] FOR INFORMATION
Customer called. Writer transferrred customer to ext 66170.
Customer called stating the dealership has contacted him and informed him his vehicle is ready for pick up and customer would like to know exactly what repairs were completed, writer stated we have not had a chance to contact dealership and we will do so and contact customer back.
Writer dialed SA Justin left message inquiring what repairs were completed to customer s vehicle upon customer s request.
Customer is contacting CAC to update his Case Manager. Agent inquired if customer would like to leave a voicemail with CM, customer declined and stated agent can just add notes to the file.
Customer states he picked up his vehicle yesterday from the dealership and the issues with the Air Conditioning are still present. Customer states it is currently 41 degrees outside, he has his climate control set at 65 degrees, and it is blowing out very hot air. Customer states his Uconnect Access assist button does not work - he attempted to contact us this morning through the Access Assist button but it did not work and produced an error message stating he was not a Uconnect customer. Customer and agent also experienced a dropped call during the

conversation. When agent contacted customer back customer stated that was the second time he experienced a dropped call since picking up the vehicle yesterday.
Customer states he is beginning to think about lemon law for this vehicle.
Agent advised customer the updates will be documented and his case manager will contact him back at [redacted].
Customer contacted writer stating he just picked vehicle up yesterday and his 911 assist button is not working and when he asks for cold air the heat comes on. Writer stated we will contact dealership and see what we can do at this time and will contact customer back.
Writer dialed dealership left message with SM Brad informing him of customer s concerns and to contact writer back.
Writer dialed customer and informed him we have left a message with SM Brad and customer stated he just got off the phone with SA Justin and he informed him the vehicle needs to come back to dealership and customer stated he wants a comparable vehicle and writer stated if one is available to go ahead and get one and as soon as we here from SM we will contact him back.
Writer dialed SA Justin who stated he got a rental vehilce that customer was happy with and customer was to drop his vehilce off and pick rental up, but customer called SA this morning stating he contacted uconnect and problem seems to be better and he will contact SA in a week or so to see if this is characteristic of this vehicle and if issue comes back.
Writer dialed customer who stated uconnect resolved his concerns with assist button and SA Justin is going to contact customer on the heat concern, writer informed customer we are sorry for the inconvenience and would like to offer him a Max Care SC writer stated we will be following back up with SA Justin 4/14/14 and will contact customer back for more information so we are able to add SC.
Writer dialed SA Justin and was informed he is off today and writer inquired if SA has voicemail and was informed he does not.
Writer will be offering customer SC WMX5100N.
Writer dialed customer left message we will be following back up with him 4/16/14.
Writer dialed customer and got exact mileage and address and stated we will be submitting this and SC will be added to customer vehicle and he will be receiving packet in the mail explaining everything this SC covers. Writer informed customer we will be closing case and if any further issues should arise to contact us back.
WMX5100N Contract created. Contract number is [redacted]

I purchased a 2014 Jeep Grand Cherokee Overland in June 2013 (ordered in April) and have been experiencing a multitude of problems. Firstly, water somehow appeared in the compartment underneath the passenger seat. This was due a leak in the sunroof and was eventually corrected Next, after only 3000 miles, my 5.7L HEMI V8 engine completely died and needed to be replaced. Unfortunately we were actually almost 100 miles from our house on a trip when the engine broke. The entire process of replacing the engine took several weeks and required me to work with a dealer I did not know that was almost 100 miles from my house. It almost feels like I find a new problem every time I drive the Jeep. Below is a list of the major problems I have experienced. There are many more small issues I am not explaining in detail but am happy to discuss if you have an interest. -Water leaking into compartment underneath passenger seat and possibly other places. The leak has been fixed but I do worry about the possible long-term effects of the water problem on the electrical system, possible rusting, carpet, etc. -Engine broke at 3000 miles,

requiring complete replacement. -ACC/FCW system turns on and off every few minutes with a message that I need to clean the front sensor. I have cleaned the front sensor thoroughly too many times to count but the problem still persists. Additionally, the FCW system will kick in and brake randomly, even if I am driving on an arrow straight road with no cars anywhere near me. This issue concerns me because of the obvious safety risks given the vehicle randomly brakes and has done so in significant traffic several times - not to mention the fact that I paid extra for a feature that I cannot use. I have taken 2-3 trips to the dealer to try and get these problems fixed but they claim not to be able to replicate the issues. Their 'solution' is to tell me to clean the front sensor yet again. -Since the engine replacement, on occasion (2-3 times recently) when starting the Jeep, I get a warning prompt that says 'Service Electronic Braking System' and the Jeep won t start. I then have to turn the Jeep off for a few minutes after which so far to date the Jeep will restart. -Many little annoyances such as shaky backup camera, bluetooth not working, trim out of line, etc. I love the Jeep but no longer trust it given my issues to date nor would I be able to recommend it to a potential buyer if asked. We are also looking at possibly buying 1-2 more Chrysler products in the next year but I am unable to justify buying anything else from Chrysler until our current situation is satisfactorily resolved. The two vehicles I am looking at possibly purchasing are the Chrysler Town and Country minivan and a Jeep Grand Cherokee (either a Summit or an SRT). I know friends who have had a much better experience with Chrysler and Jeep cars and I do believe that my bad experience is unique. I do, however, feel strongly that my issues need to be resolved as it does appear so far that I bought a lemon and might even be able to qualify as such under the Lemon Law. Frankly, I would also strongly consider 'trading in' my Jeep with the value credited towards the purchase of a new Jeep if possible or if the issues I am experiencing can not be adequately resolved.
*****END OF CUSTOMER EMAIL*****
Dear [redacted],
Thank you for contacting the Jeep Customer Assistance Center.
We are very sorry to learn of the problems you have encountered and have documented your concern.
We appreciate the time and effort you took to tell us of your dissatisfaction in our product.
The handling of your case will require a call to the Dealer. The Dealer is currently closed. What I am going to do is assign your case to a case manager that will contact the Dealer on your behalf, and continue to work on this case. The case manager will be contacting you, once the Dealer has been contacted to provide you with an update.
This will ensure that your concern is reviewed as quickly as possible
Thank you again for your email. Should you require additional assistance, or have any new information to provide, please reply to this email message or call 1-877-I-AM-JEEP (1-877-426-5337).
Sincerely,
Carolyn

Product - Electrical - Unknown - Intermittent or Inoperative - Default	a sensor in the lower bumper
Corporate - E-Reimbursement - Default - Default - Default	callibration on adaptive cruise control sensor did not repair vehicle

Briefly summarize why the customer is contacting Chrysler: Customer is calling because the vehicle was in a low speed accident (about 2 mph). In the accident a sensor in the lower bumper for the ACC and assisted Braking was dislodged. Customer had the vehicle repaired at the insurance company s recommended IRF and then taken to the DLR 45508 for calibration. Customer was still experiencing issues with the sensor so she took it back to the dealer. DLR found that a bezel was not installed. Customer brought the vehicle back again to get the bezel installed and recalibration. Customer is still having issues with the sensor. Customer made an appointment to get the vehicle looked at again at DLR 45508. When she got there she was advised that there was only one tech that can do the work and he cannot work on the vehicle that day because he has too much to do. Customer would prefer to work with another dealer from here further. Vehicle is leased and customer wants it noted that she has made every attempt to repair the vehicle. Customer is concerned that there is going to be problems with the returning of the vehicle because this sensor is not able to be fixed.
-

Writer spoke with SA Melanie. SA says that the vehicle was in a front end collision and came in on 04/02/2014. SA Melanie transferred writer to SA Paul. SA Paul programmed the ACT and callibrated the cone around camera to black everything out. It prevents it from picking up things around it and messes with the cruise control. SA says they do not have the vehicle, that customer picked it up last week.
SA Paul states last mileage was 11602.
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted] Left message.

-
Writer left message for customer reguarding what dealership customer took vehicle into. Writer let customer know writer contacted customers current dealership on file CALIFORNIA SUPERSTORES SAN and they informed writer they had not seen vehicle currently. Writer left CM contact information.
Writer will follow up by 04/14/2014, Monday.
Customer calls to speak with their Case Manager.
Transferred the customer to MR1357 at ext 66235,because the primary CM was not available.
Customer contacted writer explaining their frustration with their vehicle repairs. Customer explained there vehicle was in an accident back in 2013. In the accident there lower bumper was damaged therefor also damaging a sensor on the bumper. Since the accident the sensor has been recalibrated 2-3 different times and still is not fixed. With the sensor not being repaired right it is causing problems with codes coming up and other problems with the vehicles electrical system. Customer is very unhappy with their treatment from the DLR they have been going to. Customer stated they have tried to contact SM three different times this week and has not been called back. Customer said they do not want to go to this DLR anymore because they feel they cannot fix or calibrate there vehicle since they have tried a few times in the past. Customer stated they were told there is only one tech at this DLR who can calibrate. Customer said they have paid $300.00 thus far for repairs and is being told by their insurance costs will not be covered because the vehicle has already been worked on and repaired. Customer advised to call their cell numbe[redacted] and make this the primary number on their case.
Writer advised a follow up no later than 4/11/2014.
-
Writer spoke with customer. Customer says that they supposedly corrected and replaced a part and callibrated it. Customer says there is a mechanism called a cruise control sensor that instead of her hitting the brake it puts her in cruise control mode. Customer says it puts an error message on her display even if she is not in cruise control, and its when she is on the highway driving, not in town. Customer says she heard from her insurance that they were not going to pay for the claim to recallibrate the sensor again. Customer says she brought the vehicle back to the dealership for them to look at and they told her there was a sheild or bracket that needed to replaced and they put it on and recallibrated the sensor and it still has an error message. Customer says

if there are ongoing expenses from a different dealership she does not want to pay out of pocket. Writer let customer know writer will consider cost assistance if she wants to take the vehicle into a different dealership for a 2nd opinion. Writer let customer know that writer will research dealerships in her area but does not set up appointments. Customer let writer know that she has a leased vehicle and will return the vehicle if she can t get it fixed because this is a safety feature that came with the vehicle. Writer let customer know writer will contact customer back no later than Monday, 04/14/14 with dealership

-
Writer spoke with SA Michael. Writer asked SA whether he had done work with Callibration of sensors and whether they had a tech that could do this work. Writer explained where and what the sensor was and is doing per lines 84-88. Writer let SA know customer is looking to take her vehicle in for a sencond opinion because this is a repeat repair. Writer let SA know writer is considering cost assistance because of this being a repeat repair. SA let writer know they could definately do the work and to have customer schedule an appoinment to bring her vehicle in because they would have to look at the vehicle. Writer let customer know writer would follow up with SA no later than Wednesday, 04/16/14.
Writer gave customer information for Stoneridge Chrysler Jeep Dodge of Dublin Service: (888) 804-6949.
Service Manager: Hank
Service Advisor: Michael
Writer spoke with customer. Writer let customer know SM name Hank and was referred to SA Michael. Writer let customer know SA let writer know they could do the callibration work and that they had a tech that could look at the vehicle but that customer would need to schedule and appointment and to speak with SA Michael. Writer let customer know that they wanted to look at the vehicle before they would know the cost. Customer let writer know that customer would contact them to schedule an appointment. Writer let customer know writer will follow up with customer no later than Wednesday, 04/16/2014 after contacting SM\SA.
-
Writer spoke with SA Michael. SA says that he did schedule an appointment for 04/21/2014 for customer.
Writer let SA know writer will follow up with him no later than Tuesday 04/22/2014.
Writer spoke with customer and customer disagreed with the appointment date. Customer says she had a discussion with SA and that her appointment was suppose to be for tomorrow, 04/17/2014 at 09:30 am. Customer let writer know she will follow up with the dealership and make sure they did not change the date for her appointment. Writer let customer know writer will follow up with her by Friday, 04/18/2014 to see is she was able to make the appointment or if it had been changed.
Writer received an inbound call from customer requesting to speak with his CM. Writer transferred customer to CM AG1365 ext: 66352.
-
Writer spoke with the customer. Customer says that the dealership will not work on her vehicle unless there is some kind of cost assistance or financial issue was resolved. Customer says that SA Roger is her SA. Writer handed phone to SA Roger and he stated that he has to look at the vehicle before he could give warranty pricing or know what it going on with the vehicle in the first place. SA took CM contact information. SA handed phone to SM Hank. Writer spoke with SM and he let writer know that if this is a repair that has to do with the collision he will repair the vehicle and submit the issue to her insurance. If this is a repair that has nothing to do with the accident and there are other issues he will submit it under warranty and if its not under her warranty we can consider some kind of cost assistance. SM let writer know he will have

discussion with customer. Writer inquired about a rental for customer if she had to leave her vehicle there. SM let writer know he would have his SA contact writer back if we need to do something about rental. Writer agreed. SM handed phone back to SA and SA let writer know as soon as he gets more information he will contact writer back.
-
Write spoke with SM Hank. SM let writer know customer scheduled an appointment to bring the vehicle in on Monday, 04/21/2014. SM says he does not know yet whether customer has a warranty or insurance issue with the vehicle until she brings the vehicle back in. SM says that there is an issue with the cruise control. Writer let SM know writer will follow up with SM and customer no later than Monday, 04821/2014.
-
Agent attempted to contact dealer Service Manager Hank, however, SM not available. Left message for a return call at extension 66352 regarding whether customer brought vehicle in for appointment.
Writer spoke with customer. Customer says she took the vehicle back into the dealership today, 04/21/2014 and they have her vehicle at the dealership. Writer let customer know writer will follow up with SM and then customer tomorrow, 04/22/2014 regarding diagnosis\repairs.
Writer spoke with SM Hank. SM says customer just dropped the vehicle off today, 04/22/2014 instead of yesterday. SM says they do not have enought information for repairs yet. They are in process of diagnosis. SM let writer know to follow up with him by tomorrow, 04/23/2014. Writer agreed to follow up with SM and then customer.
Writer spoke with SA Mike. SA says the sensor in the front active cruise control sensor did need to be callibrated. SA let writer know current SA working on the vehicle is Roger. SA says the current mileage on the vehicle is: 13760. SA let writer know writer will need to follow up with SA Roger or SM regarding cost. Writer let SA know writer will follow up no later than tomorrow, 04/24/2014
Writer left message letting customer know writer contacted customers dealership and that they are in process of callibrating her front active cruise control sensor. Writer let customer know writer will follow up with customer tomorrow after contacting her SM.
-
SA Roger left message for writer letting writer know the callibrations for customers vehicle were completed and the vehicle has been returned to customer.
-
Writer spoke with customer. Customer says the adaptive cruise control does not display the error message it was displaying for the cruise control. Customer says it appears to be functioning properly and customer is satisified with repairs so far. Customer says the only problem she has is with the previous dealership and the money she spent for a repair that was not done properly. Writer let customer know writer would be willing to help with cost assistance because of this repair being a repeat repair. Writer let customer know writer will send customer the link at customer request so customer could send her documents. Writer let customer know what to put on each document when sending and that it can take between 24-72 hours for the document to attach to the case. Customer let writer know writer did meet customer expectation when pursuing repairs with a dealership and following up with customer. Writer let customer know as soon as writer receives customer documentation writer will contact customer, but no later than 04/29/14, Tuesday.

Corporate - Rental Vehicle - Default - Default - Default	Customer request rental vehicle for vacation trip

Briefly summarize why the customer is contacting Chrysler: Customer is contacting Chrysler to inquire about coverage for a rental charge. Customer is currently driving the vehicle however due to a malfunctioning part with the forward collision warning system causing the vehicle to randomly apply the brakes and deploy warning signals. Contacted service manager Kenny at dealership code 65888 who concurs that the vehicle is unsafe to drive long distances. Asked service manager Kenny if they would be able to make a loaner vehicle available to the customer or a rental however Kenny declined indicated that he would not be able to provide a loaner vehicle for a vacation trip and furthermore he has already provided 6 days of rental to the customer.
Briefly summarize what the customer is expecting: customer expects a rental provided in place of her vehicle and covered by Chrysler for the duration of a vacation starting in a few weeks.
Customer was advised that due to the nature of their rental request a call back is required and will take place by close of business today.

Briefly summarize why the customer is contacting Chrysler:
Customer states going 60-20 the vehicle just stopped on the highway.
Customer states she no longer wants to repurchase.
Customer state she wants to file for lemon law.
-
Briefly summarize what the customer is expecting: Customer state she wants to file for lemon law.
-
Agent advised customer of where her file was presently.
Agent advised customer that she would have to refer to her blue and white

booklet.
- Received a call from customer, who advised she was driving yesterday when the Brake Warning Light started flashing/beeping, warning her that a vehicle was in front of her, although there was not a vehicle in front of her and then the vehicle went from
60-20 mph on its own in about 2 seconds and she started smelling something burning. Customer advised the situation was very scary and she s lucky no-one was hurt.
- Customer advised the vehicle has already been Gengras CDJ 8 times for the same Brake Warning Light concern, so she is 'done' at this point. Empathized and apologized to customer for the inconvenience, as I can certainly understand her frustration. Provided customer with her Case Manager s (js2481) contact information and then transferred her to js2481 voice mail for a return call- customer understood.
*** Jason with the I2R Customer Resolution Team is now responsible for this CAIR. If the customer should call, please direct them to contact Jason directly at 214-583-2174. Thank you. ***
Customer LVM requesting return call ASAP.
Completed initial call to customer and apologized for vehicle concerns. Advised I would like to assist and empathized for customer s safety concerns. Customer states the number of repairs is unacceptable and she is done with this vehicle. I advised I cannot guarantee we would offer to replace her vehicle, but customer allowed me to reassure her that we would resolve her concerns. Agreed to follow up 4/11 or 4/14 after I have spoken with the dealership. Customer confirms she has alternate transportation.
Called Gengras (41657) spoke with SA Chris. Vehicle is at dealer but have not begun diagnosis or duplication. Advised we would escalate to TS to assist in diagnosis and authorize repairs. Requested SA not release vehicle until speaking with TS and SA acknowledged.

CAIR ESCALATION UPDATE
SEE STAR CASE#[redacted] FOR INFORMATION
Called Gengras, Amy states SA is unavailable to provide part information at this time.
Called customer and confirmed she is aware of vehicle and parts status. Customer is upset she was not provided a rental. I confirmed that she has access to a rental through a friend and advised if that were not available I would authorize a rental for her through dealership. Customer understands and appreciates the assistance but advises it has been the same issue all along and she wants a new vehicle for the remainder of her lease. I advised I am not aware of a key for key process that would prevent her from dealing with usage and mileage fees. I advised customer this is the first repair I am aware of for automatic braking concern. Customer confirms and states she is tired of it. I apologized and stated that once these concerns are resolved I would be happy to investigate reimbursement. Customer states part ETA this week and agrees to follow up again this week.
Called Gengras, SA Mike advises vehicle repaired. States previously customer did not want to pick it up, but is not certain customer has been notified.
Called customer advised vehicle is repaired and she could get a call to pick it up today. Customer states she has no faith in the repairs because it has been repaired several times. I advised this is the first repair

for the automatic braking feature that I am aware of. Requested customer drive vehicle before leaving dealership to confirm all issues are resolved. Customer agreed.
Because of customer s safety concern and for customer satisfaction, AM is going to buy back vehicle. ISG buyback documentation was submitted on 4/21/2014.
LVM for AM EGP8 to confirm notes before closing.
CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted] FOR INFORMATION
EGP8 confirms submitted ISG documentation. AM addressing customer concerns/treatment with dealer. Agreed CM would call customer to advise replacement.
LVM for customer requesting call back.
Customer called back advised she is aware of offer and thanks me for my help. I advised a new CM would be in contact 5-7 business days and that the process can take 30 or more days. Customer understands and thanks me for the call.
Customer LVM advising her vehicle now has a recall. Customer requests reimbursement for monthly car payment since she will have to take to the dealer again.
Called customer to confirm concerns. Customer seeking reimbursement for repairs during the month of April as she did not have her vehicle. I advised that since the vehicle has been replaced, that offer would supersede reimbursement consideration. Confirmed for customer that there are no active recalls on her new vehicle (EC[redacted]). Customer requests to speak to someone above me. I advised I would request my supervisor make contact, but could not guarantee a different response.
Called customer at customer s request for a supervisor call back and left voicemail requesting a call back to discuss customer concerns.
Sent dealer check 2 day ups

Product - Electrical - Electronic Vehicle Security - Defective - Default	Customer states that EDIC reads 'clean radar sensor in front of vehicle'

Customer came in on service on 2/24/2014 indicating that there is a message reading 'Clean radar sensor in front of vehicle' Dealer inspected vehicle and found ACC sensor had to be replaced. Dealer ordered part and ETA on part is the week of 4/14/2014. Customer is upset that part is still not available. Per customer satisfaction AM offered customer a convenience package. Customer accepted goodwill offer.
Customer called back service manager at Bryden (58364) and changed his mind about agreeing to oil change service contract. Customer said when driving back to the dealer to get his back order part installed he picked up a nail on the sidewall. Customer feels that he should be reimbursed for tire replacement because of all the hassle he has been through going back and forth for a part that was on back order. AM agreed in place of service contract to reimburse customer for tire replacement. Parts and labor with tax is $203.14.

I called and left a message for you yesterday (and have not heard back). Within a year, I ve had this car in the shop multiple times (last time was for the blower which required multiple trips). Now, it s for the service bag failing, the ACC/FCW broken, and the phone system saying it needs service. This is simply unacceptable. Please call me at [redacted].
End of Reviewed Customer message
Begin Customer Message reviewed:
Jessica - as I mentioned before, we ve had a blower fail on the car, service airbag fail, adaptive cruise control has to be fixed, and a dead pixel on the LCD display - all within a year. With all that s gone wrong in the space of a year and the inconvenience I ve had to endure due to constantly having this car in the shop, I would like you to look into adding a Jeep extended warranty on the vehicle at no cost to me. The quality on this vehicle is currently unsatisfactory and had me greatly concerned.
End of Reviewed Customer message
[redacted] called requesting to speak to CAJJ869 . Writer warm transferred customer to CA for further handling.
Mr. [redacted] Called back stating his level of concerns with vehicle and that vehicle is not even a year old yet, and is frustrated at this point. Customer biggest concern is he has been returning to dealership for multiple times for the blower on three different times. Now the air bag, adaptive cruise control is broken and the dead pixel on the LCD display is not working. Customer claims that vehicle will reach its 20 day service customer is expecting to pick up his vehicle by Saturday and be fixed. Customer states with the amount of convenience and experience he has gone has not been good. Customer is seeking to get extended warranty for his vehicle due to the experience. CA acknowledges customer frustration but made customer aware that CA has Chrysler Corporate Service Engineers will be working with your dealership technicians to see if they address his concerns. CA advised customer if he can give CA a chance and dealer to see what needs to be done for his vehicle. Customer agreed CA also informed customer that CA will look into some type of SC or extended warranty for vehicle but no promises are made due to CA will need to verify what will merit his vehicle type customer agreed. CA will follow up with customer if any updates become available from dealer or TS.

****** END OF SUPPORT ESCALATION ****** by T3755BF
67847 DWAYNE LANE S CJD dialed 425-353-3855.
Parts Manager Jeff states they did do an upgrade for part to VOR but ETA showing 06/19/14.
Contacted customer dialed [redacted]
CA advised customer that documents for reimburse has been received and he will get reimbursed one month car payment of $671.97. CA advised customer of part being expedited CA made customer aware that part was on back order and dates showing shipping out the week of 05/26/14. Customer states it has almost been a month without his vehicle and his biggest problem is that he bought a vehicle to use for towing and haul his boat. Customer states he has not been able to use his vehicle and he needs something different for a rental vehicle. Customer states he is at a point where he might consult with an attorney at this point due to vehicle being down for 30 days which within warranty classifies as a lemon. Customer states this is arbitration contract and he seeking to get a vehicle same like his and same monthly payments as well. CA asked customer if he is seeking the lemon law customer stated no but looked it up on his state lemon law for the 30 day period. Customer states there is two directions he can go with. Customer states he go to the attorney general office and if vehicle is unusable it s a lemon define by the law at this point. Customer is proposing at this point to seeks to get another vehicle that is not a lemon and work functionally. CA made customer aware that if he is requesting replacement that CA is unable to answer his question and that case will be sent to another department to review his concerns. Customer understood but stated he just wants his vehicle back; CA understood and apologized for the inconvenience but is trying to push his case as far as it can go. Customer states he will wait for part to arrive and if part does not arrive on the week of 05/26/14 customer would like to reimbursed anther car payment for June due vehicle sitting at dealer. Customer feels that this is more fair for him CA understood but made no promises. Customer is seeking to get a rental vehicle that has a hitch so he can use vehicle to tow his boat. CA understood made no promises for rental arrangements due to dealer provided the rental and CA can not make any promises if vehicle is not available.
[redacted]
BOTHELL , WA-[redacted]
Customer wanted to know why cant dealer take part from another vehicle and put in his vehicle. CA advised customer that some dealership will not allow that to happen due to certain modules.
67847 DWAYNE LANE S CJD dialed 425-353-3855.
SA Rick states he was already advised by customer that he wanted a different rental vehicle with a hitch. SA states he advised customer that rental places do not have rental vehicle that come with hitches. SA states its policy for rental places not to have hitches, SA states customer is in a rental vehicle. CA advised SA that customer wanted to know why the dealership can t take a part off another vehicle and put it in his vehicle. SA states they will not be able to due that because that VIN is programmed into the module.
Writer chatted with TS/KY to advise the part ETA is 5/26/14 as limited by supplier is on VOR status

Begin Customer Message reviewed:
Jessica-I received my car on Friday. A couple of issues: 1. I left it with a full tank, but more than 150 miles had been driven on it and it was not filled back up. 2. After over a month of having the car, it should have been detailed. There were spiders inside and outside of the car. I am in the process of having it detailed beyond what I ve done to rid the car of insects. 3. It was personally used (test driving does not mean taking it to your home and running errands with it). 4. The gear shift is sticking, which means I ll need to bring it in yet again for service. I m not al all happy that I have yet another problem. With 36 days out of service and a lot of inconvenience to me, I am going to kindly ask that Chrysler purchase and install Running Board, Molded (Part # 82212685AB) at no cost to me. You can find the part information here: http://www.mopar.com/part/82212685AB?s=357393&i=4317005&b=jeep
While I appreciate what s been done thus far (though I have yet to receive reimbursement for the May payment that has already drawn from my account), continued problems with the car require and the state in which it was returned to me require that Chrysler do more. You can reach me at [redacted]
Regards,[redacted]

Dealer - Parts - Transaction - Parts N/A / Backordered - Default	customer seeking assistance to get part which is on backorder
Dealer - By-Pass - Default - Default - Default	

Briefly summarize why the customer is contacting Chrysler: The customer called and stated that he is seeking assistance to get parts for his vehicle. The customer stated that the adaptative cruise is not working and that the ALLEN MELLO CHRYSLER JEEP Dealership have had to order a part to complete the repair and he has been waiting since March 11/14. The agent updated the customer s information in COIN. The agent provided the customer with his CAIR #: 24883063. The customer stated that he was calling as he had received a letter that stated that if he had any concerns to call Chrysler for assistance. The agent advised the customer that the agent would need to call the ALLEN MELLO CHRYSLER JEEP Dealership Parts Department to get information about the part that is on back order. The agent called the ALLEN MELLO CHRYSLER JEEP Dealership and obtained the part information as found below. The agent advised the customer that his CAIR would be sent to the Parts Support team for parts resolution for further assistance.
Briefly summarize what the customer is expecting: Assistance to get the part to complete his vehicle repair.
Writer contacted ALLEN MELLO CHRYSLER JEEP (Dealer code 42174) and spoke with Parts Advisor Deryk
who stated part information for order is as follows:
Part #: 68223771AE
Part Description: Adaptative Cruise Control Sensor
Order #: 11MARS
ETA: May 8/14
Is customer in rental? No
Is the vehicle off road? No
Order type: Special Handling
Writer advised customer that their parts concern will be escalated to the Parts Support team for parts resolution, and that their Case Manager

will provide them updates on the status of the part within 4-5 days.
If an update is received sooner, customer will be contacted sooner.

I am not pleased with the extended period of time it has taken to obtain a warranty repair part for my new car. The Adaptive Cruise Control (ACC) / Forward Collision Warning system was one of the most important features when I considered purchasing a Jeep, and I m very disappointed with the fact that it has been malfunctioning since day 1, and also with the inability for Chrysler/Jeep to repair it in a reasonable amount of time.
Is Chrysler prepared to offer any kind of consideration for almost 3 months that I ve had to wait to have this feature repaired?
Respectfully,

Pat Shine

[redacted]Franc with Chrysler and Jeep Parts Corporate.
I sincerely apologize for the concern you have had with the adaptive cruise control. Certainly, no one at Chrysler or Jeep wanted you to wait this long for a part, myself included we have been doing our very best to loosen up the backorder.
We can definitely discuss some form of compensation for the time you haven t been able to use that feature, and when your vehicle is 100% done and returned back to you, we can discuss this further. In the meantime, any questions please respond to my email or call me direct.
I appreciate your patience.

The customer is being handled by the ECS Team
CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted], Customer hears a ringing sound and then the Service 4 wheel drive, Cruise control turned off, and forwards collision warning.
Mileage: 5500. If Customer needs to bring in vehicle for diagnosis writer will setup an appointment with dealership 23563 for 4/17/2014 in between 9-10 am to have customer drop off vehicle and have rental available for customer.
Writer contacted dealership 23563 at phone # 815-544-9211 and spoke with SA Chad and SA Chad Spoke with enterprise and will be able to setup a rental vehicle for customer and appointment to be on 4/17/2014 between 9-10 am. Writer will inform customer.

Writer contacted customer at phone # 6[redacted]1 and writer informed of lines 22-25 to customer.
Writer contacted dealership 23563 at phone # 815-544-9211 and spoke with SA Chad and confirmed customer has not dropped off vehicle yet.
Writer contacted customer at phone # 6[redacted] and confirmed customer is on way to appointment and writer informed customer that dealership will do a diagnosis and once completed writer will escalate to TS to better assist in getting this resolved for customer.
Writer took call from SM/ Chad who advised there was a small amount of water in the DEF connector, SM is seeking authorization to clean and put protectant seal on the connector. Will drive vehicle a few more times and then call CA for approval to release the vehicle. Provided the approval and added DM notes.
########## ECS DIRECT-TO-DEALER ##########
ECS/Customer Care is sending this case to your dealership because an ECS warranty repair has been approved. Remember ALL PRE-authorization requirements for Digital Imaging and the Powertrain Service Center still apply. When submitting for pre-authorizations include this case number. DM Notes have been entered into GCS indicating Customer Care approval. When repairs are completed, submit your claim as you would normally and update this case and return it to Customer Care.
##
SA Chad left message informing writer that repair completed and released to customer.
Writer contacted customer at phone #[redacted] Writer is contacting customer to verify repairs and to contact writer back at phone # 1-800-763-8422 Ext 66384.
Writer contacted customer at phone #[redacted], Writer is contacting customer to verify repairs and customer doesn t trust repairs are completed and wants 6 thousand dollars writer informed 3 vehicle payment and a service contract were offered to be put on vehicle. Vehicle is a diesel vehicle. Customer wants a better offer. Writer will look into situation and get back with customer.
Writer will follow up with customer on 4/25/2014.
Writer contacted customer at phone # 6[redacted], custoemr offered a 6yr 100,000 mi and declined and customer wants more then 3 vehicle payments that customer has been offered writer will look into option but makes no guarantees and will follow up on 4/29/2014.
Writer contacted customer at phone #[redacted], Customer will not accept offer of 3 vehicle payments and customer feels that $6000 or dealership offering customer a $50,000 trade in value on customers vehicle is a reasonable expectation. Customer doesn t want to accept the 3 vehicle payments.
Writer contacted customer at phone # 6[redacted], and informed same offer writer informed need to have vehicle brought in for diagnosis for the moisture issue in the headlights and customer stated it has been brought in and dealership knows the issue and will not bring it in again and to contact back once writer finds a resolution for the headlights.
If contacted back per lines 381-383 on case #[redacted] it is a normal characteristic of the vehicle to have moisture in the headlight. If customer thinks the moisture in the headlight is too excessive to contact dealership and setup an appointment.
Writer contacted dealership 23563 at phone # 815-544-9211 and spoke with SM Chad and verified that no appointment has been setup by customer. Writer informed of the headlights and customer having a complaint about moisture in the headlights.
Writer contacted customer at phone #[redacted] Left Message informing of per lines 381-383 on case #[redacted] a normal characteristic of the vehicle to have moisture in the headlight. Writer also informed that offers made remain the same and to contact writer back if needing to at phone # 1-800-763-8422 Ext 66384.
Writer contacted customer at phone #[redacted]1 and was informed that customer will contact writer back since customer is and work and writer informed would wait for customers call back.
Caller SPORLErequesting to speak with Case Manager.
transferred to nic DJ464

Customer was transferred to writer by BA186 and Writer informed customer that write is willing to do 3 car payments and the consumer convince package SC. So customer countered with 4 car payments and the consumer convince package SC and customer would be done with this.
Writer contacted customer at phone # [redacted] left message looked into situation and to contact back when able to at phone # 1-800-763-8422 Ext 66384.
Custome left messge for writer asking to be contacted back.
Writer contacted customer at phone # 6[redacted], and Writer informed customer that writer is willing to do 3 car payments and the consumer convenience package SC. Customer is upset at the fact that writer has only been offering 3 vehicle payments and the consumer convenience package SC. Customer does not want to speak to writer anymore and thinks writer is not helping customer anymore. Customer does not want to speak to the supervisor today because the customer does not have time and wants to be contacted back tomorrow. Writer will inform supervisor.
********** Supervisor Call**********
Writer contacted customer at phone # [redacted] Left a message with JP1353 contact information and a follow up later in the day will be made.
********** Supervisor Call**********
Writer contacted customer at phone # [redacted] 1 Customer is demanding at least 4 payments and a MVP. Customer is saying he was with out his vehicle for a total of 8 days. Customer is not willing to hear about a MVP as he does not plan on keeping the vehicle past a year. CA is only able to offer reimbursement of 3 vehicle payments. Customer is very upset and frustrated and was using vulgar words. Ca jp1353 stated the offer will be good for 30days and if the vehicle is not repaired like customer is stating the vehicle needs to go back to a dealership for repair. Customer said a few more vulgar words and said he did not want to speak with Derek again and unless jp1353 could get someone who was willing to give him what he is asking for he does not wish to be contacted back.
Writer contacted dealership 23563 at phone # 815-544-9211 and spoke with SA Joe and was informed no appointment with dealership and customer has not come into the dealership.
CLOSED LOOP UPDATE - no need for additional follow-up.
[redacted] called, requesting his Customer Advocate. Transferred customer to DJ464 at ext 66384.

OMC# 26542743Order# EE0402 FOR PN: 68109355AF IS RESOLVED
26519 PRO CJDR dialed 303-469-1931.
SA Kevin states vehicle is repaired as of Friday customer had picked up his vehicle that day when they installed the adaptive cruise control. SA customer was going on a trip so he needed vehicle back, SA also states they were unable to duplicate the noise in rear end of vehicle. SA states part came in late Thursday or early Friday morning but SA will give customer a call back in a few days or up to a week to see how repairs are doing. SA thinks customer might return from his trip.
3rd attempt made to contact customer [redacted]
Left message that the next attempt will be made 04/24/14.
4th attempt made to contact customer [redacted].
Customer states dealer took care of one repair but there is still one concern with vehicle that has not been resolved. Customer states he hears a noise coming from the rear end of vehicle inside. Customer states noise sounds like rain hitting the vehicle but every time vehicle goes into dealer they are unable to duplicate noise. CA understood asked customer when he will return customer states he will try to drop vehicle off Monday due to customer is going on a trip. CA suggested customer to contact dealer to make an appointment so that way he can drop of his vehicle and CA can work with dealer. Customer agreed CA offered to follow

up Monday to make sure if he had dropped of his vehicle.

SA Louis states vehice is there but has not been looked at yet but thinks it will be later today. SA states SA Kevin is there CA advised SA if he could inform SA Kevin once diagonsis has been completed to contact TS. SA states he wants to verify if SA has TS contact info.
5th attempt made to contact customer [redacted]
CA spoke with customer advising him that CA confirmed with dealer his vehicle is there but they have not started the diagnosis. CA advised customer once dealer starts diagnosis CA had already contact TS to follow up with dealer SA. Customer understood asked what concerns CA advised customer of the noise coming inside of vehicle that sounds like rain hitting the hood of vehicle. CA asked if there was a certain mileage when the sound occurs customer stated that sounds is there you just have to hear it. Customer agreed and states he will be out of town until Thursday 05/01/14. CA advised customer if CA has any updated info from dealer CA will follow up with customer.
Kevin, SA, called to speak to CA. Writer transferred to extension 66391.
SA Kevin called back regards to customer concerns with vehicle, SA states the tech did diagnosis and found noise coming from rear of vehicle. SA states they were able to find rear spoiler to be lose, noise coming from rear gate hatches and license plate was making rattling noise as well. CA advised SA that CA had contacted TS to get in contact with them to see what TS suggests as well.

Uconnect 8.4A/8.4AN Owner s Ma
Owner s Manual
Briefly summarize why the customer is contacting Chrysler: Customer states that his forward collision warning braking system did not function when a vehicle had cut him off yesterday. Customer states that he is unsure if it is an issue or if he is setting it up wrong. Customer further inquired about P14 recall and wanted to know if it could account for the brakes on the vehicle. Customer further made request for owners manuals.
Briefly summarize what the customer is expecting: Customer is expecting product information and owner manuals.
Agent informed customer of the forward collision warning system is dictated by on off switch for the vehicle and that it would automatically apply brakes when the vehicle would sense a possible collision and that if he feels that the feature is not working that he would need to inquire further with dealership to ensure that there is no issue with this system as it would be dangerous to test. Agent informed customer that his vehicle may possibly be recalled under P14 and that he would ensure customer obtains updates for recalls. Agent informed that owner manual would arrive within 7-10 business days via ups.
The part required to provide a permanent remedy for recall P14 is currently not available.
Advised customer that their case will be assigned for special tracking until the part becomes available.

Advised customer that an email will be sent
when second letter detailing part availability
is sent to customer.

Owner s Manual
Customer was seeking information. Grand Cherokee sticker states that it has Forward Collision Warning. Customer states he bought the Cherokee and this also has this. The customer states with the Cherokee if beeps and warns him that he is getting close to the end. The customer states that this vehicle does not beep or let him know that he is getting close to anything when he uses the vehicle.
Agent read information from manual on FCW
To turn the FCW system OFF, press the forward collision button once to turn the system OFF (led turns on).
To turn the FCW system back ON, press the forward collision button again to turn the system ON (led turns off).
Changing the FCW status to “Off” prevents the system from warning you of a possible collision with the vehicle in front of you.
Changing the Active Braking status to “Off” prevents the system from providing limited autonomous braking, or additional brake support if the driver is not braking adequately in the event of a potential frontal collision
The customer has not spoke to the dealership about this.
Agent provided informtion from the manual on FCW from the manual for customer.
Customer was asking about the complet list of voice commands

Writer contacted dealer 62082 Dealer Name : FURY MOTORS INC Dealer Phone : 651-451-1313 and requested to speak to SA Chris. Left VM requesting call back.
Writer received a call from SA Chris, transferred to EXT 66244.
SA Chris returned writers call and advised that washer hose crimp in one of the lines was the problem and a connector was added and it is working properly. Hoses that were ordered were the wrong hoses. SA stated that mirror is being replaced. Pricing - Parts 842.00 Mirror .35 crimp Labor Mirror 31.46 and Hoses 157.32. Mirror - part 68110612AB is on order and should be in 04.29.2014 or 04.30.2014. Writer will email SA for update about status of part. SA advised that customer may want to pick up the vehicle while the part is on order but inquired if customer would like to stay in rental if that would be approved. Writer advised that if customer would like to stay in rental, that is would be approved.
########## ECS DIRECT-TO-DEALER ##########
ECS/Customer Care is sending this case to your dealership because an ECS warranty repair has been approved. Remember ALL PRE-authorization requirements for Digital Imaging and the Powertrain Service Center still apply. When submitting for pre-authorizations include this case number. DM Notes have been entered into GCS indicating Customer Care approval. When repairs are completed, submit your claim as you would normally and update this case and return it to Customer Care.

ATTENTION SERVICE DIRECTOR OR SERVICE MANAGER
Customer Care is sending this CAIR because this customer appears to fall within the scope of Warranty Bulletin D-12-27 Warranty Goodwill Administration Process. Please follow the guidelines set forth in this bulletin to come to a resolution. If the customer s request is beyond the
limits found within D-12-27, it will require Area Manager documented pre-approval via the DM Notes application. All offers or denials will be delivered to the customer, with an appropriate explanation, by the dealer or the Area Manager. Customer Care will follow-up as appropriate with the customer before the CAIR is closed. If this repair falls under the Digital
Imaging process or the Powertrain Service Center you will need to follow all associated processes and requirements for claim approval including tech training requirements.
##
Writer left VM at 651-251-8255 for SA Chris to answer dealer closed loop questions. Writer sent questions to SA by email.
Writer contacted customer at [redacted] Customer stated that the phone should be compatible and he is is not satisfied with the navigation system as it gives him unsatisfactory istructions to get to his destination and that he can get to the destination is much easier way. Customer is comparing system to other systems. Customer indicated that he is testing shortest route and other options in the system. Customer also advised the the vehicle speed limit over reminder is not working and gives warning incorrectly. Customer has turned it off. Customer stated that cruise control brake message is going off with no one in front of him and vehicle also brakes. Writer will review moving forward on these issues but to move forward a diagnosis would need to be completed. Writer also will send email to customer to reimburse for vehicle payment (530.00) to compensate customer for his inconvenience. Customer purchased SC to protect himself for repairs already. Customer stated that mirror has been repaired but he is concerned about the defroster working. Writer advised that when the weather gets cold again, if it is not working, we will be able to look into repairing as vehicle is part of ECS and in warranty. Writer will send email for reimbursement and also with case contact information as customer was not sure that he had received previous emails. Writer verified customer contact information.

Writer attempted to contact SA Chris at 651-251-8255. Writer left VM with customer concerns (lines 133-151). Writer requested call back to review concerns and inquire if update would take care of any of his concerns.
05/09/14 Spoke with the Service Manager (Dwight). Customers vehicle has been repaired and is currently operating as designed. Navigation system is operating as designed. Transmission is operating as designed. Speedometer issues are caused by the oversize tires that the customer purchased and requested to be installed. Area Manager recommends that call center proceed with caution with this customer going forward.
Customer appears to be experiencing 'buyers remourse.' Closing CAIR./ajb2
Writer attempted to contact SA Chris at 651-251-8255. Left VM requesting follow up call about customer concerns and lines 173-179.
Writer attempted to contact SA Chris at 651-251-8255 and left VM. Writer also tried to make contact at 651-451-1313. Writer unable to make contact.
Status update provided via email to the following email address:
[redacted]
Thank you for working with Jeep enhanced customer satisfaction concerning your case [redacted]. I am researching your concerns and need some additional time to gather information. I will contact you again no latter than 05.16.2014 to review your concerns. Thank you again for working with Jeep.
End of Status Update
SA Chris returned writer call. Writer attempted to call him back at 651-251-8255. Left VM.
SA reviewed that Speed limit reminder concern is related to oversized tires.
Problem with cruise control brake message is going off with no one in front of him and braking but has not been duplicated. Mirror is main concern that has been repaired. Writer advised that it appeared to be a rock chip but was replaced. Writer will review and email SA.
Writer contacted customer at [redacted] Writer reviewed that customer concerns about navigation system will be noted. Customer stated that he would like Jeep to know that system needs improvement as directions do not provide the best route to the destination. Writer also reviewed with customer that due to the oversized tires that speed limit warning will not work correctly. Customer also advised that problem with cruise control and braking was not duplicated. Writer advised customer that as a one time courtesy and to thank him for his feedback about the cruise control and speed limit warning concerns not being able to be adjusted for changes in tires, writer is reimbursing him for one vehicle payment. Customer stated that his questions have been addressed and gave permission for case to be closed. Writer will process check and it will arrive in 7 to 10 business days.

CONTACT UPDATE - 1st Contact attempt, phone number dialed, 5[redacted]6. Customer requested call back in five minutes - on another call.

Customer stated that he is currently at dealer 38999 and does not need a rental at this time. Customer stated that the back up camera is working however, the indicator lines do not show. The adaptive cruise control does not work and the electronic stability warning light is on and should be off. Air suspension service light is also on. Customer vehicle was taken to dealer 38999 and customer was advised that they will update him by end of business. Customer verified all contact information and declined email updates. Writer provided writers contact information in the form of a VM. Next promised customer contact no latter than 04.30.2014.
Customer expectation is to have the vehicle repaired with either a softwear update or part replacements so the vehicle concerns are resolved and no further trips to a dealer for repairs are needed.
Email sent to all TS advising of dealer correction.
SM contacted writer; SM stated that they are looking at STAR case S1308000327. SM stated that he thinks this will solve customer concerns. Writer advised that case was escalated and that will document case for CA.
Writer received a call from the Sa who is still waiting for a call from the TS. CA advised the SA to offer the customer a up graded rental.
Call received from Dave/SM inquiring if Enterprise rental is approved for customer. Writer confirmed that rental is approved per the guidelines in Warranty Bulletin D-11-53.
Writer contacted Dave, SA and advised that writer is continuing to monitor and has sent email to TSs about case. SA stated that he advised customer that repair will take another 1-2 days and also provided rental through Enterprise.
Customer left VM expressing his frustration that the repair is taking longer that expected. Customer requested a call back a[redacted] was not available. Writer spoke with Mrs[redacted] expressed her frustrations about a new vehicle needing repairs. Customer stated that they could have purchased a GMC with a discount but liked their previous vehicle so they purchased another Jeep. Writer apologized for the inconvenience and advised that writer will monitor repairs and update the customer again no latter than 05.02.2014.
Customer made contact again and stated that he is very disappointed by the time it is taking for the TS to contact the dealership and would like to make a complaint. Customer requested to speak to the TS and writer advised that a TS only works with the dealer. Customer stated the sensor was diagnosed previously and feels that the repair should not take as long as it is taking. Writer will continue to monitor and update customer on 04.30.2014.

Writer contacted dealer and spoke with SA Mike who states ASM Kurt is unavailable. Writer provided contact information for a return call from ASM Kurt.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66145. The reason for the customer contact was to provide or request the following information: Lines 130-132. Follow up 6/10/14.
Spoke with Kurt asm to check if customer has made an appointment. Kurt asm advised writer that the check engine light has come back on and it has already been taken care of 2 times. Kurt asm advised writer that the customer does need to take vehicle back in, but this week is not good, so if customer could go in next week any day he will arrange for a demo from dealership be available. Kurt asm advised writer that the customer does not like to get Enterprise, so the he makes special arrangements for customer. Writer advised will call customer and advise.
Left message [redacted] for customer that writer did speak with Kurt asm who advised that he would like customer to take vehicle in next week and let the dealer know so they can arrange for customer to have a good loaner. Writer advised that if CA does not hear back from customer by 6-11 a follow up will be made on 6-12.
Writer contacted customer and advised him of lines 137-144. Customer

states he will conact dealer and set a date to take the vehicle in next week. Follow up 6/17/14.
Writer contacted dealer and spoke with SA Ryan who states the customer does not have an appointment scheduled.
Writer contacted customer and he states he contacted ASM Kurt and left a message but has not received a call back yet. Writer advised customer we will contact ASM and follow up on 6/19/14.
Writer contacted ASM Kurt and he states he has not received a message from the customer but he is happy to contact him today.
Status update provided via email to the following email address:
[redacted],
I spoke with ASM Kurt at the dealership and he advised me he will be contacting you today. I will follow up with you on Monday 6/23/14 but if you have any questions or concerns please give me a call at 1-800-763-8422 at extension 66145. Thank you and have a great day!
End of Status Update
Left message for customer requesting call back if dealership has not made contact.
Writer spoke to Kurt/ASM. Customer refuses to take rental because he does not want to wait for paperwork to be completed. Dealer is arranging to provide vehicle currently being used by dealership GM. Should be able to get vehicle into the dealer sometime next week. Dealer will contact customer. Next follow up with dealer will be on 7/1/14. Vehicle has diesel engine with a CEL concern.
Writer contacted ASM Kurt and he states they have not made any arrangements yet because they do not have a fix for the customer s concern. ASM states they are more than happy to look at the customer s vehicle again but they may not be able to repair the vehicle. ASM states it has to do with the DEF fluid calibration.
Writer contacted customer and he states the vehicle is not using any DEF fluid. Customer states he thinks it might be from when the previous dealer replaced the tank and they did something wrong. Customer states he would like to get the vehicle in as soon as possible but he will need a loaner. Customer states he would like CA to contact the dealer and have ASM Kurt give him a call to make arrangements.
Writer advised customer we will follow up on 7/3/14.
Writer contacted dealer and spoke with SA Mike who states ASM Kurt is not available. Writer provided information to SA to relay to ASM.
Writer contacted ASM Kurt and he states the customer stopped by today because the CEL was on and there was a message that stated 40 miles until shut off. ASM states the customer has an appointment scheduled for Tuesday 7/8/14.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66145. The reason for the customer contact was to provide or request the following information: Lines 190-193, follow up 7/9/14.
Writer contacted dealer and spoke with ASM Kurt who states the reset the light and returned the vehicle to the customer because he did not have time to wait. ASM states the customer spoke with GM Mark and the customer stated he does not want the vehicle anymore. ASM states they wanted to get the customer in this week to complete the diagnosis but the customer does not want to go down that route anymore. ASM states if the customer wants they can get him in next week Monday and provide a rental vehicle.
Writer contacted customer and he states the dealership just cleared the code and sent him on his way. Customer states the light is back on, the message states 40 miles until shut down and the vehicle is still not using DEF fluid. Customer states he would like to know what can be done about a buyback. Writer advised customer our goal as his customer advocate is to get the vehicle repaired and we are willing to reimburse him another vehicle payment. Writer advised customer of lines 203-204. Customer states he needs to get the vehicle there sooner like this week because if he drives it more than 40 miles the vehicle is going to shut down on him. Customer states he does not want to go that route and does not want to accept the offer. Writer advised customer we can forward his case to our care analyst team that will review the vehicle repair history

to see if it merits further review but it will take up to 7 business
days. Customer states he would like to think about what his next step is
and will call CA back.
Is there any damage to the vehicle? (if yes, describe) No
Actual/accurate mileage? 8013
Is the vehicle leased or purchased? Purchased
Name of lender: Wells Fargo
Is the customer in a rental right now? No
Is this vehicle used as a personal vehicle or for a business? 50/50
Are there any modifications to this vehicle? (if yes, describe) Window
Vents/Mopar
If Chrysler makes an offer to replace the vehicle, what dealer does the
customer prefer to work with? SCHLOSSMANN S DODGE CITY CHRYSLER
Customer was offered vehicle payments/ MVP.
Customer is saying the vehicle is not being driven as it is saying it
will shut off in less then 25 miles.
Customer was advised to call roadside to have the vehicle towed into the
dealership and also that any offers from CA are now not available.
depending on the out come of review.

SEE STAR CASE# [redacted] FOR INFORMATION
Writer contacted customer and advised him of the TS update. Writer advised customer we are willing to offer AP685N. Customer accepts. Writer advised customer we will contact dealer and verify mileage. Writer states the SC will take up to 3 business days to attach and he will receive something in the mail in 30 days. Writer advised customer we will follow up no later than 8/20/14 to make sure the vehicle is repaired to satisfaction.
Writer contacted dealer and verified mielage 8525.
AP685N not available. Per CM:
RAMD510N Contract created. Contract number is 39125114.
Writer contacted customer and he states there is one more issue that has not been addressed. Customer states the exhuast fluid gauge is not working correctly and is showing full but it is not. Writer advised customer we will let the dealer know and follow up no later than Monday 8/25/14.
Writer contacted ASM Kurt and advised him of lines 396-397. ASM states he will contact customer.
Status update provided via email to the following email address:
[redacted]
I just wanted to let you know I contacted Assistant Service Manager Kurt and advised him of your additional concern. He advised me he will be contacting you to discuss your concern further. I will follow up with you no later than 8/27/14. Thank you and have a great day.
End of Status Update
Begin Customer Message reviewed:
Update: I tried putting DEF in the tank today because even though the gauge reads '100% FULL' I am now going on the 3rd tank of fuel so I know if it is working properly the DEF would almost be empty. When I tried to fill the DEF tank it would not let me put more than .03 - .08 in at a

time before it would shut off the pump and overflow / spitting out. It seems like there is a valve that seals the system that is not opening somewhere in the intake tube. PLEASE help me fix this... Not sure how much more I can take.
End of Reviewed Customer message
Status update provided via email to the following email address:
[redacted],
Our next step would be to get the vehicle to the dealer so they can diagnose/repair the issue. I did advise Assistance Service Manager Kurt about the issue you are having with the DEF system. The best option would be to contact the dealer and schedule an appointment. I apologize you are still having issues with your vehicle. I will contact you again on 8/29/14 to find out when you will be able to get the vehicle in to the dealer. Thank you and have a great day.
End of Status Update
Writer contacted customer who stats the DEF system will not take fluid and it is overflowing. Customer states ASM Kurt never contacted him. Writer advised customer the best option would be to contact the service department and to schedule an appointment. Follow up 9/2/14.
Writer contacted ASM Kirt, left message.
Status update provided via email to the following email address:
[redacted]
Mr. [redacted]
I contacted the dealer and left a message for Assistant Service Manager Kurt. If you do not hear back from him today I would recommend contacting the service department and scheduling an appointment at 262-790-9000. I will follow up no later than 9/4/14. Thank you and have a great day.
End of Status Update
Writer contacted dealer and spoke with SA who states the customer does not have an appointment scheduled.
Writer contacted customer on 9/4/14 and advised case was being closed due to no diagnosis.
CLOSED LOOP UPDATE - no need for additional follow-up.

Corporate - Survey By-Pass - No Diagnosis - Default - Default	

Briefly summarize why the customer is contacting Chrysler:
Customer is calling in as he has called Steve Landers - 26803 he told them of the issues he was having and he was told that it would need to be in the shop for a few days.
Customer asked them about a loaner/rental.
Customer was they don t do rental/loaners if the customer does not have an extended warranty.
Agent called the dealership and spoke with Ted SA to verify this Agent also asked about the Goodwill and was told they do not do the GoodWill Rental either.
Customer is having some concerns with his new Jeep with some vibration that seems to coming from the speaker that is in/under the dash.
His cruise control is not working properly.
He puts the brakes and hits the resume button and it does not go back into cruise.
There is a rattle in the sunroof also.
Agent has advised the customer that he will need to have the vehicle in at the dealership and then contact Chrysler again and this can then be escalated up to rental and they would be the one that will contact you if a rental is approved.
Briefly summarize what the customer is expecting:
Expecting a rental while his New Jeep is in the dealership.
Reassigning DF314 - No Diagnose.

CONTACT UPDATE - 1st Contact attempt, phone number dialed, [redacted]. Writer contacted customer and was advised to call back in 15 minutes.
Writer contacted customer; customer stated that there is a clicking noise coming from the adaptive cruise control. Customer stated that when the vehicle is slowing down and speeding up the vehicle will make a very loud clicking noise. Customer stated taking a ride with the technician today and was able to verify the sound with them. Customer stated that there is also a rattling in the heater and the dealership previously put some insulation in but the noise is back. Customer stated that the radio will intermittenly cut out. Customer advised that there is also a whistling noise but customer is not sure where is is coming from. Customer advised that the vehicle has been there multiple times for the rattling concerns and wants a resolution. Customer advised that the dealership is 70 miles away and confirmed being in a rental vehicle. Writer advised the ECS processes and advised that the dealership is diagnosing where the noise is coming from. Writer advised looking into a service contract that will extend out customer warranty on vehicle. Customer advised that the dealership was looking into giving customer a trade in deal but it was not what the customer wanted. Customer inquired if writer could look into situtation. Customer advised writer speaking to Ryan in the sales department. Customer advised cell phone number as [redacted] and email address as [redacted]. Writer advised sending CA contact information and will follow up with customer no later than Monday 5/5.
adaptive cruise control. Clicking noise. when on cruise control. take the dash out and put insalation. rattling in heater. the radio will cut out. whistling, mostly as slower speeds. not the modling. rental vehicle. 70 miles. Intermitten noises.

##
REASSIGNED TO BC/DLR 66 44825 06/04/14 10:19 O[redacted]
Writer contacted customer; Customer advised to call back in 30 minutes.
Writer contacted customer; customer stated that he still feels like something is wrong with the vehicle. Writer advised that the dealership states that the vehicle is operating as designed. Writer advised that the SC can still be added. Customer stated that the dealership has not called him yet. Customer advised that he will contact writer back in a few days with decision on what he would like to do.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66378. The reason for the customer contact was to provide or request the following information: Follow up to see if customer wants the service contract. Writer will follow up on Wednesday 6/11.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66378. The reason for the customer contact was to provide or request the following information: Follow up on with customer on SC. Writer advised calling on Friday 6/13.
Writer contacted customer; customer stated that he would like the extended warranty on the vehicle. Customer also requested oil changes. Writer offered ECS36N. Writer advised calling customer when SC are added to vehicle. Customer requested that it would be documented that he thinks the engineers need to look into the concern with the cruise control. Writer advised that concerns are documented and will contact customer next week with further information.

LWA100N Contract created. Contract number is [redacted]
Writer contacted customer; customer stated that he would like to wait until his other service contract expires to add on more oil changes.
Writer advised that case is documented. Writer advised at this time the case will be closed.
CLOSED LOOP UPDATE - no need for additional follow-up.

Dealer - Parts - Transaction - Parts N/A / Backordered - Default	customer seeking replacement
Dealer - By-Pass - Default - Default - Default	

Briefly summarize why the customer is contacting Chrysler: Customer states he has adaptive cruise control on the vehicle and it has not ever worked. He states he has had it there 3 times and the issue has not been fixed. He states 2 weeks ago they ordered him a module. He states now he is being told it could be July or later until the part comes in. Agent called the parts department and spoke to David. David states the part is on backorder and the ETA they have is 07/08/2014. Part number:68109355ai order number: 0422e1. Agent advised with the part information from the dealer we can escalate to part tracking. Customer states he wants to have the vehicle replaced and does not want to have to wait until July for a part. Agent advised we can escalate the case for him to look into replacement.
Customer informed a call back is required and will take place within 1-2 business days.

-LVM for SM Kim with Ron Lewis CJD, included my contact information and

requested a call back to discuss customer s vehicle concern and to offer part expediting assistance.
-LVM for customer, included my contact information and, requested a call back to discuss the current vehicle concern.
-Received vm from customer and, customer requested call back to work [redacted]
-Correction, work phone [redacted]
-Called SM Kim with Ron Lewis CJD but she was at another location.
-Called customer and introduced myself as the assigned CM. Customer said he was referred to contact me by Ron Lewis CJD for concerns with Adaptive cruise control stating that it is inoperable and does not engage. Told customer that his case was referred to my office for Special Handling and that I am able to get involved to ensure his vehicle can and will be repaired. Customer asked how long would he have to continue with repair process. Informed customer that upon my initial review, I don t show that out TAPS team was involved. Explained that we will want to get TAPS invovled first and receive recommendations for repair and also allow them to revisit the issue should it not be resolved. Told him after we have allowed TAPS due diligence to consider all the facts, I can review the case for other possible options. Customer said Ron Lewis CJD provides him with loaner vehicle each time and that he is available to take the vehicle in upon notice. Assured customer that I can assist with Part expediting to possibly get the part to dealer sooner that July. Advised that I will discuss further with SM Kim and will contact him to let him know the next course of action.
-LVM for SM Kim with Ron Lewis CJD, included my contact information and, requested a call back to offer assistance with parts expediting and TAPS.
-LVM for customer, included my contact information and, advised that I am looking forward to getting a call from SM Kim with Ron Lewis CJD to determine if I can assist with Part Expediting and to get TAPS involved.
-Called Ron Lewis CJD and spoke with SM Kim who transferred me to PA Chad. Parts Advisor Chad gave me Part number 68109355ai and Order number 0422e1 and, Chad agreed to upgrade to Special Order today.
-Received vm from customer, customer requested a call back to determine if I have spoken with SM Kim wth Ron Lewis CJD.
-LVM for customer, included my contact information advising that I have spoken with SM Kim with Ron Lewis CJD and obtained information regarding part no. 68109355ai. Explained that I will still submit with Part Expediting request to determine if we can get a firm ETA on the date part would arrive.

Product - Electrical - Cruise Control - Intermittent or Inoperative - Default	caller stated that the cruise control isn't working as designed
Product - Electrical - Lamps and Switches - Other - Default	courtesy light comes on and off all the time
Dealer - Sales - Transaction - High Pressure Sales - Default	feels salesman took advantage of him
Dealer - Service/Body Shop - Transaction - Repeated Trips Required - Default	problems not resolved
Product - Electrical - Unknown - Intermittent or Inoperative - Default	the forward sensor is not working and put on the brakes for no reason.
Product - Transmission / Transaxle - Unknown - Jumps Out of Gear/Park - Default	while driving one day the gears went out/backed into another vehicle
Product - Unknown - Unknown - Accident - Default	

Briefly summarize why the customer is contacting Chrysler: Customer called because he went to the dealership 59469 and spoke with salesman Ernie Charleston and advised the salesman that he needed a vehicle that could get him around in rough terrain. Caller stated that he is a disabled veteran and he needs to get outside more and he needed a dependable vehicle. Customer stated that the salesman didn t look out for the customer and went out of his way to put the customer in this vehicle which is dangerous. Caller stated that they leased him this vehicle and this vehicle is nothing but trouble. Customer stated that he is very stressed out. Caller stated that this vehicle was originally leased to someone else and he spoke with them and they stated that this vehicle was nothing but trouble. Caller stated that he has been in 2 low impact accidents. Caller stated that when he is using cruise control and when he watches how fast he is going the cruise control keeps going up 5 MPH faster every few minutes. Caller stated that while driving one day the gears went out and it felt like the vehicle thought he was towing another vehicle and while going down hill it felt like he was driving the brakes. Caller also advised the dealership 59469 that the vehicle would not go into 4 wheel drive. Caller stated that the drive train locked up at 60 MPH and it dropped to 40 MPH right away and he was headed for a bridge and a ditch. Customer stated that the dealership 59469 checked this out

and could not duplicate any of the issue. Caller stated that the dealership 59469 stated that the computer keeps saying nothing is wrong and he is tired of taking the vehicle back. Caller also stated that the forward sensor is not working and put on the brakes for no reason. Caller stated that the courtesy light comes on and off all the time. Customer also stated that he went into the store and when he came out the vehicle backed into another vehicle. Caller stated that he could not go through his insurance because this was the second time in a accident and he would have been a high risk driver. Caller stated that his lawyer advised him to hire a mechanical engineer and have them go over this vehicle to find out what is wrong and then sue the dealership. Customer stated that he read on line and his vehicle went from number 5 to 2 in the most complained about vehicles on the road.
Briefly summarize what the customer is expecting: Customer feels that he has been taken advantage of and took him for $20000.00. Customer is seeking compensation because it is costing him $20000.00 to get rid of this vehicle. Caller stated that this vehicle is dangerous and he is afraid to drive this vehicle. Agent advised the customer that our goal is to try and find the issue and get the vehicle fixed for the customer. Customer stated that he doesn t want this vehicle. Customer refuses to go back to his dealership. Agent advised the customer that we need the vehicle to be at the dealership 59469 to further assist. Caller stated that he is working with a different salesman Jason at dealership 59469 who is looking into trading this vehicle in for a 2013 Jeep.
Agent called dealership 59469 and spoke with salesman Jason Bruno who stated that he is getting the customer into another vehicle and he is just waiting for the title for this vehicle because it was a leased vehicle and now the customer bought the lease out. Jason also stated that the customer told him that when he was off roading with this vehicle that he tried to climb a rock and the vehicle slid sideways into a tree.
Agent called dealership 59469 and spoke with SM-Blain who stated that they tried to handle this customer with kid gloves because he is disabled. Blain stated that there is nothing wrong with the vehicle and stated that the customer stated that he takes the vehicle up into the mountains in the middle of the night. Blain stated that he did put on the repair order that the customer stated that the 'computer must be looking at girls' if the computer cannot find anything wrong.
Customer was advised that their concern is being forwarded for review.

Customer states that they are trying fix a sensor for the auto cruise control.
SAL is the SA states the customer.
Agent asked the SA what the PART# and order status/#
PART# 68223771ag
ORDER# 00317c
ETA: 5/21/14
ordered back in 03/17/14 but just got released.
Agent advised since the issue is back order we can get this to our back ordered parts team 4-5 business days.
Writer contacted (44179 TRANSITOWNE DODGE CHRYSLER JEEP) and spoke with (PA RYAN).
(RYAN) stated part information for order is as follows:
Part #: 68223771ag
Part Description: cruise sensor
Order #:00317c
ETA: 5/21/14
Is customer in rental? no
If yes, who authorized rental? no
Is the vehicle off road? no
Order type: Choose OneÙ (Daily/)

Writer advised customer that their parts concern will be escalated to the Parts Support team for parts resolution, and that their Case Manager will provide them updates on the status of the part within 4-5 days. If an update is received sooner, customer will be contacted sooner.
Assigned case to Choose oneÙ (96W (Parts Only))
**********96W PARTS UPDATE **********
Writer called dealer at 716-634-8000 and spoke with PA Tom. Writer requested to cancel the order and reorder the part 68223771AG under special handling. PA stated he could not cancel the order.

Unavailable wipe front sensor warning.
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
One month ago we purchased a 2014 Jeep Grand Cherokee Overland. System keeps giving message in all weather conditions. Took to dealership and they found nothing. Also tells me to BRAKE with nothing in front of me. Very frustrating as it cost 2,000 extra for something I cannot use.
*****END OF CUSTOMER EMAIL*****
CONTACT UPDATE: Agent spoke with Merce-SM. SM outlined he would require time to research into Customer concerns. Recorded contact information and advised they would callback with requested information shortly.
Dear [redacted]
Thank you for contacting the Jeep Customer Assistance Center in regards to your 2014 Grand Cherokee.
I am sorry to learn of the concerns raised regarding your vehicle s front sensors. I appreciate the time taken to bring this matter to my attention.
The handling of your case will require a call to the Dealer. What I am going to do is contact the Dealer on your behalf and continue to work on this case. I will be contacting you once the Dealer has been contacted to provide you an update. This will ensure that your issue/concern/question is reviewed as quickly as possible.
I appreciate your patience as I further research into this matter with you.
Thank you again for your email. Should you require additional assistance, or have any new information to provide, please reply to this email message or call 1-877-I-AM-JEEP (1-877-426-5337).
Sincerely,
Jeff
Customer Service Representative
Jeep Customer Assistance Center

*****END OF CAC EMAIL RESPONSE*****
Deur Speet claims to have driven it for 12 miles and did not get the code. I actually set up another diagnostic with a closer dealership as Deur Speet is an hour away. Trying the jeep dealership in Grand Haven, MI. Received the error message twice on a 10 mile trip there today.
*****END OF CUSTOMER EMAIL RESPONSE*****
Dear [redacted],
Thank you for your response. I have updated your file to reflect the information provided in your email. If the vehicle is at the Dealership and the issues remain unresolved, please respond using your method of choice, either by phone: 1-877-IAM-JEEP (426-5337) or by using the link provided below to advise us of this information. We will be more than happy to further review your situation at that time.
Sincerely,
Jeff
Customer Service Representative
Jeep Customer Assistance Center
*****END OF CAC EMAIL RESPONSE*****
I took vehicle to second dealership and they found the sensor was not clipped in securely thus triggering the messages I was receiving. Boggles my mind how first dealership did not notice this. Needless to say I will not return there for service.
So far has been 5 days with no error messages :)
Thanks,
*****END OF CUSTOMER EMAIL RESPONSE*****
Dear [redacted]
Thank you for your response.
I am happy to hear the situation appears to be resolved. I have updated your records to reflect the information provided in your response.
If going forward the issues recur or you should have any further outstanding questions or concerns, please to do not heistate to recontact us.
Sincerely,
Jeff

VIN: EC[redacted]2
Dealer code: 43084
POC Name and position: Ron Holland/SM
POC number: Dealer number
Current mileage: 5,074
Customer concern: When driving along a semi the brakes would lock up and it would try to come to a stop. Crash avoidance system that is built into crash warning system was not working when customer got too close to a vehicle.
Dealer diagnosis: Outside influence. Dealer advised the front camera was physically moved, the cover was missing, and it was bent out of the way. The camera was pointed down and to the side of the vehicle, which was causing the alerts to the side, instead of the front.
Recommended repairs: Realigned camera.
Is the customer in a rental: Yes, 2 days.
Is the customer waiting: No
Customer name: [redacted]
All customer contact numbers: Cell: [redacted]
Best time of day for contact: N/A
Ron/SM advised he is seeking 1.0 hours diagnostic time and 2 days rental. CA advised due to issue being resolved, claim will be paid, though typically, outside influence is not a warrantable concern. Ron/SM states the customer has made several allegations that he is seeking lemon law due to not being happy with the purchase. Ron/SM advised it is in his opinion that this was deliberate. DM Notes entered for claim payment.
########## ECS DIRECT-TO-DEALER ##########
ECS/Customer Care is sending this case to your dealership because an ECS

warranty repair has been approved. Remember ALL PRE-authorization
requirements for Digital Imaging and the Powertrain Service Center still
apply. When submitting for pre-authorizations include this case number.
DM Notes have been entered into GCS indicating Customer Care approval.
When repairs are completed, submit your claim as you would normally
and update this case and return it to Customer Care.

The customer is being handled by the ECS Team
All customer contact numbers: [redacted]3
Customer email address is: [redacted]
Writer advised SM, Chris at 415-886-3225, about customer concern with the suspension service light and that writer was planning to provide customer with a SC for oil changes.
SM stated that the general mileage between servicing is around 8000, but does differ. SM stated that he did not show an appointment listed yet.
CONTACT UPDATE - 1st Contact attempt, new case so check can be sent.
Agent attempted to contact customer at [redacted], however, customer was not available.
Writer asked if customer had been able to schedule a time to take vehicle in for suspension service light concern. Writer stated that a follow-up would be made no later than 5/20 and that an email would be sent with new case number as check has now been sent under previous case number.
Status update provided via email to the following email address:
[redacted]
Here is your new case information as well as my contact information for you to have available:
Jeep Case Advocate telephone number: 800-763-8422
My direct extension: 66329

My normal work hours: 9:30AM-8:00PM M-T-TH-F
End of Status Update
Writer contacted customer at [redacted] and was advised that customer had called the dealership a couple times and was told he would be getting a call back, but had not yet. Customer stated that they seem to be really hard to get a hold of.
Writer stated that the dealership would be contacted to try and expedite getting a call back to make arrangements to get vehicle in and that customer would be contacted by 5/23 with any update available at the time.
Customer stated that he would try to contact the dealership again as well.
Writer left message for Chris, SM, about customer issue with getting appointment scheduled.
Writer left message for Chris, SM.
Service Advisor (SA), Renand, stated that customer has left messages for him and vice versa.
Writer asked for next available time to have vehicle brought in and mentioned the possibility of doing an oil change on the visit as well.
SA stated that next Wednesday around 8 AM would be the next available and that, although he does not have any available vehicles to use now, he is confident that he would have vehicles back in by then. SA stated that customer had an oil change done in February at about 6,000 miles and would not need another one yet.
Writer asked SA to put customer in at 8 and that writer would call back if that was not going to work, by tomorrow.
SA extension is 2226.
Agent attempted to contact customer at [redacted] however, customer was not available.
Writer informed customer about appointment time tentatively scheduled and asked to confirmation. Writer stated that a follow-up would be made by end of business tomorrow if no update from customer or dealer prior.
Writer left message with case number and Writer s contact information.
Agent attempted to contact customer at [redacted], however, customer was not available.
Writer left message that another follow-up would be made by end of business on 5/27 if no confirmation from customer by then and would also send email today with information.
Writer left message with case number and Writer s contact information.
Status update provided via email to the following email address:
[redacted]
I left a message with more details, but wanted to email you as well to let you know that I have set up a tentative appointment on Wednesday 5/28 at 8 AM for you to take your vehicle in for diagnosis. If I do not hear from you by end of business on Tuesday, 5/27, I will follow-up with you then.
Have a great holiday weekend!
End of Status Update
Writer contacted customer @ [redacted]. Customer states appointment was rescheduled for Thursday, 5/29. Writer advised CA SH950 will follow-up by EOB on 5/29.
Dealer code: 45646
POC Name and position: Chris\SM
POC number: 4158863225
POC e-mail: chrishardey@cjdr.com
Current mileage: 10594
Customer concern: service suspension light comes intermittently, C15A8-2A, C15A7-2A,
Dealer diagnosis: Suspension switch
Recommended repairs: Suspension switch
Is the customer in a rental: Yes
Is the customer waiting: No
Customer name: [redacted]
All customer contact numbers: 4[redacted]
Best time of day for contact: Any
CA stated to SM\Chris to go ahead and order the part.

Agent attempted to contact customer at [redacted] however, customer was not available.
Writer stated that the dealership had called and were ordering part needed and that writer will check on status of part tomorrow and will expedite if needed. Writer stated that a follow-up will be made the first part of next week unless new information is obtained from the dealership that he is not aware of.
Writer left message with case number and Writer s contact information.
Writer contacted Chris, SM, and asked about part status.
SM stated that the part is about a week out and that customer opted to pick up his vehicle and return the rental until the part is in and that they will have customer come back in next week for repair. SM stated that the repair should be completed the same day and will put customer in rental again and stated that customer was glad that the issue was diagnosed and resolution found.
Part #68141342AC
Order #00530A
No current ETA
Writer submitted part for expediting.
**********96W PARTS UPDATE**********
Writer dialed dealer, spoke to PA Jason. PA states has not seen part yet.
Writer advised part is in transit on dealer truck, therefore no tracking.
Writer provided PA with email for confirmation. Writer thanked PA. Ended call.
**********END OF UPDATE**********
Chris, SM, checked and stated that the part has not arrived yet.
45646 CHRYSLER JEEP DODGE RAM MARIN dialed 415-886-3222.
SM Chris was not available. Parts Manager Nate states the ETA is showing for 06/07/14 or sometime this week but he cannot tell for sure.
Agent attempted to contact customer dialed 415-706-4393.
CA spoke with customer advising customer that CA did contact dealer and was advised that part is showing to arrive at dealer 06/07/14. CA advised customer that dealer estimated that part should arrive either tomorrow or Friday the latest but the part is being tracked. Customer understood but states he got his vehicle back and the thermometer is not working he is so frustrated going back and forth and wants CA to call him back so he can discuss what the next steps are due to vehicle being so new. CA advised customer CA can have his CA contact him Friday the latest customer states for CA to call him back at her convenience.
**********96W PARTS UPDATE**********
Writer dialed dealer, spoke to PA Jason. Jason confirmed the part arrived for the customer.
**********END OF UPDATE**********
Chris, SM, confirmed part was in and that they had reached out to the customer, but there was no appointment set yet.
Writer informed SM of customer concern with the thermometer not working, so that dealership can plan to address when vehicle is brought in for repair.
SM stated that the earliest customer would be able to bring vehicle in for repair is Tuesday right now, with how far out they are.
Left message for customer advising part is at dealer and to set appointment for repair, call CA with appointment information.
Writer contacted customer at [redacted] and asked if customer had made arrangements to take vehicle in for repair and diagnosis.
Customer stated that he had to go out of town for a week on a road trip on Friday and would likely try to get vehicle in after that since he did not think it was a crucial repair and that it usually takes a couple days each time he takes the vehicle in, but would call the dealership to check as well as schedule an appointment if it is works out. Customer asked what else could be done as it has been frustrating with as many issues as the vehicle has had. Customer stated that he purchases a new vehicle every 3-4 years and has never had this type experience and does not have the time to keep going back to the dealership. Customer stated that he had appreciated the car payment, but that he would pay another $1000 to not have to take his vehicle in anymore for problems.
Writer mentioned an extended warranty for the vehicle and then a

maintenance Service Contract (SC) since the extended warranty would not likely help since the vehicle is leased and would not be keeping it that long. Customer stated that he did not know what the maintenance schedule is on the vehicle and just wants another vehicle.
Writer advised customer that the case could be sent to a CAIR Analyst Team for review.
Is there any damage to the vehicle? No
Actual/accurate mileage? 10,854
Is the vehicle leased or purchased? Leased
Name of lender: US Bank
Is the customer in a rental right now? No
Is this vehicle used as a personal vehicle or for a business? Personal
Are there any modifications to this vehicle? No
If Chrysler makes an offer to replace the vehicle, what dealer does the customer prefer to work with? 68707, MICHAEL STEAD S HILLTOP CHRYSLER
Writer stated that he may be contacted again if there are more questions that need to be asked pertaining to his particular state.
Customer stated that the current issues remaining with the vehicle right now are the service suspension light and the temperature gauge. Customer stated that the other day, the temperature was 91 degrees outside, but the gauge read 64 degrees and did not change the whole day, but then worked correctly on a different day. Customer stated that he had been without his vehicle for about 30 days so far with multiple trips.
Advised the customer of incomplete recall P14 for this vehicle and that the dealerships are working getting parts in for the recall.
Writer stated that it may take 7-10 business days for the review and would be about the time that customer returns to town.
Writer assigning case to 91L for replacement vehicle.

Briefly summarize why the customer is contacting Chrysler: The customer state one thing does not work on the vehicle. The customer states the collision avoidance does not work.
Briefly summarize what the customer is expecting: The customer is looking for looking for assistance with the FCW system set up. The writer walked the customer through the explanation of the system on Page 321 of his owner s manual. The writer walked the customer through the sets to turn the FWC on from page 219. The writer advised the customer that if this does not work properly he will have to get his vehicle into his certified Chrysler dealership for further assistance.

***** EMAIL BRIEF DESCRIPTION CONTENT *****
Poor Reliability of Grand Cherokee
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
Just thought I would send a note indicating my displeasure with my 2014 Jeep Overland purchase. So far the vehicle has not made it to an oil change without an intervening trip to the service department. I have had multiple problems with the uConnect system, the Dash Gauges have gone blank while driving, vehicle lost of power and barely was able to go over 10 MPH (limp mode?), occasional Check Engine Lights and most recently the Seat Belt Warning and Air Bag Warning lights. I have now waited over 2 weeks for an ORC module (still on back order). In addition I also noticed that I can no longer use my regular or Adaptive Cruise Controls, but I am hoping that is related to the Seat Belt/Air Bag Warning lights. Needless to say after purchasing several Jeeps (starting with a 1980 CJ7) it is highly unlikely that I will ever purchase another Jeep/Chrysler product. I trade vehicles every two or three years because I do not want to deal

with reliability problems. My 2010 Grand Cherokee Limited was almost flawless, it had close to 20,000 miles on it so I traded it before any serious problems arose. At the present time I am looking for a replacement vehicle and will most likely trade it as soon as the 2015 models from other manufacturers are available for ordering.

CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted] FOR INFORMATION
Customer called in LVM for me to call him back.
Called Bayside Chrysler Jeep Dodge dealership spoke with SA Sheng. Per Sheng vehicle is repaired & updated RO. Per Sheng customer stated vehicle would brake when no other vehicles around, they road tested vehicle & no problem found. They have also made the following repairs: Fender flares have been re-secured. Rear shocks have been replaced and noises have been verified to be gone. Left & right front rim were bent and replaced. Tire light was on due to bad sensor so Tire Pressure Sensor was replaced. Per Sheng, vehicle is ready to be picked up.
Called customer back advised vehicle is repaired but customer stated vehicle is still having the same issues, it brakes when there are no other vehicles around and he is still having the noise coming from the transfer case which wasn t there when he originally purchased the vehicle. Customer states he is disabled and it is not easy for him to be taking the vehicle back and forth to the dealership. Advised I will review his case for options other than just repair. Customer stated he wants a replacement vehicle or his money back or he will be filing Lemon Law with is attorney. Advised I understand this is his right to do so but that I would still like to assist in the repair or other option with his vehicle. Advised customer will review his case & call him back by next Wednesday 06-11. Customer good with this. ***Follow up with customer 06-11-2014***
Customer called in LVM for me to call him back.
Called customer back advised needed some clarification. Customer stated I was supposed to call him back yesterday, but I had advised him that I would be calling him today. Asked customer who [redacted] is & he stated that is his wife & they purchased vehicle new on 09-05-2013.
Called Bayside Chrysler Jeep Dodge dealership spoke with Carmela who verified vehicle was purchased by customer There is a CAIR in the system #25012690 stating that a Technical Advisor went out to the dealership & per TA the vehicle is performing as designed, no fault codes present, all software up to date. Vehicle was test driven 30 miles. Per TA no further repairs recommended.
Called dealership for status of repairs spoke with Sheng SA, customer brought vehicle back in today for FCW Front Collision warning sensor, while he is driving vehicle will brake by itself while no other vehicles are around & also stated when customer backs vehicle he still hears the clicking sound. As per Sheng SA the clicking sound when he goes into reverse is an operating as designed condition. Per Sheng SA the service manager Bob Kennedy will be road testing the vehicle to check for braking issue.
Called customer back advised per Sheng SA, the SM Bob will be test driving his vehicle to duplicate the issues. Advised that per the TS the clicking sound when he goes into reverse is a normal sound for the vehicle & performing as designed. Per the customer, does not care what the TS states, his vehicle did not do the clicking sound until 10,000 miles. Customer at this point became very upset and said the he is not interested in any repairs to his vehicle. Customer stated that his previous CM offered him reimbursement & I have not offered him anything. I tried to let customer know that any compensation would be offered once his vehicle was repaired. Customer states he is not interested in payment reimbursements, he wants a replacement vehicle or a buy back and he wants the information in writing. He asked me to make a decision right now of whether or not I will be replacing his vehicle. Tried to tell the customer that at this very moment I am not able to offer him a replacement, and wanted to state that I am still reviewing his case, but customer would not let me finish speaking. Customer also stated that he is going to go on Facebook and Twitter and state how badly we are being to him & also to tell everyone NOT to purchase one of our vehicles. He also stated that he was going to use my name & put it on Twitter and

Facebook too. At this time he asked to speak with my Supervisor, I attempted to tell the customer that she may not be able to do any more than what I am doing for him, but he still requested a call from her. Emailed Supervisor SL670 to call customer back. ***Follow up with dealership & customer 06-13-2014***
Called customer at customer s request for a supervisor call back. Left voicemail requesting call back to discuss customer concerns.
Called customer advised that his case is still being reviewed for options other than just replacement. Customer states he would like dealership to update the Recall & I advised that the dealership usually does that automatically. ***follow up with customer 06-17-2014***
Called customer, LVM for him to call me back.
Customer called back LVM. Called customer back advised we are offering a replacement vehicle and that a Replacement Coordinator will contract them in 5-7 business days. Replacement process can take up to 30 days so if the vehicle gets repaired within that time he will have to pick up his vehicle since they are still responsible for their current vehicle, but you will still receive your replacement vehicle. Customer stated that he would tell the dealership to stop working on his current vehicle & leave it at the dealership & I advised him NOT to do that since he is still responsible for his current vehicle until he gets his replacement. He also stated that he wants a 2015 and asked me what year vehicle he will be receiving. Advised I did not know about that part of the process, that the Replacement Coordinator would be able to explain that better to him. Closing Case.
initial call. explained msrp to msrp towards CDJR vehicle. customer states he wants 2015 model because he thinks there will be same problem with 2014. customer had rubber mats added(paid out of pocket), also have warranty for tires and rims and extended warranty which he would like transfered. customer states i have to get paperwork from dealer. he s going back and forth to hospital because his mom has cancer. explained I ll get contact at dealer and email him with information.
***customer stated his mom s name is on registration

Dear[redacted] contacting the Jeep Customer Assistance Center.
We are sorry to hear of the issues you are having with your vehicle. I noticed that the uConnect system does have an update available that may help with the navigation problem you are having. You can download the update from the www.driveuconnect.com website. If that does not work you can also contact the dealership. We would like to contact the dealership to see if we can do anything to assist. which dealership have you been working with?
Thank you again for your email. Should you require additional assistance, or have any new information to provide, please reply to this email message or call 1-877-I-AM-JEEP (1-877-426-5337).

Jeep Customer Assistance Center
*****END OF CAC EMAIL*****
Hi Robert,
We are stuck with Criswell in Gaithersburg. They supposedly ordered a part
to stop some of the problems faulty reading problems and the failure of the
car to switch gears about a month ago but I ve never heard back from them so
assume either it is on back order or they have forgotten about us. I am
very suspicious about this car, and think there was something seriously
wrong with it when I got it. I would like to know when it was mfg. and how
long it sat around. We are scared to death of it. The idea that we could
not put it into neutral when we ran out of gas has me extremely worried. If
you don t get that fixed I think you will have fatalities. Someone runs out
of gas on the highway or a winding road , the car is in drive, and it can t
be taken out of Drive so it can be pushed to the side? Fatalities waiting
to happen. If you take away the mechanical ability to take a car out of
gear by making it all electronic, when the electronics fail, the car can t
be controlled. Whatever idiot allowed that should be fired.
[redacted]
*****END OF CUSTOMER EMAIL*****
Dear[redacted],
Thank you for the dealership information. We will contact them to see
what we are able to do for you. We will contact you once we have more
information.
The vehicle is able to be put in neuteral while the power is off. The

Dealer Code: 35- 60433 Dealer Name : CRISWELL CHRYSLER JEEP DODGE
Dealer Phone : 301-948-0880 Writer called over to speak to the service
manager. SM Joe advised that the vehicle was there 4/15/2014. Joe states
that they did a software update. Joe states they ordered a camera for the
vehicle for the front collision warning camera. Joe states that the part
is not in yet. Joe states that he is going to look into it and contact us
back.
****
Service Manager Joe called again to correct the information. Joe stated
that they have received the part and were going to contact the customer
to have it fixed.
Dear Wendy,
We have spoken to the dealership and they stated they have the part in
for you and will be in contact to set up an appointment. If we can be of
assistance in the future please feel free to contact us.
Thank you again for your email. Should you require additional
assistance, or have any new information to provide, please reply to this
email message or call 1-877-I-AM-JEEP (1-877-426-5337).
Sincerely,

Robert

Jeep Customer Assistance Center
*****END OF CAC EMAIL*****
Dear Robert,
I want to let you know that I am again taking my Jeep in for service next week because of the transmission and other items that have us extremely scared. If there is a better service center to go to than Criswell, I am happy to try it.
I will probably forget some of the problems but here are what I recall:
1. Transmission: I have been made aware of a batch of bad transmissions in the G Cherokee. Mine is clearly one of them. I understand Chrysler will only replace it if the customer insists. I insist!!
a. Routinely refuse to change gear. I can only get it out of first gear by putting it into Sports mode and then back into regular mode.
b. has started popping out of gear into neutral while the car is in motion and will not go back into gear. THIS IS A LIFE THREATENING DANGEROUS SITUATION. THE TRANS MISSION MUST BE REPLACED!!
2. Cruise Control doesn t work.
3. Engine light remains on all of the time. They tried to take it off when it was serviced last time but did not succeed.
4. FCW doesn t work. They replaced the module. Before it just told me I was about to crash when I was alone on the road or went through an EZPass fast toll booth or radar area. Now it just doesn t work at all.
5. Navigation system routinely goes off into nowhere (off the road on the map) and constantly says it is having to reroute. These are not on new roads.
6. USB in forward console does not work. They said they repaired it. It doesn t work for me, either on my old phone or new one, or any other USB connections. Consequently I cannot update the software.
7. Select Terrain does not work. Can t tell if it is the whole mechanism or just the light out on the module.
8. Phone periodically disconnect and I get a message that it needs service. It will not reconnect. This happens on 2 different phones.
9. I left the keys in the car. Knew it could not lock. It did. Small dogs inside. The app would not unlock it. Worked with UConnect by phone. They could not get it to unlock and told me to call the fire department. I kept trying the app while waiting for the fire truck and it finally unlocked.
I m sure by the time I get an appointment I ll remember the rest of the problems.
Hope you can see why we are beginning to think this $50K car is a death trap and need to be comfortable these issues are being resolved.
Any assistance you can provide in getting these problems rectified is greatly appreciated.
Kind Regards,

Briefly summarize why the customer is contacting Chrysler: Customer contacting stating that his vehicle is with the dealer for service and that he is seeking assistance in resolving his concern.
Briefly summarize what the customer is expecting: Customer is expecting resolution.
Customer states that he has the following issues:
-Blue smoke coming out of tail pipe when on an incline. (did an oil pan switch per TSB) still occurring.
-Pixels in the instrument cluster., (replaced instrument cluster) still occurring.
-Radio is giving a 911, vehicle phone requires service. (new radio ordered and placed in vehicle) still occurring. Illuminates the 911 light on the mirror, light stays on even after the warning disappears.
-Radio resets to default settings.
-ESC light comes on at times and will stay on until the vehicle is turned off. (booster valve that was defective, replaced) still occurring.
-ACC/FCW disabled light comes on intermittently. Dealership states that the vehicle doesn t have this feature.
-Heated/vented seats work intermittently. On low the seats feel hotter/cooler than when on high.
****
customer states that the dealer advised him they had opened a STAR case.
Writer notes that there is no STAR case on file.

Writer contacted the dealership.
Service department unavailable.
Writer advised that the case would be escalated due to customer satisfaction and to reduce inconvenience during escalation process.
Customer is expecting STAR to be contacted on the above concerns and to have further technical assistance.
Customer advised a call back is required and will take place within one business day by COB their time

Writer contacted SM Chris at (26818). SM explained the vehicle is not currently at their dealership. Customer picked up vehicle last week. SM stated that the customer has access to a TCB and is constantly coming in complaining about all kinds of things. Some of the current issues customer is alleging are happening; first the check engine light keeps coming one, Also there is a light on the interior of the vehicle that comes on. SM said they have contacted internal resources including SK915 as well as the area tech advisor also Mike McDowell. SM verified customers email address as ron.g[redacted] SM also verified last known mileage as 10733. SM sent writer the emails they received from the customer to review. SM said currently they are waiting to hear back from the internal resources they have contacted. Writer advised they will follow up next week on 06/03/2014.

****Correction to lines 80-88, these lines were meant to be placed on a

different case.
case number was [redacted].
Customer contacted writer explaining all their concerns with their vehicle. Customer says they originally took their vehicle into the DLR in January 14 2014 with about 20 different issues. Customer says there vehicle has had 4 different TSBs they ask about. Customer wants to know why there has not been a STAR case opened. Customer explained in detail all their current concerns with their vehicle. First, concern is the radio it keeps popping up a 911 icon and it was replaced and is still doing it. Second, there are pixels that appear on the instrument cluster when it is in digital mode or on the tire pressure screen. Third, ECS light randomly illuminates and customer wants to know if it has anything to do with the brake booster valve that was replaced. Forth, when vehicle is parked on an incline after it is started blue smoke comes out. Customer says this was already addressed and supposedly repaired. Customer wants to know if the DLR replaced the oil pan with the original design or the modified one. Also along with this issue if it s going to affect there dip stick and cause it to not work properly. Fifth, concern is there is an error icon that turns on when using cruise control. The icon is ACC/FCW is disabled contact service. Customer says it only does this on the freeway when using cruise control and has done it 4 times in 6 months. Sixth, concern is with the air suspension an icon shows up or down when it shouldn t customer says. Seventh, issue the transmission shifts hard and clunks when going from park to reverse and especially on an incline. Customer says they have an appointment on 6/3/2014 to take their vehicle in for a recall repair. Customer ask about the N58 recall and why there vehicle is not part of it considering there build date of their vehicle was around the same time. Writer advised there case was going to be escalated to an Enhanced team and they will be contacting them. Customer said that was fine.

Call to dealer 71- 26818 POWAY CHRYSLER DODGE JEEP RAM 858-551-1234
Spoke with SM Chris.
States vehicle is there. States AM and other Chrysler representatives are aware of this customer and vehicle.
CA advised SM that vehicle is now part of the ECS program and to follow the directive in VIP that vehicle needs to be diagnosed and then contact us with information before proceeding with any repairs.
Call to customer [redacted]
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66207 The reason for the customer contact was to provide or request the following information:
Called to introduce myself.
Call from customer. States he did not receive my email. Correct email address is [redacted]com. CA will resend contact information.
Customer is concerned that his vehicle is not listed as part of the N58 recall. CA advised that the recalls are VIN specific and base on specific location, build date, assembly line and even time of day. CA advised if TS determines that based on specific symptoms this vehicle is experiencing then recall specific work could be done if warranted. This would be the decision of the TS.
CA advised that once the dealer has finished the diagnosis process the case will be escalated to our TS and they would work with the dealer technicians.

CA will monitor the process and update the customer as needed by phone or by email. Customer agreed.
Status update provided via email to the following email address:

Voicemail from customer requesting callback to discuss status of the diagnosis and repair of his vehicle. Alleges email to him form SM stating that process will take longer because ECS involved.
Call to customer [redacted] Spoke with customer and advised that involving TS actually makes the process go faster. CA advised will monitor case for updates and contact him every few days with updates as needed.
Call to dealer 71- 26818 POWAY CHRYSLER DODGE JEEP RAM 858-551-1234 Spoke with M Chris. Expects to have a diagnosis possibly by 6/12/14. States he will email customer.
Status update provided via email to the following email address:
[redacted]
I wanted to let you know that I spoke with the dealer yesterday the 10th and they advised me that they are working to complete the diagnosis process. I will be contacting them again tomorrow the 12th for an update and will contact you accordingly.
Have a good afternoon.
End of Status Update
Call to dealer 71- 26818 POWAY CHRYSLER DODGE JEEP RAM 858-551-1234 Spoke with SA Marley. States they do not have a diagnosis yet.
States she should have more information on Monday the 16th.
Status update provided via email to the following email address:
[redacted]
I wanted to check in with you before the weekend. I was able to speak with the dealer and they are continuing to diagnose the issue with your vehicle.
I will be checking with them again on Monday the 16th.
In the meantime I hope you have a great weekend.
End of Status Update
Call to dealer 71- 26818 POWAY CHRYSLER DODGE JEEP RAM 858-551-1234 Spoke with SA Marley.She is going to check with technician and then call back.
Email to AM SKP3.
Writer took call from SA/ Marley none of the concerns have been duplicated, customer does have the recall on his vehicle and parts have been ordered. Technician is still checking into the issue with a noise in the headrest area.
Call to dealer 26818 POWAY CHRYSLER DODGE JEEP RAM 858-551-1234 Spoke with SA Marley. States they did reset the air suspension error code and determined it was from the customer pushing the button repeatedly.
Unable to duplicate all other concerns, P14 recall parts on order.
States customer is going to be called to pick up vehicle.
CA called AM SKP3 for input on how to proceed with this customer.
SA, Marley contacted writer advising that they are going to have the customer come pick up the vehicle. SA advised that she needs to be paid for the rental for 17 days at $30.00 a day. Writer advised that this would be noted for the CA.
CA added DM notes approving rental from 6/2/14-6/19/14 at 30.00 per day.
Voicemail from customer requesting call back. States he feels he is being ostracized by dealer.
CA called AM SKP3 for input on how to proceed with this customer.
Call from customer. Advised customer he needs to pick up vehicle so he is not charged for rental expenses.
Customer states he believes the dealer did not do all they could to try to duplicate any of his concerns and purposely prolonged the amount of time he was out of his vehicle.
Customer states he is considering asking for replacement of his vehicle.

CA offered service contract and car payment and customer declined. Customer wants to get another opinion at another dealer before deciding if he wants to pursue replacement. Customer does not want case closed. CA advised customer is working with additional representative to determine next steps.
Voicemail from AM SKP3 stating this is not her district.
Call from customer stating he wants to go to Jack Powell dealer in Escondido. CA agreed that he could do that to get a second opinion.
Call to AM SK915. AM states to have customer work with SM at Jack Powell dealer 61339 760-745-2880 to arrange appointment with Tech Advisor anytime after 7/14/14.
Call to dealer 61339 760-745-2880 Spoke with SM Gary. SM will take customer s call to arrange appointment with Tech Advisor any time after 7/14/14. CA advised SM of conversation with AM for working with this customer.
Voicemail from customer stating the 911 message came on the UConnect screen again.
Call to customer [redacted] Advised to contact SM Gray at 61339 Jack Powell 760-745-2880 to arrange appointment with Tech Advisor. Appointment would have to happen after 7/14/14. Customer wants to take vehicle in sooner after speaking with Matthew at same dealership. CA advised that he should tell SM Gary of his conversation with Matthew in service. As of now the decision is to wait for the TA to personally look at his vehicle.
CA stated that he could ask the SM to ask the TA if customer could be present during diagnosis process or at least have a conversation with the TA after diagnosis process is complete.
CA will call SM Gary on 6/23/14 to advise he have a conversation with Matthew about TA appointment.
Warranty Administrator Marley called back stating she tried to claim rental with RA but she did not know if she needed to use RA or PA. CA advised WA to use RA to see if goes through. CA advised WA to use PA instead of RA.
WA Marley called back stating she tried to process claim and it would not go through once again and she inquired if she should contact the warranty hotline and writer confirmed she does.
61339 JACK POWELL CHRYSLER JEEP DODGE 760-745-2880
Agent attempted to contact dealer Service Manager Gary, however, SM not available. Left message for a return call at extension 66207
The reason for the dealer contact was to provide or request the following information: Asked for update by phone or email to see if customer has contacted him to arrange appointment with Tech Advisor anytime after 7/14/14.
SM Gary contacted writer requesting to speak with CA RB1362. Writer stated that CA is currently unavailable. Writer inquired if an appointment has been set up to meet with the TA. SM Stated that they currently are just waiting to hear back from the TA, but they did speak with the customer about it. SM stated he will try to remember to contact CA RB1362 when the customer and TA have set a date, but would also like CA to follow up as well.

Customer called for assistance with his 911 service. Agent transferred customer to uConnect Access.
The customer was sent from uconnect access so the agent was going to transfer him to ECS but he said he would call his CM hisself.
61339 Dealer Name : JACK POWELL CHRYSLER JEEP DODGE Dealer Phone : 760-745-2880
Agent attempted to contact dealer Service Advisor Hector, however, SA not available. Left message for a return call at extension 66207
The reason for the dealer contact was to provide or request the following information: Would like update on status of inspection by TA and what customer has been told.
SA Hector contacted writer. SA wanted to have CM s extension. Writer provided it and warm transferred the call to RB1362.

Call from A Hector. States customer picked up vehicle earlier today.
Miles out are 13971.
The following is information from STAR case [redacted]
1. Display 911 vehicle requires service - the condition is not present at this time and there are no TSBs or software updates
2 .ESS light illuminated and seem to be too sensitive or not grabbing - vehicle was driven for a period of time using brakes and the condition is not present at this time, there are no updates and condition could not be duplicated
3. Intermittently ACC error message will come on, vehicle was driven in mixed driving including driving pattern that includes turns, the condition did not duplicate itself, no updates to any related modules or TSBs found
4. Pixilation on instrument cluster - TA to further investigate with engineering
5. The backup camera will change color and distorted - the condition is not present at this time, no software updates, dealer to check connector for camera feed
6. Shocks are leaking/ noises in front end suspension - TA drove vehicle and has not heard any noises coming from the suspension, small residue in this area - does not warrant replacement but TA recommends residue gets monitored during oil changes to see if there is any change in the residue
7. Parking uphill sees blue smoke from tailpipe - unable to duplicate this concern, the oil is appropriate and the oil pan is revised
8. Temperature does not change from the previous time the vehicle was turned on - BCM update, after that engineering calibrates the parameters for temperature updates
9. The headlights are turning on half an hour too early, there is a clunk when going from park to reverse on an incline - anytime system is on auto, the vehicle during dawn/dusk and instances of light where the sensor sees it is adequate to turn on the light, the vehicle will do so. Sensor voltages and auto headlamp operation are as expected at this time.
10. Delay when a quick take off - road tested at takeoff in normal and sport mode, all systems are operational alike other models and there are no codes or TSBs relating to concern
11. When getting in the car the customer will feel the lift mode when showing that its off - ASCM will change height at times when vehicle is in easy exit/entry and if in a much higher setting, the vehicle will put system in park mode height to reduce height as part of its functionality.
12. When turning into parking spaces there is a clunk - road tested vehicle in parking lot for almost half hour and no abnormal noises detected.
13. Customer hears a clunk when taking out of park and into reverse on a slight incline - TA compared to other vehicles and when vehicle is coming out of park, operational characteristic
14. P14 recall - will be done by dealer
Call from customer. States his main concern is that the radio is still having issues. States he contact UConnect and was told by them that it could be a hardware issue. Alleges he was told by UConnect that they could not open a case because this case is open. CA advised unaware of that process.
CA advised that any concern in the future can be address by a dealer per the terms of his warranty.
Customer agreed to closing this case and that there was nothing else required of this CA.
Customer wanted to close this case so UConnect specialist could open a new case.
CAIR ESCALATION UPDATE

I understand you have an appointment scheduled for Monday the 28th. I will contact you no later than the end of business on Wednesday the 30th with any updated information.
End of Status Update
Call from customer. States he installed UConnect software update 12.25.05 and it seems to have taken care of the 911 message issue and the back up camera picture shaking. Customer not sure if will take care of the one time the backup camera went blank in a when the outside temperature was 103 degrees. CA advised customer to note circumstances if this happens again.
Customer is going to call dealer and cancel appointment with dealer for 7/28/14.
CA is going to call dealer to contact TA to see if she able to find anything related to pixilation on the back up camera.
Customer and CA will discuss closing this case after CA has a chance to find out about TA and pixilation.
Call to dealer 61339 JACK POWELL CHRYSLER JEEP DODGE 760-745-2880
Spoke with SA Hector. States the pixilation was on the instrument cluster with one white dot. States he has not heard back from TA concerning the pixilation.
Email to TA on this case to see if they have found anything on the pixilation issue.
Status update provided via email to the following email address:
[redacted]
I wanted to let you know that I have reached out to the technician who inspected your vehicle concerning the question of the pixilation.
Can you tell me if since the UConnect update has the pixilation occurred?
I will get back with you again on Wednesday, the 6th after I have had to chance to hear back from the technician.
In the meantime you have a great weekend.
End of Status Update
Begin Customer Message reviewed:
Hi [redacted]
The pixelation issue still remains after the new connect software. I ve now also been able to get it to show up on additional screens on the EVIC. So far no more 911 messages and the back up camera no longer

jitters. I haven t been able to get to a hot climate to see if the camera freaks out again when the temp was 103F outside. Maybe this weekend I will go out to the desert and test it out. If the tech wants to talk to me I would welcome that as I can now explain the other screens that I can produce the pixelation/dead pixel issue what ever it is.
Thank you,
Ron

Status update provided via email to the following email address:
[redacted]
Did you make it to the dessert this past weekend?
I have reached out to the factory representative again who inspected your vehicle to see if she was able to get any information on the pixilation issue.
I will call you on Friday the 8th to discuss possibly closing your case.
We do appreciate you being part of the Jeep family.
Have a good afternoon.
End of Status Update
Call to customer [redacted] Customer states he still has pixilation issue in multiple screens.
States he doesn t understand why he can t be told that a fix is in the works for something such as the back camera jittering that a UConnect update fixed, instead of having to wait for it to come out. He feels all his trips to the dealer while waiting for the fixes to be released are a waste of his time. Feels like he as been a guinea pig for this model and that if he had waited to make the purchase of the same model all of his issues would have been fixed by now and he wouldn t have had the problems.
CA could not offer a service contract as customer already has one.
Customer did not want a vehicle payment reimbursement. Wants vehicle reviewed for replacement.
CA advised this is not a formal legal filing but a review. CA asked customer to allow 2-3 business days before next contact.
Is there any damage to the vehicle?NO
Actual/accurate mileage? 16022
Is the vehicle leased or purchased? PURCHASED
Name of lender: CHRYSLER CAPITOL
Is the customer in a rental right now? NO
Is this vehicle used as a personal vehicle or for a business? PERSONAL
Are there any modifications to this vehicle? NO
If Chrysler makes an offer to replace the vehicle, what dealer do you prefer to work with? 61339 JACK POWELL CHRYSLER JEEP DODGE

*********Case Escalated to I2R**********
Reviewed Warranty History which determined this case should be escalated to I2R for case management.
*** JD with the I2R Customer Resolution Team is now responsible for this CAIR. If the customer should call, please direct them to contact JD directly at [redacted]. Thank you. ***
Placed initial call to customer. I explained that this case has been escalated to me for special handling and I would like to assist with vehicle concerns. I provided my hours and a number for questions. Customer expressed frustration with number of times vehicle has had to go in. Customer is still getting intermittent ESC light and pixels on shifting display will not turn off. Customer expressed frustration at being used as a guinea pig while Chrysler determined what TSBs needed to be produced to fix vehicle. Customer stated all other concerns on his vehicle have been repaired. Customer wants to be traded out of his new vehicle at no cost to himself. Advised customer that unable to duplicate responses are frustrating, but we don t want to make repairs that are not needed. Advised customer I would review his case for all possible resolutions. ***Follow up with customer 8/18/14
Called dealer 26818 and spoke with sales manager Farook who agreed to participate in CDI program with customer.
Called customer who stated he is still experiencing the small pixilation on his display screen. Customer stated that the pixilation does not

obscure his view of the radio screen and does not hinder the operation of the vehicle. Offered customer opportunity to participate in the CDI program; customer stated he does not want to come out of pocket. Advised him that a trade of that nature is not being offered. Offered customer $1000 cash settlement. Customer stated that he does not want cash; he either wants a new vehicle at no cost to him or his vehicle fixed. Advised customer that we have exhausted our corporate resources trying to repair the vehicle and that his current concern is not serious enough to warrant repair. Customer stated he wants an answer from engineering as to what is causing the pixilation and an assurance that there is not anything more seriously wrong with the vehicle. Advised customer that all previous diagnoses have determined that the vehicle is performing fine. Customer stated he will just drop vehicle off at dealership and leave it there until there is a repair for the vehicle. Advised customer that the dealership has the authority to deny him the ability to leave the vehicle on the lot. Customer would like me to investigate to see if engineering has responded to field rep. ***Follow up with customer 8/21/14
Emailed TA regarding pixelation.
Called customer advising that JS2481 has emailed TA regarding his concern so that he can have an answer directly from her. ***Follow up with customer 8/26/14
KKY3 returned my email and suggested reaching out to AM SK915 regarding customer s concern as FT that reviewed customer s vehicle no longer works for Chrysler. If we get nom response from AM, TS stated that customer can bring vehicle in and he will review with dealership to get answer regarding customer s concern with pixilation. Called SK915 requesting call back.
Called customer and advised of TS s suggested course of action. Apologized to customer about miscommunication regarding FT. Customer expressed frustration that I told him that we were not worried about his concern; advised customer that I came to that conclusion as his concern does not affect any of the vehicle s operations, but I am happy to pursue this course of action since my answer was unsatisfactory for him. Advised we would give AM a week to respond. ***Follow up with customer 8/28/14
Customer called stating that he has gone on the Uconnect website to check for updates for the media system and found that the update shown is the software that he already has and that there is an update for a 2015 vehicle. Agent spoke with the Uconnect team and was told that this is a glitch on the site. Agent relayed this to caller.
Called AM SK915 who stated that she has overseen customer s repair as he has gone to three different dealers; AM stated that the concern is not serious enough for repair. AM suggested I email SAG2 for further information regarding previous FT s notes. Emailed SAG2.
Called customer and advised of current progress. Advised him that new FT will review previous FT s notes. Reviewed CDI terms with customer at his request. Customer agreed to wait for answer from SAG2. ***Follow up with customer 9/2/14
LVM for customer requesting call back. ***Follow up with customer 9/4/14
Customer returned VM. Advised customer that SAG2 could not find any notes from the previous FT regarding his case. Advised customer that TS KKY3 is happy to review his concern if he is willing to take the vehicle back to the dealership. Customer expressed frustration with the amount of recalls and repairs he has experienced with this vehicle. Customer reiterated that he would like the vehicle replaced. Advised customer that AM SK915 has been involved with his case and has not offered replacement/repurchase and that she deemed the vehicle s concern not serious enough for repair. Advised customer he can go through the CDI process if he would like a different vehicle. Customer expressed frustration that I could not give him exact figures on how much the trade assistance would cost him out of pocket and stated that he believes his vehicle is a lemon. Advised customer that he can take his vehicle back in for diagnosis, go through the CDI process, or accept the $1000 cash settlement I have previously offered. Customer refused offers and asked to speak to a supervisor. ***Supervisor escalation to JS2481

Called customer at ([redacted] per his request for supervisor contact and LVM requesting return call. Provided my number for assistance and advised JV1002 would follow up again within 2 business days to see what he has decided.
Customer LVM requesting return call from JS2481.
-Returned call to customer. Customer states he has been having issues with this vehicle for 8 months and his concerns are not being taken seriously. Customer lists every repair that has been attempted, including several which are not indicated on repair history and states it has been incredibly difficult even obtaining RRTs from dealers that specifically address his complaints.
-Apologized for customer s frustration. Advised we certainly are concerned, but issues which are not duplicated at dealer will likely not have recommended repairs. Apologized if he feels dealers were not cooperative. Customer confirms everything is working at this time, but he still experiences a pixelation or missing pixels when vehicle is put into reverse. States both TAs have acknowledged the issue and promised to report back, but no one has ever told him anything other than the issue does not need to be repaired.
-Customer states P36 recall will create further noise issues inside vehicle and he is not willing to endure this. Advised he is not required to have recall performed, and if problems result he can consult dealer.
-Customer asks at what point we consider the vehicle a lemon and swap it out. Advised I cannot provide a black and white answer because lemon law is a separate legal process and his warranty provides repair. Advised TS is willing to assist dealer in further diagnosis, but concerns will need to be duplicated.
-Customer agrees to schedule further service/diagnosis, but requests to work with different CM. Agreed to have new CM follow up in the next 1-2 days to confirm appointment.
-Advised customer we appreciate his loyalty and diligence, but we will likely not be recommending repairs for concerns he cannot demonstrate to dealership.
***Deborah with the I2R Customer Resolution Team is responsible for this CAIR. If the customer should call, please direct them to contact Deborah at 888-542-7239, extension 2123. Thank you. ***
-Called customer and introduced myself as the assigned CM. Customer stated he is planning to contact Dealer Code 61339 (JACK POWELL CJD) and will arrange appointment. Told customer that I would want to be informed of this appointment so that I can ensure ECS case is handled properly. Gave customer my name and contact information.
-LVM for customer, included my contact information and, requested a call back to determine if customer has arranged appointment to take vehicle to dealership.
-Called Dealer Code 61339 and spoke with SA Bill who stated customer s vehicle is there at this time however, they have not had time to complete diagnosis. Told SA Bill that I would contact them after today to discuss diagnosis.
-Called customer and customer stated he and his father have the same name and both go to Dealer Code 61339. Customer clarified the situation and stated he has an appt set for 09/18 9:00am and customer stated he has the MVP to cover his rental.
Gary, Service Director (SD), called stating that they have already had their tech rep out to look at vehicle and went over all the complaints and was advised that a Case Manager is wanting them to go over everything again.
Writer informed SD that the case is being handled by DB1222 and provided contact information on line 653.
-Received vm from SD Gary with Dealer Code 61339 and he stated they have had TA involvement with this ECS case in the past and vehicle is at dealership now. SD Gary requested a call back asking what else should they be doing with the vehicle. Per LINES 632-636, customer stating he is still experiencing a pixelation or missing pixels when vehicle is put into reverse.
****** Following Corporate Resource has been contacted ******
TAPS

on 2014-09-18 @ 15:25
-LVM for SD Gary with Dealer Code 61339, included my contact info and requested a call back.
-Received vm from SD Gary with Dealer Code 61339, advising that they need to be able to speak with my office before they can do anything to the vehicle. SD Gary requested call back to Armon in service, or himself.
-LVM for SA Armon with Dealer Code 61339, included my contact info and advised that I have requested TAPS involvement for this ECS case and requested a call back.
-Called customer and customer stated he was contacted by SA Armon earlier today. Told customer that I have requested TAPS involvement for this ECS case to determine if there is any reporting back from TA for additional repair as customer stating he is still experiencing a pixelation or missing pixels when vehicle is put into reverse. Customer stated he is not worried because he has been placed in a rental vehicle 09/18 and his vehicle has been down for more than 30 days now.
-Received vm from SA Armor with Dealer Code 61339 and he requested a call back.
-LVM for SA Armor with Dealer Code 61339 and requested a call back.
-Called Dealer Code 61339 and spoke with SD Gary. Inquired with SD Gary about the TA s involvement with the vehicle concern previously. SD Gary indicated another technician was handling and that person is no longer with dealer. SD Gary stated they are not certain if there would be further instruction provided for the pixelation when going in reverse. Told SD Gary that since this is an ECS case to take no action at this time and explained that I will request the TAPS ECS TS to contact him to discuss further.
-LVM for SA Armor with Dealer Code 61339, included my contact info, advised that I have requested TAPS involvement with the ECS case. Further, provided CAIR [redacted] 3 and explained that we authorize use of a rental vehicle until such time TAPS TS can speak with either SD Gary or SA Amor about any additional technical repair guidance for the pixelation when going in reverse. Advised that if they need to speak with me further, to contact DB1222 at 214-583-2123.
-Received vm from SA Armor with Dealer Code 61339 and he is inquiring about TAPS contacting them about this ECS vehicle.
-LVM for SA Armor at 760-658-6837, included my contact info and advised that we would want the customer s vehicle to remain at dealership until TAPS TS contacts them about this ECS case.
-Received vm from customer, customer stated he has been contacted by someone at Dealer Code 61339 and customer stated he is being told dealership is still waiting to be contacted.
-Called customer and told customer that our TAPS TS will be contacted SD Gary or SA Amor with Dealer Code 61339 and that we must allow this communication to be made. Customer stated he would be leaving to go out of the country 09/30 and will not return until 10/07. Told customer that we would continue working toward repair and that I would also still be looking into his case. Explained to customer that we will ask him to return the rental vehicle Dealer Code 61339 after repairs are completed or if he is leaving the country.
CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
-LVM for customer, included my contact info and advised that I was just wanting him to know that I am still looking into his case at this time.
LVM for customer, included my contact info and advised that I was just wanting him to know that I am still looking into his case at this time.
CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted] FOR INFORMATION
-Received vm from SM Matthew with Jack Powell CJD stating that the customer s vehicle has been there since 09/18 and that they were inquiring to see if someone would be coming to the dealership.
-Received vm from customer, customer stated he was contacted by Dealer Code 61339 and told that no one has contacted the dealership.
-Called customer and customer stated his vehicle is still at Dealer Code

61339 (JACK POWELL CJD) at this time but, customer stated he will be leaving to go out of town 09/30 afternoon returning 10/07 and customer needs to know what he should expect.
-LVM for SM Matthew with Jack Powell CJD, included my contact info and requested a call back advising that it is important that someone returns call to TAPS TS SWM15 regarding customer s vehicle as this is an ECS Case. Further, advised that I have spoken with customer today and confirmed that he has not yet picked up his vehicle from Dealer Code 61339 but that the customer is leaving to go out of town 09/30.
-Received vm from SM Matthew with Jack Powell CJD and he stated the vehicle is actually still there but that they have had to move on to another vehicle stating no one has contacted them. SM Matthew stated he would try to contact TAPS TS SWM15 again.
-Called customer and told customer that I understand he must leave to go out of the country 09/30. Told customer to go ahead and pick up his vehicle from Dealer Code 61339. Apologized to customer for the inconvenience as customer stated he has been told by Dealer Code 61339 that TAPS TS has not contacted them but this was incorrect information. Told customer that I will still look into his case, customer agreed to return rental vehicle and explained that I would plan to speak with him upon his return to the country 10/07.
-Received vm from customer, customer stated he has returned back from out of the country and customer requested a call back.
-LVM for customer, included my contact info and requested a call back advising that we would need to arrange to get vehicle back to dealership.
-Called customer and told customer that we would need for the vehicle to be diagnosed with TAPS involvement to determine if there is a current issue. Apologized to customer and told him that we try to ensure TAPS TS can speak with SM at dealership but it seems that the vehicle was not at dealership when the contact was attempted. Told customer that since a TA was involved with previous diagnosis attempt, I would need to discuss further with SM and would follow up with customer 10/16
-Called SM Matthew with Dealer Code 61339 and told SM Matthew customer has returned from out of country and we need to schedule vehicle to come back to dealership whenever the TA can be requested. SM Matthew stated he would check on this possibility and would contact me, gave him my direct telephone number and he may possibly call back 10/15.
-Called Dealer Code 61339 and asked to speak with SM Matthew but he was not in today. Agreed to call back 10/21.
-LVM for SM Matthew with Dealer Code 61339, included my contact info and requested a call back to determine if he has arranged for field tech to come out yet.
-Called customer and customer stated the since we last spoke that the trim fell off his vehicle as well. Customer stated he received a call from SM Matthew with Dealer Code 61339 and they arranged vehicle to be dropped off 10/27 and that a technician would be there on 10/28 to look at the vehicle. Customer stated he knows dealership will provide him with rental for the 1st day and I told customer that we would allow for diagnosis to be completed and would decide what actions need to be taken from there.
-Received vm from customer, customer stated he took vehicle back to dealership and factory rep looked at the vehicle. Customer requested a call back to discuss further.
-LVM for SM Matthew with Dealer Code 61339, included my contact info and requested a call back to determine the outcome of the diagnosis from factory rep 10/28.
****** Following Corporate Resource has been contacted ******
TAPS
on 2014-10-29 @ 17:31
-Called customer and customer stated vehicle is at Dealer Code 61339 at this time and that he has been told they were able to observe concern with brakes pulsating but unable to make any repair until they are contacted by TAPS TS on this ECS case. Customer further stated he was unhappy to learn that the factory rep observed concern with pixelation but customer stated he was told they deem this to be a normal characteristic of his vehicle although he was not allowed to compare in

another like vehicle. Told customer that I have a request in to SM Matthew to call me back and discuss further. Also, advised that I have requested TAPS TS to contact Sm and discuss repair opportunities. Customer stated at the end of this process, he would rather not have ECS involvement. Told customer that this status was intended to enhance customer satisfaction but I would note his request.
CAIR has been sent back because of the following reason:
Per CAIR, customer has requested to be removed from ECS Program
-LVM for SM Matthew with Dealer Code 61339, included my contact info and advised that this case has been removed from the ECS program. Inquired about most recent diagnosis regarding brake concern and pixelation concern. Requested call back or fax of the RO showing repairs or outcome for each.
-Called customer and customer stated he picked up his vehicle from Dealer code 61339 10/31 and is aware that with the pixelation concern was determined to be no trouble found. Customer stated the dealership did complete brake repairs to his vehicle and he stated on the way back from out of town the vehicle began wobbling badly and customer took vehicle back to Dealer Code 61339 again 11/03. Assured customer that we will contact SM Matthew with Dealer Code 61339 to determine vehicle repair status. Told customer that the case was no longer on the ECS program but we are confident that the certified trained technicians at Dealer Code 61339 can address the concern. Customer stated he feels this is just going around and around. Told customer that his CM will be KC556 and he will be able to resume the handling of this case and ensure that we conclude with a positive outcome.
Customer was warm transferred from 88F as customer was wanting to speak to uconnect in regards to the pixelated view he is getting through his EVIC system. Agent advised customer that the EVIC system is different from the UConnect system. Agent verified that it was the evic system that was experiencing the issue. Agent advised customer that he would have to consult with the dealership on how to repair his vehicle.
DB1222 please contact customer in regards to this situation.
-LVM for SM Matthew with Dealer Code 61339, incl my contact info and requested a call back to determine if the vehicle is there and determine vehicle repair status with new brake concern.
Customer called back to find out who their new CM was so agent followed Answer ID 17118
-Recvd vm from SM Matthew with Jack Powell CJD (61339) who stated customer brought his vehicle back in shop 11/03 and, vehicle was released back to customer 11/04 with no further repairs. SM Matthew stated they were unable to observe brake concerns with the wobbling as customer described.
-Called customer and customer stated he was in class at this time and he requested a call back.
*** Kelsey with the I2R Customer Resolution Team is now responsible for this CAIR. If the customer should call, please direct them to contact [redacted]. Thank you. ***
I called the customer at ([redacted] and the customer just complained about the technicians that we have been lying to him, he also stated that he does not like the pixleating to be normal, and he was frustrated with the break pads being put on the vehicle. The customer then stated that he was not happy with us stating that his issues were normal and then us coming out with TSB s , the customer then requested that I call SA Matt.
**** I called Jack Powell Chrysler Jeep Dodge and I spoke with SA Matt and I updated the RO history. *** Will follow up on Friday.
****** Below Customer Contacted for Documentation Request ******
[redacted] on 2014-11-14 @ 12:57
I called the customer back at (619) 851-2909 and I confirmed that the vehicle is repaired/ unable to duplicate. The customer then complained about being out of his vehicle, and I offered him a cash settlement of $2,000.00 , and the customer stated that he would look it over. Will follow up on Wednesday.
***** Customer Document Received *****
I called the customer at [redacted] and he stated that this deal seem agreeable to him, but that he will have someone else look it over before

he signs it. Will follow up on Friday.

****Begin structured narrative T2 - Beginning Narrative
Briefly summarize why the customer is contacting Chrysler:
Briefly summarize what the customer is expecting:
****End structured narrative T2 - Beginning Narrative
Briefly summarize why the customer is contacting Chrysler: The customer is contacting regarding experiencing multiple vehicle issues, the customer is requesting lemon law and states they have had to take their new Jeep to the shop about 7 or 8 times now, 4 times for the 911 light and about the same amount of times for the airbag and seatbelt light.
Briefly summarize what the customer is expecting: The customer is expecting further assistance as they are requesting lemon law and they state their vehicle has been at the DLR now since the 20th of May and they state the DLR told them the part required is on back order and will not be in until June 10th 2014. The customer is extremely unsatisfied with their new vehicle. The agent contacted AUTOPARK and spoke to parts to obtain the required information and they stated the only part they have on order right now is for the occupant restraint module which is on back order until the 10th. The agent then spoke to Daniel Owen in service who is personally working on the customer s vehicle. Daniel stated they are also going to perform a full radio replacement but they do not have the order information as of yet. Daniel stated they are going to provide the customer with a loaner vehicle today but they can only authorize it up to 5 days.
Writer contacted AUTOPARK CHRYSLER JEEP and spoke with Matthew in Parts

Matthew stated part information for order is as follows:
Part #: 68222877aa
Part Description: occupant restraint module
Order #: $0522s
ETA: June 10th 2014
Is customer in rental? YES
If yes, who authorized rental? DLR
Is the vehicle off road? YES
Order type: VOR
Writer advised customer that their parts concern will be escalated to the Parts Support team for parts resolution, and that their Case Manager will provide them updates on the status of the part within 4-5 days. If an update is received sooner, customer will be contacted sooner.
Assigned case to 88F
Customer called saying case manager has not called and customer is frustrated with process, dealer and his vehicle.
-
Agent reviewed narrative above and advised case is escalated and provided customer with case management line. Customer says he has no time now to speak with CM but will call that number tomorrow.
*****CASE MANAGEMENT DISTRICT M*****

4 Chrysler vehicles in household, 3 new and 1 used
MVP Contracts = 1 active
Writer called and spoke to SA Daniel who advised the writer that he customers vehicle has quite a few issues. SA stated that he needs to replace the radio because the radio does black out and 911 comes up as unavailable. SA also stated that the customer needs to the module for the air bags and the seat belt. SA stated that the airbag light comes on intermittently and the seatbelt light is on all the time. SA stated that it is not registering that the seatbelt is being used when it is. SA also stated that the forward collision warning is also coming on and the adaptive cruise control will not work because of the forward collision warning is coming on. SA also stated that the Brake Booster recall they cannot order the parts. SA stated that current mileage on the vehicle is 19448 and that the customer is currently in a loaner vehicle. SA stated that the customer needs to be in a bigger vehicle due to his job. SA is requesting that we reach out to parts expediting to try and get the parts that are back ordered. SA has ordered the occupant restraint module Part #: 68222877aa Order #: $0522s and the current eta is 6/10/2014. SA stated that he will contact the customer and let him know that Chrysler has contacted the SA. Writer advised SA she will follow up with him later this afternoon.
Writer called and spoke to the customer and advised him that we are trying to locate the part that he needs to get his vehicle to get it repaired. Customer stated that the 911 issue has happened for about a year and that he has had the software flashed every time he has gone in to get an oil change. Customer stated that about 3 weeks ago while he was driving about 80mph the airbag light, seatbelt light, the 911 service light, the adaptive cruise control, and the forward collision warning light all came on and stayed on. Customer stated that he had to bring it back into the dealership and the vehicle has been there since. Customer did state that when he first purchased the vehicle there were rivets missing in the wheel wells and the lift gate handle was misaligned. Writer advised the customer that she will contact him with any updates once we are able to find his part. Customer provided email address [redacted] Writer advised customer that she will do further research for a Service contract or payment reimbursement.

Begin Customer Message reviewed:
Samantha,
This is an unacceptable response. Enterprise doesn t run out of cars, and they are not the only rental company in Raleigh, NC. This is not a solution. Please call me to discuss ASAP.
Samantha,
Per our discussion earlier this week, you indicated looking into covering the expense of my jeep for the ~month we believe it will be out of service and also extending the warranty as well as oil changes. Please provide an update in regards to that. As for a rental vehicle, my assumption is I don t have another option since I have not heard back from you. Please update me on status of the vehicle, the costs associated with the time in the shop, and the extended warranty.
Thank you,
[redacted]
End of Reviewed Customer message
Customer contacted writer who stated the parts have arrived and repairs are underway. Customer stated he would like CM s supervisor to contact him back as soon as possible. Writer stated it could be as late as 06/10/2014. Customer thanked and disconnected the call.
Customer: [redacted] calling to speak with CM; SH1186. CM is not available. Writer transfer call to CM; LY81
Customer contacted writer and advised that he was told that his vehicle is repaired and ready to be picked up. Customer stated that he would like

assurance that his case will not be closed just because the repairs are complete. Customer stated that he would like to have his warranty extended, oil changes and a reimbursement for one month car payment. Writer advised customer that his case will not close just because his vehicle has been repaired. Writer advised customer that he would need to send in documents for review for the car payment reimbursement. Writer advised customer that he needs to send in Proof of Payment and a Statement, such as a sales receipt. Writer advised that a warranty cannot be extended but a Service Contract can be added. Writer advised that customers CM will need to research the SC available on the vehicle as well as the SC for oil changes. Writer advised customer that she will send a documentation link for customer to upload the requested documents. Customer agreed. Writer confirmed address per WEBCOIN.
****** Below Customer Contacted for Documentation Request ******
[redacted] on 2014-06-09 @ 09:13
Per lines 155-169, customer requests a call back today, 6-9-2014, with information about the SC available for the vehicle. Writer advised that she will document the request but could not promise a call back today.
***** Customer Document Received *****
Customer Document Reviewed.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66334. The reason for the customer contact was to provide or request the following information: Writer called and confirmed that she has received documentation. Writer requested a call back, and advised customer she will follow up no later than Wednesday 6/11/2014.
[redacted] called requesting to speak to CM SH1186 . Writer advised CMSH1186 is currently unavailable. Writer warm transferred customer to CM AH1270 for further handling.

***** EMAIL BRIEF DESCRIPTION CONTENT *****
Open Case #25093812
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
To Whom it May Concern, I have called into the 800-992-1997 line 4 times now expressing my disappointment with the ownership of my 2014 Jeep GC. I was finally given a case number, assigned a representative, yet have still not been contacted. My frustration is the way this entire situation has been handled since my GC was taken to Auto Park Cary two weeks ago. There seems to be a lot of finger pointing going on regarding who is responsible for the issues I am having relating to my Jeep not being fixed. Most importantly, I can NOT drive my car. The air bag, seat belt, and front collision warning lights are all on. The 911 call button has malfunctioned and been brought in for service 3 times now. As a paying customer of a $52,000+ vehicle (to AutoPark Cary), I would consider myself a high value customer for the Jeep brand. The way this has been handled is embarrassing. It has effected my current employment, taken valuable time away from my family, and cost me out of pocket expenses related to the issues. Thankfully, my service coordinator at AutoPark (Daniel Owen) has done what I believe to be within his power to work with me. It is evident that someone above Mr. Owen should be in contact with me as soon as possible. My last 2 phone calls to the 800 number have resulted in the same situation, an apology, and a status update of 'we will be in touch.' This is unacceptable. I get a quicker response as a consumer from companies that I spend a fraction of what I have spent with Jeep over the last 10 years. AutoPark Cary has given me the latest status

update as: 'We should receive your ordered parts for your GC on June 10th 2014. This will put my Jeep out of service for 23 days as a best case scenario. Again, this is unacceptable. Beyond calling the 800 number again, I am running out of options. I look forward to hearing from someone regarding this issue. Kind Regards [redacted]

Corporate - Product Information - Default - Default - Default	OCM module on back order

Writer contacted (SHERRY CHRYSLER, DODGE, JEEP, INC 67302) and spoke with
(SM or SA Name).
(SM or SA name) stated part information for order is as follows:
Part #:68222877AA
Part Description:Occupant control module
Order #:e0530,
ETA:no date
Is customer in rental?no
If yes, who authorized rental?
Is the vehicle off road?no
Order type: (Daily)
Writer advised customer that their parts concern will be escalated to the
Parts Support team for parts resolution, and that their Case Manager
will provide them updates on the status of the part within 4-5 days.
If an update is received sooner, customer will be contacted sooner.
Assigned case to 96W
Briefly summarize why the customer is contacting Chrysler:Customer states
that he is calling in because the vehicles Forward collision went out,
the cruise control went out and the Air bag light stays on and the seat
belt light. the customer states that the dealership said that there Used
to be a date on the parts and now there is no parts.
Briefly summarize what the customer is expecting:Agent advised the
customer that the OCM module will be able to get sent up to a higher case
manager since its on backorder, but the p14 recall part since it is a
recall we cannot expedite a recall part. The customer had a bad
connection on the phone and the call disconnected.
NEXT AGENT: if the customer call back, inform him again that the OCM
module can be sent up, but the p14 recall cannot. He will be contacted
within 4-5 business days, if there is an update sooner, he will be
contacted sooner.

Customer LVM requesting return call at [redacted]
Customer LVM requesting return call at [redacted]
Called Browning Dodge LVM for SM Jeff.

Called customer to confirm vehicle concerns. Customer states he has already taken the vehicle back to the dealer because crash avoidance was activating again. Confirms alternate transportation provided. States dealer reported same results as last time, not able to duplicate and cannot replace sensor because it is not available yet. Apologized and advised part may be able to be expedited and received sooner to attempt repair. Customer states regardless he does not want the vehicle because it is putting his wife and kids in danger. Apologized and sympathized with customer s concerns. Customer states he did attempt to work out trade with dealer unsuccessfully, but states he wants to stay with a Jeep regardless. Advised I would follow up with dealer and report back more information as well as review the case further to see what can be provided. Customer states he will be out of town after tomorrow and will not be able to answer his phone. Advised not likely to have further information tomorrow, customer agrees to follow up tomorrow or early next week.

Product - Electrical - Unknown - Complete Failure - Default	Front collision warning sensor and housing suffered physical damage
Corporate - Survey By-Pass - D-12-27 - Default - Default	

Briefly summarize why the customer is contacting Chrysler: Customer states that they have been experiencing an issue that a bracket on the rear of the vehicle that contains components of the forward collision warning system of the vehicle had been pushed up/damaged. Customer states that they have been told that they have to pay for this and that it would cost the customer $5000. Customer elaborated that she has had many difficulties in locating a Jeep vehicle to her specifications and that she feels that based off of previous experience that this sensor housing and components had suffered damage from the dealership. Customer further states that she is dissatisfied with this concern and that she would be making further inquires.
Briefly summarize what the customer is expecting: Customer is expecting assistance with warranty disputes.
Agent contacted dealer 68958 and spoke with SM Victor who reviewed customers concern and states that a bracket at the rear of the vehicle had been bent in a specific manor that surrounding bracket components of the forward collision control system of the vehicle was missing, that the left sensor had obtained damage. Dealer states that this was bent in a specific manor that clearly indicated out side damage and that components had not come from the factory bent in this way. Agent advised customer that it is bent in a manor that it is declared physical damage that we cannot process customers warranty request for this. Agent advised customer that it could be possible for insurance to be contacted to see if assistance could be provided under those means. Agent advised that vehicle had passed initial inspection at time of sale and that we would submit customer complaints but assistance cannot be granted further.
The customer called back to say she called the dealership who stated that the damage to the bracket was not that severe and said that they were

waiting for jeep to call back. The SM Victor the bracket is bent the the bezel aroung the sensor is missing and it not warranty repair. The SM states the customer should apply to her insurance company for assitence. The customer would like to document that chrysler should change the design of this if it is so fragile as to be damaged so easily.
Customer called back and is upset and stated that she spoke to the dealership and they told her that the repair would not be covered under the warranty. Customer stated that that they received the message that stated the 'swc/acc was off and then said to clean sensor' so it was due for first oil change and this message came up in March and they took vehicle in yesterday to dealership. Customer stated that they were told that the cone housing was missing on the front sensor and that there was a bracket pushed down a metal oneÙ and later was told it was not bent much and there were no scratches or damage. Customer was told that because the bracket was bent that it could not be covered under warranty. Customer stated she wanted to know why someone backing up in the rear or snow or stones could have dislodged the cone housing and the bracket. Customer wants to know why it is so easily damaged. Customer stated that she cannot understand how this happened as her son has driven the vehicle but has not back into anything and does understand that the dealership stated that it would just take someone backing into the vehicle that could damage the sensor.
Customer stated that the dealership gave her an option to bend it back and they know sometimes the plastic brackets break and they just replace them and can realign and try that and it would cost $400.00-$450 and they could leave it without the cone. Customer stated she is weighing her options or will contact the Insurance Company but then her insurance will go up.
Customer stated that they told her it could have been damaged from someone backing into the rear of the vehicle and it would not take much to damage it. Customer stated that it could get damaged from snow or rocks or stones hitting from underneath. Customer is concerned that this will happen again and wants to know why they can t ride it like it shows on the ads and wants to have her concern documented.
Agent advised customer that we will call her back on her cell- [redacted] once we speak to the dealership to get further information as she states the information on file is incorrect and this is not what she advised agent. Agent advised we will get this straight and document exactly what the dealership states. Customer also wanted to know who else she can contact further up in Chrysler to resolve this issue if this piece is so easy to break.
Agent contacted dealership 68958 Ù to confirm details of diagnosis. Spoke with Service Advisor MatthewÙ.
What is the diagnosis? Customer came in and the sensor was dirty. Matthew stated that when the technician looked at vehicle they stated the front radar sensor is out of position recommending new bracket. The sensor was bent down and shroud cone housing was missing recommending the 3 plastic brackets and readjustment of sensor and calibration. Matthew advised customer that it would take between 3 to 3-1/2 hours to fix and customer declined offer. The cost of the repair would be labor $437.50 and parts $15.00 and she declined to have it done because she stated that it was faultiness of the dealers and aero dynamics of the vehicle. Dealership did not take pictures of it and because the shroud was missing that there was damage done. Matthew stated that it could have been caused by the vehicle pushed up against a snow bank and hit the sensor or could have been a bird flying into it something happened that was soft enough to not damage the sensor but hard enough to wreck the cone. They noticed a ding on it and they also had to fix the trailer hitch however there were no marks or dents on that or scratches however with the shroud missing they definitely hit something.
Agent contacted the customer back and stated that she will think about what to do because it would cost 5,000 for the kit to repair it properly and to fix it without the cone would be 437.50 plus parts 15.00.
Agent advised customer to think about it and when she decides to contact the dealership.

Vehicle is at the dealership - NYLE MAXWELL CHRYSLER DODGE JEEP (45463)
Update triggered by S01610E
Writer contacted customer, left message. Follow up 6/19/14.
Writer received call from Jonathan, SM at dealership 45463. SM states that there is an open STAR case that tells the dealership not to attempt to test the front crash warning. SM states that he drove with his SD in a vehicle in front of him. SM confirms that he duplicate the automatic breaking with the option of the active braking turned off. SM confirmed that both active braking and front collision options must be off to deactivate the active braking as the vehicle does not know the difference between a car making a right turn and it being at a complete stop. SM states that he has 2 days of rental but no RO. Writer requested SM fax copy of rental to CA RF766. Writer provided SM with CA email address. SM will explain issue to customer.
Writer contacted customer and he states he is busy and would like a call back in 30 minutes.
Writer contacted customer and he states he would like this concern corrected because he was advised he needs to deactivate the whole system for the ABS system to not go off on its own. Customer states the SM advised him he needs to turn off both options which one is on the touch screen and one is near the dash for the warning signal. Writer advised customer of lines 76-86.Customer states he does not want to lose the option of the warning signal and wants to know what can be done about

this. Writer advised customer we can discuss this with one of our TS s and get back to customer on 6/24/14.
Status update provided via email to the following email address:

End of Status Update
Email sent to TS/Scot for assistance to resolve the customer s concern.
Writer contacted SM Jonathan who advised that vehicle is operating as designed and that the customer would like it to do something that it is not designed to do. SM tested the vehicle to satisfy the customer and advised that vehicle is operating as it is designed. SM would also like RF766 to follow up with him about email and payment on case.
Status update provided via email to the following email address:
[redacted]
Sorry for the delay in resolution to your vehicle concern. Please allow us a few more days to continue researching the forward collision questions you have. Your Customer Advocate, Rosa has been out of the office. Your concerns have been forwarded to a Corporate Technical Specialist for review. I will follow up with no later than 6/27/14.
End of Status Update
Writer received an email from TS Scot who state based on what he read and researched, It looks like the customer can turn off the Active Brake Feature and still have the ability to leave the Forward Collision Warning System on.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66145. The reason for the customer contact was to provide or request the following information: Lines 121-124. Follow up 7/1/14
Writer contacted customer and advised him of lines 121-124. Customer stated that is what he was trying to explain to the dealer because when he turns off the ABS it is still active and braking when it is not supposed to. Customer states he does not want to take it to the dealer because they will tell him exactly what they told him last time. Writer advised customer we will consult with our TS to see what he recommends at this time. Follow up 7/2/14.
Writer contacted customer and advised him the best option would be to take the vehicle to the dealer so we can look into the concern further. Customer states he does not mind taking the vehicle back in but would like CA to explain the conversation with the TS to hm. Customer states he would also like a different rental maybe a Jeep or some type of SUV. Writer advised customer we will do so and have SM Jonathan contact him.
Writer contacted SM Jonathan, left detailed message regarding conversation with customer.
Email sent to TS SWM15.
Writer received voicemail from SM stating he would like to know if the check was sent out for the rental and is requesting the TS to contact him before he schedules an appointment with the customer.
Writer receive an email from TS Scot stating he will contact the dealer on Tuesday 7/8/14.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66145. The reason for the customer contact was to provide or request the following information: Advise customer of lines 145-149. Follow up 7/9/14
Email sent to TS Scot.
Status update provided via email to the following email address:
[redacted],
As of right now SM Jonathan requested our corporate engineer to contact him so they can discuss your concern further before having you take it back in. I have sent the information to my corporate engineer so as soon as I get the information, I will contact you but it should be no later

than Monday 7/14/14. If you have any questions or concerns please feel free to contact me directly at 1-800-763-8422 EXT 66145 or you can respond to this email. Thank you and have a great day.

Product - Electrical - Unknown - Defective - Default	Customer states EVIC system is displaying multiple errors

Briefly summarize why the customer is contacting Chrysler: Customer called in stating her vehicle is currently at the dealership and for the duration she has had the vehicle approximately 10 months, the customer has brought in the vehicle for numerous repairs. The customer is frustrated with the amount of issues the vehicle is having. Agent is currently working with dealership 45610. The customer states the evic system is displaying many errors such as, brake warning signal, air bags not active and the 911 on rearview mirror is flashing. Agent contacted the dealership and spoke to SA Ron, to see if there was an update on the vehicle. SA stated they did find the issue and the telematic module needs replacing. SA stated the customer is currently at the dealership right by him. Agent connected back to the customer to relate the information and informed the customer that her concerns will be documented.
Briefly summarize what the customer is expecting: reporting issues with vehicle, and wondering status or diagnosis
Agent also informed cutomer of p14 recall and provided the customer with information as per answer id: 24159

CAIR ESCALATION CLOSURE
SEE STAR CASE# 6[redacted] FOR INFORMATION
Writer dialed SM Jim who stated they ordered radio and it has arrived, SM also stated this customer has informed them of all of his grievances and SM stated he has submitted this to his AM and he has also notified TS as well. Writer stated we will document this as well.
Writer dialed customer [redacted] was informed he will not be in until 6/23/14.
Writer dialed customer [redacted] customer stated he is very frustrated that this will be the 12th time that his vehicle has been to the dealership and he purchased a new vehicle so he would not have these issues. Customer stated he would just like the same vehicle but one that does not have these issues, writer inquired if he has notified the dealership and he stated he has. Writer stated we will get further information from dealership and will contact customer back.
Writer dialed SM Jim who stated radio is in but customer has not returned to have repairs completed. Writer also inquired if SM has got a response back from AM concerning this matter and SM stated he has not at this time. Writer stated we will contact customer and inform him the radio is in and informed SM to contact writer when he gets response from AM.
Status update provided via email to the following email address:
[redacted]
Hello,
We have been in contact with the dealership and they have informed us the radio for your vehicle has arrived, when you are able please contact the dealership and schedule a time that will work for both of you to have those repairs completed. I will follow back up with dealership and you 6/27/14 to see if appointment has been made.
Have a great day,
Melba

Jeep Enhanced Customer Satisfaction
End of Status Update
Writer dialed SM Jim and was informed by 3rd party he is not available and writer left message to contact writer back.
Writer dialed SM Jim and inquired if customer has contacted them to have repairs completed, SM stated customer has not.
Writer dialed customer who stated this is his busy time of year for work

and he does not know when he will be able to take vehicle into dealership, customer also stated he is very frustrated that he has to keep taking this vehicle back into the dealership and this will be the 14th radio that will have been replaced, customer also stated he may just wait until the vehicle falls apart and purchase another brand vehicle.
Writer apologized that customer has had these concerns and stated when customer does decide to take vehicle back into the dealership to have repairs completed to contact writer back.
Writer dialed SM Jim and informed him of what customer has stated and also inquired what AM has stated about customer s request for buyback, SM stated AM requested repair history and once that was reviewed informed SM they will not be replacing customer s vehicle.
Writer received a voicemail from customer stating a week ago he was in a minor accident and he ended up rear ending someone and the front warning system never went off and the brakes never hit and everything was turned on and the airbag did not deploy and would like a call back.
Writer dialed customer who stated he was going 8-10 mph when accident happened, writer informed him we will be sending case to our SI team and we will contact customer back when updates become available.

Briefly summarize why the customer is contacting Chrysler: The customer called in and states he has been home for a few weeks and his sons had the car. The customer states that he cruise control and there is a special enhancement - distance monitoring accessory.
The customer states when driving down the road the brakes slam on. The customer states that this has happened twice in the last three weeks.
The customer has not brought the vehicle in to the dealership yet. The customer spoke to the dealership and they did not know if they could do anything as it was an intermittent issue. The customer explained this to the dealership and they told him that they would have to keep the vehicle for a couple of days and that the customer would have to rent a vehicle when this is done.
Customer requested the special customer care team he had previously to address his concerns. Agent is sending file up as customer states he is afraid to drive the vehicle and this is dangerous.
Briefly summarize what the customer is expecting: Caller is seeking to file a complaint on his vehicle.
Customer advised a call back is required and will take place within one business day by COB their time

Call to dealer 60313 CRYSTAL CHRYSLER, JEEP, DODGE 760-324-4557
Agent attempted to contact dealer Service Manager Ernest, however, SM not available. Left message for a return call at extension 66207
The reason for the dealer contact was to provide or request the following information: Checking to see if John got a hold of customer last night. What is the status of the customer s vehicle? Was there a chance for diagnosis? Does customer have vehicle back?
Requested call back from SM.
SM John contacted writer stating that they have test drove the vehicle close to 40 miles and have been unable to find any of the problems with the vehicle and are waiting for STAR to reply to them.
Voicemail from customer. Very upset that vehicle was not diagnosed or repaired. States dealer told him that Detroit had not contacted them and had not responded to their requests for assistance with diagnosis.
Call from customer stating same information in voicemail. CA advised that calls had been placed to the dealer.
Advised that dealer did not contact for assistance with diagnosis.
Customer states he is in parking lot of dealer. Wants to know if they bring the vehicle back tomorrow could the dealer get help with diagnosis tomorrow. CA advised customer go in and talk with SM to make arrangements.
Customer requested call back in 30 minutes.
Call from customer. States SM was gone for day, parts manager Randi tried to be of assistance. Customer states they explained the situation that vehicle needs to be taken care of tomorrow. Customer needs same rental and asked that they have it ready for them tomorrow. States vehicle is dirty. States GM walked by and handed his card and told him to call the GM.
CA stated that when vehicle comes back in tomorrow they need to make sure they tell the dealer they are only there for a day.
Call to dealer 60313 CRYSTAL CHRYSLER, JEEP, DODGE 760-324-4557
Left voice mail for GM requesting call back tonight. Need to discuss making same rental available and getting TS involved as soon as customer is checked in tomorrow.
*******WHEN THIS CASE IF NOTED WITH DEALER INFORMATION ON 6/20/14 CUSTOMER NEEDS TO BE TREATED AS WAITING EVEN THOUGH DEALER WILL SAY HE IS NOT**********
VEHICLE WILL ONLY BE THERE FOR ONE DAY AND NEEDS TO BE GIVEN TO TS FIRST THING AS WAITING.
Voicemail from customer stating he dropped vehicle off and the rental was available. States he would like them to also check the rear turn signals on both sides, text messages are not appearing on screen anymore and

would like car washed.
Voicemail from Terry at dealership requesting call back.
Call to dealer 60313 CRYSTAL CHRYSLER, JEEP, DODGE 760-324-4557 Left voicemail with SA John that I will call him back later.
Called back to dealer and spoke with Technician Terry.

2 voicemails from customer requesting status update from dealer.
Call to dealer 60313 CRYSTAL CHRYSLER, JEEP, DODGE 760-324-4557 Left voicemail for acting SM Randy and for Technician Terry to get update for customer.
Another voicemail from customer.
Call to dealer 60313 CRYSTAL CHRYSLER, JEEP, DODGE 760-324-4557 Spoke with SM Randy.
States problem with braking appears to be connected to the adaptive cruise control. Chrome bezel has been ruled out, vehicle is not misaligned. Could be software.
Text messaging on screen will need possible pairing update.
Issue with rear blinker lights could not be duplicated.
Car was washed.
Call to custome[redacted] Advised of conversation with SM Randy.
Advised that CA was not ignoring voicemails but attempting to speak with people at the dealer.
Went over information he discussed with SM Randy. CA mentioned the possibility of not using the cruise control. Customer asked if he could turn off the adaptive part only and be sure that it is off. CA advised could not answer to that question knowledgably.
Customer asked for phone number for UConnect for issue with text messages.
CA advised that case will be monitored to check for updates from TS and CA will keep customer updated when they have a repair suggestion.
CA advised that he can stop at any dealer along the way if needed and the information in the TS case would be available to the dealer.
Customer states that the ECS had advised that he call to CAC for assistance with the issue that he is having with the Uconnect.
Customer states that the Radio no longer reads the Text Messages.
Customer has an iPhone 5 (7.1.1) from AT&T.
Agent advised that the Software version is not compatible.
Agent recommended that there is a Software Update available for the Radio.
Agent advised the steps to get to the Update (Go to www.driveuconnect.com -> Hover over Help/Support -> Select Jeep -> Enter the Last Eight of the VIN). Agent advised that the Customer Read through the FAQ for information about using the different Browsers to complete the Software Download.
Agent advised that if t he Customer needs any Further assistance to call back to CAC and we can help walk through the procedure.
Voicemail from customer stating the customer service he received from

assistance button on UConnect.
Status update provided via email to the following email address:
[redacted]
I wanted to let you know that I did receive you last voicemail. I apologize that you did not receive the quality of service from the representative that you expected.
I checked your case today and do not see any updates yet.
I will check with the dealer tomorrow the 24th for an update and ask them to call with an update.
Have a good evening.
End of Status Update
Call to dealer 60313 CRYSTAL CHRYSLER, JEEP, DODGE 760-324-4557 Spoke with GM Steve and told him how helpful the new SM Randy Redmond was in working with this customer. That Randy was able to help de-escalate a very upset customer.
Spoke with SM Randy. States that customer s local dealer will need to take over the STAR case to work with customer.
Status update provided via email to the following email address:
[redacted]
I hope your trip home was enjoyable. I just spoke with Randy at the Crystal dealership and we both agreed that working with your local dealer would be best for you. The service manager there could speak with Randy to discuss the situation and then the local dealer could work with the Technical Specialist to complete the process of diagnosis and repairs.
I will check with you on Friday the 27th to see if you have a dealership in mind.
Have a great day.

CAIR ESCALATION UPDATE
SEE STAR CASE# 61378318 FOR INFORMATION
Call to customer [redacted]
Begin Customer Message reviewed:
Ree,
We made it home with U-Haul in tow... We turned off all the different systems and did not use the cruise control... Relieved to be back and safe... As I mentioned to you on the VM the garage did not tell us what to do and I realized before we left I wasn t certain what to turn off.
When we called your helpline the individual we talked to was totally inept and after 25 minutes of trying to explain to him where the basic controls were I gave up and went online to figure it out myself. Although the gentleman I talked to told me he had been trained on the vehicle it was obvious to me that he had never set foot in a jeep and did not have a clue as to where even the basic controls work. He kept telling me don t worry everything will be alright even though he could not answer my questions
Very scary! Combine that with the inability of Crystal Chrysler to answer the phone on a Saturday morning it was not a good start for our trip!
Had an additional electronic problem on the way back. About an hour out, the electronic system froze
The navigation locked and although it appeared on the screen, it was in a suspended mode
The radio went out
The Bluetooth phone system would not work. This happened about 11 months ago and what we did was to shut off the engine and wait 10 minutes and then restart the car to unlock the electronics. We followed the same procedure as last time but this time when we restarted the car it was still in the lock position
We waited another five minutes, started the car again and we were able to move forward.
Seems like we have some real serious issues with our software and I m very disappointed that we were not able to find the cause of the sudden breaking problem in addition to this ongoing electronic lockup problem.
Look forward to hearing from you soon

Call to customer [redacted]
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66207. The reason for the customer contact was to provide or request the following information:
Want to make sure repairs are to customer s satisfaction, all concerns were addressed, and anything else we can do.
Will call customer again tomorrow the 25th.
Return call from customer. States repairs seem to be satisfactory. Was not pleased that his vehicle had been driven more than 100 miles during the repair and the gas tank was not filled before he picked it up.
CA offered oil change contract to compensate and customer stated that he thought he was already going to get lifetime oil changes for his trouble and could we add oil change contract to his sons Charger.
CA advised would need to look back through notes to see if lifetime oil changes were offered.
CA advised would need to see if able to add oil changes to son s car.
CA checked and there are no notes in this or the last case indicating that offer.
Status update provided via email to the following email address:
[redacted]
I am updating your address information and need to confirm if it is: [redacted]
Also I went through all of the oil change contracts I have available to add to your vehicle. While I do not have a lifetime option, I can do the maximum I have to offer of 4 per year for 6 years.
I am still checking to see if I can add one to your son s car.
Please reply to this message and confirm the correct address option and I will add the oil change contract to your vehicle.
Have a good evening.
End of Status Update

Begin Customer Message reviewed:
Ree,
Thanks for your prompt reply. I think a six-year program is very generous and will gladly accept. Here is hoping we can do something for Michael s Chrysler 200 as it would take care of the gas situation due to the 150+ miles driven for testing!
Ree, you have terrific during this entire episode. Here s hoping that the new radio will eliminate the ongoing electronic problems we have been experiencing.
Regards,
Bob
End of Reviewed Customer message
Status update provided via email to the following email address:
[redacted]
It looks like I would not be able to do the oil changes on your son s car. However I can reimburse you for a full tank of gas. Send me the receipts that you would normally get from the machine when you fill up and I will send you a check. I will send you a separate email with a document link.
First you will want to scan and same your document to your computer. Then open the link email. The link itself it only good for seven days and one click. If your link expires just shoot me an email asking for another.
I will get the paperwork submitted for the oil change contract for your vehicle today.
Have a wonderful weekend.

Thanks for the offer of the full tank of gas
Since we just filled up we will not be able to meet the seven-day link requirement. Any suggestions on how we communicate with you after seven days? I will take a photo of the gas receipt and included in the link once our tank is empty again.
Hope your having a good weekend
Regards Bob

.
6.20.14 - Owner sends email to Chrysler regarding his frustration about the inoperative Collision Warning system. Owner said the dealership is unable to get parts and is seeking Chrysler s help.
.
Writer called owner and advised his email was received. Writer inquired which dealership owner is working with. Owner said he is working with dealer 23153 and this is where parts were ordered. Owner said the Collision Warning system has not been working for approximately 6 months but he wants to get it repairs since his 17 year old son will start driving the vehicle soon. Writer advised owner she will follow up with the dealership for part numbers and information. Writer advised she will do her best to try and expedite the part to the dealership, if possible. Owner thanked writer for calling and following up.
.
Writer called dealership and spoke with Anthony in Parts. Anthony said the part on order is a cruise control sensor, which is on back order. Anthony said the Part Number is 68109355AH and the order number is 229182.

.
6.24.14 - Writer reviewed lines 40 and 41. Writer called dealership and spoke with Dan in Parts. Dan verified the part is currently at the dealership. Writer inquired if the customer has been notified, Dan said he was not sure but he will make sure someone reaches out to the customer.
.
Top Care follow-up contact was 06/24/14 at 15:52 by MLS45
.
Writer called owner and left detailed v/m message advising the part has arrived at the dealership. Writer advised owner to schedule an appointment with the dealership for repairs. Writer invited owner to call writer should he have any questions or to call the dealership directly to schedule an appointment. Writer provide her number, as well as, the number to dealership 23153.
.
6.25.14 - Owner called writer and left a v/m message. Owner thanked writer for calling him back and following up. Owner said he will call the dealership to schedule an appointment.
.
6.25.14 - Writer called owner and advised his v/m message has been received. Writer advised owner, she is calling to see if an appointment date and time has been scheduled. Writer invited owner to call back so the information can be updated in his file for further follow up. Writer left name and number again for contact.
.
6.25.14 - Writer called dealership and spoke with Service Receptionist, Linda. Writer inquired if the owner has scheduled an appointment for repairs. Linda checked the system and advised an appointment has not been scheduled for anytime in the near future. Writer thanked Linda for checking.
.
7.3.14 - Writer called owner and left v/m message inquiring if the vehicle has been repaired, and if so, how the collision warning system is operating. Writer left name and number for owner to call back.
.
7.3.14 - Writer called dealership and spoke with Michelle in Service. Michelle said the customer does not have an appointment scheduled and has not had the repairs performed yet.
.
7.11.14 - Owner called writer back and left a v/m message. Owner said the dealership cannot schedule an appointment for him any sooner than the end of July, which is when his appointment is scheduled for.
.
7.28.14 - Writer called dealership and spoke with Service Receptionist. Writer was advised the owner came in on 7/25/14 to have the part installed.
.

7.28.14 - Writer called owner and inquired about the vehicle. Owner said the part was installed and the vehicle is operating fine. Owner said he wants writer to know that he is picking up a new vehicle tonight for his wife and it will not be a Chrysler product. Owner said he is disgusted by the lack of customer service. Writer inquired about the customer service she provided to owner. Owner said he thought writer s customer service was great. Owner said he is upset by the dealership s lack of customer service. Owner said he feels if he did not write to Corporate and if writer did not get involved, nothing would have been resolved. Writer advise downer she will escalate his feedback about the dealership, internally.

Product - Electrical - Unknown - Defective - Default	Customer called stating they have had multiple electrical issues

Briefly summarize why the customer is contacting Chrysler: Customer called stating they have had multiple issues with their breaking system and the safety components shut off. Customer states they have been to the dealership 15 times for this issue, the first 7 or 8 times was to Tyson Chrysler, the last few times have been at Naperville Chrysler Jeep. Agent called Tyson Chrysler and spoke with SA Bill who stated the customer was in around 5 times for the accidental avoidance system. SA stated they contacted STAR pretty much every time the customer was in. SA stated the customer was also in for a couple other electrical issues. Agent also called Naperville Chrysler and attempted to speak with SA Keith who was no available so agent spoke with SA Ernie who stated that the customer was in twice for the auto forward collision warning and was in a couple other times for some other electrical issues (power door locks, moon roof, and cruise control). Customer is very unsatisfied with this as he has been driving his vehicle for 10 months and is concerned for his safety and refuses to drive the vehicle any more. Customer would like a new Jeep or to have the vehicle bought back as he loves the vehicle but these issues are very concerning.
Briefly summarize what the customer is expecting: Replacement or Buyback
Customer informed a call back is required and will take place within 1-2 business days.
Preferred Morning/Midday call back number is [redacted]
Preferred Afternoon/Evening call back number is [redacted]
Customer email address for case updates: [redacted]
Who has possession of the vehicle? (Owner/Dealer/IRF)
Is this a request for Lemon Law, buy-back or replacement?

*** JD with the I2R Customer Resolution Team is now responsible for this CAIR. If the customer should call, please direct them to contact JD directly at [redacted] Thank you. ***
Called dealer 45120 and spoke with SA Keith who reviewed vehicle s repair history.
Called dealer 67753 and spoke with SA Jack who reviewed vehicle s repair history.
Placed initial call to customer. I explained that this case has been escalated to me for special handling and I would like to assist with vehicle concerns. I provided my hours and a number for questions. Customer stated that he has turned of anti-collision system as it goes off too frequently and will stop his vehicle in traffic. Customer stated he is worried about that happening while his children are in the vehicle. Customer also stated that dash lights turned off and went inoperable over the weekend. Advised customer that I would like to see if his vehicle is pulling any codes. Customer agreed to take vehicle in to dealer 45120 this evening.
Called dealer 45120 and confirmed appointment with rental with SA Keith. Advised SA that I would like him to review the anti-collision system to see if he can get it to duplicate in addition to checking to see if vehicle has any codes. ***Follow up with dealership and customer 6/26/14
Returned VM from SM Keith at 45120. LVM requesting call back.
****** Following Corporate Resource has been contacted ******
TAPS
on 2014-06-26 @ 13:15
Returned VM for SA Keith at 45120. SA advised that no codes pulled on vehicle. Advised SA to try to reproduce concern with anti-collision system as that is a safety concern. Advised SA that I am requesting TAPS support. SA will call me with updates. Advised SA I can assist with rental if needed.
LVM for customer advising him of repair status. ***Follow up with customer and dealership 6/30/14
CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
Contacted the dealership (45120), spoke with SA Roland, SA Keith was off today. SA Roland stated the technician is also gone for the day. He was unable to provide me with an accurate update on vehicle status.
-Contacted the customer, I informed him that TAPS has made attempted to contact the dealership was unable to speak with anyone. I informed the customer to expect a phone call with more of an update from his CM 7/2.
CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
Returned VM from SA Keith at 45120. LVM requesting call back.
Called dealer 45120 and spoke with SA Keith who stated TS suggested anti-collision may be tripped off die to angle of camera. SA states that customer is aware that he can adjust sensitivity of system. SA would like to try to test vehicle for two more days and then give vehicle back to customer on Thursday, 7/3/14.
LVM for customer advising him of repair progress. ***Follow up with dealership and customer 7/3/14
Customer LVM stating that he feels unsafe in the vehicle and has no confidence in it. Customer wants a letter from Chrysler stating the vehicle is safe to drive, but he stated that he is not inclined to drive or sell vehicle at this point. Customer stated he is frustrated with it at this point.
Returned customer VM. LVM stating that customer will need to pick up the vehicle as part of repair process to determine whether or not vehicle is repaired from his perspective. Advised I would follow up in a couple of days and add his concerns to the case notes. ***Follow up with dealership and customer 7/3/14
Customer returned VM and reiterated his concern about feeling unsafe in the vehicle with the anti-collision turned on. Advised customer that he is responsible for his vehicle when repairs are completed and we would not be able to extend his rental beyond the repair process. Advised customer that a non-duplication during the test drive does not mean that possible trade assistance is off the table. Advised customer to ask SA

what strategies he could employ to test anti-collision feature without causing injury to himself, the vehicle, or another person. ***Follow up with customer and dealership 7/3/14

CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted] FOR INFORMATION
LVM for SM Keith at 45120 requesting call back.
Called dealer 45120 and spoke with SA Keith. SA states that vehicle concerns did not duplicate and no codes appeared. Vehicle is washed and ready for customer pick up.
LVM for customer advising that vehicle is ready for pick up. Advised customer to drive vehicle normally over the weekend and call me if concerns worsened. Advised customer to speak with SA about strategies to test anti-collision systems in situations other than traffic. ***Follow up with customer 7/8/14
Returned customer VM. Customer stated in VM that his radio screen is graying out. LVM requesting call back. ***Follow up with customer 7/10/14
Returned customer VM. Customer stated that Bluetooth has started interacting with his phone, but concern is typical of vehicle. Customer expressed frustration with vehicle and will not allow his family to ride in it as he doesn t know when anti-collision system will engage. Offered to refund customer of his Maximum Care Plus MVPP 5 Years/60,000 miles with $100 deductible. Customer stated that he would prefer replacement into a like vehicle. Advised customer that I could look into possible trade assistance given that some of his repairs have not been able to duplicate his concerns. ***Follow up with customer 7/10/14
Called customer to offer trade assistance with the CDI program. Customer rejected offer. Reiterated offer to customer to refund his Maximum Care Plus MVPP 5 Years/60,000 miles with $100 deductible and replace it at no charge to him. Customer asked for arbitration information. ***Request to close case
Dealership SM Keith contacted writer due to customer s vehicle arriving back at dealership and when SM search VIN # it advised to contact Jeep customer care. Writer advised SM to do a diagnosis and when SM is done with diagnosis to contact Customer Care back. SM agreed.
Customer LVM stating that arbitration did not rule in his favor, so he would like to have his Maximum Care Plus MVPP 5 Years/60,000 miles with $100 deductible refunded. LVM for customer to contact me when he has cancelled his plan with selling dealership.
Returned customer VM; LVM requesting call back.
Customer returned VM; customer stated he has already cancelled his Maximum Care Plus MVPP 5 Years/60,000 miles with $100 deductible for refund and would like it added back to his vehicle per our previous conversations. Advised customer I would process his request and reach out to him when we have added the Plan back to his vehicle.
>> Maximum Care 5 Year/60,000 miles $100 deductible Mopar Vehicle Protection Plan (WM560N) has been applied to the vehicle for customer s future reliability concerns due to 6 repairs for various vehicle concerns in less than 16,500 miles of owning vehicle, vehicle down 31 days. Contract code 38105233.
Called customer and LVM advising that his Maximum Care Plus MVPP 5 Years/60,000 miles with $100 deductible has been added back to his vehicle.

[redacted],

Hello, my name is Jae with Jeep Customer Care. I am contacting you on behalf of your Case Manager CJ, who is not available at this time. I am following up on a survey you took on your 2014 JEEP GRAND CHEROKEE and it was mentioned that you would like a call back. I am following up to see if there is anything I can do to assist you with your concerns. Since I have been unable to reach you, your survey will be closed. However, after your survey is closed, if you have any other issues, concerns, or if you require further assistance, please contact your local dealer to schedule an appointment for a diagnosis or repairs. If you need to contact Jeep, please contact Jeep at 877-426-5337. Another case will be created to provide you further assistance. Congratulations on your purchase of a 2014 JEEP GRAND CHEROKEE and welcome to the Jeep Family.
Thank you

Enhanced Customer Satisfaction Team (ECS) *
The customer is being handled by the ECS Team
Writer dialed [redacted] Customer states that the dealer was unable to resolve his concerns. Customer advised that he left a 3 page list at the dealer to help with resolving the concern. Customer advised that he would like CA to look at that list. Customer states that he would also like a copy of his repair history with this vehicle. Customer was advised by the dealer that they could not provide that. Writer informed customer that we will see what can be done. Writer advised customer that this would be looked into and that he would receive a contact back by 7/2/14.
Customer email: [redacted]
Dealer 24221 originally listed on case - writer attempted to reach SA Mike but spoke with warranty administrator Mike who advised that the last time this customer was seen, was in February, then writer noticed dealer 62049 was listed.
Writer contacted SA Mike and verified that dealership is 60415. SA advised that customer and SA had problems helping customer understanding that spare key cannot be left in the vehicle and be locked. SA advised that customer is using third party navigation system and is interferring with the system in the vehicle. System was updated and working as designed. SA stated that suspension system is operating properly, satelite system and is trying to lock vehicle with spare key. Field rep looked at vehicle looked at vehicle at previous.
SA also stated that customer is on wait list for recall.
SA also verified mileage as correct.
Agent attempted to contact custome[redacted], however, customer was not available.
Left message for a return call at extension 66244. The reason for the customer contact was to provide or request the following information: Review customer concerns. Next contact attempt on 07.02.2014.
Customer email would not send. Line 50 should read satellite system is working properly.
Agent attempted to contact customer [redacted]3, however, customer was not available.
Left message for a return call at extension 66244. The reason for the customer contact was to provide or request the following information: Review information from dealer and advise about recall.
Writer contacted Mike SA at 970-267-5046 and advised that writer can reach out to another department that can assist in getting parts for back order. SA stated that they do a regular stocking order and it will not be placed until the end of the day. SA stated that recall parts will be set aside for the customer so the customer will not need to wait and ECS will not need to assist in getting parts. Writer advised that writer is still attempting to contact customer. Writer advised that customer also has 9[redacted] as a listed number.
Agent attempted to contact customer at [redacted]3, however, customer was not available.
Left message for a return call at extension 66244. The reason for the customer contact was to provide or request the following information: Review customer concerns and that dealership can do recall. Next contact attempt on 07.08.2014.
Writer attempted to contact customer at [redacted], however, customer was not available.
Left message for a return call at extension 66244. The reason for the customer contact was to provide or request the following information: Review customer concerns and advise that dealer is holding recall parts for the customer. Next contact attempt on 07.10.2014.
Customer called requesting a call back on home number DO NOT CALL cell phone number.
Customer left VM requesting no calls [redacted]. **contact customer at [redacted]* only. Customer would like call back at 8:30. Customer advised in VM if his concerns cannot be resolved, that he feels his

vehicle is a Lemon.
Writer contacted customer at [redacted]. Writer advised customer of recall and offered to set up appointment. Customer advised that he would set up an appointment and would like to have it monitored. Customer stated that he a retired engineer and feels his problem should be resolved. Customer feels there is a design defect. Customer would like to meet with an engineer or have the vehicle declared a Lemon. Customer states the vehicle has a radiation emissions somewhere in the electronics near the navigation or electronic system. Customer states he has video that shows the concern.
Writer inquired how writer could assist. Customer advised that he would like to meet with the correct type of engineer. Writer advised that writer cannot set up an appointment with an engineer. Customer stated that he has an associate that he can work with to demonstrate and that the concern is breaking the law. Customer stated that his concern has been going on since 09.2013. Customer stated the first thing that happened that made him know that there was a problem is that when he was in Virginia was that navigation buttons would not respond. Customer contacted uConnect. Customer advised that 2 dealers have been shown the vehicle. Customer advised that he will writer a letter to Chrysler corporate with copy of video. Customer will also put video on the internet and the National Safety Advisory. Customer also advising that he has concerns about his adaptive cruise control. Customer requested to speak to supervisor. Customer transferred tp405.
****** Supervisor Call ******
Customer states that there is dangerous levels of radiation emitting illegal levels of spectral radiation near the navigation system. Customer has completed his own diagnostic testing as he has been an engineer for over 30 years. Navigation resets itself intermittently and goes blank at times. The electronics on the vehicle are not standing up to the quality promised. Customer has purchased several Jeeps and is loyal to the brand. Customer will be taking vehicle to the dealership for the recall and will have them address his concerns further. Writer suggested if there were things the dealership would like to attempt to solve the problem customer feels there is, to have them contact us nd we will get our TS in touch with their technician. Writer advised if customer seeks to leave his vehicle for a few days in order for them to duplicate the concerns, we will be happy to provide a rental. Customer would like to request a like vehicle so he can test the issue on another vehicle. Customer will consider sending a video to the CEO of the company. Please only use ([redacted] to contact the customer
Writer contacted customer at [redacted]. Customer has set up an appointment for 07.25.2014 and would like follow up on 07.28.2014 at 10:00 am is possible. Writer reviewed that as writer cannot control phone calls but will try to call as close as possible to 10 am. Customer requested that the navigation - uConnect system and related electrical systems be replaced to see if resolves his concern. Customer also stated that he spoke with the person at express service department at the Pollard dealership and advised that he is disappointed with them and does not think he will be returning them. Writer advised that writer will present his request but cannot make any type of commitment. Customer stated that he reviewed his concern with a representative named Tanner. Customer feels that the vehicle has a design defect and is not within the FCC guidelines.
Writer contacted Mike SA at 970-267-5046 and reviewed customers request and concerns. SA stated that he will make the necessary contacts and work with the customer.
Writer contacted Mike SA at 970-267-5046 who advised that customer did not set up or have appointment. SA advised that customer wanted to meet with tech from Detroit.
Writer attempted to contact Pollard dealer 24221 303-447-8187 that customer mentioned on line 139 and number would not work.
Writer contacted dealer 60415 at 970-226-5340 60415 Dealer Name : FORT COLLINS DODGE CHRYSLER JEEP and spoke with Julia in the service department and customer did not have appointment there since 06.30.2014.
Agent attempted to contact customer at [redacted], however, customer

was not available.
Left message for a return call at extension 66244. The reason for the customer contact was to provide or request the following information: Follow up on customers concern and inquire about going back to dealer and verify which dealer. Next customer contact attempt on 07.30.2014.
Writer received a call from dealer stating the RRT s are being rejected. Writer advised we will enter the notes into the system.
Customer left VM requesting call back on 07.31.2014 as he will not be available on 07.30.2014.
Writer contacted customer at [redacted]. Recall was completed at the Fort Collins dealership. Customer disagrees with the field engineer that looked at his vehicle in January. Customer stated that he feels the lighting controls and running lights are not operating correctly now. Customer also reviewed when the vehicle was in for the recall that the ventilation system was not operating correctly and the SM Mike came out and made adjustments to get it to work properly. Writer will contact the dealership and request that he reach out to higher management. Customer complaint is the the engineer cannot be questioned about his decision when the vehicle was looked at. Writer reviewed with customer that his email address would not process and customer provided alternate email of: [redacted] Writer will follow up with customer on 08.07.2014 between 10 and 12.
Customer also mentioned that if his concerns are not resolved, that he will look into Lemon Law.
Writer contacted Mike SA at 970-267-5046, however,
SA not available. Left message for a return call at extension 66244. The reason for the dealer contact was to provide or request the following information: Review customers comments and request that dealer reach out to AM/DM.
Status update provided via email to the following email address: [redacted]
Thank you for contacting Jeep enhanced customer satisfaction concerning your case [redacted] I will reach out to the dealership on your behalf and follow up with you on 08.07.2014. Thank you again for working with Jeep enhanced customer satisfaction.
End of Status Update
The customer states he has an exterior light issue. The caller states when driving in the past the LD lights around the headlights would be on a form of running light. The last few days the customer realized that the LD lights do not seem to be coming on. The customer states there is a light switch on the panel and caller states you can push this and it will push on the fog lights. The customer states he has been using a little circle symbol and in the past the LD lights have always been on. The caller cannot get them to come on. The customer states he leaves the vehicle running and puts the park break on and puts it in drive. The caller states he jumps out of the vehicle and looks and they are not on.
The Daytime Running Lights (low intensity) come on whenever the engine is running, and the transmission is not in the PARK position. The lights will remain on until the ignition is switched to the OFF or ACC position or the parking brake is engaged.
Agent explained to caller that he cannot put the parking break on either or the lights will go out.
The customer had his wife come out and look while he was driving up the driveway. The customer states that he understands now that the lights are working fine and that this is an operator problem.
The customer states that he is very frustrated with the vehicle. The customer is so very frustrated at this time. The customer states that he appreciates the help given with the situation with the lights.
Customer left VM requesting his call back be moved to 08.08.2014.
Status update provided via email to the following email address: [redacted]
Thank you for working with Jeep enhanced customer satisfaction concerning your case [redacted]. This is email is to confirm that your email address is working.
End of Status Update

Writer contacted customer at 9[redacted] and reviewed that notes on case indicate that lights are working now. Customer stated that he did not do anything different and he is still concerned. Customer thinks the computer on the vehicle malfunctioned and malfunctions intermittently. Customer is still stating the he feels the diagnosis and information from the field tech at Pollard Motors was not correct. Customer also reviewed his concerns about the navigation system and requested to be put in contact with an engineer to send his spectral plots to. Customer would like case to be left open for 2-3 weeks as his friend who will be helping him was in accident. Customer and writer agreed that writer will send customer an email on 08.21.2014 for an update about when the vehicle will be seen at dealer 24221 and if there is no response writer will attempt to contact customer. Customer also left recording of his concerns during the call and requested that the call be reviewed by someone from the corporate headquarters. Customer stated that as a retired engineer he has the ability to resolve and understand this concern and feels it could cause an accident and customer mentioned adaptable cruise control system. Customer also stated that he will send a packet to corporate headquarters and the National Safety Board.
Customer also reviewed that he has been a loyal Jeep owner and this experience is very disappointing to him and that he may not be loyal to the brand in the future. Customer also stating that his warranty rights are being violated by the way his concerns are being handled.
Writer contacted dealer 24221 Pollard Motors at 303-447-8187 and requested to speak to SM Donnie. SM not available, however, writer left message for a return call at extension 66244. The reason for the dealer contact was to provide or request the following information: That customer would like to come back to dealer for the spectral plots to be submitted. Writer advised that when diagnosis has been done the information would be submitted to the proper channels. Writer will contact dealer when customer advises that he will be able to go to the dealership. Writer wanted dealership to be aware of customers intentions. Writer also left dealership with complete list of writers contact information.
Agent attempted to contact customer at [redacted], however, customer was not available.
Left message for a return call at extension 66244. The reason for the customer contact was to provide or request the following information: Writer attempted to contact customer to review information and going back to dealer. Next contact attempt on 08.26.2014.
Agent attempted to contact customer at [redacted]
Agent attempted to contact customer, however, customer was not available.
Left message for a return call at extension 66244. The reason for the customer contact was to provide or request the following information: Writer attempted to contact customer to review information and going back to dealer. Next contact attempt on 08.27.2014.
Begin Customer Message reviewed:
August 25, 2014
Regarding the schedule for the spectral scans on the interference problem. It appears that it may be October before the consultant can do the tests due to his recovery time from physical injuries in an accident. During our last conversation, I was advised when the data is collected it needs to be given to the dealer.
Chrysler needs to explain to me just what will be done with it then? Will the dealer somehow use it to isolate the problem? Will it be sent on to corporate engineering where properly skilled engineering specialists who are qualified to understand such technical data in the EMC/EMI/RFI area and constructively use it to identify the root cause of this problem that is causing Chrysler to not honor my warranty and then take effective corrective action?
As a Registered Professional Engineer (Ret) myself, I would not expect anyone other than a specialized engineer in Chrysler Corporate Engineering to be able to use this kind of data.
Please provide a full description of what will be done with this if it is provided to the dealer.
Please provide the answer in electronic form as you did this note.

Thank you.
[redacted]
End of Reviewed Customer message
Agent attempted to contact customer at [redacted], however, customer was not available.
Left message for a return call at extension 66244. The reason for the customer contact was to provide or request the following information: Writer attempting to contact customer to review his concerns for a second time. Left VM that writer would email customer.
Status update provided via email to the following email address:
[redacted]
Thank you for your email and voice mail to Jeep enhanced customer satisfaction concerning your case[redacted]. As the dealership has advised that your navigation system is operating as designed, if you have a new concern, please contact the dealership for a new diagnosis. When the dealership has your spectral scans documents, they will submit them to the correct department. Until your documents have been received and reviewed, I cannot answer your questions about the repair or how your information will be used. As you mentioned that you will most likely not have your documents unitl October, your case will be closed. I have contacted the Pollard Friendly dealership and spoken with the Service Manager, Donnie, and he has been advised that you will be bringing in your documents. Thank you again for working with Jeep Enhanced Customer Satisfaction.
End of Status Update
Customer left VM requesting that entire navigation/and or computer system be replaced and mentioned class action lawsuit. See lines 44-51 that note vehicle is operating as designed and that field technican looked at the vehicle. Customers other concerns about the ventilation system and lights were resolved by the dealership showing the customer the correct why to operate them. See lines 171-172 and 210-215. As customer has no current concern that has been diagnosed, email sent to customer advising case will be closed as paperwork will not be submitted until October or until his associate can assist him and until there diagnosis that advises a new repair is needed is done.
CLOSED LOOP UPDATE - no need for additional follow-up.

***** EMAIL BRIEF DESCRIPTION CONTENT *****
drops into 3 while in D
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
***** CUSTOMER EMAIL *****
After two weeks in shop to fix list of issues the car dropped out of D on the freeway into 3 scarring my wife half to death. This car has on multiple occasions taken control and completed unsafe actions, including stopping to operate in cruise (ACC recall), panic braking for right turning vehicles and the paddles being too close to controls on the wheel. Demontrond doesn t return our calls, nor will they tell us the phone number of the next contact up the line to lodge a complaint. Truly deplorable system when the complaint tree doesn t allow you access past the entity being complained about. Jeep has proven unreliable, unsafe and unresponsive.
***** END CUSTOMER EMAIL *****

Dear[redacted]
Thank you for contacting the Jeep Customer Assistance Center.
We are very sorry to learn of the problem you have encountered and have opened a file regarding this issue.
Thank you for bringing this to our attention. We appreciate the time and effort you took to tell us of your dissatisfaction with our product. We have documented your concerns and have made them available to our product development team.
Please know that your feedback and opinion are both, very important to us. We hope this experience will not cause our customers to misjudge our products.
Are you experiencing any return of the issues you have had addressed?
We apologize.
Thank you again for your email. Should you require additional assistance, or have any new information to provide, please reply to this email message or call 1-877-I-AM-JEEP (1-877-426-5337).
Sincerely,

Tyler
Customer Service Representative

***** CUSTOMER EMAIL *****
We definitely expect the issues to continue. The dealer has failed to find the root cause of the issue, remedied the problems with 'updates', did not replace components expected to be replaced, and failed to communicate on every level concerning our wellbeing and the issues. The vehicle has not worked from day one and we are now heading off on vacation with a car that slips into gear on its own, been advised by the service manager to just shift it back into gear when it happens, and not to worry.
I guess will just drive it until it tears itself apart or kills someone because at this point I believe that is the only way to get it fixed.
***** END CUSTOMER EMAIL *****
***** CAC EMAIL *****
Dear [redacted],
Thank you for contacting the Jeep Customer Assistance Center.
Have you left on vacation yet? I apologize, Ava. Unfortunately, the Dealer is currently closed. What I am going to do is assign your case to an agent that will contact the Dealer on your behalf. Once the Agent has established contact, we will send you an update via email. This will allow for the quickest response time.
We would like to apologize for the statement made by the Service Manager, do you happen to recall their name? The statement was made at Demontrond Auto Country?
Thank you again for your email. Should you require additional assistance, or have any new information to provide, please reply to this email message or call 1-877-I-AM-JEEP (1-877-426-5337).
Sincerely,
Tyler

Product - Electrical - Cruise Control - Defective - Default	sensor for adaptive cruise control needs replacing, part on back order
Dealer - By-Pass - Default - Default - Default	

Customer brought vehicle into 65399 ROCHESTER HILLS CHRYSLER JEEP last week for cruise control issue. Custoemr says part is on b/o and there is an annoying noise that beeps in car. Customer is going on a road trip on July 7 and would like issue resolved before going on trip. Customer would like to be called by CM as soon as possible.
-
Agent contacted 65399 and spoke with SA Steve who indicated a sensor for adaptive cruise control is needed and an order was placed when vehicle was there last week.
-
SA Steve also says...
Is the concern a result of misuse/abuse/lack of maintenance? Just a bad part.
Could the customer have caused/prevented concern? no
Is the concern related to age and mileage?no
Is vehicle maintained? Had check up at 6000 miles in april and came in June for current problem.
What is the general condition of the vehicle? good
Does customer have prior history with the current issue at your dealership?no
Have there been any previous related repairs? no
Have there been any previous out-of-pocket repairs? no
-
Writer contacted 65399 ROCHESTER HILLS CHRYSLER JEEP and spoke with PA Marty.
PA Marty stated part information for order is as follows:
Part #:68223771ah
Part Description:module or sensor for adaptive cruise control
Order #:ra0626

ETA:back order
Is customer in rental?no
If yes, who authorized rental?
Is the vehicle off road?no
Order type: Choose OneÙ Special Handling
Writer advised customer that their parts concern will be escalated to the Parts Support team for parts resolution, and that their Case Manager will provide them updates on the status of the part within 4-5 days.
If an update is received sooner, customer will be contacted sooner.

Product - Electrical - Unknown - Other - Default	Front camera for forward collision pack
Corporate - Survey By-Pass - Duplicate CAIR - Default - Default	

Briefly summarize why the customer is contacting Chrysler: Customer called to complain about dealer 45495 WESTGATE. Customer stated on Thursday March 20th the problem began with what she stated was the front camera for the forward collision pack. Customer stated this has been going on for months, and the dealer informed her she could bring it in Friday March 21st for repair., SA GregÙ said that would be fine and they could probably squeeze her in. Saturday, March 22nd customer spoke with SA EdwardÙ and he said he didn t know the JEEP was there and there was no way they could get to it that Saturday. EdwardÙ said would have the manager call her the following Monday but he never called. Customer stated SM Will CooperÙ called later and said she could pick up the vehicle April 1st and set her up with a loaner vehicle. Customer stated she was given a loaner vehicle which as a 2013 Dodge Dart with an almost empty tank, no features and it was plastered with WESTGATE advertising.. After diagnosing the vehicle dealer 45495 found the part for the camera was on backorder. Customer stated they informed her part is not ready again over and over. Jeep was at the dealership for a month and a half. On May 19th she got tired of waiting returned the loaner and picked up the Jeep. Didn t hear another word from the SM WillÙ and he said he would call and keep her updated. Customer left several voicemails for WillÙ in regards to this and he didn t return the calls. Customer called him on Monday June 23rd left a voicemail, and he was still not returning the phone calls. Tuesday June 24th left another voicemail and he called back an hour later and said the part was available. SM stated he would come and pick up the Jeep today 7/01/14 but he never did.
Briefly summarize what the customer is expecting: Customer says she wants this issue to be resolved and thinks she deserves some kind of compensation. Will was saying she may be able to get some kind of financial return. Customer wanted the complaint to be documented against customer service at the dealership for not returning calls and following

up as they had informed her they would.
Reason for Dealer Contact: Follow up on complaint.

**** Dealer Notification Sent ****
Red Letter sent, reassigning CAIR to SK1074 for next step.
Customer is calling and stating that she is wanting to send in a few
papers of documentation . Agent provided customer with fax number to send
in her documents . Customer is wanting to know if there has been any
update on the case . Agent advised customer that a Red letter has been
sent . Customer was happy to hear that the red letter was sent .
Customer contacted Jeep to say that she has been attempting to fax a
letter and documents but the fax line is busy. Agent confirmed the fax

number and the customer informed that she was faxing a four page letter requesting compensation for all the problems she has had with the dealership. Agent consulted TL and will reopen the case and put it in the que.
CAIR is reassigned to 86Y
The customer states that she faxed over the paperwork and wanted to know if it had been received. Agent informed the caller that the information is not attached yet.

End of Status Update
FIRST CONTACT CUSTOMER see lines 28-40.
Agent attempted to contact dealer Service Manager (SM), however,
SM not available. Left message for a return call at extension 66284 or
emal address
The reason for the dealer contact was to provide or request the
following information: Follow up with SM Murphy as to the status of
repairs and diagnosis.
CUSTOMER 70[redacted]CM contacted customer and reviewed expectations and
how to further assist customer. Customer history of repairs is 1.
Replaced radio (4 times), 2. 3 recalls 2 have been completed and the
third brake booster is outstanding, as master shield and cylinder is/has
been repaired. 4. Adaptive cruise control 5. Trunk lid 6. Back Camera is
green when in reserves.
Customer expectations is 1. Wants loaner/rental similar to JEEP GRAND
CHEROKEE
2. Vehicle payment concerns because he has not had vehicle for 3 weeks.
3. Consideration for trade because customer does not feel safe driving
and the quality of vehicle functionality.
CM indicated research with Dealer to determine diagnosis and
recommendations for repairs must be done in order to know the next steps
to help resolve customer issues. CM will follow up with customer on
7/7/14, and verified address, email and preferred contact numbers.
DEALER 708-366-1001 CM contacted SA Murphy and he reported all repairs
have been completed, expect for the master cylinder and STAR approved
this module to be replaced. SA reported part is scheduled for 7/14/14.
Agent attempted to contact customer, however, customer [redacted] was
not available.
Left message for a return call at extension 66284. The reason for the
customer contact was to provide or request the following information:
CM left message information see lines 63-65, and also reported sending SM
an email requesting customer rental accommodate his family. CM will
follow up once SM responds about rental and follow up on parts for
vehicle available 7/14/14.
CM sent email to SM Matt requesting if rental could be larger to
accomodate customer s family.
Begin Customer Message reviewed:
I would just like you to know that I have yet to get a call saying that
I m going to get a loaner vehicle comparable to my 2014 jeep summit. I m
supposed to go on a vacation friday and now I have to cancel it because
we all can fit in the current vehicle for the long ride. Thanks, I really
have high hopes in chrysler and all I get is big let downs.
End of Reviewed Customer message
CM had sent request for rental upgrade to Mmatt@hawkcdj.com on 7/7/14 and
dealership did not respond to request or contact customer. CM contacted
dealership and left message for Carla in dealerships rentals requesting
an exchange for a comp vehicle same as customer s vehicle. See lines 70-
73. CM requested call back and will follow up later in the day.
Status update provided via email to the following email address:
[redacted]
I apologized for the dealership not contacting you, and I have placed a
call into the dealership and the individual Carla handling the rentals is
not in yet. I left a message about your request and will follow up with
her later this morning to ensure we accommodate your request. I will

follow up with you once I have spoken to Carla.
End of Status Update
WA Carlene called, requesting the Case Manager. Tranferred WA to CM JB1846 at ext 66216 as CM SW738 was unavailable.
WA stated that the customer is in a Chrysler 300. WA stated that the only other vehicle they have available is a Journey. WA stated that they will contact the customer and let him know. WA stated that the customer can also check back later in the day if he doesn t want the Journey.
Customer 7[redacted]
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66284. The reason for the customer contact was to provide or request the following information: Follow up to information see lines 98-101. CM will call customer s other numbers.
Customer [redacted]
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66284. The reason for the customer contact was to provide or request the following information: See lines 106-107. CM will follow up 7/11/14 with customer.
CUSTOMER [redacted] CM contacted customer to inquire if rental issues had been resolved. Customer indicated dealer was to follow up with a 2nd call and he had not heard anything yet. Customer informed CM he had to cancel vacation because he could not fit all members in the vehicle. CM will follow up with dealer on parts on 7/14/14, and will follow up with dealership about rental.
CM left message for rental manager for dealership rentals and indicated customer was expecting a 2nd follow-up call from dealer on rental size accommodating his family. Customer indicated he had to cancel vacation because he could not fit all members in the vehicle.
CUSTOMER [redacted] CM contacted customer and inquired about rental concerns, and customer did not get an upgrade as per dealership follow up. Customer requested vehicle payment reimbursement because it has been at the dealership and CM informed customer of possible options for compensations once vehicle is repaired. CM will follow up with dealer to ensure part is in and customer by 7/17/14 if not sooner.

[redacted] on 2014-07-16 @ 12:01
CUSTOMER 708.567.0573 CM contacted customer to follow up with email to contact customer. Customer reported repairs had been completed and everything seems to be fine. CM reviewed recall on brake booster and customer thought it was taken care of, but CM will follow up with dealer to ensure it was completed. Customer current expectations have changed because of not being able to have a rental to accommodate his family and a vacation was cancelled because of parts being delayed and dealer did not change size of rental. Customer will be happy with one month vehicle payment for over 3 weeks of being a dealer. CM offered service contracts as options, but customer preferred 1 month vehicle payment and expected additional for missing vacation and future loyalty and meeting his expectations. CM offered SC ECP312N and one other SC choice, but customer wanted something for his kids linked to missing vacation. CM needs to research options, and will submit MVP to add and sent link for vehicle payment. CM outlined processes time line for reimbursement and added MVP and will contact customer once MVP is added.
DEALR 708-366-1001 CM contacted SA Tom and verified mileage 13,871, along with brake booster recall being performed.
MR LOUIE RAINONE called stated that he tried sending documents though the link and was not able. Customer advised that he had faxed in the documents today. Writer advised that it may take a little while to show up on the case.

I received your documentation and am processing your check, and I need the vehicle s mileage from the last repairs, before I can submit the request for approval. In addition, I had to laugh with your comments, when you picked up the vehicle. I will follow up with you when check is approved and ready for final submission to process and mail. Please get me the mileage and I can submit request for approval. If you have any additional questions, my contact information is 800-763-8422 Ext 66284 or

you may respond to this email. You are a very valued customer to us and I would like to thank you for the opportunity to assist with your situation.
End of Status Update
Agent attempted to contact dealer Service Manager (SM), however, SM not available. Left message for a return call at extension 66284
The reason for the dealer contact was to provide or request the following information: Need date customer picked up vehicle and mileage of last repairs.
Begin Customer Message reviewed:
the milage is 14078. Thanks again Chrysler. Looking into a wrangler sport. Just because the dealer is bad luck doesn t mean the product is bad . I ll keep shopping jeep Chrysler . Thanks again for your help

Briefly summarize why the customer is contacting Chrysler: Customer states that wants to return the vehicle, due to having nothing but problems since day one. Agent advised that would need to work with DLR. Customer stated that DLR told him to contact CAC. Agent contacted DLR and DLR stated that Sales advisor Phil would give him a call when available to discuss Customers issues with vehicle
Briefly summarize what the customer is expecting: Customer expecting to return the vehicle
CAIR RE-OPENED AND FOLLOWING REASON CODE(S) REMOVED
Survey By Pass - No Diagnosis
Customer called stated he had call CAC before to address his on going concerns with his vehicle but was referred back to the dealer. Customer stated the dealer at that time had referred him to CAC. Customer stated he feels he is getting the run around with no results. Agent apologized for any inconvenience. Customer advised he is having electrical concerns with his vehicle. Customer stated at times a message will display telling him to brake or applying the brake without driver intervention. Agent confirmed both of those functions are associated with the Forward Collision Warning (FCW). Customer stated he is also seeing a message displaying saying ACC FCW. Customer stated he has tried to address this with his dealer 5-6 times and each time the issues are not resolved. Customer stated at this time he is concerned this will cause an accident or someone will get hurt because of it. Customer stated he wants a buy-back of this vehicle. Agent advised per Answer ID 23673, advised his concern will be escalated for him.

Called customer-He stated that he is not going back to any dealership to get his vehicle serviced. He has had many issues with the vehicle and feels that it is unsafe. I asked the customer if he has possibly spoken to the dealership about trading out of the vehicle since he is in a lease. The customer stated that he does not want any CDJ vehicle ever again. He said that he is considering going to a lawyer for them to review his case. I apologized to the customer for all of the inconveineces he has experience and I provided to arbitration number. The customer does not want to continue with the repair process.

cruise control
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
Hi folks,my wife and i went for a ride yesterdayjuly4,14 .When i started it
up my mem seat didn t move so i cut it off and tried again and no luck,cruising down the highway i set the cruise and when i exited off i hit
the brake and it would not go off it kept pulling the brake slowed us a bit
so i pannicked but then hit the button on the wheel and it released kind of
a scary moment.Tried it later and it worked fine.I do have quite a few blackouts on the radio screen.Not complaining about the Jeep,i love it.Just
had it serviced last week and checked on thr recall but the part hadn t come in yet so you all have a great day and remember, today is the oldest you ve ever been and the youngest you ll ever be,Bill Allison
*****END OF CUSTOMER EMAIL*****
Dear[redacted],
Thank you for contacting the Jeep Customer Assistance Center.
I m sorry to hear of the concern you have experienced with your cruise control and the memory seat feature. We would like to review this concern further. Has the vehicle been diagnosed by Big O Dodge regarding the cruise control and memory seat concerns? If so, when was it diagnosed and who was your service advisor?
Thank you again for your email. Should you require additional

assistance, or have any new information to provide, please reply to this email message or call 1-877-I-AM-JEEP (1-877-426-5337).
Sincerely,
Eileen
Customer Service Representative
Jeep Customer Assistance Center
*****END OF CAC EMAIL RESPONSE*****
I had it serviced just three days before this happened so no it has not been discussed with Big O i just thought you folks might have had this problem reported by someone else.Haven t used the cruise since that day,I have had several days that the mem seat and tilt didn t work but never tried the cruise on that day,Bill Allison
*****END OF CUSTOMER EMAIL*****
Dear [redacted]
Thank you for contacting the Jeep Customer Assistance Center.
We are sorry to hear of the concerns you have experienced. We are unable to advise of what may be causing the concern with the memory seat and the cruise control. We would be happy to further look into this situation. To do so, we will first require a diagnosis be performed by any authorized Jeep Dealership to review the situation and a determination on the repair procedure be put in place.
Our records indicate that the following recall campaign has not been performed by an authorized dealer:
P14 BRAKE BOOSTER
We recommend contacting Big O Dodge to arrange an appointment for proper diagnosis and repair. Once you have had an opportunity to undergo a diagnosis through your authorized Jeep Dealership, please call Jeep - 877-IAMJEEP (877-426-5337).
Thank you again for your email. Should you require additional assistance, or have any new information to provide, please reply to this email message or call 1-877-I-AM-JEEP (1-877-426-5337).
Sincerely,
Eileen

VIN: EC[redacted]
Dealer code: 61210
POC Name and position: Randy/SA
POC number: Dealer #
Current mileage: 7342
Customer concern:
1) Right center dash AC vent, top 2 fins are not working
2) Adaptive cruise inoperative
3) When in overdrive the transmission slips.
4) Brakes locked up one time with the ACC on.
5) Dash makes one beep at customer
6) Center console lower door has imperfection on the side
7) Left front window on the inside leaves spots when rolling up or down. Leaves track marks on the window.
Dealer diagnosis:
1) Replace the fins for the AC vent.
2) ACC was out of position, adjusted lense and recalibrated and that works great. That adjustment also resolved concerns # 4 & 5.
3) NPF with transmission.
4) See # 2.
5) See # 2.
6) Replace center console door.
7) Window regulator is leaking grease onto the window.
Recommended repairs: Replace 2 fins on the AC vent, replace center console door, and replace window regulator. Adjustment completed for Adaptive cruise control.

*********Case Escalated to I2R**********
Reviewed Warranty History which determined this case should be escalated to I2R for case management.
*** JD with the I2R Customer Resolution Team is now responsible for this CAIR. If the customer should call, please direct them to contact JD directly at 214-583-2153. Thank you. ***
Called dealer 65454 and reviewed customer s RO history with SA Jamie.
Placed initial call to customer. I explained that this case has been escalated to me for special handling and I would like to assist with vehicle concerns. I provided my hours and a number for questions.

Customer stated he has had several concerns develop on the vehicle, but the most troublesome is the vehicle says it is in park, but actually moved forward in drove when the customer takes his foot off the brake. Customer stated he believes the vehicle is a lemon and no longer wants it. Customer stated that dealership does not help him when he brings his vehicle in; they tell him to get used to the vehicle. Advised customer that I can oversee a diagnostic with the dealership to determine if there is anything wrong with the vehicle. Advised customer I could look into resolutions to help him trade out of the vehicle if such a resolution is warranted by the diagnosis and repair. Customer agreed to take vehicle in for diagnosis.
Called dealer 65454 and spoke with service assistant Faith who set appointment for customer for Friday, 7/18/14 at 10 am. Advised her to set up rental for customer. Confirmed appointment with customer.
***Follow up with dealership and customer 7/18/14 DM NOTES FOR RENTAL
Returned VM from SA Phil at dealer 65454. SA stated that customer got upset that rental agency was asking for proof of insurance, but they got it sorted out and sent the customer on his way. Advised SA to let me know if they duplicate the customer s concern or if they pull any codes so I can request TAPS support.
Called customer who complained that he didn t like his rental. Advised him to call rental agency to see if they have anything else that is covered by Chrysler corporate rental policy. Advised customer I will keep in touch with dealership regarding repair and that he is secure in his rental over the weekend if dealer needs to keep his vehicle.
***Follow up with dealership and customer 7/22/14
SA Phil at dealer 65454 LVM stating that they could not find any codes relating to customer s concern; they ran software updates and returned vehicle to customer.
LVM for customer requesting call back. ***Follow up with customer 7/24/14
Called customer who stated there is no change in the vehicle s performance. Advised customer that dealership determined that no codes were pulled and they could not duplicate his concern. Advised customer they did perform some software updates that should have addressed his concerns. Customer stated they did not. Advised customer I would be happy to help him seek a second opinion. Customer stated that he was told that the part causing his problem cannot be fixed.
Called dealer 65454 and spoke with SA Phil who confirmed vehicle is performing as designed.
Called customer and told him that vehicle is performing as designed. Customer stated that he is not interested in a second opinion and that this situation is just wrong as they vehicle is unsafe. Gave customer arbitration information. ***Request to close case
Customer called stating that his warning lights have come back on and he is taking his vehicle in for service on Wednesday to dealer 65454. Customer stated he needs rental assistance. ***Request to reopen
>> A new CAIR and I2R Case [redacted] have been opened to further assist customer.
Called customer to advise his case is now with me and provided my contact info. Customer stated he still plans to take the vehicle to the dealer tomorrow at 7-7:15 in the morning. Advised customer that I d be in contact with the dealer to see if the concerns can be duplicated which would allow me to escalate to TAPS. Advised customer that his case can and will be reviewed for other options if the repair/diagnosis warrants that. Customer understood and was advised that I d be in contact with him within 2-3 days once more info is obtained on the repair/diagnosis.
--Follow up with DLR 08/20 to check on the diagnosis---
Called dealer(65454) and spoke to SA Jamey who advised the vehicle was picked up yesterday. SA also helped me update the RO history on the vehicle.
**Called customer to see how the vehicle is performing and was advised that all of the lights have gone off on the dash but he still feels there is an issue with putting the vehicle in park. Advised customer to give it a couple of more days to test drive and to call me back either Monday or Tuesday with an update on the performance. Advised customer from there we

should know what we need to do.**

***** EMAIL BRIEF DESCRIPTION CONTENT *****
Lemon Law Demand
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
The dealer has failed to fix a faulty navigation system FOUR TIMES. This is in addition to over 10 other trips to the dealer to fix a host of other defects. I would like to have this vehicle replaced. Below is the history of the problems, along with the specific instances (four) that the dealer has failed to fix the navigations system. Here is the history of my purchase. 1. Purchased on Friday, August 2. Car didn €™t start on lot; was told that was because €œsomeone must have left the lights on. € 2. Picked up on Monday, August 5 after paying for €œundercoat € and inside/outside sealant. Navigation didn t work. Remote Start didn t work. 3. Returned vehicle same week and was told 'problems fixed' after day long software reset. 4. Friday, August 9 (same week) car completely wouldn t start and stranded me on highway 93 in Montana. Car towed to dealer: they said 'problems fixed' after changing grounding wire and updating software. 5. Picked up car on evening of Friday, August 9. Remote start fixed, but navigation frozen. 6. Navigation not fixed till September after two more visits to shop (a total of 4 trips to the shop within one month). 7. February 6, 2014.

Check Engine repeatedly light goes on and then goes off after 3-5 days. Problem repeats but Don K says not to bring it in unless light on so they can get code. Bring to Don K on February 13, 2014. 8. February 13, 2014. Check engine light on. Don K reprograms instrument cluster. 9. March 4, 2014. Check engine light goes on; call for appointment on Thursday, March 6, 2014. Given appointment on Monday, March 10, 2014. Problem is apparently a bad reading on the vapor canister. Check engine light reset. 10. March 13, 2014. Check engine light goes on again. Make appointment for Friday, March 14, 2014. 11. March 14, 2014. Appointment at Don K. Replaced seal-vapor canister on evaporative system. 12. March 17, 2014. Check engine light goes on again. Make appointment for Tuesday, March 18, 2014. March 18, 2014, drop off vehicle at Don K (10:00 am). 13. May 23, 2014. Navigation system shows me miles away from actual location and compass doesn €™t work. Make appointment for June 11, 2014. REPAIR ATTEMPT FOUR FOR NAVIGATION SYSTEM. Driving off lot system still doesn €™t work. Take back and navigation reset and then works. 14. July 13, 2014. Get in vehicle and navigation doesn €™t work (no compass and location is wrong by 50 miles) [redacted] VIN: EC106560 Telephone: [redacted]
***** END OF CUSTOMERS EMAIL *****
Dea[redacted],
Thank you for contacting the Jeep Customer Assistance Center.
Chrysler is dedicated to producing a quality product and we are saddened to hear of the numerious issues you have had with your vehicle. Products are not put out onto the market with specific faults in mind and we cannot foresee when a vehicle may encounter any issues.
Your concerns, particularly in view of the inconvenience involved in this issue, are understandable and I appreciate the time and effort you took to bring this matter to my attention. A case has been opened for you and the number is at the bottom of this page.
Due to the nature of your concern, your file has been escalated for further review. We feel this referral action will provide the best resource for your concerns. A Case Manager will attempt to contact you within one business day at the phone number provided in your email [redacted] If you wish to be reached at an alternative number, please respond so we may update your file appropriately.
We also would like to advise you of your currently incomplete recall, I have provided information below on the recall:
Chrysler Group will recall certain Jeep Grand Cherokee and Dodge Durango SUVs, model years 2011-2014, to install a cover over the brake boosters to minimize corrosion caused by undue water exposure.
Chrysler Group will inspect the brake boosters, and may replace them if braking capability has been reduced. All boosters will be equipped with a cover to insulate their crimp joints from water.
What you must do to ensure your safety... Simply contact your Chrysler, Jeep, or Dodge dealer right away to start the process of getting the recall completed.
Thank you again for your email. Should you require additional assistance in the meantime, or have any new information to provide, please reply to this email message or call 1-877-I-AM-JEEP (1-877-426-5337).
Sincerely,
Sierra

End of Status Update
Writer called the dealership and spoke with SA Dan and was placed on hold for 9 minutes. Writer will contact the dealership later.
Writer called the dealership and spoke with SA Dan and was advised that the vehicle is not at the dealership and the last time the vehicle was at the dealership was on 6/12/14 at 10,295 miles for a re-flash on the RRT 14-014. SA Dan stated that the customer brought the vehicle in on 3-20-14 at 7,946 miles for the check engine light was on.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at 1-800-763-8422 extension 66014. The reason for the
customer contact was to provide or request the following information: The reason the case was openand discuss customer concerns and issues vehicle is having.
Writer called customer. The customer, Mr [redacted] , confirmed to writer that indeed he is an attorney and that yes, he has been seeking buy back. Customer stated that the dealership is about thirty miles away and he just cannot continue to take his new vehicle there for repairs only to have them remain unresolved. Customer then stated that last Thursday, July 31, 2014, he got into his vehicle and discovered that the navigation system has suddenly started working on its own, and that today, Monday, August 4, 2014, the vehicle continues to be operating as it was designed; but, the customer stated, he has no faith that this is going to last based upon past history. Writer asked the customer, given the repair history, if he would be interested in Chrysler reimbursing him for a vehicle payment. Customer was appreciative, said he might be interested in that, and stated that this shows good faith. He then told writer that he wants to drive the vehicle for another week or so and see if the current operating state of the vehicle remains stable. Customer stated that it does, and we provide the reimbursement, then he would consider the matter resolved and we could close the claim. Customer told writer he has much more faith in Chrysler than he does in his dealership. The

customer told writer that at one point he did ask the Dealership (his selling dealership) if a trade in would be possible, but they wanted him to pay an additional $5,000-$6,000. The customer then said another option he would like to put on the table would be a preferred trade in for a new model, in which case he would be interested in an Overland with a diesel. Writer advised customer that I am going to do research into all of these options and topics and customer and writer agreed to touch base in one week, Monday, August 11, 2014.
Writer called Dealership. Writer spoke with Service Manager Greg, who said, I am the fixed operations manager I do have a service manager who is going to be the better one to talk to , Tim Davis. Writer was transferred to Service Manager Tim Davis. SM Tim told writer that it is true, on this vehicle everything from the navigation unit on has not been working. Tim stated that there is yet another new update for the customer s radio which just came on July 31, 2014: TSB 08036-14 revision A . Tim also noted the nexus of all the problems and first point of failure was that the battery kept going dead and general radio/ navigation issues. Writer advised Tim regarding conversation with customer. SM Tim stated the customer is a good guy and that his personal opinion is that the customer does have a legitimate perspective and concerns. Tim added that there is still one incomplete open recall, P14 Brake Booster, for which the dealership is awaiting the correct parts. Writer thanked Tim and will be back in touch with the Dealership in about a week.
Begin Customer Message reviewed:
Case# [redacted]
Message for Shani:
Look forward to speaking with you on Monday. Just an update: the Forward Collision Warning is not working (to the best of my knowledge) and sometimes the outside temperature doesn t work. It seems the entire system is riddled with faults and is unreliable.
Best,
[redacted]
End of Reviewed Customer message
Writer called customer, in order to acknowledge the email which customer has just sent (lines 178-186.) Customer Mr. [redacted]r stated that these factors are something he had not brought forward previously, and yet Customer wanted to add these to the list of his concerns. Writer assured customer that I and Chrysler are doing our best to make things right for him; customer responded that he has full confidence in that and appreciates writer s help. Writer and customer agreed to confer on Monday, August 11, 2014, as previously planned.
Writer called customer. Note that customer is an attorney. Customer states that have a new host of issued that have occurred (see latest email :) Including that his seat is now getting hot, his forward collision system is not working, and his temperature gauge has stopped working. At this point, the customer s expectation, not necessarily in this order, he says: 1) Chrysler, buy my car back 2) Chrysler, trade this inn for a new vehicle or at least 3) please give me a break on the payments. Writer asked customer if he would be interested in reimbursement for a vehicle payment. Customer was NOT satisfied with that offer, given the large number of unresolved problems, unsatisfactory trips to the Dealership without lasting repair, and , he states, a great deal of lost work and income due to vehicle issues. Customer Mr [redacted] told writer that now he has to go back to the Dealership for more diagnosis and repairs, due to the new concerns listed above, but that he was waiting for his Case Manger to offer him a solution of some kind first. Customer noted that as time passes he is getting closer and closer to being outside L Law provisions and warranty. Writer advised customer that I am going to do my best to escalate this in a new direction this week and customer would like a call back tomorrow, if possible ((Tuesday, August 12, 2014); if so, customer requests, please call in the morning.
Writer called Dealership. Writer spoke with Service Manager Greg, and reviewed with him the customer s latest concerns. Service Manager Greg

stated he didn t understand why the seat would be heating up, and asked agent to find out if the customer s temperature gauge light is also coming on. Writer requested of SM Greg that he open a new STAR case for this customer s vehicle. SM Greg advised writer that the dealership is very 'booked up' and that the earliest he could get the customer in would be August 22 at 1:30 pm. Writer secured that appointment slot for customer and thanked SM Greg. Greg stated he will make a note to open the STAR case when the customer comes in.
Writer called customer. Customer is not willing to go through another 60 mile round trip up to this dealership in the mountains, which, he says, also entails loosing another day of work, nor is he interested in 'wasting time' with more ineffectual attempts to repair his vehicle. Customer asked writer to cancel the appointment at the dealership. Bottom line: Customer advised writer that he will settle for a reimbursement of TWO vehicle payments; otherwise, he states, he is going to pursue lemon law on his own. Customer is an attorney. Writer advised customer that I will research the possibilities in regard to his request and get back to him as soon as possible.
Writer called customer. Customer was not available. Writer left voicemail message informing customer that I want to talk with him about an offer we have on the table (no details!) and asking him to please return my call as soon as possible.
Writer called customer. Customer was not available. Writer left voicemail message, advising customer that I do wish to talk with him as soon as possible regarding the offer we have for him. Writer requested, in the message, that customer return my call at his early convenience.
Customer Mr. [redacted]r called writer. Writer delivered to customer the offer that was authorized, which is for one (1) vehicle payment, up to $500. The customer responded that he is quite disappointed with that as his monthly vehicle payment is, he says, $1500. Customer stated he needs to think this over for a day or two before deciding if he will accept, and needs to consider his other options. Customer stated he will get back to writer in a day or two.
Writer called customer. Customer was not available. Writer left a voice mail message, encouraging customer to return my call and let me know what his decision is in regard to the offer of a reimbursement for one vehicle payment.
Writer called customer; customer was unavailable- writer left voice mail. Writer expressed to customer that I hope to hear from him soon regarding his decision. Writer advised customer that if I don t hear from him soon, I will, regrettably, need to close the case, and requested a call back.

Case #: [redacted]
VIN: 1C4RJFJTXEC[redacted]
Shani,
i received your emails: thank you for your persistent follow up.
i reluctantly will accept the offer of the one-time reimbursement. I m just tired out.
Best,
[redacted]
End of Reviewed Customer message
Writer notes email from customer Mr. [redacted]r, above. Writer called customer; customer was unavailable. Writer left a voice mail for customer: writer thanked customer for the message, and advised customer, in voice mail, that I will be emailing him also with a little more information as to which documents we will need in order to process his reimbursement. Writer also said, in voice mail, that I will be sending customer document request links. Writer will touch base with customer after his documents are received.
CORRECTION: writer needs to discuss the links with the customer in person. Therefore, writer called customer again, and reached customer in person. :) Writer explained to customer Mr. [redacted]r that we WILL reimburse his vehicle payment (one), and what the process of reimbursement entails; writer explained document links and Mr. [redacted] stated that it would be fine to go ahead and send them and he will send the documents required.
AND: Writer then advised Mr. [redacted]r that I (we) would really like to try

one more time to resolve his vehicle concerns and asked if he would like to take the vehicle back to Don K. one more time AND that I will work on this end to ensure that this time there is CM involvement in getting a (STAR) ('engineering/ technical') case opened. This was appealing to the customer and he stated he would be willing to do that but that he is going to research and see if another closer to him would be more efficient for him. Customer will decided upon which dealership and let writer know when he has an appointment made. Meanwhile, writer will send the document links so that that is taken care of and the information is attached to this case. Writer and customer agreed to touch base after the long weekend (week of September 2, 2014.)

[redacted] on 2014-08-27 @ 18:26
***** Customer Document Received *****
Writer notes that one of two documents is received, but that customer still needs to provide proof of payment (his notation with the document notes he was unable to.) Writer needs to request that customer fax the remaining document. Writer attempted to call customer, but customer s line indicated busy or out of service. Writer will attempt again in the morning, Thursday, September 4, 2014.
Writer called customer to talk about the documents he sent and also the plan to have him go for a diagnosis at another Dealership. Customer stated he does not want to spend another minute on this: he stated his new expectation: send the $500 reimbursement and close the case. Writer stated that I understood and will abide by customer s desire. Writer still needs the proof of payment and document and will request, via email, that this be sent via fax as he was unable to send it via document link.

Shani: Mr. [redacted], regarding our earlier conversation today, I completely understand your position and will abide by your decision. I want to complete the process of the reimbursement to you. The document showing the amount of your vehicle payment came through our system and is attached to the case. However, we still need to see your proof of payment, such as a bank statement indicating the amount. I will send you a fresh link and would like to inform you that you can send the second document via fax. Here is our fax number: 801-736-3929. Please attach a cover sheet bearing your name, my name, and the case number, [redacted] for identification purposes. Once we have that document we will be able to create your reimbursement check quickly and send it on its way. Thank you. I hope you have a pleasant remainder of the week.
End of Status Update
Begin Customer Message reviewed:
Shani,
The document I sent you is from your own company (Chrysler Capital)! It shows right on top the number of payments. All payments are by electronic transfer. I am not going to copy my bank statement to show you proof that it came from my bank account.
Do you mean to tell me that your company is asking for proof that I paid your company????? Could that be real? Please see your own company s statement to me that show the number of payments.
If this is not enough, then forget the offer and we ll just do the lemon law thing.
Thank you for your assistance. You work for a very weird place.

Hello, Mr. H[redacted], thank you so much for sending me the correct address information. Unfortunately, I do need to ask you for one more piece of information- and I apologize, because I fully understand your frustration. I should explain that I don t have access to the Chrysler Capital financial records, which is why we have needed to ask for all this information. And a new policy requires that I have to ask you for this extra documentation. Therefore, in your kindness, would you please supply to us a concrete proof of vehicle payment in one of these forms?
1) Front and back of a check sent as form of payment
2) Credit card receipt
Or 3) a bank statement, showing the payment deducted from your account, with everything not pertinent, of course, blacked out. I sincerely apologize this has taken a lot longer than it should have. As well, I very much thank you for your patience with me and the process. Please call me if you have any questions. Please note: my extension has changed. The new extension is: 40683. Sincerely, Shani

Product - Electrical - Cruise Control - Intermittent or Inoperative - Default	Customer feels adaptive cruise control is not working
Corporate - Survey By-Pass - No Diagnosis - Default - Default	

Briefly summarize why the customer is contacting Chrysler: Customer states that she has been utilizing her adaptive cruise control function and is finding that it is not working. Customer states that she would like to be provided instructions as to how it is supposed to work. Customer states that she already has an appointment with the dealership and will seek help from them.
Briefly summarize what the customer is expecting: Customer is expecting adaptive cruise control information.
Agent advised customer that the adaptive cruise control needs to be set by selecting the appropriate button on the bottom left of steering wheel and that you can select distance from vehicles by selecting the buttons beside this. Customer had attempted multiple times to see if function would change but no changes could be noted. Agent advised customer that as customer is going to the dealership to review this function with them to ensure there are no concerns on the vehicle.

Customer contacted writer and advised that the front adapter cruise control doesn t work. Customer stated she is taking into dealership again next week. She will be making an appointment at Adams in Annapolis. She stated the service department has been wonderful in trying to resolve her concerns. Writer advised customer of a follow up on 07/31/14. Customer agreed.
Writer called [redacted].

Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66223. The reason for the customer contact was to provide or request the following information: Follow up on Adams.
Customer contacted writer and advised the cruise control and front collision warning are inoperable. Customer took the vehicle in on Wed and picked it up Friday, and the lights came back on. The lights flashes red and the brakes lock up. Customer has an appointment 08/06/14. Customer is afraid to drive the vehicle. Customer stated she likes the dealership and loves her Jeep, but is getting to the point where she is afraid to drive it. When the brakes lock up the brakes slam on and she is afraid of being rear ended.

Case assigned to AM Erica Moyer for handling.
AM has requested an update from SM Frank at Stew Hansen 45323-will update case once more information has been provided. ELM54 _
AM received update from SM Frank at Stew Hansen in regards to this Lemon Law case. SM Frank states:
Customer has presented a list of complaints of which his memory seat and mirror complaint has been verified and his auto temp control has been verified. We have repaired the memory seat and have am AC control head here today for replacement. His major complaint is the forward collision warning sounds intermittently with nothing in front of the vehicle.
There are no faults in the system and we have not been able to verify the complaint. We replaced the forward collision warning controller on the last visit. SM will keep AM updated once more information is provided-service and parts director is out as well as assistance service manager who have been working closely on this case. ELM54
Received call from customer who stated he is upset that his case still has no resolution. Customer states he wants his vehicle fixed today or he wants a new car today. Informed customer that the dealership is

currently working with the AM to diagnose his concerns but there is no way a resolution will be provided today. Customer states he would like the AM to contact him within 6 hours. Informed customer I would inform the AM he would like to speak with her but there is no guarantee she will be able to contact him in six hours. Customer became very upset and stated everyone at Chrysler is ignorant.
AM received update from tech advisor that he has an inspection set-up for next week Tuesday, August 12th. TA will update AM of his findings and proceed from there. ELM54

Writer contacted customer at [redacted]. Writer asked customer to explain the concerns he is experiencing more clearly. Customer stated that there is a noise when he has his cruise control on. Customer stated he has test drove a vehicle with the NH3 ADAPTIVE CRUISE CONTROL W/STOP. Writer advised customer that his vehicle has NH1 ENHANCED ADAPTIVE CRUISE CONTROL. Writer stated that if he will contact dealership to see if they have a vehicle with NH1 to diagnose the vehicle. Customer stated he would like a factory engineer come down to the dealership and look at the vehicle; Writer stated he cannot promise that an engineer can come down, but can look into it. Customer also stated that sometimes the whole dash will black out.
Writer contacted customer at [redacted] Writer spoke with customers spouse who referred writer to contact customer at 4[redacted]
Writer contacted [redacted] and spoke to Mr. [redacted]. Customer reviews concerns with writer stating that his vehicle has a noise in the dash. Customer states that he is really hoping to have an engineer involved and not just on the phone. Writer advised that we can definitely arrange to see what can be done. Customer is expecting a phone call back on 08/04/2014
Status update provided via email to the following email address:
[redacted]
I apologize for being unable to call you today. I am still currently researching right now to see if it is a possibility to have an engineer go out to the dealership for further assistance.
End of Status Update
Writer contacted customer at [redacted] Writer informed customer that we can put in the request for an engineer to come to the dealership, but cannot do so without having the vehicle at a dealership. Customer stated he has already taken it to two different dealerships and stated that they both told him that it is operating as designed. Customer stated he understands that the vehicle is not going to stop because he does not have that system. Customer states that the vehicle sometimes speeds up and he is worried that it is going to cause a crash. Customer stated he will take the vehicle one more time to a dealership so we can have our technicians involved, but if it does not fix the concern he will file for lemon law. writer will follow up on 8/8/14.
Briefly summarize why the customer is contacting Chrysler:
Customer is contacting Chrysler seeking his case manager.
Briefly summarize what the customer is expecting:
Customer is expecting to talk to their case manager. Agent provided customer with their case managers phone number and extension; 800-763-8422 ext 66075.
Writer received voicemial from customer stating he has an appointment set up for 8/11/14
Writer contacted dealership and was advised that the service department is closed.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66075. The reason for the customer contact was to provide or request the following information:
State that a message was left for the service department and that writer will contact them again on 8/12 for further information.
Writer spoke to SA Justin who stated that they have test drove the vehicle and have experienced the vehicle accelerating while the cruise control is active. SA stated that it only accelerates when the vehicle is set at a certain speed and slows down due to a vehicle being in front of

them, and will accelerate back up to normal speed after changing lanes or if there is no longer an object in front of the vehicle. SA stated they also have not experienced the concern with the cluster blacking out or the AC not working.
Writer contacted dealership and spoke to SA/Justin. Writer informed SA that customer is no longer on ECS restriction and a TS will not be contacting them. SA stated that they have test drove the vehicle over 100 miles and still have been unable to duplicate any of the concerns and states that the vehicle is operating as designed.
writer attempted to contact customer at [redacted] Writer left a message requesting a callback
Transferred call to 66318 for assistance
Writer received a call from the customer who is saying he was told by the dealership they could not hear it and the customer did get a bit upset and the SM asked him to take his vehicle and leave.
Customer is willing to go to Stinnett Chrysler Dodge and see if if a TA can inspect the vehicle. Customer is going to meet with the owner Bachman Bernard Chrysler .
Customer would like His CA to contact the dealership Stinnett Chrysler Dodge and see if a TA can see his vehicle. And get a call back today.
Writer sent email to AM.

Corporate - Recall - Default - Default - Default	customer called in for recall information
Corporate - Enhanced Customer Satisfaction Program (ECS) - Default - Default - Default	

Briefly summarize why the customer is contacting Chrysler: The customer called in for information. The caller states that he had the vehicle towed in. Caller states as he was driving and applying the brakes the vehicle was vibrating. The customer states a red light came on in the vehicle ABS light and the 'service four wheel drive' light came on as well. The caller was seeking recall information on the N58. Agent informed the caller that the N58 was completed. Agent informed the caller that the P14 is not completed on the vehicle. Agent informed the caller that all of his issues would be documented for him. Caller thanked agent and ended the call.
Briefly summarize what the customer is expecting: Caller is seeking information on recalls.
Agent is requesting survey bypass - vehicle needs diagnosis.
Customer called as per the previous notes. Customer was travelling last night and the vehicle broke down. Customer states he called the Dlr this morning at 7am to inform them that the vehicle was there and to ask for a rental. He was advised that they can t extend the rental without a diagnosis. Agent called the Dlr and spoke with the SM Mark. Agent advised as the customer is an ECS customer that he is automatically provided a rental. He states he will call Tim at the Dlr (as he was away), and will have him set it up with enterprise. Customer wanted to be able to get home. Agent advised the customer of this and also advised that we will have a CM follow up on the repairs and to ensure satisfaction.
Customer advised a call back is required and will take place within one business day by COB their time
Preferred Morning/Midday call back number is [redacted]
Who has possession of the vehicle? Dlr

Has the vehicle been diagnosed by a CDJ dealer? Not yet
If a CDJ dealer has diagnosed, what is the dealer name or code? 44561
Reassigned to 88W
Enhanced Customer Satisfaction Team (ECS) *
The customer is being handled by the ECS Team
Writer dialed dealership and SA Tim stated they have diagnosed vehicle and they have found a left wheel speed sensor code has come up, writer informed SA this customer is part of the ECS program and to provide rental if needed. Writer also informed SA we will be escalating case up to our TS s and also provided writer s contact information as well.
Writer also informed SA of open recall on customer s vehicle.
Agent contacted customer, however customer inquired if they could get a call back in a few minutes
The reason for the customer contact was to provide or request the following information:
To inform customer we are their CA and we will providing updates as they become available and if rental is needed to get one.
Writer dialed customer and informed him we are his CA and will be providing updates as they become available and if rental is needed to go ahead and get one and we will cover that.

The customer had called in stating that he had not received a call from his CM regarding his case.
Agent had called over to the ECS program and spoke with Greg, agent then transferred the customer over for further assistance.
Customer contacted writer stating that he is concerned because he was told his CA would be giving him call when there are updates on the vehicle. Customer stated he took it upon himself to contact the dealership for an update and was notified that the vehicle should be repaired by tomorrow. Customer also stated he wants to know how the vehicle will return to the customer. Customer states he would rather not have to drive the 130 miles to the dealership the vehicle is at due to having to go on another road trip on 8/2/14. Writer stated we can possibly look into having the vehicle towed to a dealership in his area or reimbursing the customer back for any towing charges accumulated.
Customer thanked writer and stated that he is available to call after 8:00 am est.
Writer dialed SA Tim and left message informing him of lines 70-72 and to contact writer back so we are able to further discuss customer s request.
Writer dialed customer and informed him that we have left message with the dealership to further discuss this and will contact customer back once information needed is obtained.
Writer dialed SA Tim who stated they do not have a tow service so that is not something they are able to do, and repairs will be completed today and will notify customer when completed.
Writer dialed customer [redacted] 9 and informed him of lines 83-85 and stated if he does have vehicle towed we will reimburse him for that.
Writer also stated we will follow back up with him first of next week.
Caller Mrs [redacted] requesting to speak with Case Manager.

Customer calls to speak with their Case Manager.
Transferred the customer to AM1676 at ext 66238,because the primary CM was not available.
Customer declined to provide a second phone number.
Customer was transferred to CA; Customer stated that he has left several messages about his new concern which is that he has a clicking noise under the steering column. Customer stated that he doesn t know when he will be able to take the vehicle back in to get a diagnosis and wants to know what options he has. Customer stated that he was thinking about getting rid of it. CA stated that the customer can look into his blue and white book, attorney general or go to BBB.org to get his state law information. CA stated that the customer can proceed with reimbursement and have the case closed and reopen when the customer brings the vehicle back in for diagnosis when it is more convenient also. Customer requested a call back from CM MG1246 08/07/14.
Writer dialed customer who stated he does have a new concerns but does not have the time or the want to continue taking vehicle back and forth to the dealership and inquired what his options are at this point, writer inquired if customer has contacted purchasing dealership KUNZ CHRYSLER and inform them the concerns he has been having with his vehicle and customer stated he has not, writer informed him to also refer to his blue and white book and also contact states attorney general s office for the laws in their state. Customer stated he will do that and writer stated to contact writer back on what he has decided to do at this point. Customer also stated he will be sending in documents for reimbursement for towing.
Writer dialed customer and informed him we have not received his documents, customer stated he is waiting for his for bank statement, writer stated to contact us when it does arrive so we are able to send out another link.
Writer dialed customer and left message informing customer we will be sending another link to attach documents and if another one is needed to contact writer back.
****** Below Customer Contacted for Documentation Request ******

End of Status Update
Briefly summarize why the customer is contacting Chrysler. Customer is calling as the vehicle has been in four times for electrical concern with the seat belt and air bag alarm. Customer had the vehicle in today and they told her they have to order a part. They told her it will be about 2 weeks for the parts to come in. The dealership could not get any further information to provide an exact date. Front sensor for the adaptive cruise control and crash sensor, the parts were ordered for this repair about 3 weeks ago.
Briefly summarize what the customer is expecting. Customer is calling to log a complaint and seeking assistance on what to do for getting her vehicle fixed.
Informed customer we will need to speak with the dealership for further information to see what is the next step we need to take. Advised customer we will contact the dealership regarding the back order part and concerns with her vehicle. Customer asked if we could email her the case number. Informed I will email her the case number and contact number should she have further questions or concerns.
Reason for Dealer Contact: Diagnosis and back order part information on the electrical concerns to send to 96W or 88F for further handling.

AM reviewed the CAIR history. It appears that this is primarily a dealer management issue as it relates to fender damage and the dealerships inability to resolve it to the customer s satisfaction. No defect with the vehicle has been verified or mentioned in the CAIR history. Am supports the reimbursement of one car payment to the owner as a goodwill offer due to the unfortunate way this was handled, but AM does not support offering a replacement vehicle as there has not been a history of repairs due to a defect in the operation of the vehicle. sab20,AM. _

***** EMAIL BRIEF DESCRIPTION CONTENT *****
Adaptive Cruise Control
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
I recently purchased a 2014 Jeep Grand Cherokee Overland. Almost immediately after purchase the adaptive cruise control stopped working. I brought the car to get serviced at Dadeland Jeep (I purchased the vehicle at Arrigo Jeep) and was told that a new sensor needed to be ordered and would be in within 10 days. 10 days later, I contacted Jeep and was told that the new sensor could take MONTHS to arrive. This is unacceptable for service to a BRAND NEW VEHICLE. Please assist me. Thank you.
*****END OF CUSTOMER EMAIL*****

[redacted],
Thank you for contacting the Jeep Customer Assistance Center.
Please accept our sincere apologies for the delayed response to your email.
Because of the public s current interest in Chrysler Group and our products, we are unable to respond as promptly as we would like.
We are very sorry to learn of the problem you have encountered and can certainly understand your frustration. We have documented your concern.
The handling of your case will require a call to the Dealer. The Dealer is currently closed. What we are going to do is assign your case to an Agent that will contact the Dealer on your behalf within the next business day. We will be contacting you within one business day, after the Dealer has been contacted to provide you an update. This will ensure that your issue/concern/question is reviewed as quickly as possible.
Thank you again for your email. Should you require additional assistance, or have any new information to provide, please reply to this email message or call 1-877-I-AM-JEEP (1-877-426-5337).
Sincerely,
Crystal

Briefly summarize why the Customer is contacting Chrysler: Customer advising he was having an issue with the collision avoidance system on his new vehicle. Customer wanted to take his vehicle to BROWN S JEEP CHRYSLER DODGE as it is close to his work and they have extended hours until 11 PM. Customer is a physician. Dealer has refused to take vehicle in for service. Agent called BROWN S JEEP CHRYSLER DODGE 631-289-8500 and spoke to SA Brittany who advised they are only servicing vehicles that were sold by their own dealership. Agent advised that cannot be right as that cuts out any visitor that may have issue with vehicle. SA Brittaney advising that if vehicle was purchased on the island (Long Island) then customer has to take back to selling dealer. Agent gathered contact number for Customer and advised issue will be escalated.
Briefly summarize what the customer is expecting: Customer requires assistance to get service from dealer.
Customer contact cel[redacted]0.
Customer is calling in to see if there has been any updates since previous Agent has told him that she was sending this up.
Agent has advised that there is no additional information as of yet.
Agent supplied the customer with the Cair# also.
**** Dealer Notification Sent ****
dcp15 review: Advise customer that a formal complaint has been submitted on his behalf. In the meantime, refer the customer to another CDJR dealership for diagnosis and repair. dcp15
TL JK671 has sent another email to DCP15 in regards to issue, waitng for outcome.
Customer wants to break the lease because dealership will not look at the

vehicle at Brown s dealership. Customer stated that the collision avoidance system keeps breaking. Customer stated that he is a physician and wants to take it to Browns dealership as this is closest and is open until 11:00 pm.
Customer purchased the vehicle from Smith Haven 44812Ù however has purchased vehicles in the past from Brown s dealership. Customer stated that he can drop the vehicle off at 7:30 am and he is a physician and works until 8:30 and Browns is more convenient for him to bring the vehicle to. Customer does not know why he has to be penalized for this as this is the second dealership in New York that is refusing to work on the vehicle because he did not purchase the vehicle there.
Customer stated that this is not right that he should be able to bring his vehicle to any Chrysler dealership to have repairs done. Customer stated what if he was transient and he broke down would the dealership there refuse him also?
Agent advised customer of lines 21-23 however customer is not willing to deal with another dealership.
Agent contacted the dealership and spoke to the Service Advisor Peter who stated that because they have such an overload of repairs that they are 3 weeks back logged and not taking new customer s on. Peter stated they will only work on vehicles that were purchased at their dealership only. Peter refused to work on this customer s vehicle.
Agent advised customer that they are still refusing to repair his vehicle and that this has been sent up to our Business center as well as the General Manager. Customer stated he wants this resolved so he can bring his vehicle there and not be denied.
TL JK671 advised there is nothing more that we can do with the Customers situation at this time. TL advised to offer the Customer a complimentary Service contract that will include 4 oil changes for a period of two years. Agent will contact with the Customer tomorrow AM.
DEALER CONTACT: Writer contacted SMITH HAVEN CDJR 44812 , 631 863 2000 to find out what the dealership had done to address the Customers issue as Customer had stated Smith Haven had repaired but repair was inadequate and collision avoidance system is broken again. Agent spoke to SA Bob at Service who advised that there is no open or closed repair order on the vehicle.
AC ID 24087 SM Rich Sullivan richsully@yahoo.com 631 289 8500.
DEALER CONTACT: Writer called BROWN S JEEP CHRYSLER DODGE for SM Rich. 631-289 8500. Agent spoke directly with SM. SM advised after looking at system that database does not show Customer ever purchased a vehicle at BROWNS . After advising of Customers flexibility in being able to drop off vehicle at 7:30 AM, and advising that a formal complaint has been lodged to GM/AM. SM Rich still has to refuse as the service is booked a month ahead.
CUSTOMER CONTACT: Writer called MR [redacted] Writer reached [redacted] directly. [redacted] does not want the oil changes nor really my apology [redacted] advises that the foreign car comapnies offer impeccable Customer service at the dealerships and Chrysler is lagging far behind and he nor his family members will ever purchase another Chrysler product, as Customers are held hostage over service. [redacted] advised there is no record at SMITH HAVEN as he dropped his car off and they did nothing with it just gave it back to him. Writer is requesting a by pass we do not have a Diagnosis for the actual issue.

8/12/14RP RA scheduled on 8/14 at Ed Voyles-66999. Spoke to Mrs. o/ who confirmed veh. drop off on 8/14. Sent appt. ltr. to o/ and SM/TA/AM.
Concern: forward collision warning system inoperative. *Contacted dealer and authorized a rental, should one be necessary, for the duration of the repair. Also, instructed dealer to include the following explanation in the claim narrative as justification: 'Lemon law rental approved in cair #25437949.' TA-after your inspection please update cair then reassign to vaj3.
Vehicle is at the dealership - ED VOYLES CHRYSLER JEEP DODGE (66999)
Update triggered by S21268M
Inspected vehicle 8/14 when the customer s concern was the Forward Collision Warning (FCW) system does not work properly. Spoke with Ms. and she stated the system does not warn in situations when she and her husband think it should warn. I checked the vehicle for FCW diagnostic codes and there were none present. Also there were no flashes (software updates) available for this vehicle. Test drove vehicle extensively and vehicle operated as designed. The customer was provided a copy of a Star Online Solution # S1308000274 which details the operation of the system.

And the customer was advised to consult the owner s manual for details of how the system works. The literature give to the customer and the owner s manual advise the customer NOT to try to test the system. No repairs made. Vehicle returned to the customer. JEJ3 TA

Briefly summarize why the customer is contacting Chrysler: Customer called stating she recently bought a 2014 Grand Cherokee. She states she has nothing but problems with it. She states she is at the point where she actually hates the vehicle. She states she is thinking of getting rid of it. She states it has been to the dealership at least 4 times. She states she has had problems with the interior,exteriotr,engine and electrical. She states the body molding is peeling off on the outside,the transmission slips, the adaptive cruise control does not work right, if driving at certain speeds the speaker makes a really loud noise. She states she is going to take it back to the dealership on Tuesday but wants to know what else she can do. Agent advised we will send this to a case management department for further assistance. Customer thanked the Agent and ended the call.

I called Sliman s and I SA Brian and I confirmed that the vehicle is in , and I requested a STAR case be opened.***Case [redacted] - I2R Authorizes a rental for this vehicle up to $35 a day from 8/19/14 - 8/25/14 for body issues and a vibration noise while it is at Sliman s Sales & Service Inc.
*** Will follow up on Thursday.
I called Sliman s and I spoke with SA Brian and we have done DI and the cruise control unit is installed, and we should have the vehicle done by tomorrow.*** I called the customer and I updated her, and she reiterated that she would not keep the vehicle.*** Will follow up on Monday.
I called Sliman s and I spoke with SA Brian and I updated the RO history as the vehicle is at a different body shop for the rear flares, but should be done tomorrow.*** I called the customer and I updated her and she stated that she wants out of the vehicle, and I let her know that a replacement is not possible, customer then stated that trade assistance would not work as if she comes out of pocket at all it would be to another company. I offered to look at a MVPP or a months payment and customer stated that she would prefer a months payment. Will follow up on Wednesday.
I called Sliman s and I spoke with SA Brian and I updated the RO history as the vehicle is still having issues and they are now waiting on DI.***
Case # [redacted] - I2R Authorizes a rental for this vehicle up to $35 a day from 8/26/14 - 8/29/14 for body issues and a vibration noise while it is at Sliman s Sales & Service Inc. ****I called the customer and I updated her, will follow up on Friday.
I called Sliman s Sales & Service Inc and I spoke with WA Diane and we are waiting on DM TAS13 to put in notes to the DI.*** I called the customer and I LVM updating her, will follow up on Wednesday.
DM entered notes into GWA approving dealer to replace moldings and not simply remove, clean and reattach.
I called Sliman s Sales & Service Inc and I spoke with WA Diane and we have the parts and they will be installed on Friday (ETA).*** I called the customer at [redacted] and I LVM updating her. Will follow up on Friday.***Case [redacted] I2R Authorizes a rental for this vehicle up to $35 a day from 8/30/14 - 9/5/14 for body issues and a vibration noise while it is at Sliman s Sales & Service Inc.
I called Slimans and I spoke with WA Diane and they are getting the

vehicle back from the body shop today.*** I called the customer and I updated her, will follow up on Tuesday.
I called Slimans and I spoke with WA Diane and the vehicle is back in the body shop for a workmanship issue. The vehicle should be back to the customer tomorrow.*** Case [redacted] - I2R Authorizes a rental for this vehicle up to $35 a day from 9/6/14 - 9/9/14 for body issues and a vibration noise while it is at Sliman s Sales & Service Inc. **** I called the customer at [redacted]1 and I updated her, will follow up on Thursday.
I called the customer at [redacted] and I LVM, will follow up on Monday.
I called the customer at [redacted] and I LVM, will follow up on Wednesday.
I called the customer at ([redacted] and I LVM stating that if I do not hear back from her by Friday that I will close her case.
I did not hear back from the customer.
Diana WA from Sliman called and LVM, reuesting information on processing the rental. *** I called her back and I updated her.

***** EMAIL BRIEF DESCRIPTION CONTENT *****
Accident Avoidance/Adaptive Cruise Control Abrupt Operation
***** END EMAIL BRIEF DESCRIPTION CONTENT *****
Are there any software updates or plans for updates to address the adaptive cruise control s abrupt braking and acceleration under certain situations? The cruise will run up on slower moving vehicles, then abruptly apply the brakes in an emergency manner. Is there anything that can be done to ease up on speed sooner to make the adaptive cruise control operate more as how an alert driver would, as opposed to how an inattentive driver operates a vehicle with abrupt maneuvers? When a slower moving vehicle subsequently moves out of the way, the vehicle accelerates at full throttle back up to the set cruise speed instead of at a smooth pace. The operation of the adaptive cruise control is very annoying in certain traffic situations, and may be deemed dangerous, because drivers following behind me may not be able to react as quickly when the the brakes are applied so abruptly.
*****END OF CUSTOMER EMAIL*****
Dear [redacted]
Thank you for contacting the Jeep Customer Assistance Center.
Please accept our sincere apologies for the delayed response to your email.
Because of the public s current interest in Chrysler Group and our products, we are unable to respond as promptly as we would like.
We appreciate the time and effort you took to tell us of your product suggestion. We have documented your comments and will provide them to our product development team for review.
At this time, there are no updates available for your vehicle.
Thank you again for your email. Should you require additional assistance, or have any new information to provide, please reply to this email message or call 1-877-I-AM-JEEP (1-877-426-5337).
Sincerely,
Victoria

Corporate - Survey By-Pass - Default - Default - Default	Customer is and has been having many issues with the vehicle.
Dealer - By-Pass - Default - Default - Default	

Customer contacted Chrysler stating she has had many issues with her vehicle and she has only had the vehicle since January 2014.
The issues have been:
Paint bubbling rear passenger doors resolved
Gas leaking from the filler neck resolved
Fuel injection plug resolved
Air suspension module repeat issue, DLR thinks this is causing the break issue but don t know why
Check engine light comes on and the vehicles rides rough repeat issue
Vehicle brakes even when nothing in front of her repeat issue
Weather stripping on the passenger front and rear keep having to be replaced repeat issue
Bluetooth not pairing and agent explained about this
MPG is very far out repeat issue
Customer is taking the vehicle back to the DLR tomorrow and the DLR said they will have it for about 2 weeks and are supplying her with a rental. Customer is extremely pleased with her DLR and can t say enough good things about them. Customer also stated that she keeps buying Jeeps as they have the best customer service.
Customer did say about lemon law and agent referred her to the blue and white book. Customer said she really doesn t want to do this as she really enjoys the Jeep brand. Customer said she is interested in a buyback or replacement
Customer informed a call back is required and will take place within 1-2 business days.
Preferred Morning/Midday call back number is [redacted]
Preferred Afternoon/Evening call back number is [redacted]
Customer email address for case updates [redacted]

Who has possession of the vehicle? (Owner/Dealer/IRF) DLR
Is this a request for Lemon Law, buy-back or replacement? Buy-Back or Replaced
Reassigned to 91L

*********Case Escalated to I2R**********
Reviewed Warranty History which determined this case should be escalated to I2R for case management.
Contacted dealer (24165), SA Brandy was unavailable.
-Contacted the customer, she confirmed current concerns. Appointment scheduled for 8/25 and loaner is going to be provided. Customer stated she is paying $875 a month for her vehicle and so surprised that she is having this many concerns. Customer stated she is hesitant to keep the vehicle if he is constantly having to go to the dealership for service. I acknowledged customer concern with vehicle and apologized for everything she has experienced. I informed the customer that is not something that we want for our customer, and we are here to assist her with repair of the vehicle. I informed the customer at the time when the vehicle is brought in for service, I am going to request additional technical support to contact dealer to assist with diagnosis and repair. Customer understood. I advised customer if we are unable to do so, I would be glad to review her case for any other possible options. Provided customer with contact information and informed her that I would follow up with her on Monday 8/25. Customer thanked me for the call.
Contacted dealership (24165), LVM for SA Brandy requesting a callback.
-Contacted the customer, she confirmed her vehicle is currently in for service and she is in a loaner. Customer stated she has spoken with SA Brandy and they are confident that they can repair it. I advised the customer, I did reach out to the dealership and a VM for left for SA Brany. Customer was very excited about not having the issue reoccur. I advised the customer after the repair, we can speak about some form of compensation.

CAIR ESCALATION UPDATE
SEE STAR CASE# [redacted] FOR INFORMATION
Received a call from the customer wanting an update on her case. I advised the customer that I have not spoken with Brandy as of today. I advised the customer that last note that was put on her case by TAPS was that the FCW needed to be aligned. Customer stated she spoke ith Brandy and was told they were unsuccessful at aligning the FCW. I advised the customer the part that was ordered may take another 1-2 Weeks to reach the US and then another week to reach the dealership. Customer stated that is ridiculous because she is still making payment and insurance payment and she is with her vehicle. I advised the customer at this time, we are moving forward with the repair process and I ll more information for her at a later date. Customer understood. I advised the customer at the end of the repair, we can look into some form of compensation. Customer understood.
Contacted the dealer (24165), spoke with SA Brandy. SA Brandy stated she received a message from the technical specialist requesting information regarding the alignment. SA Brandy stated she contacted him and left a message informing him that the alignment did not work. I advised Brandy the part is held up in Germany. I advised her that I would follow up in a few days.

OMC# 89975082Order# $0827Z FOR PN: 68259548AA IS RESOLVED
Contacted the dealer (24165), LVM for SA Brandy requesting a return call.
Contacted the customer, LVM requesting a return call.
Received a call from SA Brandy stating the part was put on yesterday. Vehicle was test drove over night, no issues occurred. Customer is going to be contacted.
CAIR ESCALATION CLOSURE
SEE STAR CASE# [redacted]FOR INFORMATION
Contacted the customer in regards to vehicle performance. Customer stated everything seems to be fine. She does still have a slight issue with the Bluetooth so she is going to be taking the vehicle back. Customer also stated she has not used the adaptive speed control so she is not sure how that is performing. Customer is going to take a few additional days to confirm issue is repaired. Will follow up with customer on 10/25.
Contacted the customer to confirm vehicle performance. Customer stated she is not sure if the adaptive cruise control is working. Customer stated when a vehicle merges in front of her the vehicle does not stop or slow down. Customer is not sure if she has unrealistic expectation of what the adaptive cruise control is suppose to do but she has contacted Brandy at Auto Nation and she is looking into it for her. Customer stated she is currently out of town and can not take the vehicle back for service until after Tuesday. I advised the customer to contact me once appointment has been scheduled.
Contacted the dealer (24165), no appointment has been scheduled as of yet.
Status update provided via email to the following email address:

End of Status Update
Received a call from the customer stating she was told by Brandy at autonation to reference her manual in regards to the adaptive cruise control. Customer stated when she is using the cruise control, if a vehicle merges in front of her, the vehicle does not slow down. Customer stated she is not sure if it is suppose to slow down or not. I advised the customer that I would research that function and give her a callback.
Checked owners manual in regards to ACC. Advised customer if the vehicle detects another vehicle in front of her, it is to apply limited braking or acceleration automatically. I advised the customer in no form is the vehicle going to take the place of her driving or braking to prevent collision. I also informed the customer that the ACC system does not react to pedestrians, oncoming vehicles and stationary objects such as stopped vehicles in traffic jams or disabled vehicle. Customer understood. I then offered the customer compensation for the total amount of days she was without the vehicle. I offered the customer 1 payment reimbursement of about $876.00 and 2 years owners care. Customer stated she would have to think about the offer because she still thinks she wants to contact an attorney to have the vehicle bought back. Customer stated her vehicle was down for well over 30 days. I advised the customer that I would further review her case and give her a callback.
Contacted the customer in regards to review. I advised the customer that we are willing to offer her 2 payment reimbursements as well a 2 year owners care package. Customer was appreciative and accepted the offer. Customer is going to fax over documentation needed. Customer thanked me

for the call.
Received a VM from the customer stating she had to take her vehicle back into the dealer. Customer requested a return call.
-Contacted the dealer (24165), spoke with receptionist. She stated customer s vehicle is not in for service.
-Contacted the customer, she stated she has an appointment scheduled for 10/16. Customer stated on the screen it shows I drive, customer stated she is unable to accelerate at all. Customer stated she can stop the vehicle fine and she has to be the vehicle in sports mode in order to accelerate. Customer stated when this happens the engine raves up really hard. I apologized to the customer for what she is experiencing. I advised the customer to stick with her appointment and I am going to follow up with the dealer as well as she on how we are going to proceed. Customer thanked me for the return call.
Contacted the dealer (24165), spoke with receptionist. She confirmed vehicle was in for service but could not provide RO #. Transferred to SA Brandy, LVM requesting a return call with vehicle diagnosis.
Contacted the dealer (24165), LVM for SA Brandy requesting a return call.
Received a VM from Brandy at Auto Nation, she stated they are still diagnosing the vehicle and once they have a diagnosis, she would give me a return call.
Contacted the dealer (24165), LVM for SA Brandy requesting a return call with vehicle status update.
Contacted the customer, LVM advising the customer that I am aware that her vehicle was in for service. I advised the customer that I received a VM from Brandy last week stating they were still diagnosing. I advised the customer to give me a callback in regards to if her vehicle is still in for service.
Contacted the dealer (24165), spoke with SA Brandy. She stated they have not been able to duplicate the customer s concern as of yet. Customer is out of the country for 1 month, vehicle will remain at dealer until she returns. SA Brandy will contact me once issue has been duplicated.
Contacted the dealer (24165), LVM for SA Brandy requesting a return call regarding duplication of the customer s concern.
Contacted the dealer (24165), LVM for SA Brandy requesting a return call.
11/20/2014 12:12:25 PM: User Comment by Oscar Cantu: Contacted the dealer 24165 and spoke with Brandy. Brandy advised me that what the customer was experiencing was provision issues from the transmission, once they reach 70 MPH it starts to down shift on its own. Customer stated she was seeing an 'I' which was actually a 1 for 1st gear. Vehicle is with the dealership, customer is on a loaner and has returned from her out of country trip at this point.

I spoke with SA Melissa who told me that the vehicle is presently being worked on. She told me that when it is finished that the SA (Brandy) who is assigned to this case will contact the customer.
I spoke with the customer and provided an update. She very much apreciated my call!
CAIR ESCALATION UPDATE
SEE STAR CASE#[redacted] FOR INFORMATION
Contacted the dealer (24165), spoke with SA Brandy. She stated they have placed a flight recorder on the vehicle and is now currently driving the vehicle to obtain data. SA Brandy stated she got in trouble thanks to me.
I apologized to the SA and advised her TAPS had been requested due to no progress in regards to the diagnosis of the vehicle. The recommended

steps were not completed and therefore was escalated even higher. I advised SA that I would follow up with her regarding the data recorder.
-Contacted the customer in regards to her vehicle concerns. Customer stated she is paying $875.00 a month for a vehicle she cannot drive. Customer wants Chrysler to step up and do something about her vehicle. I advised the customer that I would be glad to start a review on her case for all possible resolutions. I advised the customer that I would follow up with her. Customer was appreciative.
Contacted the customer to advised T7218RD is scheduled to inspect, diagnose and road test her vehicle on 12/5. I advised the customer that I would follow up on Friday in regards to that. Customer understood. Customer was appreciative of the phone call.
Called customer who stated she has been given a flight recorder to monitor the vehicle and store any codes that appear when her vehicle duplicates. Customer stated that vehicle is slipping out of gear and decelerating on the freeway. Customer stated that vehicle only duplicates once or twice a month. Customer reiterated her desire for replacement. Advised customer that, since there was no repair made on the vehicle on this last visit, we cannot justify replacing the vehicle at this time. I suggested that customer continue to test with the recorder and allow the dealership to determine if a repair needs to be made. If a repair is made, advised that her CM can review for all possible resolutions at that time. Customer expressed frustration that vehicle is not presenting codes; sympathized with customer, but advised that either the vehicle is not communicating with the dealership or there is nothing wrong with the vehicle. Customer wanted to know what she would have to do to escalate beyond my department; advised I can request a supervisor call, but supervisor is bound to the same review standards as her CM. Advised customer that arbitration or legal recourse were the next steps. Customer decided to continue with repair process. ***Follow up with customer 12/10/14
Contacted the customer in regards to flight recorder. LVM advising to follow up with me once duplicated.
Contacted the dealer (24165), spoke with SA Brandy. She stated she has left the customer a few messages in regards to the flight recorder and she has not heard back. She thinks the customer may be out of the country for the holiday. I advised SA that I would follow up after the holiday.
Status update provided via email to the following email address:

**********END OF TRIAGE**********
Writer contacted DLR at 815-935-7900. Service Manager Paul confirmed that the customer has possession of the vehicle and is drivable. SM stated that it was a manufacture problem and the point of failure was the adaptive cruise control. SM stated that they are waiting for parts, when the part is received repairs will take 2 hours to be /completed. SM confirmed that repairs will be completed under warranty. Current mileage on the vehicle is 16,099. Writer will follow up on 8/27/14.
Writer contacted the customer at [redacted] Customer inquired why the part is not in stock. Writer informed the customer that the DLR does not have the part in stock that is why the part has been ordered. Writer informed customer that the part was expedited. Customer s expectations are to make sure his vehicle gets repaired and the part comes in sooner since the customer is going on vacation for Labor Day. If any updated information writer will contact the customer before 8/27/14.
Writer contacted DLR at 815-935-7900. Parts Department stated that the recall brake booster cannot be ordered since it has a restriction. Parts Department stated that the adaptive cruise control cannot be ordered as well since it has a restriction on it. Writer inquired if there is anything the writer can do to get the part shipped. Parts Department advised writer to do further research.
Writer contacted DLR at 815-935-7900. Writer informed Parts Department Keith that the P14 recall for the brake booster restriction was lifted and should be able to order the part. Writer advised Keith to contact Star and see if they can order the part. Keith informed writer that he

has tried to order the brake booster and is still unsuccessful and that he will contact the expediting team. Keith informed writer that he cannot contact Star only the Service Department can. Keith stated that further research will be done. Keith gathered writer s contact information.
Writer contacted DLR at 815-935-7900. Parts Department Keith stated that the adaptive cruise control should be on 8/29/14. Keith stated that when the part is received, they will be giving the customer a call. Writer inquired about the brake booster. Keith stated that the vehicle was not affected by the recall but requested the Area Manager to order the part. Keith informed writer that they are waiting for a response from AM.
Writer contacted at [redacted]. Writer informed customer of line 103. Customer stated that he will be going on vacation on 8/28/14 at night and advised writer to contact the DLR on 8/28/14 to see if the part was received. Writer agreed. Writer informed customer of the incomplete recall. Customer was aware and stated that he was frustrated because they were not able to order the part. Writer informed customer that the Parts Department is working hard to try to get the P14 recall available. Customer understood. Writer will follow up on 8/28/14.
Customer calls seeking recall information. Advised the customer of incomplete recall P14 for this vehicle. Customer was advised to contact a Chrysler, Dodge, or Jeep dealer to schedule an appointment to complete recall repair.
Writer contacted DLR at 815-935-7900. Parts Department Keith stated that the part was received on 8/28/14 and left a voicemail with the customer to inform the customer that the parts were received.
Writer contacted at [redacted] Writer informed customer of lines 121-122. Customer stated that he will contact the DLR today and make an appointment. Writer advised a call back if an appointment is made, if not writer will contact customer on 9/3/14.

Canceled new model block order and placed new order for AF level ETA to dealer is 9/5
****** END OF SUPPORT ESCALATION ****** by T8430MH
Writer contacted DLR at 815-935-7900. Parts Department stated that 3 parts were ordered and all were received. Parts Department stated that Chrysler gave DLR new parts numbers. Writer was transferred to Service Department Shawn. Shawn stated that repairs were completed on 9/2/14 and customer has possession of the vehicle. Writer inquired if all repairs were completed. Shawn stated that all repairs were completed.
Writer contacted at [redacted] Writer inquired if customer has possession of the vehicle. Call was disconnected.
Writer attempted to contact at [redacted]6. Writer wanted to verify with the customer that repairs were completed and the customer has possession of the vehicle. Writer wanted to know if customer is satisfied and expectations were met. Writer advised a call back. Writer will attempt to contact customer on 9/5/14.
CAIR RE-OPENED AND FOLLOWING REASON CODE(S) REMOVED
Dealer - By-Pass
Writer contacted customer at [redacted]. Customer stated that they do have possession of the vehicle but has not had a chance to test drive the vehicle to make sure repairs are to their satisfaction. Writer advised customer to drive the vehicle over the weekend and writer will follow up on 9/8/14.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 66165. The reason for the customer contact was to provide or request the following information follow up with customer s repairs on their vehicle.
Agent contacted customer at [redacted] and inquired the status of the vehicle. Customer stated that they did not have enough time to test vehicle. Customer states that they had an instance where vehicle did seem as though it was operating correctly. Agent advised that they will follow up with customer in a few days to give customer enough time to test vehicle.
Writer contacted at [redacted]6. Writer inquired if repairs are to the

customer s satisfaction. Customer stated that he has had a problem with the vehicle shifting hard but has not gave the vehicle time. Customer informed writer he has not drove the vehicle a lot. Writer inquired if the case can be closed and if the customer has concerns or question to contact us. Customer agreed. Writer inquired if the customer is completely satisfied. Customer is not satisfied since the part took long to be received. Writer stated if there is anything that can be done to completely satisfy the customer. Customer stated no.
Writer attempted to contact customer, however, customer was not available.
Left message for a return call at extension 40696. The reason for the customer contact was to provide or request the following information: Writer wanted to offer customer MVP plan MAP4N for the inconvience. Writer advised a call back.
Agent attempted to contact customer, dialed 8[redacted] however, customer was not available.
Left message for a return call at extension 40696. The reason for the customer contact was to provide or request the following information: Writer wanted to explain that case manager would like to present an offer at this time and requested for a return call at this time, however there was not an available voice mail to leave a message. MAP4N
Customer contacted writer. Customer inquired what MVP plan was offered. Writer offered MVP plan MAP4N for the inconvenience. Writer educated customer on MVP plan. Customer inquired if he can be sent an email with everything the MVP plan comes with before it is attached. Writer informed customer that we cannot send an email with information but when the MVP plan is attached, the customer will receive an email with the information. Customer understood and agreed to take MVP plan. Writer will contact the customer when MVP plan is added. Customer agreed.
MAP4N Contract created. Contract number is[redacted].
Writer contacted customer at[redacted]. Call was disconnected.
Writer attempted to contact customer, however, customer was not available.
Left message for a return call at extension 40696. The reason for the customer contact was to provide or request the following information: Writer attempted to contact customer at[redacted]. Writer wanted to inform the customer that the MVP plan was attached to the vehicle. Writer wanted to make sure the customer is satisfied. Writer advised a call back. Writer will follow up on 9/26/14.
Writer contacted customer at 8[redacted]. Writer informed customer that MVP plan was attached to the VIN. Customer understood. Writer inquired if the customer is completely satisfied. Customer stated that he is and the vehicle is running good. Writer informed customer that the case will be closing. Customer understood and agreed.
CLOSED LOOP UPDATE - customer contacted today to confirm repairs. All of the customer s concerns as documented in the reason codes have been addressed with the customer.

Top Care customer first contact was 08/21/14 at 16:52 by SS11
.....Writer spoke with customer who advised veh is still having issues with white smoke coming out of exhaust upon start up, and advanced collision warning system not working. Customer advised does not want to take the veh into the Dlr anymore. Customer advised will be out of the country until Aug. 26th. Customer advised will follow-up with writer when gets back from vacation.
POSTMARK DATE: 081114; DATE RECEIVED: 082214
Top Care follow-up contact was 08/29/14 at 11:13 by SS11
.....Writer spoke to customer who advised is back in town and needs to take veh back into Dlr: 60590 for the following issues - white smoke coming out of exhaust upon start up, eye ball collision warning system not working, side mirror blind spot detection activating and not shutting off, stereo locks up, cannot adjust A/C. Customer seeking rental assistance when brings veh into Dlr. Writer advised customer will contact Dlr: 60590 and follow-up with customer.
.....Writer left voice message for customer call back to confirm when customer might be bringing his veh back into the Dlr for diagnosis of the above mentioned items. Writer will arrange rental assistance for customer once writer confirms when customer will be bringing veh into Dlr.
.....Writer left a return voice message for customer advising to make an appointment with the Dlr for a date when customer is back in town. Writer advised customer will work with Dlr to resolve issues but veh will have to be diagnosed at the Dlr.
.....Writer left a 2nd voice message for customer call back to review timing when customer may be able to bring veh into Dlr for diagnosis.
.....Customer advised writer has an appointment set for 9/30/14 at Dlr: 60590 for diagnosis of above listed veh concerns. Customer seeking rental assistance when brings veh into Dlr on 9/30/14. Writer spoke to SA Julie at Dlr: 60590 who advised does not show any appt. for customer

in Dlr system for 9/30. Writer left voice message for customer advising of the above. Writer advised customer will Goodwill a rental veh once customer confirms appt. date with Dlr.
.....Writer spoke with Dlr: 60590 service receptionist who advised customer R.O. was opened on 9/30/14 and closed on 10/3/14. Writer left voice message for SA Brenda for call back to review customers recent service appt.
.....Writer left return voice message for customer call back to review current veh status.
.....Writer left return voice message for customer call back to review current veh status.
.....Writer left another voice message for customer call back to review current veh concerns.
.....Writer spoke to customer who advised when brought veh into Dlr: 60590 back on 9/30 Dlr was unable to duplicate any of the above mentioned veh issues. Customer advised issues are intermittent. Writer asked customer if there is a date that he might be able to bring veh back into the Dlr for further diagnosis of electrical issues. Customer could not provide writer a date due to customer advised is in outside sales and is constantly on the road or in airports. Customer advised will look at calendar and follow-up with writer with a possible date he could bring veh back into Dlr. Writer advised customer to contact writer two days before his service date and writer will set up a rental veh as Goodwill as well as engage tech assistance as needed.
.....Writer left a return voice message for customer advising would like to at least have the chance to be able to work with the Dlr to correct above mentioned veh issues before customer decides to trade-in veh. Through writers previous dealings with customer, customer is constantly unavailable to bring veh into a Dlr as he is always traveling. Writer did encourage customer to allow Chrysler to assist. him in repairing the veh.
.....Writer has not heard from customer since writers last voice message on 10/17. Writer left another voice message advising customer to contact writer when customer has a block of time available to have veh diagnosed at a Chrysler Dlr. As stated above, customer is constantly traveling on business and never has time to discuss or bring veh into Dlr. Writer advised customer will be closing the file but provided contact number for future reference if and when customer has a block of time to bring veh into Dlr for diagnosis of the above veh issues.

Product - Drivability - Unknown - Other - Default	excessive oil use

Briefly summarize why the customer is contacting Chrysler: Customer states that she has Jeep grand Cherokee that she purchased on thanksgiving of last year and had 2 oil changes on the vehicle and the customer is unhappy that she has had to add a quart of oil Customer took it to the DLR as she believes that it is unsafe to drive customer is unhappy at the excessive use of oil customer set the cruise and the vehicle took off on the customer DLr is checking a cruise and the computers is giving the customer multiple electrical concerns
-
Briefly summarize what customer is expecting: Customer is wanting to have her concerns documented and resolved as this would be the second time the issue has been brought to the DLR
-
Current location of the vehicle: DLR
Date of last repair attempt: around the 18,19 of august
Customer s preferred method of contact: Phone
Customer phone number (Morning) [redacted]
Customer phone number (Evening) [redacted]
Customer email address:
Dealer code (if applicable):60569
Dealer personnel involved (if applicable):
Assigned case to 88F
Briefly summarize why the customer is contacting Chrysler: Customer calling Chrysler because she has not heard from a CM regarding the vehicle.
Briefly summarize what the customer is expecting: Customer was expecting to hear back regarding her vehicle.
Agent advised the customer the case was sent up electronically on Friday, Aug. 29th, and with the holiday weekend the customer would most likely hear back by the end of business today. Customer understood.
Customer s best contact number would be [redacted].

* * * * * CASE MANAGER TEAM - District N * * * * * *
Writer contacted dealer at 800-947-7567, spoke with SM David. SM advised that customer has been taking vehicle to Graven CDJR for oil changes, and when she recently brought the vehicle in for oil consumption issues, oil was spilled all over the engine. SM advised that they are going to do an oil consumption test and have the customer bring the vehicle back in 1000 miles. SM advised that customer has had issues with the adaptive cruise control, the key fob and the blind spot monitor, but they have not been able to duplicate any of those issues at the dealership, and feel it may be an operator error. SM confirmed mileage at 11111.
Agent attempted to contact customer at [redacted], however, customer was not available.
Left message for a return call at extension 66283. The reason for the customer contact was to provide or request the following information:
To follow-up with customer on concerns
Writer received VM from customer returning writer s phone call.
Writer contacted customer at customer at [redacted]5. Customer advised that the dealer is supposed to be delivering her vehicle today, as she is going out of town. Writer advised that customer will need to put 1000 miles on the vehicle and then return to the dealer for testing. Customer understood. Writer advised that will follow-up with customer again on Wednesday 9/10/14.
Writer contacted dealer at 800-947-7567, spoke with SA John. SA advised that vehicle has been returned to customer, and they have advised her to bring it back after about 1000 miles so that they can evaluate the oil consumption.
Writer contacted customer at customer at [redacted]. Customer advised that after driving 500 miles, she will return her vehicle to the dealership. Customer advised that she is hoping to get the vehicle returned after the weekend, but would like to have a vehicle to drive while the vehicle is at the dealership. Writer advised that since the vehicle is fairly new, writer can talk to the dealership to see if we can arrange something for her. Writer advised that will follow-up with customer no later than Monday 9/15/14, an and will follow-up with the dealer on 9/12/14 about a rental vehicle.
Writer contacted dealer at 800-947-7567, spoke with Clint who is the SM for Ford, as the SM for CDJR was not available. SM advised that they would be willing to accept an RA, but would need to know when the customer plans on coming in so that they can make sure a rental is reserved. Writer advised that will follow-up with customer and will wait to send RA until we know when the customer is coming in. Writer advised that we may not need to authorize rental, if they are just check the oil level.
9:10AM (MST) writer had contacted the customer and she stated that she does have the vehicle and she spoke with her CM yesterday about arrangements for her for Tuesday, 09/16/14. She is also stating that she is requesting a rental and writer had already told the customer that her CM is aware of this request. The customer is aware that this will be authorized by the SM of the dealership. Writer thanked the customer for her time this morning and her CM will be in contact with her next week Monday, 09/15/14 for updates.
The customer called to speak to the CM. The customer had an appointment and will not make it at the scheduled time. The customer also states that the last time she had to take the vehicle to the dealer, she was not provided a rental and expects to be given one. Writer advised that warranty does not cover rental and that it can be given as a courtesy and there are service contracts available for purchase that cover towing and rental.
The CM has a new extension: 40539.
Writer called the customer back to advice of the new extension as promised.
Writer contacted customer at customer at [redacted].
Writer advised:
The CM has a new extension: 40539
CAIR #: [redacted]0
CAIR Manager: DARIEN

Writer received call from customer. Customer advised that she is going to take her vehicle to the dealership tomorrow. Writer advised that writer will contact the dealership and will find out if rental will be needed or if they will just check the oil levels. Writer advised that will call customer back.
Writer contacted dealer at 800-947-7567, spoke with SM David. SM advised that it will take 5 minutes check the oil level. Writer advised that if customer needs a rental for some reason, we can authorize it. SM advised that they will make sure the customer is taken care of.
Writer contacted customer at customer at [redacted]. Writer advised of lines 104-107. Writer provided customer with the name and ext. of a CM in the office that will be able to help her, as writer will be out of the office tomorrow.
Writer called the dealership and spoke with SM David. SM stated that he checked the oil and that the oil level had not moved and was still full. SM stated that he told the customer to go ahead and gring it by at another 500 miles and he would check it again. Writer will call the customer to see if we can close the case.
Writer called the customer and gave the information on lines 112-116. Customer stated that she does not understand why her vehicle ran out of oil once and now it is not and would like to keep the case open. Writer stated that we would call back in one week to see if there is any change but if not we would have to close the case at that time and that the customer could keep in touch with the dealership and if anything changed she could open a new case with us. Customer agreed.
Writer contacted dealer at 800-947-7567, spoke with SM David. SM advised that customer has not been in since 9/16. SM advised that they checked the oil level, and everything was normal. SM confirmed mileage at 11573.
Agent attempted to contact customer, however, customer was not available. The reason for the customer contact was to provide or request the following information:
Let customer know the case is closing due to no repairs needed. Writer provided Jeep Customer Care number and thanked customer for being a part of Jeep.
CLOSED LOOP UPDATE - no need for additional follow-up.

Product - Electrical - Cruise Control - Defective - Default	Auto braking with no vehicles ibnfront of them.

Briefly summarize why the customer is contacting Chrysler:
Customer is contacting Chrysler as they have made 4 or 5 appointments and they do not have a loaner as promised. Customer feels they have done it several times now on purpose. Customer states they called on a Friday to confirm they can pick it up on a Saturday and when they came on Saturday the loaner was not available. Customer states the DLR did set up for a rental but he can not arrange one with that particular company. Customer states their vehicle is auto braking by itself with no vehicles in front of them while in cruise control.
Briefly summarize what the customer is expecting:
Customer is expecting his complaint to be documented.
Agent contacted DLR and spoke to Service Manager Clyde who stated they held the loaner for about a week and he could not make it in then. SM Clyde states they did set up for a rental but both the customer and his wife both can not get a rental even though they have different last names. SM Clyde states that the next loaner should be available within the next few days but can not guarantee anything. Agent advised customer that their complaint will be documented and handled internally.
Customer is calling in still quite upset because the dealership has not given him a loaner yet and he is waiting to bring his vehicle in for 2 recalls and an undiagnosed issue. Agent tried to explain to customer that he has no rental or a SC and customer stated that he cannot go to rental place that dealership deals with (Enterprise) because of fraudulent charges, so dealership had stated that out of their goodness, they will supply customer with a loaner but after holding one, the customer did not show up. Agent contacted dealership and spoke with SA Yvonne who stated that the customer is not entitled to rental (two recalls and one undiagnosed issue) but they are trying to get him a loaner. Agent transferred customer over to SA Yvonne who will explain again what the customer can get.

Chrysler Company Cars had a Demo fleet in an accident while the driver was using Adaptive Cruise Control feature. The driver reported that the ACC was working correctly and then it accelerated:
Driving on the highway and rear-ended another vehicle. The vehicle I have has adaptive cruise control. Traffic in front of me slowed. The adaptive cruise control slowed along with the traffic. For some reason the adaptive cruise control sped up into Vehicle 2(Journey)in front of mine. As a result Vehicle 2 was pushed into vehicle 3(On Police Report). The police were called and a report was filed.

Product - Electrical - Lamps and Switches - Other - Default

Briefly summarize why the customer is contacting Chrysler:
Customer called stating his vehicle has been to DLR-60266 about 5-6 times for electrical issues.
He states that there have been sensors for the parking, daytime running lights and now the automatic radar on the speed control and parking assist is presenting issues.
Customer states he was at the DLR all morning but they were unable to fully diagnose the issue and he had to take the vehicle and is going to bring it back next Monday 9/15/2014.
Agent contacted DLR and was advised that the SM: Geno is currently unavailable and the SA: Reggie who has been working on this case is also unavailable.
Agent advised customer that the case would be forwarded to a CM for further review and DLR contact and that he should receive a call back in 1-2 business days, once the case has been further investigated and we have made contact with the DLR.
Briefly summarize what the customer is expecting:
Customer is expecting to have his vehicle repaired completely and does not want to continue traveling 25 miles to the DLR for recurring electrical issues, that he believes to be related.
Customer advised a call back is required and will take place within one business day by COB their time
Preferred Morning/Midday call back number is: [redacted]5 (cell)
Who has possession of the vehicle? Owner
Has the vehicle been diagnosed by a CDJ dealer? unknown if diagnosis was completed this visit, yes previous visits.
If a CDJ dealer has diagnosed, what is the dealer name or code? 60266

Briefly summarize why the customer is contacting Chrysler: Customer stated his vehicle is currently at the dealership for repairs. Customer stated he has had multiple issues with vehicle and would like vehicle to be bought back.
Briefly summarize what the customer is expecting: Customer is expecting his vehicle to be bought back.
Writer advised customer that an SRT agent will be able to assist him further. Writer called SRT Case management and transferred customer to Destan for further assistance.
CM was contacted by customer in regards to a buy back. Customer stated the vehicle has had multiple issues such as the cylinders lowering 8-4, multiple warning lights flashing, the seat belt warning light went off for three hours, check airbag light keeps coming on, adaptive headlight warnings, shifter failed, and cruise control failed as well. Customer stated multiple times throughout the call he is no longer interested in getting the vehicle repaired he wants jeep to buy the vehicle back. CM acknowledged and explained case would be escalated to the Cair Analysis team. Customer acknowledged and thanked CM for assistance.
Vehicle is at dealer 45576.
Mr. [redacted] telephoned seeking to speak with DH911. Customer stated that the vehicle was picked up from the dealer today and that it still has 3 codes (P3402 - P3442 - U0151). Mr. [redacted] stated that he does not want the vehicle and that he was informed that the case was escalated for buy back. CM inquired if the customer had made contact with the dealership to informed them of the codes and he stated no. CM advised that the case will be noted with message for a return call from DH911.
Mr. [redacted] is also awaiting an email at [redacted]m with contact information. Customer preferred contact number is [redacted]

********** 91L Review **********
*********Case Escalated to I2R**********
Reviewed Warranty History which determined this case
should be escalated to I2R for case management.
Customer contacted CM to determine case status. CM stated the case was escalated on 9/11/14 and the case manager will need time to investigate.
Customer requested that the case managers name and contact information be emailed to him. CM acknowledged.
CM will send email to customer with CM name and contact information based on AC ID # 17118 - If a customer or dealer calls for information that is currently being managed by the I2R Team, you may provide the following number to them: 888- 542-7239.
Status update provided via email to the following email address:

The GM at the dealership received the following letter:
From: Donal Hummer mailto:Donal.Hummer@thunderroadfinancial.comÙ
Sent: Wednesday, September 10, 2014 8:04 AM
To: Steve Christian
Subject: 2014 Jeep Grand Cherokee Overland
Good Morning Steve,
I have been considering what to do about [redacted] 2014 Jeep Grand Cherokee Overland. As we are all painfully aware, the Adaptive Cruise Control/Forward Collision Warning (ACC/FWC) system has not worked properly since we took delivery of the vehicle. (You might remember this is also the vehicle that had the extraneous trim piece rattling around in the front of the vehicle between the radiator and the inside of the front bumper.) It has been for brought back for attempts to repair the ACC/FWC at least 10 times in the last 9 months. The system still goes off line and issues a warning message every time it is driven.
While I have a great deal of confidence in your service department, and I think that Andy probably knows more about these systems then anyone else out there, the fact of the matter it is, the factory doesn t know how to fix it. Numerous Star cases have been open up with different possible solutions, none of which have addressed the problem. The most current suggestion was to bang on the steering column. Clearly they are just guessing at this point and have no idea how to fix the vehicle.
I bought this vehicle for my daughter to drive at home and when she is at college. I chose this vehicle because it has good NHSA rating and that I

could order all the various safety features like Blind spot detection, ACC/FCW, etc. If these features do not work or worse yet work intermittently and chose to fail at an inopportune time, not only am I not getting what I paid for, but I now actually have a vehicle that is less safe to drive.
The vehicle at this point less than 2500 miles on it. Over 500 of these miles have been from taking the vehicle to and from the dealership for repairs and another 500 plus miles the dealership has put on, in testing to see if various repair attempts have succeeded. Bottom line, my daughter has only been able to drive the vehicle about 100 miles a month since we bought it.
I figure at this point, we have a couple of options. The first is for Jeep to take this back and exchange it for a new one. I would be willing to pay the difference, if any, in the invoice cost of a new one, verses the current vehicle. The upside is, I will get a vehicle that I feel confident in having my daughter drive. Jeep keeps a loyal customer by proving that our current car is just an anomaly. And the costs for Jeep are actually kept to a minimum. (Keep in mind that since 2009, I have owned no less that 4 new jeeps and one new Ram pick up.)
The second is for me to go the lemon law route. Clearly, this vehicle falls into that category and the case will be easily proven. I am sure I do not have to remind you that for over a decade, as a trial lawyer handling product liability defense cases for such companies as GM, Detroit Diesel Allison and Genmar Industries, for me this will be a walk in the park. But frankly a first year law student could handle this one. The upside is, I will get all my money back. The downside is, I will have to spend a lot of time, first going through the dispute resolution process and then to court. Time I would just soon not waste. The downside for Jeep is that, not only will they have to take this vehicle back and pay for all my costs and fees incurred in the process, the vehicle will also be officially labeled a lemon, which for the most part means a 100% loss. But probably the biggest downside for Jeep is that will forever lose a loyal customer. I would prefer option one.
As it is right now, they have not yet lost me as a customer. The world is not a perfect place and sometimes these things happen. If Jeep owns up to the problem and makes it right, no harm no foul. Better yet, it makes me feel that I have invested my dollars in a reputable company. If not, well there is always option two.
I would like to get this response back from Jeep with in the week, so that we can either get a replacement on order, or that I will know to start the process.
Cordially,
Donal

Hello, my name is Charlie, and I have been assigned as your case manager. This email is confirmation that your case, [redacted] , was successfully escalated to me. After I review the details of your case I will be calling you at your preferred number, [redacted] within the one

business day as promised. My office hours are 8:00 AM 4:30 PM (Mountain Time). My contact information is 1-800-763-8422 EXT 40526. If your preferred telephone number mentioned above isn t correct, please reply with the correction.
End of Status Update
Writer contacted the customer at [redacted] updated in case. Customer is concerned with the safety of the vehicle about the cruise control and the accident prevent issues in the vehicle. Customer is willing to even work with the dealership to replace the vehicle and pay the difference. The customer however will not pay deprecation of the vehicle since the vehicle has been in the shop longer then they have had the vehicle. Writer will contact the dealership to see what can be done for the customer and the writer will follow up with the customer on 9-19-14.
Writer attempted to contact dealer Service Manager (SM), however, SM not available. Writer left message for a return call at extension 40526. The reason for the dealer contact was to provide or request the following information: To find out any updates to what is happening with the customer s situation. Warranty Manager Amy did tell me that they are still looking into the issue for the customer and they are aware of the customer wanting to replace the vehicle with another vehicle and the customer not wanting to pay for the depreciation of the vehicle. Writer will await contact back from the dealership will be in contact with the dealership no later than 9-18-14.
Customer contacted the dealership and the SA Colleen states that the customer is scheduled for an appointment on 9-23-14. Writer will follow up with the customer and dealership on 9-26-14.
Customer contacted CM via phone call. Customer states that the vehicle was repaired and the customer s daughter took her vehicle 15 miles out form the dealership the vehicle broke down yet again. Customer wants resolution by today and CM will contact the dealership to see what the next step is. Follow up with the customer later today.
CM contacted dealership and spoke to SA John. SA Colleen is busy with another customer at this moment. SA John took the CM contact information and will have SA Colleen contact CM back once she is finished with the customer. CM will be reassigning this case to the dealership as an unresolved concern once CM has spoken to the SA Colleen.
CM attempted to contact dealer Service Manager (SM), however, SM not available. CM left message for a return call at extension 40526. The reason for the dealer contact was to provide or request the following information: To give the SM the information to get the customer s issues resolved sending the case to the dealership to see what can be done next for the customer.
CM contacted the customer and explained what the CM is working on. CM is using internal and external resources to assist the customer on the issues that is happening with the vehicle. Customer picked up the vehicle and 15 miles from the dealership the vehicle shut off again. The customer is aware that any answer would probably not be in until mid-week follow up with the customer is on 9-29-14.
CM contacted the customer and told the customer that they have been in contact with internal resources and the customer should receive contact from them to assist the customer from there. CM will contact the customer on 10-1-14 to inquire about what the customer has found out.
CM contacted the customer and stated that internal resources are still evaluating the situation and will have a decision sometime next week. Follow up with the customer is set for 10-9-14.
Have processed template for trade assist
100814, jme2 approved template for trade assist and forwarded to ISG for processing.
CM contacted the customer and he has yet to hear from the dealership however he has been in contact with the dealership SA Steve is helping the customer with the case and CM will follow up with the customer on 10-13 to see if the customer has talked to Steve at the dealership.
CM attempted to contact customer, however, customer was not available. CM left message for a return call at extension 40526. The reason for the customer contact was to provide or request the following information: To inquire if the customer has been in contact with Steve at the dealership.

Follow up on 10-20 but CM will also email the customer as well.
Status update provided via email to the following email address:
Donal.Hummer@thunderroadfinancial.com
Hello Mr. Hummer, this is Charlie and I was inquiring about your contact with the dealership. Has Steve been in contact with you. I just want to make sure you are being helped.
End of Status Update
CM contacted the customer and they have a vehicle on order for the customer which should arrive in the next 45 days. CM will inquire to have the case closed at this time.
CLOSED LOOP UPDATE - no need for additional follow-up.

-Called Dealer Code 60446 and spoke with SA Mike who stated the SA handling vehicle is SA Chris however he left for the day. Verified with SA Mike that the customer reported concerns with no start and stated vehicle not detecting the key. SA Mike stated the vehicle is ready to be released back to customer and provided me with RO# 7[redacted] stated they were able to start vehicle, determined NTF and that the code P1B13-00 was set when customer manually disengaged vehicle for towing. SA Mike stated they road tested vehicle 71 miles and customer has not picked up the vehicle from dealer yet.
-Called customer and introduced myself as the assigned CM. Customer stated his vehicle is still at Dealer Code 60446 at this time and that they have been told there was no trouble found. Customer expressed frustration stating that they have had to miss sporting events because of the concern he described with key fob. Customer stated he is in the military and has a small child and does not feel safe with the vehicle s key fob not working all the time. Apologized to customer as he vented and confirmed customer using a rental vehicle from dealership. Customer stated his wife has the rental vehicle and they will return rental today. Told customer that I am his advocate and want to look toward a positive outcome. Explained that I can offer him a Cash and Keep offer for $2,000 as I hear him saying that he still likes the brand. Verified customer s email address as correct and told customer that I would need to do additional research on the case. Provided customer with my contact information and hours of availability. Told customer that I am sending the offer letter to him for his consideration and would plan to speak with him again no later than 09/19 to discuss the next course of action.

dbrown@impartialservices.com on 2014-09-16 @ 15:30
-Sent offer letter to customer email address [redacted]
-Called Dealer Code 60446 and spoke with SA Mike again who stated the Recall p36 has not been completed because parts are not available for this recall yet.
***** Customer Document Received *****
-Received vm from customer, customer requesting a call back.
-Called customer and customer stated he felt that the offer letter was final and wanted to clarify if the Cash and Keep offer was the end of our consideration. Told customer that I did inform him that I would continue to look into the case and determine if there was any info that I have not yet considered. Customer stated he has his vehicle back as of 09/16 and, customer stated he is not willing to take his vehicle back to dealer for recall work to be performed. Told customer that the letter was not intended to offend him and that I we do have access to look at each RO for his vehicle. Explained to customer that I will plan to contact him again no later than 09/19.
-Received vm from customer, customer requested a call back with an update on his case.
-LVM for customer, included my contact info and advised we are still looking into his case at this time. Advised that I would be in contact with him in the next 2 days.
-Received vm from customer, customer requested a call back.

-Called customer and customer inquired about what will be done since he has decided not to accept the Cash and Keep offer for $2,000. Told customer that I understand he is not willing to accept the offer and we are still looking further into his case at this time. Customer expressed concern with future reliability and we discussed his LIFETIME Max Care MVPP he already has in place. Explained to customer that we make offers to help with customer satisfaction. Advised that if he were to experience another vehicle concern, he would still be able to get vehicle diagnosed within terms of his warranty. Customer asked what would happen after basic warranty expires. Explained to customer that each case is unique but that since each CM is trained the same, we will look more into his case and determine if we can help with repair process and determine if we should be making a goodwill gesture toward the customer at that time. Told customer that I hear him saying he is still happy with the brand but, is concerned about the possibility of having another vehicle concern with the current vehicle. Explained to customer that no manufacturer could guarantee him that a vehicle will never have a concern. Assured customer that we will continue looking into his case and would speak with him again in the next few days.
-LVM for customer, included my contact info and requested a call back.

-Received vm from customer, customer requested a call back regarding release document.
-Called customer and explained to customer that he would still be entitled to get any warranty repair work completed as needed to his vehicle. Customer stated he is willing to accept the offer and would return the offer letter to me. Verified customer address to be correct as shown in Agent Workbench.
Customer saying he can never reach DB1222 directly and always has to leave a message and then it takes 2 days for her to call back. Customer would like a call back by DB1222 on Monday.
-
Customer says the uconnect radio screen is blanking out. Agent advised on driveuconnect.com there is a radio update available. Customer says he has an appointment at the dealer next week and will have dealer download software and upload into uconnect.
-
Customer says key fob fails periodically. During the call today it failed than it worked again - intermittent. Agent advised to have dealer look into this.
-
Agent offered to give customer the Chrysler Roadside Assistance phone # if he drives vehicle and gets stranded or if he needs it to be towed to dealer next week. Customer would not take number. Agent said he can call Jeep CAC and we are happy to transfer customer over to roadside assistance if that becomes necessary.
-
Customer says, in terms of the settlement, he has not yet received the check for $4000 and that he has turned papers in just 3 days ago. Customer suggests he may not cash check when he gets it but contact his lawyer instead due to ongoing problems with vehicle.
Vehicle is at the dealership - NORTH TAMPA CHRYSLER JEEP DODGE, (60446)
Update triggered by S20553B
-Received vm from customer from 10/04 stating his vehicle is having a recurring problem and that the vehicle is having a new concern as well. Customer requested a call back.
-Called Dealer Code 60446 and asked for the SM Jennifer but Receptionist Haley advised she was not available. Left msg for SM Jennifer, included my contact info and requested a call back.

-Called customer and customer stated he took vehicle to Dealer code 60446 (NORTH TAMPA CJD) today for concerns with key fob, stating vehicle won t start because it does not detect key fob, radio screen goes blank and a new vehicle concern with cruise control. Customer stated he is not using a rental at this time and that a family member helped him to get back from dealership. Told customer that I would look into the case a bit further and would plan to speak with him next no later than 10/08.
-Received vm from SM Jennifer with Dealer Code 60446.
-LVM for SM Jennifer, included my contact info and requested a call back to determine current vehicle repair status, obtain RO info and determine if any escalated repair assistance is needed.
-CALLED dealer code 60446 spoke with SM jennifer who confirmed that the vehicle is there.
sm Jennifer stated no trouble found with key fob ordered radio and still addressing cruise control and provided me with repair order information.
-called customer to advise of the update from the dealership advising that a radio has been ordered and they are still attempting to diagnose the cruise control and the key fob concern. Customer stated his major concern was the key fob.
-Left vm for SM Jennifer with Dealer Code 60446, included my contact info and requested a call back to determine vehicle repair status.
-Received vm from customer, customer requested a call back.

[redacted] on 2014-10-14 @ 10:55
-Received call from customer who stated they picked up the vehicle from Dealer Code 60446 10/10. Customer stated he was told lense was cleaned related to key fob and want to allow time to determine if this resolved the key fob concern and said he has been having concern with adaptive cruise control since he purchased the vehicle. Customer requests that I consider this as additional info and look into his case to determine what can offered beyond $4,000 cash and repair process. Customer agreed to return a copy of the RO to me as well.
***** Customer Document Received *****
-Received call from customer, verified with customer that I received copy of RO [redacted]. Customer requested that I reconsider the offer stating that he experienced the key fob concern again 10/16 at night time after washing his vehicle. Customer stated the key fob was not working and that he was unable to start the vehicle. Customer stated he finally started vehicle after 5 minutes. Told customer that I would look into the case further and that I would contact him again next no later than 10/21.
-Received vm from customer, customer requested a call back.
-Called customer and told customer that we have looked at his case further and will offer him $4,500 Cash settlement toward customer satisfaction. Customer stated he would want to look at the offer letter and would let me know but that he did not consider this to be a fair offer. Asked customer if there was anything else going on with the vehicle that we need to consider. Customer stated he spoke with other people and they do not believe the offer is fair. Told customer that the cash we are offering is in addition to the warranty he has for his vehicle. Explained that it is not intended to offend him or to bribe him in any way. Customer stated he would look at the letter but wants a new CM. Customer inquired to say if he accepts the offer if he would still need to speak with me. Told customer if he accepts the offer, he would possibly be speaking with me to complete the process.

-Sent release letter to customer email address for $4,500 cash and keep offer for customer satisfaction.
***** Customer Document Received *****
Customer contacted Chrysler due to not receiving documentation from his case manager. Agent requested call back for customer. Agent noticed in her notes that customers CM sent an email out. Customer stated he received it. Agent advised customer she was going to request a customer call back. Customer understood.
Called customer and let customer know we ve reviewed the calls and we agree they were not handled with regard to how we want to treat our

customers and offered him our apology. Let customer know that his case has been reassigned to new CM SM1793. Customer stated that their key fob situation they were not able to drive their vehicle through the weekend. Customer upset because he does not feel treated well from his previous CM. He also does not want the money offered, he would like a replacement due to all the issues he is having with it. Customer also stated that the CA Offer Letter he received states that if he does not accept the letter within 10 days that the offer will be voided. Advised customer that if we are in communication with him, that date MAY be extended. Advised customer I will have his new CM SM1793 call him tomorrow 10/24 and gave him her phone number. Customer was appreciative. ***Follow up with customer 10-24-2014***
***Customer called LVM to return his call.
***Called the customer LVM advising that I did receive his message and requested a return phone call in order to complete the final resolution process.
***Follow up with the customer 10/29
***Customer called LVM requesting a phone call
***Returned customer s called and he stated that he wants to know what we can do to assist him with resolving this issue. He stated that the previous rep was not helpful at all, he stated that it is not about the money, it is more of principal because of all the issues that he has had with the vehicle he feels as though Chrysler should buy the vehicle back. I advised that I can review his case for other possible options but I can t guarantee him anything. The customer stated that the issue is with the KeyFOB , he stated that it doesn t do it all the time but what happens if he and his family are out at night and the Key FOB decides not to work leaving them stranded. That is not safe, he stated. I apologized to the customer and empathized with him to let him know I do understand. I also explained to him that he may be able to accept the cash offer and keep the vehicle or trade it. The customer stated the only problem with that is that he is not working he just got out of the military and that may be an issue for the dealership. I advised that even if we were to provide a replacement it is the same as going in for a brand new car and the dealership doing all the paperwork all over again. I advised the vehicle has depreciated due to not only just leaving the lot but will all the repairs done to it. The customer stated that no one explained that process to him, I advised so in essence the situation could go either way. I advised the customer that I will speak to him again on 10/31 the customer agreed.
***Follow up with the customer 10/31
***Called the customer and advised that at this time Chrysler would not be moving forward and replacing his vehicle. I advised that after careful review we thought it best to offer him $5,000 as a goodwill gesture rather than to replace the vehicle. The customer asked what about his lifetime warranty would that be something that we would look at, as far as, his $100 deductible. I advised that that would solely depend upon the repairing dealership if they would waive the deductible or not. I advised the customer that if he is interested in my offer I can get the paperwork processed and issue him a check. The customer stated that at this point he would just rather accept the offer and be done with it. I apologized to the customer for the inconvenience that this may have caused him but would like for him to keep in contact with me if he ever needs further assistance. The customer agreed. I thanked him for his time and ended the call.

Briefly summarize why the customer is contacting Chrysler: Customer stated he had his front end drop while driving and had to bring the vehicle into the dealer (60399). Customer stated he previously had front end work done at a dealer in CA, they replaced a front strut and repaired the air suspension. Customer stated DLR60399 advised him the tow kit was not installed correctly and this cause lines to rub which caused this front end issue he was experiencing. Customer stated the dealer advised him that because the work was done at another dealer in CA, they can not complete this repair under warranty and he must pay out of pocket. Customer stated he picked up his vehicle today and paid $1100 for the repair but doesn t feel that he should have to pay for this. Agent attempted to contact Service at 60399 several times but was unable to reach anyone. Agent advised customer we will continue trying to reach the dealer to confirm the repair information, once dealer contact has been made we will contact the customer with information on what we can do to assist him. Customers contact number is: 661-886-6543, Customer stated he was working with SA Andy Evans.
Briefly summarize what the customer is expecting: Customer seeking cost assistance for a repair.

Customer called stating he talked to Brittany yesterday and she was supposed to get back to him. Agent offered to call the dealership. Customer declined and stated he just got off the phone with them. He states he has an air suspension problem now and his adaptive cruise control is not working now. He thinks this is all tied together. He state

he is going back tomorrow morning. He states he is not happy he had to pay 1140 to get it fixed. He states he is being told if it is workmanship issue from the other dealer then it is not under warranty. Agent advised this is correct and the warranty only covers defects from the manufacturer. He states he has no way to get back to the other dealer and he has no way to prove it is a workmanship issue. Agent offered to call the dealership again. Customer declined stating he cannot wait on hold as he is about to lose service. Agent advised him to call us later. Customer thanked the Agent and ended the call.
Agent was unable to call out to customer on 9/16/14. Agent will close the case as customer was advised to call us back, so that if case requires any reassigning next agent will be able to do so.
Customer advised a call back is required and will take place within one business day by COB their time
Preferred Morning/Midday call back number is [redacted]
Preferred Afternoon/Evening call back number is [redacted]
Customer email address for case updates:
Who has possession of the vehicle? Dealer
Has the vehicle been diagnosed by a CDJ dealer? Been working on the diagnosis for 19 days with star
If a CDJ dealer has diagnosed, what is the dealer name or code? BOERNE DODGE CHRYSLER JEEP (60399)
Reassigned to 88F
Customer called back because their case still has not been resolved with the suspension and active cruise control. Agent contacted SA Andy who stated that this is an ongoing issue for the customer and this visit the vehicle has been in the shop for 19 days and they are still working with star to resolve this issue.

Customer states still having issues with the suspension and the cruise control
Writer contacted the dealership and spoke with the SA Andy, the SA advised writer the issue is not resolved and there is a back ordered part. The part is an adaptive cruise control module and writer would need to contact the parts department for an eta the order # and part #. The SA advised writer they are working closely with the STARR Corporate Engineers for a fix and still have not found a resolve yet. The mileage on the vehicle is 17033 and writer will update that information.
Writer then called the parts department and spoke with Gary who advised writer.
Part # 68109355ai Adaptive cruise control module
Oder # SP 0929
ETA None
Customer s husband called in , Dennis.
He was requesting to speak with CM .
Agent provided customer with phone number and ext , and transferred to cm ext.
MR.ZA[redacted] requesting to speak to CM MA1138. Writer advised customer that CM MA1138 is not currently available but will call customer back by the end of business today.
Customer: MR[redacted] calling to speak with CM; MA1138 CM is not available. Writer transfer call to CM; ES1000
Customer Mr[redacted] Called in to speak to CM MA1138 and she was not available, so ES1000 took the phone call from [redacted].
Customer so frustrated about 72 days in the shop total, he said.
Agent attempted to contact dealer Service Manager (SM), however, SM not available. Left message for a return call at extension 40632
The reason for the dealer contact was to provide or request the following information: See if part is on order, and part number.
SM/OD Todd called, requesting the Case Manager. Transferred him to CM MA1138 at ext 40632 VM as CM was unavailable.

Customer Called CM ES1000 back again today with updates on parts. Bob is SM at Dealer 60399 and is using parts from other vehicles to repair his vehicle, customer said. Instrument Cluster part is supposed to arrive tomorrow; Air Suspension Pump is in and repaired already, customer stated. We are waiting on Adaptive Cruise Control part, and do not know the whereabouts of it. CM will follow up with Dealer tomorrow and get update and let customer know or advise CM MA1138.
Part : 68109355AI
Order : SP0929
Dealer Code : 60399
Status : Special Handling
Part Detail : ADAPTIVE SPEED CONTROL MODULE SENSOR
ETA : No ETA
Customer Mr. [redacted] Called CM again asking about status of vehicle. CM advised that I had consulted with other corporate resources regarding his stray parts location. Customer stated that Instrument Cluster is supposed to arrive at Dealer today; the only other part that we are waiting on is the Adaptive Cruise Control which is ordered.
CM ES1000 gave information and updates to case manager MS1138.
Writer called customer and advised one part still has no eta but the other parts are in. Customer stated his dissatisfaction regarding the vehicle. The vehicle had been at the dealership for a week and a half previously and this last time it has been three weeks. The customer will be in town next week, but on 10/19/2014 he is leaving town until the 10/24/2014 and he does expect a resolve by then. Customer said will follow up and get back to customer as soon as she finds out more information. The customer states that he is not even sure after all these parts are in if it will really fix the vehicle. The customer advised writer to contact Todd Brown at the dealership and to get a better update and understanding for this vehicle.

Writer called in and advised writer that the suspension issue has not been resolved and they are out of ideas, customer advised writer to follow up with Todd at the dealership and find out what our next steps would be.
Is there any damage to the vehicle? no
Actual/accurate mileage? yes 17033
Is the vehicle leased or purchased? Purchased
Name of lender: Northrorp Drummond Federal Credit Union
Is the customer in a rental right now? Yes
Is this vehicle used as a personal vehicle or for a business? Purchased
Are there any modifications to this vehicle? (if yes, describe) yes Rv towing kit
If Chrysler makes an offer to replace the vehicle, what dealer does the customer prefer to work with? Boerme
Writer looked into STARR case and found out one has been opened up 10/13/2014 and and the STARR case is still open and the next step is to bring the Master Consultant into the issue, and if a resolve cannot be met there then it would resort to bringing in the Techncian to the dealership and they would need to set up an appointment for the TSA to come out to the dealership,
Writer advised the customer as above narrative 147 through 152. Customer said how long will this take. Writer advised she did not know but she would stay on top of it and contact the customer back in 2 days 10/15/2014.
Operations Director Todd called to talk to the CM MA1138. Warm Transfered

to MA1138 for further handling.
The Service Director Todd returned writer s call and advised the SD that the part eta is for 10/14/2014. The SD advised writer that until they can resolve the suspension issue they cannot do the repair. Writer advised the customer would contact Todd on 10/15/2014 and find out if the part has arrived. Then will follow up with the STARR case to find out what is happening there, and then will follow up with the customer.
Writer contacted Todd the Service Director at the dealer and spoke with him regarding part ordered. The part eta for 10/15/2014 came in and has been installed. The SD advised writer they did bring in a master technician and now the valves have been ordered and there are no part numbers but the eta is today or tomorrow 10/23/2014. The SD stated it should be a day and a half repair and writer could follow up on 10/24/2014 to find out if the repair has been completed.
Writer contacted the customer and advised the valves would be coming today or tomorrow and they expect the repair to be completed by 10/24/2014. The customer stated why when the parts were ordered last Wednesday 10/15/2014 why would it take so long. Writer advised the customer that sometimes it is based on availability of the part how soon it arrives. Writer advised would follow up on 10/24/2014 and let the customer know if the repair is completed..
Writer attempted to contact the SM, writer was put on hold, and the dealership ended the call.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 40530. The reason for the customer contact was to provide or request the following information: Requested customer contact, in regards to repairs.
Agent attempted to contact dealer Service Manager (SM), however, SM not available. Left message for a return call at extension 40632 The reason for the dealer contact was to provide or request the following information: Repair update.
Writer received a message on her voice mail from the Service Manager Todd at Boerne dealership, Todd left writer a message that he did receive good parts front struts with valve on top of struts, and the Todd contacted the customer.
The customer left a message on writer s voice mail and advised writer the vehicle has bee picked up, and the customer said it did not fix the issue. The customr is stating he wants his $1100 back and he hung up.
Writer attempted to reach Todd regarding the customer s vehicle. He was not available and writer spoke with Andy and he advised writer the customer s picked up their vehicle on 10/27/2014, and that is about all he knew.
Writer states the customer picked up his vehicle after the last repair on 10/27/2014. After driving the vehicle the customer discovered the parking sensor does not work and they are taking their vehicle back to the dealership for this problem. Customer states he would like reimbursement for $1140 for the repair the customer does not feel that repair was caused by the lines rubbing through, this happened two months ago. The customer s stated that there is something wrong with the air suspension system, and therefore the secondary cause was the failure of the lines rubbing through. The customer states he went to a restaurant and when he came out his vehicle was nose down. The tires rubbed against the wheel well. The customer states he had driven the vehicle 20,000 miles with no problem. After picking up his vehicle he drove about 50 miles and his cruise control went out. The customer believes something else was the caused it to go down.
****Begin structured narrative T2 - Beginning Narrative
Briefly summarize why the customer is contacting Chrysler:
Briefly summarize what the customer is expecting:
****End structured narrative T2 - Beginning Narrative
There is an error on line 212 it is the parking sensor that went out not the power steering.
The customer is contacting Chrysler after his last repair, the custome hardly drove his vehicle 50 miles and the parking sensor went out. The customer is expecting his vehicle to be repaired. The customer states he wants the $1140. repair reimbursed.

Agent attempted to contact dealer Service Manager Todd, however, the SM was not available. Left message for a return call at extension 40632
The reason for the dealer contact was to provide or request the following information:
Writer was requesting an update on the vehicle.
Writer contacted the customer the customer advised writer the vehicle was just taken to the dealership about an hour ago. Writer will follow up with the dealer on 11/3/2014 to find out status of vehilce and then advise the customer.
Agent attempted to contact dealer Service Manager Todd , however, the SM was not available. Left message for a return call at extension 40362
The reason for the dealer contact was to provide or request the following information:
Writer attempted to contact the SM to get an update status on cusomer s vehicle.
Writer contacted the customer and the vehicle was repaired and the repairs seem to be holding. The customer stated the issue is not resolved as they were blamed for the initial failure. The customer further states that they believe there was a different failure of vehicle s air suspension system that caused the front end to go to the fully lowered postion to lose all of the air, which caused the tire to rub the fender walls and damage ther airlines in that area. The vehicle between driving and towing had over 22000 miles, had been to another dealership numerous times for 1 repair issue on front suspension, the purchasing dealership and there was no rubbing of the fire wall ever noted by the other dealership. The other dealership rotated the tires and did oil service changes and never noticed any rubbing condition. At no time prior to initial air suspension failure was there ever any sound of a rubbing condition, after the failure, getting to the dealership they then heard a rubbing condition but no rubbing sound prior to that.
Todd the Service Manager at the dealership returned the writer s call to advise writer that the repairs had been completed. Writer advised the SM the customers were pleased but not happy with the outcome of having to pay $1400.00 for the repairs. The vehicle was under warranty when the air suspension failure happened. In previous narrative the customer advised writer that the mileage was about 17133, writer will update.
****** Below Customer Contacted for Documentation Request ******
[redacted] on 2014-11-06 @ 15:57
Writer advised the customer to please send documentation so that the AM could review document , the email was sent successfully. (email address: [redacted]
***** Customer Document Received *****
Writer contacted 52979 Dealer in Lancaster CA and spoke with the Service Manager Diego and writer asked the SM if he had installed a tow kit in the customer s vehicle and he says he has no record of it. Then Writer asked the SM Diego if he knew if the customer had picked up a tow kit and he could not find that information either.
Writer contacted the customer and asked who installed the tow kit. The customer said he did and he installed it the first 200 miles on the vehicle. After that the customer alleges he towed over 6000 miles and while in CA at that dealership the customer purchased his vehicle from he had oil changes and tire rotations, and an alignment and that dealership saw no evidence of tire rubbing on the tire well. The customer further alleges the tire well was not made of metal like the old ones use to be but on a fabric type of material that showed no evidence of rubbing. The customer states the lines from the air suspension pump were misrouted. Writer said writer would follow up with the dealership for further information.
Writer contacted the dealership and the and asked to speak with Todd the Service Manager and then writer was disconnected.
Writer spoke with the customer and writer advised the customer at this time and since the repair has been completed there is no way to verify through the previous dealership that the rubbing was not the cause of the failure due to the customer stating there was no evidence of the rubbing on the wheel well. Writer advised the customer we have to rely on our dealership s as writer does not have any technical skills. Writer wanted

to know if there was someone above the dealership. Writer advised she could email the AM. The customer stated why did writer not go through the dealership s GM before going above to the AM. Writer advised the customer when writer asked if the customer had spoken to the GM he was of no help. The customer advised writer he would go back to the dealership and try to speak again with the GM and if that does not work out then the customer would request a GM.
Writer contacted the customer to inquire if the customer had been able to get hold of the GM. The customer advised writer that the customer had had company from out of town and they had been showing them all of the sights driving them around. Writer said that is great, is there anything writer could do to assist and the customer said he will get hold of the GM hopefully during the next few days; writer advised would follow up on 11/24/2014 unless writer hears from the customer sooner.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 40632. The reason for the customer contact was to provide or request the following information: GM contact update.
Customer states they are Sarah Clark the warranty administrator from dealer 60399, and they are seeking information on any discussion of rental for customer. They received a bill for 22 days of rental for customer and they want to know what payment arrangements have been planned. Agent search but did not find any discussion of rental for customer in the narratives, except that they were in a rental. Agent suggested customer contact the Cm Marjorie for more information. Agent provided contact number for CM Marjorie at 800-763-8422 ext 40632 to customer and offered to transfer, customer declined.
Sarah from Bernie Dodge has left a message asking for an RA for a total of 22 days at $770.00. Writer needs to research how this should be handled as I have no record any rental was offered and need to find out what the next step will be.
Writer left a message on the voice mail for the Service Manager Todd regarding the rental for the customer,
Writer contacted the dealer again and this time asked for Sarah Clark and writer advised Sarah that we did not put the customer into a rental, and the customer has a service contract for 5 days and if the dealership could pay for 5 days of rental we will look into reimbursement for the additional days in the amount of $420.00 the remainder of the rental.
****** Below Customer Contacted for Documentation Request ******
sarah@boerneauto.com on 2014-12-04 @ 12:52
Writer contacted Sarah at BOERNE DODGE CHRYSLER JEEP, Sarah provided an email for documentation sarah@boerneauto.com.
Writer contacted Todd who advised writer he would have the Warranty administrator send an email to writer for the information. Writer requested dates of the rental so writer could do the remainder 12 days of rental, as the customer had a 5 day rental and the dealership could pay the other 5 days and then Chrysler would pay for remainder 12 days and send an RA.
Writer advised Todd the SM that the customer was very unhappy he was blamed for the suspension system going out, and wished to be reimbursed. He said he had been blamed for the issue with the suspension. Writer went through this again with Todd and he explained to writer, he could not override what the STARR people had advised. Todd advised writer the engineering team and the field representative came out and advised it was a gray area where no-one could tell for sure what happened. He advised he would lose his job if he overrode what their recommendation was..
The customer called and left a voice mail on writer s extension and advised he is getting no- where with the GM Brian at the dealership as he will not return his calls. The customer wished that writer would escalate his concerns to a higher source as he is very dissatisfied paying for a repair which he states he did not cause, and would like some assistance. Writer advised the customer that writer would send his case to the AM to take a look at his concerns but writer could not promise anything.
Writer contacted the AM Jack Brinks and asked about customer s concerns, the AM asked me what type of vehicle it was writer advised it was a 2014

Jeep Grand Cherokee Summit and the AM said I thought so. Writer advised the AM that STAR had been involved, and that is why Todd the SM at the dealership said he could not override that decision as they had advised it was not covered. Writer did not see that mentioned in the STAR case. The AM suggested two things, had the customer contacted his insurance company and did the customer have oversized tires on the vehicle. Writer said she would check that out and the AM advised if writer needed to, to send an email regarding the issues.
Writer spoke with customer previously and asked the customer if he had put oversized tires on his vehicle, he was just using factory tires that came with the vehicle when he purchased the vehicle. He did get hold of his insurance and they did not cover the vehicle damage, even turned down comprehensive coverage. Writer advised the customer would contact the AM Jack Brinks again through email as he requested and give him the information he was requesting. Writer advised the customer would follow up on 12/22/2014.
Writer advised the customer the AMs are on vacation and writer will contact the AM around 1/5/2015, writer advised she has not forgottent the customer will still be working on his case.
Agent attempted to contact dealer Service Manager (SM), however, SM not available. Phone continued to ring with no voicemail. The reason for the dealer contact was to provide or request the following information: Information on the tire situation.
Agent attempted to contact dealer Service Manager (SM), however, SM not available. No voicemail available.
The reason for the dealer contact was to provide or request the following information: Information on the tire situation.
Writer contacted SA Andy, SA informed writer that the vehicle has not been to the dealer for quite some time, and that no information is available at the time, and that the SM is not available.
Writer contacted the AM through email as to what can be done if anything to assist the customer. Followed up with the customer regarding has same tires on vehicle that came from the manufacturer and the insurance company declined to assist customer. Waiting for the decision from the AM as what can be done if anything.
The customer left writer a message on writer s voice mail ; he customer asked what was the outcome on his case, the last the customer heard writer was going to reach out to an AM. The customer was asking if there was any resolve regarding the possibility of reimbursement or some kind of assistance.
Writer returned the cusotmer s phone call and advised the custome had sent an email to the AM and was waiting on a response from the AM. Writer advised writer would contact the AM to make sure he received writer s voice mail.
Narrative line 394-399 has errors writer returned the customer s phone call and advised the customer that writer had sent an email to the AM, and writer is waiting for a response from the AM. Writer advised the customer that writer would contact the AM by calling to make sure the AM had received writer s voice mail.
Writer received email notification from JB the AM and it came back as declined. Writer will notify the customer.
Writer contacted the customer and advised the customer the AM did decline the repair reimbursement, writer apologized and advised the customer writer has to follow the chain of command writer advised she would see if there is another avenue the customer could pursue, but I did doubt that, but writer would not close the door entirely she would check and call the customer back if she has any additional information. The customer advised writer he was looking into purchasing a truck and it was a toss-up between Ford and Chrysler and now there is no longer any question his decision is to go with a Ford product.
CLOSED LOOP UPDATE - no need for additional follow-up.

Briefly summarize why the customer is contacting Chrysler: The customer states they were at the dealership for 7 hours just making the purchase. The customer states they walked around the vehicle and everything looked fine. The customer also test drove the vehicle. The customer states they finished the paperwork and the salesman went back and told them they took the wrong car back to detail. The customer states is was a long frustrating day. After the vehicle was detailed they put the fuel in the vehicle. The customer states as they brought the vehicle into the lot he noticed that on the passengers door there was a haze that looked like someone had waxed the vehicle and forgotten to remove the wax in one spot. The customer thought the vehicle must have been waxed and they just missed a spot. The customer states she tried to remove the spot. The salesman came over and ran back to the garage and he was trying to get the spot out and it would not come out. The Sales Manager then came out and they brought some spray out and they could not get it to buff out. The customer was told to come back next week and the head detail person would be in. The customer states they said if they cannot fix it they will repaint it. The customer said he was very tired when he left the dealership. The customer went back a week later on a Monday. The customer went back to the purchasing dealership a week later and told the customer it was in the paint and they would have to send the vehicle to

be repainted. The Sales Manger told him they could not swap the car out and they would have to repaint it. The customer was told it was a very professional place and the job would be done right. The customer states he then had to bring the vehicle back the following week. The customer had a firm ware upgrade that was done while they sent the vehicle out to paint. The customer was provided a rental vehicle and he had to pay out of pocket for the insurance on the vehicle. The customer paid $78. for insurance on the rental. The customer went to pick the vehicle back up after the paint was finished. The customer took the jeep to work and he looked at the windshield wiper arm and the cover was missing on the passengers side. This was labor day weekend and waited till the following Tuesday and called the dealership. The customer states the forward collision did not seem to work properly. The customer states before the vehicle was painted it seemed to work properly.
The customer started testing the vehicle for when the chime would activate and it was within three feet and there was no warning signal. The customer states he called the dealership back and they took a test drive with the service tech. The service tech drove the vehicle
The customer returned to the dealership to have the piece put on the windshield and they tested the vehicle for the forward collision warning and it still was not working right. The customer states the tech got in the vehicle with him. The customer showed the tech and they got within three feet and there was no warning. The tech states that he agrees that the forward collision was not working properly and they opened a star case. The customer called them a week ago and the dealership is still checking on this. The customer called today. The customer was told a tech went into another vehicle and it was working properly. The customer was told today that he would have to drop the car off and leave it for a couple of days for them to work on.
The customer states he has been back to the dealership for paint and windshield wiper issues five times already and now has to go back again for another repair. The customer states that he now has to bring the vehicle back again and rent another vehicle and pay more money out. The customer states he has had it now and it feeling like he is driving an old vehicle that needs constant repair. The customer states they bought this as he wanted to keep the vehicle for a while.
The customer states he has been a loyal Chrysler customer to the dealership and to Chrysler. The customer states he feels they should have switched the vehicle out. Customer states he is fed up.
Customer has owned three Chrysler products in the past.
The customer is bringing the vehicle in Monday Sept. 22/14 around 9:30. The customer will call back and have the file advanced once the vehicle is at the dealership.
Briefly summarize what the customer is expecting: The customer states that he is not happy with the performance of the vehicle.
Agent is requesting survey bypass. Vehicle needs to be diagnosed. Customer stated he is dropping his vehicle off at the dealership first thing in the morning tomorrow. Customer stated this is the 3rd time he will be bringing his vehicle back to the dealership for repairs.
Customer stated the forward collision is not working. Customer stated he brought vehicle in on 09/03/14 and dealership could not diagnose problem. Customer stated he has been told by dealership that vehicle will need to stay at dealership for another few days. Customer stated he is very frustrated that his new car has had so many issues. Customer stated he feels the dealership should be trading in his vehicle for a new one. Customer stated vehicle has already been at dealership for 5 days 08/29/14 for a paint defect. Customer stated dealership covered his Enterprise rental fees but customer had to pay $74.95 for insurance. Customer is seeking reimbursement for insurance costs. Writer advised customer that if dealership does not provide customer with rental tomorrow to call us back and rental through Chrysler will be considered. Writer advised that a case manager will be in contact with him within 1 business day.

Customer had issues with paint job when he purchased vehicle and it was sent to be repainted. Customer states forward collision did not seem to work properly and it was tested within 3 feet. STAR case was opened. Customer states wiper arm and the cover was missing on the passenger side of windsheild. The customer states he has been back to the dealership for paint and windshield wiper issues five times already and now has to go back again for another repair. The customer feels the dealership should be trading in his vehicle for a new one. Customer wants reimbursement for insurance he paid out of pocket. Customer seeking rental.
Writer spoke with Service Advisor Berto in Service. Berto says that none of customers warranty is expired on the dealership side. SA is Friank.
Writer then spoke with SA Tony. SA let writer know customers vehicle is in for collision warning not working
The customer is 'IN WARRANTY' for everything but VIP says everything is expired. Writer called dealership and everything is ok on their side.
They say customer is in warranty for everything. (BASIC, POWERTRAIN, ETC.)
Writer will follow up with dealer and customer no later than Friday, 09/26/2014.
Status update provided via email to the following email address: [redacted]

After I review the details of your case I will be calling you at your preferred number, [redacted], within the 1-2 business day and no later than Friday, 09/26/2014. My office hours are 9:30am 6:00pm (Mountain Standard Time). My contact information is 800.763.8422 EXT 40559. If your preferred telephone number mentioned above isn t correct, please reply with the correction.
End of Status Update
Customer seeking rental assistance because customers vehicle in dealership for 3rd time diagnosis. Contacted Service Advisor, Tony at 52912 to
discuss the customer s request for rental assistance. Confirmed customer s concern and with Service Manager concurrence, authorized 5 days of rental per guidelines in Warranty Bulletin D-11-53.
Rental authorization will be processed by CAC.
Agent attempted to contact dealer Service Advisor Tony, however, SM not available. Left message for a return call at extension 40559.
The reason for the dealer contact was to provide or request the following information: To get an update on customers vehicle? WRiter will follow up next week no later than Wednesday, 10/01/2014 if writer does not hear from SA.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 40559. The reason for the customer contact was to provide or request the following information: To let customer know writer request callback from customer regarding updates on vehicle. WRiter let customer know that as policy we would help with cost assistance or reimburse for the rental vehicle itself but

we don t help with insurance on a rental and we don t reimburse for insurance costs on a rental vehicle. Writer left CM contact information. Writer will follow up with customer no later than 10/01/2014, Wednesday.
******
Customer stated he called the number in the email and advised he would be sleeping today and his next day off will be Sunday. Customer stated he called on Wednesday leaving another message. Customer stated an hour ago he was sleeping and by the time he got to the phone no one had been there. Customer stated he has been trying to call since three o clock. Customer stated he waited on hold, the phone rang and then went silent so he hung up and tried again.
Customer stated he wanted to be reimbursed for the rental car. Customer stated he has a rental car this week. Customer stated he has to go to work tonight and would like to speak with the CM. Customer stated the message she left stated Chrysler will not reimburse for the insurance. Customer stated this is a brand new vehicle and should not have to pay for anything. Customer stated he paid for the insurance in case something should happen.
******
Writer advised the customer would have to speak with the CM to see if the decision can be change. Customer stated he will only be home for 45 minutes and then will not be able to speak with the CM as he will be going to work.
Writer transferred the call to the CM for further assistance.
MR[redacted] called back for CM AG1365, returning CM s call. Customer works the graveyard shift for an ambulance service; customer sleeps during the day and missed CM s call earlier today. Customer tried to call AG1365 back immediately, but was unable to reach her, or another agent (pressed '0'); the system would not connect to anyone. Customer was eventually able to leave AG1365 a voicemail but didn t know if it was understandable or coherent. Writer warm-transferred customer to CM AG1365 for further assistance.
Writer spoke with customer. Customer says that when he purchased vehicle he wanted to make sure there were no defects and went over the vehicle with a fine tooth comb. Customer says the paperwork took awhile and the dealer had a detail guy take it back to detail it and the guys took the wrong vehicle to detail and they had to come back and get his vehicle, it took half of the day for them to detail and then they filled it up with fuel. Customer says they did something to the paint and it was not wax and there was some kind of haze on the vehicle. SM tried to wipe it off and some of the service personel tried to wipe it off and it would not come out. SM says it was a defect in the paint and he would have to come back for them to repaint the door. Customer says he asked if they could just trade the vehicle for another one and they told him they could not do that. Customer says he likes this dealership and the service personel at GLENN E THOMAS DODGE CHRYSLER JEEP. Customer says a leaf fell on his windsheild and when he went to pull the leaf out he noticed he was missing the cover for the windsheild wiper assembly and you could see the bolt. Customer says on the drivers side he noticed it was loose and he put it back on correctly. Customer says he notices while driving the collision warning was not working. Customer says he would be behind someone that would make a right hand turn and would stop and it was not alerting customer he was getting to close to people. Customer says there were a couple of codes a little off and so he erased them and everything seemed ok. Customer says he tested it and got as close as a half a car length away from someone and it was still not alerting him he was to close to someone. Customer took it back to the dealer and he had the Service Advisor test drive the vehicle with him and he kept accelerating until he was about 4 ft or closer to someone to show him there was no warning. SA let writer know he was not sure why it was not working? Customer showed SA the videos showing when it should warn a cusotmer when driving. Customer says they opened a STAR ticket. Customer says he dropped the vehicle off for the 2nd time on Monday, 09/22/2014 and the dealership still has the vehicle. Customer let writer know the issue he has is that he had to get the rental place $15.00 a day insurance in order to protect themselves just in case something happens to the rental

vehicle so he won t have to repair that vehicle. Writer let customer know Chrysler does not reimburse the rental vehicle insurance but will consider 1-2 car payment or looking for a good MVP to add to customers vehicle. Customer says when they start pulling stuff apart its not factory sealed and the vehicle is never the same. Customer says that he tried to get them to trade this vehicle within a week of getting this vehicle and the Sales people told the customer this is not something they will do. Customer says this is only the 4rth vehicle he has ever bought and he does not go to IRF to get service done. Customer is very upset because they should have never let him leave the lot. Customer says he did not mess the paint up and so this is not his fault. Customer says the Sales Manager Steve Henderson. Service Advisor Frank is customers friend and set him up with the Fleet Manager Jim Henderson, but his sone the Sales Manager dealt with customer. Customer says Steve witnessed the defect in the paint. Service Advisor Frank has witnessed the Collision control Alert not working and the paint being messed up. Customer says the vehicle has been in the shop a total of 15 days. Customer is extremely upset and has alot of health issues and was so upset he was almost crying because he says he does not need this on top of everything. Customer says he works 12 hour graveyard shifts and is alway in pain and works hard for his money and has just had it. Writer let customer know writer will contact the General Sales Manager to see if they will trade this vehicle for the customer and if they give writer the same answer stating they won t trade this vehicle out writer will contact AM SLW5. Customer gave writer his work shift for the coming week. Writer will attempt to contact customer on Monday, 09/29 or Tuesday, 09/30/2014 after contacting GM\AM. Writer let customer know writer will continue to contact SM regarding repairs.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 40559. The reason for the customer contact was to provide or request the following information:
To let customer know writer contacted some of my resources and that his case was chosen by the Special Handling department. Writer let customer know this is a good thing and they can help him with more resources than writer can. Writer let customer know writer will transfer customers case over to our Special Handling Department and he wil be contacted within 2-3 business days by a Case Manager from this department. Writer let customer know if he has any questions he can contact CM.
Status update provided via email to the following email address:
[redacted]
I am sending this email to let you know I contacted some of my resources and your Case has been chosen by our Special Handling department. I wanted you to know this is a good thing and they have more resources than I do and can help you further with the issues you are experiencing. I am transferring your case over to our Special Handling Department and a Case Manager from this department will contact you within 2-3 business days. If you have any questions feel free to contact me at 1 (800) 763-8422 XT. 40559.
End of Status Update
Customer called in - he works midnights and will not be available after Tuesday. The customer is requesting a call back before he has to return to work. He is very frustrated with this whole process because he just bought the vehicle and has had to go to the dealership 6 times. He has been without the vehicle for a total of 2 weeks since he bought it. The bank has already taken the payment out for this vehicle.
Enhanced Customer Satisfaction Team (ECS) *
The customer is being handled by the ECS Team
Writer left message for Adrian, Service Manager (SM), asking for return call.
MR[redacted] calls to speak with their Case Manager SH950. Case manager was not available. Writer warm transferred the customer to LK237 at Ext 40614.
Customer made contact and expressed his frustrations about all of the repairs that have been needed since August. Customer is in a rental vehicle but advised that he paying for insurance to protect him should the rental be damaged. Customer also shared his experience of going to

the dealership with the forward warning system and that the tech from the dealership was not educated about the system. Customer stated that he is very loyal to the brand and the dealership. Customer has been working with the dealership for 10 years. Writer explained advantages of ECS program. Customer also stated that he wants to get another vehicle. Customer gave example of another dealership and another brand where the vehicle can be returned within 5 days. Customer also advised that has medical concerns and works nights that are adding to his stress about having problems with a new vehicle. Customer also expressed his frustrations of waiting during the sales process. Customer stated that there was a spot by the drivers side handle where the vehicle was detailed and he thought it was wax but it was a paint defect. Customer feels because of this repair he no longer has a new vehicle. Customer gave writer permission to place him on hold and contact the dealership for update about the repair.
Writer contacted dealer 52912 GLENN E THOMAS DODGE CHRYSLER JEEP Dealer Phone : 562-426-5111 and requested to speak to the SM.
Writer spoke with SM Tom. Dealership has two SM, Adrian and Tom. Writer advised that the dealership will contact the customer and go the status of the vehicle and that they will update his CA and she will also contact him by the end of business today. Customer will talk with dealership and be able to make an informed decision on moving forward on what steps to take next. Writer provided customer with CA contact information. Writer went over option of moving forward with repairs and CA providing reimbursement of payments while customer was out of the vehicle and also a SC or having vehicle reviewed for the replacement process.
Status update provided via email to the following email address: [redacted]
We are contacting you on behalf of your Case Advocate Shari as she is not in the office today. She will contact you tomorrow the 2nd.
Her number is 800-763-8422 ext. 40677
End of Status Update
Frank sa called to advise that the customer vehicle was compared to other like vehicles and found that the vehicle is as designed. Per Frank sa vehicle drives as designed, customer will pick vehicle up today. Frank sa advised writer that the customer was in a rental for 5 days. Writer advised Frank sa to use the reference number for the RA.
Writer called [redacted] spoke with customer who advised at this point the vehicle seems to be working the same way as a like vehicle. Customer was asking about the payment reimbursement provided the information via email needed for reimbursement. Customer was promised a MAX care SC current miles are 945 but will need to confirm at the next call on 10/7/14 Customer prefers to be called on Monday or Tuesday as he works nights.
Status update provided via email to the following email address: [redacted]
To review the goodwill assistance we discussed, I will need you to send the following:
Monthly statement indicating how much your monthly payment is, and what vehicle you are paying for.
Proof of payment. Typically, this is a copy of the cleared charge from your bank account. If you pay with a Money Order, it is the detachable receipt.
**Please feel free to black out any sensitive information, including the full account number and any additional charges you do not want seen. **
You may fax the documentation to Shari s attention at 801-736-3929.
Please include your case number, [redacted]. She will follow up with you after the documents have been received.
End of Status Update
[redacted] called requesting to speak to CA SH950 . Writer advised customer that CA SH950 is currently unavailable. Customer called to verify the fax # 801-736-3929 is correct. Customer faxed document on 10/8/14. Writer advised customer that writer will request CA SH950 call customer back as soon as possible.

End of Status Update
Writer contacted customer at [redacted] and was asked to contact him later in the week as he was at work and could not talk.
Writer advised customer that a follow-up would be made on 10/31 and was informed that it was his day off.
Writer contacted customer at [redacted] and advised customer that the items for the check were in and that we don t usually provide reimbursement and a SC, but that writer will look into the possibility.
Writer asked how many miles they will likely put on the vehicle per year.
Customer stated that they have short commutes to work and that their 2004 Ram dually has less than 70,000 miles on it. Customer stated that they might need to take the vehicle back in as the radio pre-sets for both FM and satellite had gone which was a little while after the vehicle had been returned from getting painted. Customer stated that he noticed that the light had come on for the forward collision warning system and he had tried multiple things from the owners manual to reset it, but then did go

off and back on a different day. Customer stated that the remote start options for the horn etc were all still working as normal, but that the light for the traction control had come on the console and was not sure if they were related.
Writer asked customer when he would be able to take vehicle in and would have our TS s get involved with the dealership to address the concerns.
Writer asked if there will come a time when someone will say that it has been enough and give them another vehicle.
Writer advised customer that the case can be sent to a CAIR Analyst Team for an initial overview and can take 5-7 business days and we would just put the offers on hold for the time being.
Customer stated that the dealership is 20 miles away and can take anywhere from 30 minutes to 1 hour depending on traffic and is hard on their schedules and his back. Customer stated that he may try to call the SA, Frank, about trying to get vehicle in on Friday to check to see if there are any codes for them to be able to work with and if so, he may leave vehicle if needed, otherwise will take vehicle back home. Customer stated that he is off on Thursday and Friday and could be contacted after Thursday afternoon if needed.
Writer advised customer that if no contact from him or the dealership is received prior, that a follow-up would be made about the SC and for which direction customer is wanting to go.
Customer Document Reviewed.
Customer called in stating 3 warning lights started going off on the vehicle and when driving around corners in the grocery store parking lot, customer felt as though the rear end of the vehicle was dragging. The warning lights going off in the vehicle include the MIL, the Electronic Stability Control warning light, and a 'Service air suspension' light. Customer is very disappointed and feels as though these issues are becoming a huge headache, as his schedule does not allow him to get to the DLR easily. Customer wants to know if he should drive the vehicle. Advised that agent cannot advise him to drive it as agent does not know how serious these issues could be. Consulted DF314, advised rental can be looked into however as CM does not work weekends we cannot get authorization. Advised reimbursement could be looked into so long as he gets a 35 dollar per day CDJR vehicle. Customer understood and states he will try to get the vehicle to the DLR on Monday.
Customer is seeking a rental for tomorrow. as he has to get his child to school for 8 am.
Briefly summarize why the customer is contacting Chrysler: customer is calling about an on going issue with the vehicle. Customer states the lights are still on. Customer states he will attempt to get the vehicle to the DRL on Monday but will attempt. Customer states the 2 warning lights came back on with a 3rd warning lights stating it need to be serviced. ESC, forward collision, and now the suspension servicing light came on. Customer states when turning slowly in a parking lot the back end started to jumping and sounding like the brake was locking. Customer states tomorrow he will have to stay up in order to take care of the issue as he normally sleeps as he finishes work at 6 am. Customer states the tech advised customer even though the codes states nothing wrong the tech believes there is an issue.
Briefly summarize what the customer is expecting: Customer is seeking assistance with getting the issue resolved. Agent advised customer agent will document the current situation. Agent advised customer agent has inputted the CM callback. Agent offered to transfer the customer to the CM line to leave a message.
Briefly summarize why the customer is contacting Chrysler: Caller contacting CAC seeking assistance with his concern. Caller seeking to speak to CM Voicemail.
Agent was calling CM and it says you can leave message but just hangs up on you. Agent advised caller. Agent offered to write down the message he wants to make.
Caller advised that he is having issues with ESC, FCW and Air Suspension. Caller advised all lights come on and off as they please. Caller advised vehicle has been jerking and the tired feel like they lock up. Caller advised that it happens when turning. Caller advised he is asking for CM

callback tomorrow morning. Caller advised he will be available anytime after 6:30 am (9:30 am EST).
[redacted] called requesting to speak to CA SH950 . Writer warm transferred customer to CA for further handling.
Customer stated that he dropped the vehicle off to the dealership this morning. Customer reiterated the information received over the weekend and asked to have the case escalated for possible replacement because of the issues that have been going on as well as the new one from the weekend with the vehicle jerking and locking up. Customer stated that when he took the vehicle into the dealership this morning that he could smell something that was like plastic had been overheated, but not quite burnt. Customer stated that he had his advisor come out and he could smell it as well.
Writer advised customer that his case would be escalated and can take 5-7 business days and they would look into any possible reimbursement as had been previously discussed, but if the vehicle did not qualify, that the case would be sent back to writer for repair resolution. Writer stated that the dealership would be contacted first so that the we can get our TS s involved in the meantime.
Customer asked if there was something that can be done for his SA, Frank, as he has been great to work with and has genuinely felt for his circumstances both with the vehicle and his personal concerns.
Customer was advised that writer would see what can be done about that request as well.
Customer is seeking replacement.
What s the main concern? number of various concerns
If known, how many repairs and/or dealer visits for concern? 6
If known, how many days down? about 3 weeks
Describe previous offers made: car payment reimbursement and Service Contract
Writer contacted Frank, SA, who confirmed that the customer concerns were present when brought in this morning and that the tech was in the process of looking at the vehicle.
Writer advised SA that we want to send the case to the TS s as soon as possible.
SA stated that he would call when the diagnosis is complete and would prefer to wait until it was all ready before escalating case.
Writer left message for Frank, SA, for update on diagnosis.
Writer assigning case to 91L for replacement vehicle consideration.
********** 91L Review **********
Frank, SA, had left message on 11/3 that they had tested the system and found that it needed a new steering column. SA stated that the part is not in stock and so they got one from another dealership and were in the process of repairs now. SA stated that they will road test the vehicle tomorrow and feels that this should resolve the customers concerns as they are all tied into the same systems. SA stated the current mileage is 1,589.
The customer called in about compass setting for the vehicle.
Agent helped the customer to reset the vehicle media center and the default setting came back up.
The customer states that the oil changed indicator was not reset after the oil change was done. Agent went through the steps to reset the oil change light as well with the customer. The customer did finally get the oil change light reset.
The customer is very frustrated at this time with the vehicle. The customer states is has been one thing after another with the vehicle.
The customer should be in bed sleeping as he works the night shift. The customer was very appreciative of the help given to correct the compass and reset the oil change function so he did not have to go back to the dealership.
****ATTENTION CUSTOMER CARE AGENT****
This customer has contacted Customer Care seeking Lemon Law buyback/replacement. Preliminary research has determined this vehicle warranty history does not merit further review. Please continue case management in an attempt to resolve the customer s

concern and/or issues.
Customer stated he will have to bring vehicle back tomorrow because the warning are coming back on again just got into the vehicle again and the check engine light is on. And if it does not go out with normal driving then it needs to go back to the dealership and check engine light has stayed on steady with everything he tries to do.
Customer stated he will have to bring vehicle back tomorrow because the warning are coming back on again just got into the vehicle again and the check engine light is on. And if it does not go out with normal driving then it needs to go back to the dealership and check engine light has stayed on steady with everything he tries to do.
Customer called to speak to CM SH950.
Agent transferred customer to speak to CM SH950 phone number 800-763-8422 extension 40677and there was no answer and could not leave a voice mail.
Agent advised customer that we were unable to reach CM and customer requested to leave a voicemail.
Agent advised customer that I would document in the file that they would like a call back and that he has to take the vehicle back to the dealership tomorrow.
MR [redacted] called to speak with their Case Manager. CM was not available. Writer warm transferred the customer to BB113 at ext 40517.
Customer wanted to let the CM know that the check engine light come on when they were driving the vehicle on 11/09/14. They were using the cruise control. It would lose speed. I would not keep the distance between vehicles. The light come on that stated that the cruise control needs to be serviced. They shut off the cruise control. The light shut off. They tried to use the cruise control it worked and kept it distance between the vehicles that they had in front of them. When they did not have a vehicle in front of them the vehicle did not keep the speed the lights have come on. The customer does have a rental. This is the 4th rental that the customer had. Customer stated that they would like to have the CM call them in the mornings 6:45 AM -8:00 AM PST. It is oaky to leave a voice mail for them. If it s during the day. Customer does work nights.
CA contacted dealer 52912 at 562-426-5111, spoke with SA\Frank who stated that the vehicle is at the dealership and they are going to be diagnosed. SA\Frank speed control switch needs to be replaced and they are getting the part this going to be in today. SA\Frank stated that he will contact CA with the diagnosis when he gets it. SA\Frank stated that he so far doesn t need Star assistance.
CA contacted the customer at [redacted]
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 40509. The reason for the customer contact was to provide or request the following information: Dealership replacing speed control switch and diagnosing further. CA stated next follow up will be 11/13/14.
CA contacted dealer 52912 at 562-426-5111, spoke with SA\Frank who stated that the sensor is replaced and the SCR was replaced and the A\C is working normally. SA\Frank stated that the vehicle should be done 11/14/14 and the only other number he has for the customer is [redacted] which is the home phone.
CA contacted the customer at [redacted]. Customer stated that he doesn t trust the vehicle and still wants to do buyback. CA referred the customer to his blue and white book or to go to his attorney general. CA stated that the review process sent the case back for warranty repairs and our goal is to get the vehicle repaired because he is already invested into it. Customer stated that he just wants someone to fight for him and stated that he wants a different vehicle. CA stated that dealership will be contacted to see if the dealership can look into a replacement or trade in for the customer and will let the customer know 11/14/14 if any new information has been acquired.
CA gave no promised but stated that CA would try for the customer.
CA contacted dealer 52912 at 562-426-5111, CA left a message for SM stating that customer is looking at getting a different vehicle and CA asked if the AM could offer any assistance to the customer due to the repetitive trips and repairs to the vehicle. CA left call back

information, VIN, customer s name and case number.
CA contacted dealer 52912 at 562-426-5111, spoke with SA\Frank and stated that the customer wants out of the vehicle and asked if the AM could get involved for some further assistance in helping with getting the customer out of the vehicle. SA\Frank stated that he would start working on it and CA provided call back information.
CA contacted dealer 52912 at 562-426-5111, left a message for SA\Frank asking if the AM is going to get involved with helping the customer out with getting out of the vehicle.
CA contacted the customer at [redacted]
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 40509. The reason for the customer contact was to provide or request the following information:
CA is still working with the dealership to see if the customer can get out of the vehicle and will follow up again on 11/18/14.
****ATTENTION CUSTOMER CARE AGENT****
This customer has contacted Customer Care seeking Lemon Law buyback/replacement. Preliminary research has determined this vehicle warranty history merits further review. This CAIR is being reassigned to the Resolution Team for further handling and review in an attempt to resolve the customer s concern and/or issues.
BC has requested we offer a replacement.
>> A new I2R Case 2[redacted]3 has been opened to further assist customer. Original CAIR number is the same.
**Called customer at [redacted] to inform of the replacement offer and he accepted. I advised that a Replacement Coordinator will contact him in 5-7 business days.
**Customer stated that the vehicle is still at the dealership as it is not drivable and he is in a rental.
Called customer at [redacted] and left message advising I need to confirm his email address to provide an offer letter for his records. Provided direct line for return call.
Customer left message advised phone was off during the day because he was working nights. Confirmed email address [redacted] and advised he would be available to talk Thursday afternoon or Friday if necessary. Customer was appreciative for the call and states he looks forward to the resolution.
****** Below Customer Contacted for Documentation Request ******
js2481@chrysler.com on 2014-11-20 @ 16:14
****sent offer letter to customer for his records via email at [redacted].
***** Customer Document Received *****
Frank, SA, wanted to verify that the repair for the injector clamp was notated previously.
Writer advised SA that there were no notes about it listed.
SA stated that the vehicle was brought in on 11/25 with smoke coming from underneath the middle part of the vehicle and they found that the injector clamp was the cause, but was on backorder. SA stated that the part has come in and they completed the repairs today.
Writer advised SA to contact the department that is handling the replacement of vehicle or Area Manager.
SA Frank called ECS stating that he performed the 181904b1 for CEL, checked for an exhaust leak, and p36 recall. SA states that the flash was 4/10 labor time.

Agent attempted to contact Dealer, Service Manager unavailable.
Agent attempted to contact Dealer, phone malfunction, call disconnected.
Agent contacted Dealer and spoke to Sever Advisor Brandon who advised that the mileage of the vehicle is 19534. SA advised the Service Advisor working on the case is unavailable. SA advised to contact the SA in charge of the vehicle in 30 minutes, agent will contact accordingly.
Agent contacted customer, Mr [redacted], and inquired about the headlamp flickering issue. Customer alleges this has gone on for 4-5 times and even been in the shop up to 20 days at a time. Customer explained that the headlamps, fog lights, tail lamps will flicker like a fast light switch, and then they will turn off. Customer additionally has had other

problems with the vehicle such as; seatbelt chime and radio issues.
Customer is very upset that this one safety issue has been going on.
Agent informed the customer that Jeep wants to help him, so we will
research this issue and get back with him by 09/19/14.
Correction to line 15, Active 5/36
Agent contacted dealer, spoke to Service Manager Brad. Agent inquired on
vehicle s mileage, which is up to 19,534. SM informed agent that STAR
needs to look at this vehicle. SM noted that customer needs to bring this
vehicle in as soon as possible, and 09/22/2014 is the recommended date.
Agent will update customer on 09/19/2014, to bring vehicle in by
09/22/2014 for diagnosis.
Agent contacted customer. Customer wants some kind of reimbursement
because of their time and inconvenience. Customer is very irritated that
they aren t getting a replacement. Agent informed customer that our
corporate techs want to help with this vehicle, and to bring the vehicle
into the dealer on 09/22/2014.
Follow-up with dealer on 09/22/2014 for update on diagnosis, and check in
with customer by 09/23/2014.
Customer calls to speak with their Case Manager. CM EM1218 is not
available. Transferred the customer to AF787
at ext. 40500.
CUSTOMER CALLED-
Customer stated that he spoke with his CM the other day and just wanted
to verify which dealership he is supposed to go to. Writer confirmed with
CM EM1218 that the dealership that is aware of the customer s concerns is
43325. Customer thanked writer and advised he will let his wife know.
[redacted] called, requesting his Case Manager. Transferred customer
to CM EM1218 at ext 40722.
Customer contacted agent and inquired why Service Manager Brad wasn t
informed of the appointment. Customer is a bit confused and is wondering
why this wasn t fixed already. Customer inquired on loaner/rental, agent
will investigate this. Agent noted that will contact DLR and then
schedule appointment for 09/23/2014.
Agent contacted DLR and Service Manager Brad wasn t available, so spoke
to Service Advisor Brandon. SA advised that agent should speak with
Service Advisor Steve Freeman, as he knows about this particular vehicle,
agent noted this, will advise Mr. Freeman on further occasions. Agent
scheduled an appointment for Mr. [redacted] r for 09/23/2014. Agent will
inquire on rental as soon as possible on next contact with DLR.
Customer: [redacted] calling to speak with CM; EM1218 with customers
permission writer transferred customer to CM s voice mail, as CM is not
currently available.
Agent contacted customer, inquired to see if vehicle was in for
diagnostic. Customer stated vehicle is in for diagnostic and awaiting
repair. Agent mentioned to customer that we will follow-up in 2 days
time, on 09/26/14 to give the dealer time to fix it, then the customer
time to test drive the vehicle.
Agent attempted to contact customer, however, customer was not available.
Left message for a return call at extension 40722. The reason for the
customer contact was to provide or request the following information:
Update customer.
Agent contacted DLR, spoke with Service Advisor Steve, got update on
vehicle. SA noted mileage is 19,885. Sa noted the intelligent battery
sensor was replaced, this was controlling the headlamps to turn on/off.
SA noted a ground on the vehicle was not installed, this was fixed. Sa
noted this was not abuse/neglect, nor manufacture defect, just poor
installation from factory. Sa noted the inside lights were flickering,
this was fixed. SA noted they did not need to get in contact with STAR.
Agent contacted customer for satisfaction overview and update on repairs.
Customer was satisfied with the repairs, per his wife s notation. Agent
relayed the information from the recent repair and since customer was
satisfied, asked to closed case. Customer obliged, has no other concerns
at the moment.
CLOSED LOOP UPDATE - no need for additional follow-up.

Product - Emissions - Unknown - Defective - Default	Customer seeking Lemon Law

Briefly summarize why the customer is contacting Chrysler: Customer contacted Chrysler seeking to advise that she plans on filing for Lemon Law.
Briefly summarize what the customer is expecting: Customer expecting to advise that they expect to be filing for Lemon Law.
Customer states that they have had problems with the vehicle since they purchased it.
Customer states that the vehicle has been at the DLR for a month.
Customer states that they had problems with the cruise control and the catalytic converter.
Writer contacted DLR and spoke with SM Dan who advised that they did have to replace the catalytic converter and the camera for the Adaptive Cruise Control.
SM Dan states that he has notified one of the owner s of the DLR (Troy), and factory rep (April).
SM Dan states that he has notified the customer that the vehicle is ready.
Writer advised the customer that the vehicle is ready.
Customer states that she is tired of the run around and that she has friends in the auto industry and that she will be sending this up the 'flag pole'.
Writer advised customer that file would be escalated to the proper department.
Customer understood.
****

AREA MANAGER REVIEW: AM has been involved with this Case w/the DP of the dealership - the current concern was for the cruise control. The RO was opened on 8.25 and closed 9.17th - AM advised the dealer on 9.12.14, that Chrysler would consider offering Trade Assistance on a new Grand Cherokee Summit, as the owner wants another like vehicle. The GSM and DP are working w/the customer - the dealer advised there are trying to find

another like vehicle w/the Diesel engine. The GSM & DP advised the customer last evening (9.17.14), that Chrysler HAS extended an offer to Replace the vehicle, and now it is just a matter of finding the new Replacement vehicle. The owner stated he understood. The DP & GSM are to keep the AM posted in order to move forward/AJE.
****

Area Manager Review:
GSM has advised that the customer has accepted the Replacement Package offer - ISG to determine the terms. The replacement VIN is EC5[redacted] and the current concern has been corrected on RO #611158. Area Manager to send Package request to CJJ2 for approval to ISG/AJE.
writer called Bettenhausen Chrysler Jeep to get clarification on accessories added to the old and new vehicle, left a message for Mike Sorenson to call writer back....writer also spoke withAM April Eagan regarding the usage fee, she wants the customer to be charged on all miles less 340 miles on the vehicle at purchase.

Status update provided via email to the following email address: [redacted]
Hello, my name is Mariah and I am contacting you on behalf of your case manager, Kodie. This email is confirmation that your case, [redacted] was successfully escalated to her. After she reviews the details of your case she will be calling you at your preferred number [redacted], within the one business day as promised. Her office hours are 11:00 AM 7:30 PM (Mountain Time). Her contact information is 800.763.8422 EXT 40604. If your preferred telephone number mentioned above isn t correct, please reply with the correction. (Please ignore the system generated message below).
End of Status Update
Writer contacted dealership and spoke with SA Chris who stated that the customers vehicle was in the dealership on 9/03/2014 and that the dealesrhip was not able to duplicate the issues with the transmission and that the customers back up camera was replaced, and the brake booster recall was completed and that the RRT was completed as well.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 40604. The reason for the customer contact was to provide or request the following information: Get customers expectations and see what the customer is planning on doing at this time, advise the customer to get the vehicle into the dealership for a diagnosis.
Customer left a VM stating that she was advised that a call back would take place in a few days and the customer would like a call back as soon as possible. Customer left contact number as [redacted].
Customer called and stated that she took her vehicle into the dealership and that it was there all day. Customer stated that the service is terrible and that she feels that nothing is being done. Customer stated that she personally knows the owner of the dealership. Customer stated that she is still having issues with the transmission and the back up camera and that the dealership stated that the front eye sensor could not be repaired but that it is now. Customer was informed that Chrysler would provide a rental vehicle for a day while the issues are addressed and that the customer needs to make an appointment for a diagnosis and a test drive. Customer understood and was advised that a call back would be made next week.
Writer contacted dealership and spoke with SA Chris who stated that the customer does not have an appointment and was last there 9/03. SA was thanked and phone call was disconnected.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 40604. The reason for the customer contact was to provide or request the following information: Advise the customer that if the customer has not called back by tomorrow then the customers case would be closed due to no appointment. Cusotme was provided brand number and advised that they are a valued customer.

[redacted]com on 2014-10-07 @ 16:11
Customer called and stated that the dealership will not call the customer back at all. Customer stated that she is trying to get another vehicle but that she does not wants a Chrysler vehicle. Customer stated that she would like to know her options. Customer was informed that she can work with the dealership and then the customer inquired about getting her vehicle replaced and was advised to refer to her blue and white handbook. Customer stated that she can have her case reviewed if she would like. Customer stated that she will work with another dealership to trade the vehicle in. Customer would like to send in pictures of her back up camera and was advised that a follow up will take place within a few days. Customer understood and wants it documented that the service at Dealer 60412 was completely unsatisfactory.
Customer left a VM stating that she has been waiting for an update. Customer stated that she would be trading her vehicle in for a Lexus but that she would like a vehicle payment reimbured. Customer requested a call back at [redacted] so that she can be updated as to what can be done.
Customer called and stated that she would like to have a vehicle payment

and that she would be trading her vehicle in. Customer was informed that her case could be sent for review but that a vehicle payment was no longer an option, customer stated that she thought that her case was being sent for review two Weeks ago. Customer stated that she was not satisfied with agent and that she had her lift gate come open on the highway and that she lost her sons saxophone as well as his back back which hit another vehicle. Customer was advised that the CM was under the impression that the customer would be trading her vehicle in and that the customer did not request that the case be reviewed. Customer stated that she is completely dissatisfied and stated that nothing has been done. Customer requested to speak with a supervisor as she feel that there has been a miscommunication. Customer stated that agent was inexperienced, writer attempted to descalte the phone call and customer would not allow agent to speak. Writer warm transferred call to supervisor MG1439 Ext: 40638.
******IMMEDIATE SUPERVISOR******
Customer was transferred to an immediate supervisor at ext. 40638. Customer advised that there has been nothing done for over a month regarding the case. Customer alleges that the lift gate opened on its own while driving. Customer also alleges that the interior light will not go off in the vehicle. Writer advised that she first contacted Customer Care on 9/18/2014 and has not taken the vehicle to the dealership for diagnosis. Customer alleges the dealership never returns calls to make an appointment and that the customer will not be inconvenienced by driving a rental. Customer also advised of working with Lexus and trading the vehicle for a non-Chrysler product. Customer s only request was one vehicle payment and writer declined due to not compensating for inconvenience and the customer not willing to work with Customer Care or an authorized Chrysler dealership. Writer requested to work with the customer on repairing the vehicle. Customer insists on not owning the current vehicle any longer and requested to have it replaced. Writer advised of sending the case for replacement review. Customer advised that the customer does not have time to wait for the review and that it should have already been done through the Case Manager. Writer advised of lines 80- 85. Customer advised that the Case Manager offered the payment but the customer did not accept it at that time. Writer reiterated that Customer Care and the Case Manager are willing to work with the customer on repairing and diagnosing the vehicle and the customer declined again. Customer requested to speak with writer s supervisor immediately based on the writer declining payment reimbursement. Writer stated that the immediate supervisor is not currently available and requested a callback. Customer accepted and advised that the best time to call is after 2:00pm MST at 720-26-1315.
[redacted] called requesting to speak to another CM . Writer warm transferred customer to CM JG1965
for further handling.
Customer called the writer. Customer asked what we would be willing to do in compensation for her lost items mentioned in the case notes as her rear gate fell open while driving. Writer asked if the customer had taken the vehicle to a dealership to get the gate looked at. Customer stated that she took the vehicle in and they could not duplicate the issue. Writer stated that we could not offer any compensation as the issue was not duplicated. Customer became angry and threatened legal action. Customer also stated that she is taking the vehicle to a dealership right now. Writer will call the dealership to see if an appointment or a diagnosis has been made.
[redacted] called, requesting a supervisor. Line disconnected while writer attempted to locate a supervisor.
Supervisor call
Writer contacted customer on 7[redacted] and was informed that customer never received a callback as promised. Writer informed customer that both MG1439 and JG1965 have spoken with the customer today, and customer was suppose to take the vehicle into the dealership. Customer informed writer that a supervisor callback was promised after 2 today, but customer never received it. Writer placed customer on hold to review the notes, when writer got back on the line, customer was speaking with someone else.

Writer asked if writer can follow up with customer within half an hour, customer agreed.
Waiting for corporate response before contacting customer.
Writer contacted CENTENNIAL CHRYSLER JEEP. Receptionist advised that the service dept closes at 6pm. Writer advised a callback would be made tomorrow.
Per AM, no offers will be made for 'inconvenience'. CAIR to be closed.

Briefly summarize why the customer is contacting Chrysler: Customer states that he would like to know what the latest firmware update at drive uconnect.com will deliver on his vehicle. Customer states that phones will intermittently drop from the radio and that bluetooth connections will be lost and would like to know if this would fix bugs for this. Customer states that he will seek to do the update.
Briefly summarize what the customer is expecting: Customer is expecting software update assistance.
Agent advised customer as per service bulletin 08-036-14 REV. A that the radio includes general enhancements for a wide variety of concerns. Agent further advised customer that there will be some general phone compatibility upgraded with the update but majority is for vehicle features connected with the radio. Agent advised customer that update is available at driveuconnect.com and that if customer has questions he can call us back at any time.

Product - Electrical - Cruise Control - Other - Default	Brake warning light comes on dash
Corporate - Survey By-Pass - Duplicate CAIR - Default - Default	Duplicate CAIR 26040736

Briefly summarize why the customer is contacting Chrysler: Customer states that he is having ongoing concerns with his vehicle and attempted to email his Case Manager however he received a message stating his case has been closed (CAIR[redacted]). Customer states that the adaptive cruise control system states it needs cleaning even though this was completed. Customer states that this affects the forward collision warning and a brake message will display on his dash board. Customer states that after four months of owning his vehicle the battery box below the front right seat had water accumulated and the vehicle was at the dealership for a week. Customer states that he is concerned that the water did not just go to this component and may affect other electronic components. Customer states that at 3,000 miles his engine was replaced which took two weeks at the dealership in Culpeper Virginia (44574) 80 miles from his residence. Customer states that there are little glitches and small noises in the vehicle. Customer states that the rear windshield washer fluid nozzle seems to be leaking. Customer states there are electronic concerns with the reverse backup camera where the screen will intermittently freeze. Customer states that there is a Uconnect Bluetooth concern however it was resolved by completing an update however he states he has an iPhone and that may be the concern as he now has iOS 8 and that the concern became present once more at this time.
Briefly summarize what the customer is expecting: Technical assistance with ongoing concerns. Customer states when accelerating sometimes there is a burning smell that can be detected.
Agent advised customer case will be escalated for review however the dealership needs to be involved. Agent advised that Apple products which just received updates may have compatibility concerns. Customer understands.
Who has possession of the vehicle? Customer
Has an authorized dealer diagnosed the vehicle? Not since June 2014

If a CDJR dealer has diagnosed, what is the dealer name and code? Vehicle will return to Koons Chrysler
Customer advised a call back will take place within one business day.
Preferred Morning/Midday call back number [redacted]
Preferred Afternoon/Evening call back number is: [redacted]
Customer email address for case updates [redacted]
Reassigned to: 88W
Enhanced Customer Satisfaction Team (ECS) *
The customer is being handled by the ECS Team
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 40640. The reason for the customer contact was to provide or request the following information:
To inform customer we are their CA and to contact writer so we are able to further discuss customer s concerns with vehicle and to get a current diagnosis.
Writer dialed customer [redacted] inquired if customer has notified the dealership of the ongoing concerns he is having with his vehicle and customer stated he has not, writer informed customer he is part of the ECS program and we will be getting our TS s involved to assure a proper resolution. Writer inquired when he will be able to schedule appointment and customer stated he will schedule one and contact writer back after this weekend.
Writer dialed customer left message inquiring if customer has taken vehicle into the dealership and to contact writer back.
Writer dialed customer left message inquiring if customer has scheduled appointment and to contact writer back.
Customer called and stated he has appointment 10/10/14.
Service Director LYN WHITNEY from dealership 68348 calls to speak with Customer Advocate MG1246. Writer transferred SD to CA MG1246 at ext. 40640.
SD Lynn called and stated the customer dropped of his vehicle and stated he would not tell them what the concerns are with his vehicle and informed them someone will be coming out to look at his vehicle. Writer informed SD of the concerns that are documented in case and stated we will escalate case up to our TS s and to contact writer back once diagnosis has been completed.
Writer called dealership at 703-356-0400.
1) Forward collision message comes on, cleaned the eyeball.
2) Adaptive cruise control needs cleaning
3) back up camera , update 14.25
4) rear washer nozzle leaking, no valve so it leaks
5) two recalls
6) burning smell on acceleration, no leaks and no smell.
Dealership will call back with totals before releasing the vehicle back to the customer.
SD called back with labor cost information.
Warranty labor=18.60.
DM notes added.
Writer dialed SD Lynn left message inquiring statues of customers vehicle and to contact writer back.
Writer dialed SD Lynn and inquired status of customer s vehicle and writer was informed customer now has vehicle back 10/17/14. Writer informed SD DM notes have been added.
Writer dialed customer left message inquiring satisfaction of repairs and to contact writer back.
MR[redacted] calls to speak with their Customer Advocate.
Transferred the customer to MG1246 at ext 40640.
Customer called and stated he is having the same concerns with the adaptive cruise control once again, writer informed customer to contact dealership and schedule appointment to take vehicle back in and we can get our TS s involved. Writer informed customer to contact writer back once that appointment has been rescheduled. Customer also stated he is looking into his states lemon laws and writer informed him to also review the blue and white book he got with purchase of vehicle for other resources.
Writer dialed SD Lynn who was not available and 3rd party stated customer

does not have an appointment scheduled.
Writer dialed SD Lynn who stated customer has not scheduled appointment.
Writer dialed customer [redacted] left message to contact writer back.
Writer dialed customer [redacted] left message to contact writer back.
Writer dialed customer on alternate number [redacted] who stated he would like to just give this vehicle back and pay the difference for another one, writer inquired if he has spoken to the purchasing dealership about this request and customer stated he has not. Writer informed him we will contact him next week and see if he has had a chance to contact them and see what they are willing to do to assist customer.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 40640. The reason for the customer contact was to provide or request the following information: Left a message agent will follow up 11/12/2014.
Writer dialed customer left message to contact writer back.
Writer dialed customer and left message to contact writer back.
Customer left message to contact him back after 3:15 pm their time.
Writer dialed customer [redacted] and inquired if he has contacted the dealership and informed him of his request and customer stated he has not but will do so, writer inquired if customer is making payments on vehicle and customer stated he paid for vehicle in full. Customer stated he will contact the other resources and will contact writer back and writer stated we will contact him next week if we have not heard from him by then.
Writer contacted SA. SA states that no appointment has bee scheduled.
Writer dialed customer left message inquiring what customer would like to do at this time and to contact writer back.
CLOSED LOOP UPDATE - no need for additional follow-up.

*********Case Escalated to I2R**********
Reviewed Warranty History which determined this case should be escalated to I2R for case management.
*** Claudia with the I2R Customer Resolution Team is now responsible for this CAIR. If the customer
should call, please direct them to contact Claudia directly at 214-583-2135. Thank you. ***
-Called dealer 60412, spoke to TJ in service. Confirmed vehicle has been in once for a warranty repair.
-Called dealer 60420, spoke to receptionist, confirmed vehicle is in for service and is being diagnosed. Confirmed vehicle was brought in 10/2. Advised service writer is Scot. I LVM for Scot requesting a return call.
>Placed initial call to customer, advised that his case has been escalated to me for special handling. I provided my direct line and work

hours. Customer states that he is not satisfied with his vehicle and that customer service that he has received thus far is nothing compared to the service he got at BMW. I apologized to customer but assured him that his case has been sent to the right department. Customer is requesting to be put in the same exact vehicle as a rental. I advised that I cannot gaurantee any rental and that my job is to make sure he has reliable transportation. Customer is requesting an e-mail to be sent to him with contact information. Customer agreed to wait for update.
Status update provided via email to the following email address:
[redacted],
I am your case manager. My office hours are Monday-Friday 8:00-4:30 CST. My direct line is 214-583-2135 or you may reach me toll free at 888-542-7239 Ext. 2135. I will be contacting Colorado Chrysler to see if I can assist with getting the DEF injector expedited. I will contact you once I get an update from the dealership.
Thank you,
Claudia

Customer has contacted via email in cair [redacted] Agent advised that the customer will need to contact their case manager and provided contact information. Customer is requesting further information.
>Called dealer 60420, spoke to someone in service, He states that SA Scott is out to lunch. He states that DEF injector arrived and vehicle is ready for pick up.
>Called dealer 60420, Robert in service confirmed that vehicle is ready for pick up.
>Called customer, he states that he is in the middle of a conference and can t talk.
>Called dealer 60420 several times in attempt to contact someone in the service deparment. No one picked up.
>Called customer, he confirms he has his vehicle back since Friday 10/10. Customer states that dealer is going to fix a scratch made on the bumper while the vehicle was in for service. Other than that, customer would like for me to look into offering an extended warranty. I advised customer that I would review.
>Spoke to owner. I advised that I can offer a MVPP of 5/60 with a $100.00 deductible. Customer is satisfied with this resolution. Customer accepts offer. I advised him that he will receive a packet of information through the mail in a few weeks. Cusotmer understood.
CAIR has been sent back because of the following reason:
Vehicle repaired, and no longer at the dealer.
>> Maximum Care 5 year/60,000 mile $100 deductible MVPP (WM560N) has been applied to vehicle for customer s future reliability concerns due to 1 repair for Check Engine Light and 1 repair for Front Collision Warning System in less than 2,300 miles of owning vehicle, vehicle down for 7 days. Customer has owned 4 previous CDJ products. Contract code 39357792. Customer stated that he is having issues with his vehicle again and would like the vehicle replaced. Customer stated that he is getting the message 'DEF system needs to be serviced' and the check engine light is on. Customer stated that he is finding it hard to find a diesel mechanic at a Chrysler DLR.
Agent advised customer that his case would be escalated to the proper department and advised him to contact the CM. See line 42-47. Agent referenced Answer ID 17118.

Product - Electrical - Cruise Control - Other - Default	engaging on its own
Product - Brakes - Unknown - Brake/Parking Brake Lamp On/Flashing - Default	red brake light keeps appearing
Product - Brakes - Unknown - Defective - Front	vehicle applying brakes by itself

Briefly summarize why the customer is contacting Chrysler:
Customer is seeking assistance with an unresolved concern with the vehicles braking system.
Customer stated that initially the brake light would appear on his dash in red with a buzz sound , but it would go away on its on and happened randomly .
Customer stated he thought it was just a new vehicle glitch .
Customer state he was driving yesterday, and he slowed down to allow and vehicle to pass him and his vehicle completed braked on him without him applying breaks.
Customer felt as though cruise control was activated but it was not turned on.
Customer brought vehicle to his dealer and dealer has performed some updates, but thus far is unable to duplicate the concern.
Customer stated he is concerned about driving vehicle.
Cusotmer also stated the dlr has placed customer is rental for time being.
***
Agent contacted dlr 37000 and spoke with SA Rodney , who confirmed that they were unable to duplicate concern thus far and has performed software updates for tcm and pcm .
***
Agent advised customer that case will be escalated to case manager for additional review, and will received a follow up within 2 business day.
Customer understood and thanked agent.
Briefly summarize what the customer is expecting:
Customer is seeking assistance with unresolved concern.
***

REQUEST FOR SPECIAL HANDLING
NIC of TL consulted: Lb546
Reason for special handling request: MY14 , low mileage , unresolved concern.
Current location of the vehicle: dealership
Date of last repair attempt: 10/08/14
Customer s preferred method of contact: email
Customer phone number (Morning) [redacted]
Customer phone number (Evening) [redacted]
Customer email address [redacted]
Dealer code (if applicable): 37000
Dealer personnel involved (if applicable): SA Rodney
Assigned case to 88fÙ for Special Handling
Customer is contacting back to update the case. Customer states that the dealership is advising him to pick up the vehicle because they can not duplicate the issue. Customer states he is in a rental right now and the dealership is looking into rental for a little while longer as the customer is waiting on their case manager to contact him. Customer would like to know if it happens that the dealership is expecting the rental back if we could cover the rental from there.
Agent spoke to LB546 to see if any rental was available but was advised for the customer to work with their case manager once they contact.
Customer understood and thanked the agent.

Product - Electrical - Cruise Control - Intermittent or Inoperative - Default	adaptive cruise control
Dealer - Service/Body Shop - Transaction - Insufficient Follow-Up - Default	data device and STAR case
Corporate - Survey By-Pass - No Diagnosis - Default - Default	

Briefly summarize why the customer is contacting Chrysler: Customer is experiencing problems with his adaptive cruise control. It works when it works but it then stops working for no reason. , The issue according to the customer is that the ACC takes off, the lens is clean, but the dealer says there is nothing more they can do. Customer provided some technical details about the working of the light on the dash, how it says to clean the lens but that doesn t work and how the ordinary cruise control works but not the adaptive cruise control, etc. The level of his expertise was close to that of a mechanic in the descriptive area. Writer did not understand all of the technicalities, so summarized the customer s discourse into 3 main areas - see preceding sentences.
Customer claims the dealer told him that they offered to put some data recording device on the vehicle to drive around with until this occurred. Customer was not happy about this situation with having to put a device on his vehicle.
It sounds like a non-duplicatable issue. This needs to be confirmed with the dealer, also that they opened a STAR case.
Writer called the dealer NEMER and left a message on the SM s voicemail asking him to call back or have an SA call back with the case # so we can find out what happened at the dealer.
Customer also took the case # to call us back on with tomorrow 10/15/14.
Briefly summarize what the customer is expecting: to get his unresolved problem with the ACC resolved
Reassign to TL for Survey Bypass - no diagnosis
Briefly summarize why the customer is contacting Chrysler: Customer called stating he called last week and was told to call us for an update. Agent advised we do not have any updates as the sm did not call back. Agent called the dealer and was transferred to the SM s voicemail. Agent

called back and was advised he is in a meeting. Agent advised the customer we need to speak to the SM regarding the STAR case that was supposed to be created. Agent advised to give us a call later today and we can try to get in touch with the SM. Customer states he will call later.
Briefly summarize what the customer is expecting: An update on his case
CAIR RE-OPENED AND FOLLOWING REASON CODE(S) REMOVED
Survey By Pass - No Diagnosis
The customer called back because the previous agent was unable to get the SM on the phone. The agent called the dealership but the SM was out for a meeting and the SA stated they have no information because the SM is handling it other that they have been unable to duplicate. The agent advised the customer that the SM is going to call him when he gets in and that she will send his case to a CM for review.
Customer advised a call back is required and will take place within one business day by COB their time
Preferred Morning/Midday call back number is [redacted]
Preferred Afternoon/Evening call back number is [redacted]

Writer contacted dealer at 518-793-2571, spoke with SM Jason. Writer inquired about getting a STAR case created. SM advised that he would like to get the concerns to duplicate before doing that. SM advised that they were unable to get the issues to duplicate, and returned the vehicle to the customer. Customer had vehicle for 1 week, and experienced this issue once. Writer advised that writer will contact customer and will find out if he would be willing to take the vehicle back to the dealership. Writer advised that writer will be sending case over for an unresolved concern as well. SM understood. SM advised that last known mileage was 10617.
****** Below Customer Contacted for Documentation Request ******
[redacted] on 2014-10-21 @ 13:14
Writer contacted customer at [redacted]. Writer advised customer of lines 64-72. Customer advised that this does not sound like a reasonable plan, and he is not comfortable with the dealership putting vast amounts of miles on his vehicle. Writer understood. Customer advised that he would like to get our engineers involved in this. Writer explained that per the dealer in order to contact those corporate resources, the issue has to be duplicated at the dealership. Customer advised that he has pictures of what the reading is when the ACC problems occur. Customer inquired about some sort of software that would record what the computer is doing when the problem occurs. Writer advised that this would be a data recorder. Customer inquired about having that put in his vehicle. Writer advised that writer is unsure if that is possible, as usually dealerships have deposits that are put down on those before sending them home with the customer. Customer advised that he is more than willing to put down a deposit on that. Writer advised that writer will need to look in to that to see if it is a possibility. Customer inquired about page 204-208 in the owner s manual about recalibrating the sensors, and if the dealership had done that when the vehicle was there last. Writer is unsure, but advised that writer can look in to it. Writer advised that writer will do some research about what our options are, and will

follow-up with both customer and dealer tomorrow 10/22.

***** Customer Document Received *****
Customer Document Reviewed.
Writer contacted dealer at 518-793-2571, spoke with SM Jason. SM advised that there was a TSB out for an issue, but since what the customer was experiencing was not related to that, they did not recalibrate the sensor. SM advised that he would like the concern to present itself more often that once a week before having the customer come in. Writer inquired about a data recorder, SM advised that he does not have enough y-pods for that, he may be able to do that in a week or two. Writer advised that writer will send case over for an unresolved concern, and will get in contact with the AM for a direction to go so that we can get this resolved for the customer. SM agreed and understood.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at extension 40539. The reason for the customer contact was to provide or request the following information:
To let customer know that writer is getting in contact with our corporate resources, and will follow-up as soon as writer hears back from them or no later than 10/27/14.
spoke to jason at dealership - agreed to auth 3 or 4 days rental for owner the week of nov 1St to perform extensive test drives of vehicle to attept to duplicate owners complaint. as concern does not impeed vehicle performance or operation just an option of an option - notes to be added for rental and updates to be added if duplication of complaint occurs.paf
Writer contacted dealer at 518-793-2571, spoke with SM Jason. SM advised that customer will be at the dealership on the 3rd of November. SM advised that he will have the SA contact customer to set this up. Writer thanked SM.
Writer contacted customer a[redacted]. Customer advised that the dealership has not contacted him to set up an appointment. Writer advised customer of lines 125-129. Customer requested to know how the dealership is going to record the data from the vehicle, and why his pictures are not sufficient for diagnosis. Customer requested to speak with an engineer. Writer advised that writer does not have access to contact them; we contact them through the case. Customer became upset and refuses to take his vehicle to the dealership to get the answers he requested. Writer referred customer to ask the dealership for those answers. Customer advised that he did, and they referred him to contact CAC. Writer apologized that writer does not have the answers he requested. Customer inquired if dealer had recalibrated the sensors. Writer advised that they did not, and that per the SM, it was not related to customer s concerns. Customer requested to get that in writing. Writer advised that writer is not able to do that, as it is proprietary information. Customer requested that writer send him the recording of this call. Writer advised that calls are only recorded for quality and training purposes. Customer advised that he does not give writer permission to record the call. Writer advised that writer will need to disconnect the call, and advised that will follow-up on Friday 10/31/14. Customer understood, and call was disconnected.
Writer contacted dealer at 518-793-2571, spoke with SA Dan. Dan advised that customer does not have an appointment set up. Writer then spoke with SM Jason. SM advised that they will be putting a data recorder in the vehicle and will drive it with the data recorder. Writer thanked SM.
Agent attempted to contact customer, however, customer was not available. Left message for a return call at Jeep Customer Care. The reason for the

customer contact was to provide or request the following information:
To let customer know that we will have to close his case due to not having a diagnosis.
CLOSED LOOP UPDATE - no need for additional follow-up.

Briefly summarize why the customer is contacting Chrysler: Customer called in very upset. Customer states she is having a major problem with her DLR as well as her vehicle. Customer states there is a major malfunction in vehicle that caused the entire brain of the vehicle to go out. Customer states that every single warning light came on, air bag warning light, 4WD not available, Blind spot, park sense. Customer states she lost power to her Uconnect, but it did come back on several times. Customer states she is filing a complaint with the Better business burro. Customer states she has had a horrible experience throughout this entire process. Customer states it started with her contacting the DLR about a question about the 2014 and 2015 vehicle regarding car play, as she heard it was going to be available for 2015 and if it was she was gong to wait. Customer states the sales person was rude, but she did allow him to continue. Customer states she got to the DLR as she knew what she wanted and she knew she wanted the overland hemi. Customer states the finance department was lying to her about what Chrysler is going to cover under the warranty that came with the vehicle. Customer states the finance department told her that Chrysler would cover driving habits and road conditions customer states she knew that was false. Customer then asked to speak to the head finance person as this was not right. Customer spoke to that gentleman, and told customer he does not know why previous Financial Advisor told her that information, and was not true. Customer

states she did purchase extended warranty as well as the full VIN of the vehicle, so she could change her insurance. Customer called the DLR, and told them that there was an error with the paperwork. Customer states the DLR told her to bring it in when she would pick up vehicle. Customer said okay. Customer states the DLR called her, and told her the vehicle was hers. Customer states she called in to get a hold of the sales person, and reception told her that he was not in. Customer states she called back 30 minutes later and reception told her he was actually there, and that he was with a customer. Customer states she got a call while call while doing her personal job, and states they have a problem and do not have the vehicle. Customer states the DLR tried pushing her into a leased vehicle, and customer states she did not want to do that, she wants to purchase one. Customer states she took her vehicle back after 3 days of driving it, as it had a paint chip problem that needed to be fixed. Customer states nobody from the DLR called her back, to follow up. Customer states 6 weeks later, she got a recall letter, so she took the vehicle in to get it fixed. Customer states she waited 3 weeks for her vehicle to get fixed. Customer states as of 10/17/14 she got a warning light come on for her battery, saying it was low. Customer states she found out it was not low. Customer then states as she was driving, an error comes up about cruise control, not available needing immediate service, customer states the vehicle will ding and the headlights go off for about 5 seconds, and this happens about 7 times in less then 7 minutes. Customer states she called the DLR yesterday 10/18/14 and told them that she needs the vehicle serviced right away, and that something is seriously wrong. Customer was having a very bad stress attack thinking something was going to happen, with all of these warning lights, and error messages coming on. Customer states she eventually got to the DLR, and she was not able to put the vehicle in park, and that the DLR had to put the vehicles e-break on to turn the vehicle off. Customer states the vehicle is at the DLR now, and does not feel confident that it is going to get fixed. Customer states she is planning on going to her attorney or a lawyer. Customer states she is not spending a sent on this vehicle until it is replaced, or fixed like a brand new vehicle. Customer states this should not be happening. Customer is very upset. Customer states that she wants to speak with someone higher up. Agent advised customer her case would be sent to our CM team to see what they are able to do. Agent apologized to customer, and advised her that we would take a look and see what we are able to do for her. Customer thanked agent.
Briefly summarize what the customer is expecting: to get her vehicle fixed like new.
-
Customer advised a call back is required and will take place within one business day by COB their time
Preferred Morning/Midday call back number is [redacted]
Who has possession of the vehicle? DLR
Has the vehicle been diagnosed by a CDJ dealer? No they are working on finding out what is wrong.
If a CDJ dealer has diagnosed, what is the dealer name or code? 68116
Reassigned to 88F
Customer states that more information was received over the course of the day and Customer called to update the narrative with the new information.
Customer states this is not a Chrysler issue it is an issue with the Dlr.
Dlr is stating that Customers issues are not unique, they get 5 or 6 complaints like this a week.
Customer states carfacts says that the PCM and BCM were worked on on 07/31/2014.
Customer states she feels like she had a right to be informed of this when purchasing the vehicle.
Customer is understanding of the situation and willing to work with Chrysler Corporation to rectify these problems.
Customer called inquiring about callback from lines 66-67. Agent advised callback should be received by end of business 10/21/14 as per those lines.
customer states she was supposed to receive a phone call back from her

case manager and she never received one yet
customer seems to be really upset and she thinks that no one is helping her out and she is just getting the run around and she just wants someone to assist her properly and get all these issues resolved as soon as possible
agent advised customer that her case manager is away from her desk or with another customer, but agent advised customer that i could get a hold of another case manager if she wants further assistance
customer replied and said that she will wait and see if her case manager has any updates for her because she don t know what process she is going along and who her case manager has tried to contact and how she is going to assist her, so customer wanted to wait until she talked to her case manager before she asked for a different case manager
agent advised customer that her case manager should be calling her by the end of today s business day and if she don t call her then the customer could give us a call back tomorrow and then the next agent that gets her case can then further assist her

- 0 expired service contract
- Servicing dealer: Parks (68116)
Writer attempted to contact dealer 68116 Service Manager (SM), however, SM not available. Left message for a return call at extension 40675.
The reason for the dealer contact was to provide or request the following information: to get the current diagnoses of the vehicle. What is going on so far with the vehicle.
CONTACT UPDATE - Customer was contacted today at [redacted]. Customer states that customer has been having multiple concerns with the dealer. Customer states that it all started when customer goes into the dealer to buy the Jeep. Customer states that customer was tried by dealer to get customer into a lease vehicle that customer said no too. Customer found out the trade vehicle was coming from Colorado. Customer states when the vehicle got to the dealer customer notice rock chips in the paint. Customer had to make multiple calls to the dealer and vehicle at dealer for a week before something was done. Customer states when vehicle got returned customer notice one day the warning lights coming on for low battery but the battery did not have low voltage. Customer also states that customer found out before customer took ownership of vehicle the BCM, PCM, and amph was replaced on vehicle. Customer states just recently customer took vehicle to dealer for the electrical concerns and found could not get the vehicle into park. Customer is tired of being lied to by dealer and how the dealer business practice is. Customer feels unsafe in vehicle. Writer advised customer that writer has contacted the dealer and left a message for the SM to call writer back. Writer advised customer once the dealer is contacted than writer will call customer again.
Writer received call from dealer 68116 Service Manager (SM) Denis. SM states that customer came in for a lot of electrical concerns and issue with the sunroof. SM states this is the first time seen in the service department. SM states that found a loose ground wire that was fixed and the sunroof is being repaired now. SM states had lunch today with the AM and SM states that the AM is willing to pay one month car payment for what customer been through. SM states cannot buy the vehicle back. SM states doing everything can for the customer. Writer thanked SM for all that has been done and will follow up on 10/23/2014.
Writer contacted customer. Writer explained what was found out from dealer per lines 142-150. Customer states that customer wants to know why Chrysler is not going to buy back vehicle. Customer is upset that customer is not getting answers from dealer on complaint and how the

vehicle mileage was changed. Customer states that customer does not like the fact that nobody is taking responsibility for customer odometer to be changed. Customer wants someone to take a look into this. Customer is unhappy on how Chrysler does not care on how customer is treated. Writer understands customer frustration. Writer advised customer that each dealer is independently owned and operated. Writer advised customer that Chrysler has no control over who is hired at the dealer and how the dealer is run. Writer advised customer that Chrysler is here to step in and fix the vehicle when there is a problem to the terms of the warranty that is on the vehicle. Writer advised that all comments and questions have been documented and Chrysler does look into this. Customer states has vehicle back but feels unsafe with it. Wants some answers. Writer can see what can be done but not guaranteeing anything because they are not owned by Chrysler. Writer advised customer once this is done than the case will be closed and customer feels should not if customer does not get some answers and writer understands but can t force the dealer to do anything. Customer understood.
Writer contacted the dealer and spoke to SM Denis he stated that they have already spoke the customer, he stated that the mile discrepancy is not an odometer change. He stated that the when they completed the dealer trade they were given the incorrect miles and that is what was written down as they did not have the vehicle at the dealer yet. SM stated that it was a difference of 8 miles; he stated that they spoke to this customer on 10/23/2014 and explained everything the customer has also spoken to the dealer owner Paul. SM also stated that the people in sales that she was having issues with no longer work at the dealer. The SM stated that he even contacted his AM and got her one car payment.
Writer attempted to contact customer, however, customer was not available. Left message for a return call at extension 40675. The reason for the customer contact was to provide or request the following information: to go over what was found out from the dealer per limes 172-181. To let customer know that everything has been done and if customer has any other concerns to work with the dealer.
Writer attempted to contact customer, however, customer was not available.
Left message for a return call at extension 40675. The reason for the customer contact was to provide or request the following information:
To inform of lines 172-181 and 186-187. Writer informed that case will be closing in two days.
CLOSED LOOP UPDATE - no need for additional follow-up.
The vehicle is displaying ACC-FCW unavailable. Wipers were working. Customer was driving down the highway and there was no vehicle in sight and the vehicle applied the brakes by itself. The vehicle did the same thing last week.

CONTACT UPDATE - Customer was contacted today at [redacted] Customer was provided with agent s extension: 40675. Would like to go over new and old concerns and where vehicle is at.
Customer: [redacted] requesting a call back from CM: SJ448 prior to 2:00pm Central Time. Customer stated will not be available after that time and would like to speak with CM before the weekend.
Customer: [redacted] declined to provide a secondary phone number at this time.
Writer did receive 2 voice mails from the customer to call back at [redacted].
Writer contacted customer back. Customer states that customer has

mechanical issues with the vehicle again. Customer states were driving down the road on Tuesday when the ACC-FCW warning lights came on. Customer called on washday Morning to make an appointment with parks motors and had one set for 11/7/2014. Customer states that night customer was driving down the highway at 55 mph when all of a sudden the vehicle brakes on its own like customer was going to hit something in front. Customer took vehicle yesterday to Parks. Customer states that customer was treated very poorly with the SM at the dealer like they were not going to service vehicle because of the poor score customer gave the dealer. Customer states that customer heard that the person that is giving customer the vehicle payment also was going to put a stop hold on check because might be trading in vehicle. Customer states do not know what is going on and wants vehicle fixed and safe. Writer understands frustration. Writer advised customer that writer will have to call over to the dealer and then call customer back next week.
Writer received call from customer. Customer states that customer vehicle has been at the dealer since 11/7/2014 and has not heard anything. Customer states that customer wants answers on what is going on with vehicle and customer states that customer has not heard of customer vehicle payment going through. Customer wants some answers today. Writer understands the frustration on what customer is going through. Writer advised customer that writer will go ahead and call dealer and than given customer a call back later today.
Writer attempted to contact dealer 68116 Service Manager (SM) Dennis, however, SM not available. Left message for a return call at extension 40675. The reason for the dealer contact was to provide or request the following information: to find out the status of customer repair to the vehicle and what needs to be done. Need to find out about the vehicle payment reimbursement that customer said was supposed to receive and did not.
Also talk about the rental that customer paid for.
Writer received call from customer. Customer states wanted to let writer know that customer did have to rent a vehicle for the weekend. Customer states the loaner vehicle was too small to take for the weekend. Customer rented a GMC vehicle that cost $35 a day plus tax. Writer will mention this to the SM and what is going on.
Writer received call from Service Manager Dennis at dealer 68116. SM states that this is the 2nd time customer has come in for an electrical concern with her vehicle. SM states that the customer first time it came in was the ground wire that was bad and was replaced. SM states that the vehicle was from another dealer that replaced 3 modules but not the ground wire. SM states the vehicle is at dealer now because the ACC-FCW warning lights came on and the vehicle collision warning came on. SM states customer states that the vehicle broke on its own like it was going to hit something in front but nothing was there. SM states has test driven the vehicle multiple times and even did what star said to do and cannot duplicate the concern and no codes came up. SM states that the first time customer was in SM contacted the AM which approved for a reimbursement on a vehicle payment but this time customer came in saying wants vehicle bought back. SM put a hold on the check because of this. SM states the rental customer had to pay for are going to be covered by the SM. Writer thanked dealer for the information and will follow up.
Writer attempted to contact customer, however, customer was not available. Left message for a return call at extension 40675. The reason for the customer contact was to provide or request the following information: to go over the case with customer
AM email sent

Writer contacted the Service Advisor. SA stated that the vehicle is not at the dealership.
Customer is seeking lemon law buyback/replacement.
What s the main concern? That the two loss grounds affected all the components
If known, how many repairs and/or dealer visits for concern? 10 times
If known, how many days down? 18 days
Describe previous offers made: None
Writer contacted the customer. Customer states that she was promised that the dealership would reimburse a vehicle payment. Customer stated that the dealership has not been of any help ever since the customer gave the dealership a bad survey. Customer doesn t feel why she had to wait weeks to get a vehicle payment then for the vehicle to have another issue to have it looked at for review then not being able to receive the payment. Customer feels that she is having this miss treatment because she gave the dealership a bad survey. Writer informed the customer once the vehicle comes back from being reviewed and the vehicle repaired that we can see what we can do for the vehicle payment. Writer stated that we cannot guarantee that the customer will get it but we can see what we can do.
********** 91L Review **********
91L reviewed and returned to 88 for case handling
****ATTENTION CUSTOMER CARE AGENT****
This customer has contacted Customer Care seeking Lemon Law buyback/replacement. Preliminary research has determined this vehicle warranty history does not merit further review. Please continue case management in an attempt to resolve the customer s concern and/or issues.
Writer contacted customer. Writer explained to customer that writer received customer case back. Writer explained that customer vehicle did not qualify for lemon law/buyback/replacement. Customer wants to know why. Writer explained the factors that the care analyst looks for. Writer advised customer will do the vehicle payment for the customer. Customer wants to speak with a supervisor on why exactly it did not qualify. Writer transferred customer over to MG1439 at ext. 40638.
AM email sent
Writer contacted dealer 68116 service. Writer spoke with SM Denis. Writer explained to SM that the vehicle did not qualify for lemon law or buyback/replacement. Writer advised that customer accepted the vehicle payment and about rental. SM states that the AM has approved for the vehicle payment to be given to customer. SM states have all the information and will give to AM. SM states will submit and take care of the rental vehicle. SM states that customer has to submit a rental bill to SM to submit to AM. SM states that the last time customer was in could not duplicate concern. Writer thanked dealer for the information and will also email the AM on this.
******IMMEDIATE SUPERVISOR******
Customer was transferred to an immediate supervisor at ext. 40638. Miss. [redacted] is passionately less than satisfied with the replacement vehicle outcome per lines 313 - 319. Writer advised that there is no further information regarding the Care Analyst Team s review. Customer advised that the vehicle brakes immediately engaged while the customer was traveling at 55 mph. Customer requested for the vehicle payment and rental reimbursement to be sent to the customer immediately. Customer alleges that the payments were coming from the dealership, in particular SM Dennis. Writer verified the information with the Case Manager who advised that the Area Manager is involved in reimbursing the customer and a call would be made to the dealership while writer had the customer on the line (please reference lines 328 337). Customer also stated taking the vehicle to Davis Moore dealership to obtain a second opinion. Customer requested for CAC to cover the rental. Writer declined due to no

diagnosis being done but that rental will be assisted with once the diagnosis is performed and repairs have started. Customer also requested for the extended warranty purchased through Parks (68116) to be refunded. Writer stated that the warranty is a dispute between the dealership and the customer as it was purchased through the finance department with the vehicle loan. Customer also stated repurchasing a new warranty once the customer finds a suitable dealership. Customer passionately refuses to work with Parks (68116) due to the less than satisfying service the customer has experienced with the finance, sales and service department. Writer advised that the feedback with be handled through the proper internal channels. Writer then realized that the call with the customer was dropped. Writer contacted the customer at [redacted] and left a message apologizing for the dropped call and requested the customer to return writer s call to ext. 40638 or to contact the Case Manager at ext. 40675 to conclude the conversation.
******SUPERVISOR CALLBACK******
Writer contacted the customer again [redacted]. Writer was informing the customer of speaking with the Case Manager and attempting to obtain the proof of payments for the rental and vehicle payment that the dealership is reimbursing to the customer. Writer noticed that the call dropped and was disconnected. Writer reattempted to reach the customer at [redacted]. Writer left a message advising of the fax number and that writer will send a documentation request link to obtain the proof of payments. Writer stated that the Case Manager will follow up with the customer no later than 11/28/2014 but that an attempt will be made before the holiday. Customer called back immediately after message to ext. 40638. Writer reiterated obtaining the proof of payments and follow through will be done with the dealership. Customer also wanted to add that the dealership damaged the dash lining when trying to pry it with a flat head screw driver. Customer stated that the dealership has ordered a part to replace the damaged piece. Writer advised that the Case Manager will follow up with the dealership next week before contacting the customer. Customer advised that there is no further assistance needed by writer at this time.
Received email response from AM
Writer contacted customer. Writer explained that the documents to cut the check for the car payment have been received and need the documents for the rental. Customer states were told by dealer that if more documents were needed then Chrysler would ask for more documents. Customer does not want to have to deal with the dealer. Writer advised customer that writer will send to customer a link to send in the rental bill and proof of payment to writer to forward on. Writer advised customer that writer will keep follow up with customer on this.
****** Below Customer Contacted for Documentation Request ******
[redacted] on 2014-12-03 @ 20:03
***** Customer Document Received *****
Area Manager called on behalf of customer requesting to speak to the Case Manager. Agent refferred to AC ID 19956
Writer received voice mail on 12/4/2014 from AM Rck to call back about the check.
Customer Document Reviewed.
Writer contacted AM back. Writer explained to AM that customer would like to get rental covered by Chrysler. Writer states that the dealer said would submit to AM for approval. AM states will reimburse the one vehicle payment. AM states will look into the rental and let writer know.
AM is reimbursing customer for one months payment and rental as goodwill. Total is $1089.93.

End of Status Update
Begin Customer Message reviewed:
Hello Ashley,
I have send a letter with copies of ROs and sales info to chrysler and asked to get the car replaced.
The FCW system got worth since the last repair. It now logs at times on to vehicles in the right or left lane and flashes 'BRAKE' when I am partially past that vehicle. The FCW does not apply the brake at that time even so it is set to brake.
One time the ACC was set maintaining the set speed while the FCW flashed 'BRAKE'. The ACC is also acting up at times. I pass a vehicle traveling in the right lane while on a set speed, the ACC slows my car somewhat down (not behind the passing vehicle) and than returns to the set speed.
Regards
[redacted]
Iam for an other week in NC.

Customer contacted writer; customer stated that he will be on vacation all next week. Customer stated that he does have an appointment on 11/25. Writer advised calling on 11/24 to verify.
Status update provided via email to the following email address: [redacted]t
This is Ashley with Jeep Enhanced Customer Satisfaction. I just wanted to call to remind/confirm that you have a scheduled appointment for tomorrow 11/25. Give me a call or reply to this email if plans have changed or you have any questions/concerns. Thank you and have a great day!
End of Status Update
David called and stated customer informed them to bring vehicle in so they are able to put in a data recorder and they do not have a data recorder for a y Tec vehicle and they have been unable to duplicate the customer s concerns. David also stated he will speak to his SM about getting one, writer stated we will inform CA to contact customer and further discuss what the next course of action will be.
Writer contacted SA David; SA stated that he test drove with the customer and found nothing wrong with the vehicle. SA advised that the customer is not suppose to use the cruise control in stop and go traffic. SA advised that he is going to have the AM come and drive the vehicle. Writer advised contact information and advised SA to contact writer with updates.
Agent attempted to contact customer [redacted] however, customer was not available.
Left message for a return call at extension 40513. The reason for the customer contact was to provide or request the following information:

Advise lines 84-89.
Agent attempted to contact customer at 4[redacted], however, customer was not available.
Left message for a return call at extension 40513. The reason for the customer contact was to provide or request the following information: Advise lines 84-89. Writer will attempt again on Wednesday 12/3.
Writer attempted to contact SM David and left a message requesting a call back in regards to AM appointment.
Writer contacted customer; Writer advised lines 84-89. Writer advised contacting customer back once an appointment is scheduled.
Writer dialed SM David who stated he is still waiting for a response back from his AM and to contact him back next week when he has more information.
Writer contacted SM David; SM stated that the TA for their area has retired. SM stated that his AM and himself is working towards getting the TA from Alabama to come look at the vheicle. SM stated that the AM is Gaylon Morgan. Writer advised calling SM on Thursday for further updates.
Writer contacted SM David; SM stated that the TA will not be able to come and look at the dealership until the first of the year. Writer advised contacting SM once a week until a concrete appointment is scheduled.
Writer contacted customer; Writer advised lines 111-113. Writer advised that another CA will follow up with customer once a week until appointment can be scheduled.
Called David sm to check on if there is a date on when the TA will be out. David sm advised writer that he does not know if they are going to send a TA out from Florida or where but they did advise him it would be after the 1st of the year.
Called [redacted] customer to advise that writer did speak with the dealership and that there will not be a TA out till after the 1st of the year. Customer advised writer that would be fine, and he will be out also till 1-10-15. Writer advised customer that writer will note the case and will be checking with the dealership for a better date for the TA and will contact customer after customer returns.

appointment. So, just give the dealership a call, and we can get an appointment scheduled. Thank you and have a great day!
End of Status Update
Writer contacted dealership on 865-932-4144 and requested to speak to SM David. SM advised that for case to move forward, an appointment with the tech rep and the customer needs to be arranged so a test drive can be completed. SM advised that customer is having problems with the adaptive cruise control as he is trying to change speeds. Dealership is having a difficult time helping customer how to operate vehicle properly. SM will not move forward with any repair attempts of diagnosis until meeting has been completed. Dealer has been trying to resolve for three months. SM advised that meeting was set up but customer did not keep because of bad weather. SM will contact tech rep and try to reschedule appointment.
Writer advised that writer will be CA on case at this time and will email writers contact information to dharkleroad@rockytopcjd.com.
Writer attempted to contact customer at [redacted]. Writer spoke with Mrs[redacted]e, who advised that it would be best to call back in an hour. Writer will call back.
Writer attempted to contact customer at 4[redacted]. Writer spoke with M[redacted] and advised that writer will now be the CA on the case.
Customer gave permission for writer to send contact information by email. Customer also noted new contact information on call. Writer and customer agreed that writer would monitor case and followup after meeting had been set up by dealer.
Writer contacted dealership on 865-932-4144 and spoke with SM David. SM is still waiting for reply concerning meeting with tech rep. SM is hoping to have an answer by early next week. Writer will follow up again on 03.12.2015 if SM has not made contact.
Writer contacted dealership on 865-932-4144 and spoke with SM David. SM advised that meeting has been set up for 03.18.2015 at 11 am.
Status update provided via email to the following email address:
[redacted]t
Thank you for working with Jeep Enhanced Customer Satisfaction concerning your case [redacted] I have been advised by the dealership that a meeting has been set up concerning your vehicle on 03.18.2015. I will follow up with you on 03.20.2015 to be sure that your concerns have been addressed. Also moving forward, I will be your customer advocate. My name is Leslee and you can reach me at 800-763-8422 my direct extension is 40614. I am usually in the office from 7 am until 1 pm MST.
Thank you again for working with Jeep Enhanced Customer Satisfaction.
End of Status Update
Writer contacted dealership on 865-932-4144 and requested to speak with SM David, however,
SM not available. Left message for a return call at extension 40614.The reason for the dealer contact was to provide or request the following information: Get updated on meeting with tech rep on cruise control.
SM David made contact and advised that the tech rep heard a noise that happens when the vehicle slows and speeds up and it researching. Tech will try to be back at the dealership in one week. Writer will follow up again on 03.27.2015.
Status update provided via email to the following email address:
[redacted]
Thank you for working with Jeep Enhanced Customer Satisfaction concerning your case [redacted] I spoke with the service manager, David, at the Rocky Top dealership and he advised me that the tech that test drove your vehicle would like some additional time to research your concerns. I will follow up with you again on 03.27.2015. If you would like to speak with me before that date, please contact me at 800-763-8422 my direct extension is 40614. Thank you for your patience and for working with Jeep Enhanced Customer Satisfaction.
End of Status Update
Writer contacted dealership on 865-932-4144 SM David. SM advised that tech made contact and advised that they are aware of another Jeep that is experiencing the same concern and will continue to research. Writer will follow up on 04.08.2015.
Status update provided via email to the following email address:

[redacted]
Thank you for working with Jeep Enhanced Customer Satisfaction concerning your case [redacted]
I spoke with the service manager, David, at the Rocky Top dealership again today and he advised me that he is still working with the tech. The tech is requesting additional time to complete more research. I will continue to check back with the dealership and keep you updated. As I will be out of the office and back on 04.07.2015, would it be ok for me to update you on 04.10.2015? If you need assistance before that date the SM would be happy to assist you or you can call my number - 800-763-8422 EXT 40614 - press 0 and another customer advocate can assist you. Thank you again for working with Jeep Enhanced Customer Satisfaction.
End of Status Update
Writer contacted dealership at 865-932-4144 and spoke with SM David. SM advised that he will contact the tech and get some firm information to move the case forward (Tech researching another vehicle with similar cruise control issues). Writer will follow up again on 04.09.2015.
Agent attempted to contact dealer Service Manager at 865-932-4144 however,
SM David not available. Left message for a return call at extension 40614. The reason for the dealer contact was to provide or request the following information: Get an update on what Tech would be doing concerning cruise control issues
Writer contacted dealership at 865-932-4144 and spoke with SM David. SM advised that the tech (Tommy) will email writer directly about what he will be doing to resolve the customers concerns.
Writer attempted to contact customer at [redacted]4. Writer advised that writer will make contact as soon as writer receives email from tech. If no information is received, writer will contact customer and set new follow up date.
Writer contacted dealership at 865-932-4144 and requested to speak with SM David. SM was not available and writer spoke with SA John, who advised that SM was doing test drive but that he would give him message to contact writer as tech has not emailed writer yet.
Writer contacted dealership at 865-932-4144 and spoke with SM David. Writer advised SM that contact had not been received from Tommy and SM advised writer to contact him directly at 407-461-5740 or email him at [redacted]
Writer contacted tech Tommy who advised that he heard clicking noise and that he will be going into the dealership in May and arrange for SM to set up appointment for customer. Writer inquired about case handling and Tommy advised that he usually has authority to do repairs and works with dealer. Writer inquired if writer should get updates from dealer or Tommy. Writer advised that CA should get updates from dealer and monitor for customer. Writer will contact customer and SM and advise.
Writer contacted SM David and advised him the case will be transferred to P67 for recall handling of parts and that customer will be contacted about how case will be handle when tech Tommy is available.
Writer attempted to contact customer at [redacted], however, customer was not available.
Left message for a return call at extension 40614. The reason for the customer contact was to provide or request the following information: Writer advised customer that writer will be transferring case for P67 recall handling. Writer will also attempt to contact customer again on 04.6.2015 to advise of how clicking noise concern will be handled.
Writer contacted customer at [redacted] Writer advised customer that tech Tommy will be coming to the dealership but does not have his schedule set. Tommy will contact the dealership and they will contact him and set up times. Writer advised customer of P67 recall and handling process. Customer inquired about recall and writer reviewed all recalls with customer.
See case [redacted] for P67 recall handling.
Writer contacted dealer at 865-932-4144 and spoke with SM David. Writer verified that customer is on dealership waiting list for parts.
CLOSED LOOP UPDATE - no need for additional follow-up.
Dealer sent email that customer has appointment set for 05.13.2015.

Customer Survey Comments:
1. Squeak/rattle/abnormal noises from center console
How often does this trouble occur? Trouble occurs regularly.
Please describe in the box below where from the center console the trouble with abnormal noises is located: rattle noise from front interior of the vehicle, don t know if it s from the center console, door panels, or dash
Approximate mileage when trouble was first noticed was: 0 - 1499 miles.
To the best of your recollection, the trouble was first noticed: At delivery.
2. Axle makes whining, howling, clunking, or grinding noises
Please describe conditions when this trouble occurs: I ve marked the axel as the thumping or clunking might be from the axel and not the

transmision
Approximate mileage when trouble was first noticed was: 0 - 1499 miles.
Are you using your vehicle for towing when the problem occurs? No.
To the best of your recollection, the trouble was first noticed: At delivery.
3. Abnormal squeaks/rattles/noises coming from front doors
Please describe conditions when this trouble occurs: in rough asphalt with large gravel, or over uneven road when there is vibration
Additional Comments: There s rattling noises from all over the dash and instrument panel of the vehicle. I ve taken the vehicle for test drive with dealership s technician and the source of the noises were not know so they said they might need to open the dashboard to find out and I decided not to touch the dashboard and instrument pannel of a brand new car. The noises are absolutely horrible for a +$70k brand new vehicle specially the SRT which is the top of the line
To the best of your recollection, the trouble was first noticed: At delivery.
How often does this trouble occur? Trouble occurs intermittently.
Please indicate which door has abnormal noises (check all that apply): Driver s side front door. rattling noise either from driver s door or instrument panel or air vents
Approximate mileage when trouble was first noticed was: 0 - 1499 miles.
4. Front doors are difficult to open/close
Approximate mileage when trouble was first noticed was: 0 - 1499 miles.
To the best of your recollection, the trouble was first noticed: At delivery.
Please indicate which of the following best describes your concern (check all that apply): Difficult to close. front passenger s side door is difficult to close. Jeep dealership at first didn t notice the difference but second time taken to the dealership they agreed to the problem, but haven t fixed it yet as they need approval from chrysler for the hinge. As per my experience this just needs alignment/adjustment and not replacement.
Please describe conditions when this trouble occurs: all the time
How often does this trouble occur? Trouble occurs regularly.
5. Excessive wind noise
Approximate mileage when trouble was first noticed was: 0 - 1499 miles.
How often does this trouble occur? Trouble occurs regularly.
Please indicate the location of the wind noise (check all that apply): Front windshield. from either the sunroof or front windshield
Please describe conditions when this trouble occurs: wind noise at higher speed or windy conditions
To the best of your recollection, the trouble was first noticed: At delivery.
6. Squeak/rattle/abnormal noises from instrument panel/dashboard
To the best of your recollection, the trouble was first noticed: At delivery.
Approximate mileage when trouble was first noticed was: 0 - 1499 miles.
How often does this trouble occur? Trouble occurs intermittently.
Please describe in the box below where from the instrument panel/dashboard the trouble with abnormal noises is located: rattling noise from the front interior of the vehicle
Please describe conditions when this trouble occurs: uneven road, pavement, humps, etc.
7. Squeak/rattle/abnormal noises from rear cargo shelf/cargo cover
To the best of your recollection, the trouble was first noticed: At delivery.
Please describe in the box below where from the rear cargo shelf/cargo cover the trouble with abnormal noises is located: I hear it when I m driving, so don t really know where it is exactly but probably the tailgate or the side pannels
How often does this trouble occur? Trouble occurs intermittently.
Approximate mileage when trouble was first noticed was: 0 - 1499 miles.
Please describe conditions when this trouble occurs: in bumps, uneven road
8. Transmission makes abnormal/excessive noises

Please indicate driving condition when noise occurs (check all that apply): Braking. as explained above
Soon after vehicle start-up.
Normal acceleration.
Deceleration.
City driving/stop-and-go traffic.
Please indicate approximate operating temperature when shifting trouble occurs (check all that apply): Normal condition: Vehicle has been driven more than 20 minutes from a cold start, or vehicle is restarted after being off for less than 1 hour. I think it s more noticeable when vehicle is warm and has been running for a while
How often does this trouble occur? Trouble occurs regularly.
To the best of your recollection, the trouble was first noticed: At delivery.
Approximate mileage when trouble was first noticed was: 0 - 1499 miles.
Noise sounds like (Check all that apply): Knocking. there s a noise in the rear of the vehicle when it shifts after full stop, or after down-shift or brake after vehicle is moving. It seems like a lose trans mount, or a suspension bushing which is worn out. dealer ship said it s normal, but I don t believe it is.
9. Exterior moldings/trim pieces loose/misaligned/falling off
Please indicate which body panels had moldings/trim pieces that were loose/misaligned/falling off (check all that apply): Driver s side front fender. driver s side fender flares are lose with a gap between the body and the plastic fender flare. Weak Adhesive. Took to dealer they were not sure if warranty will cover or not.
Please indicate the type of trouble you experienced regarding the exterior moldings/trim pieces: Exterior molding/trim is loose.
To the best of your recollection, the trouble was first noticed: Within the 1st month after delivery.
Additional Comments: The adhesive holding the molding/fender flares to the body could be of poor quality. It will stick when you press it with the palm of your hand for a while but will loosen over time, under sun, etc.
Approximate mileage when trouble was first noticed was: 1500 - 3999 miles.
Collision Avoidance/Alert System works properly, but is difficult to understand/use; controls are in a poor location
Please indicate the trouble you experienced with the Collision Avoidance/Alert System (check all that apply): Other (please describe). Brake warning alert sounded 3 times in absolutely normal street conditions and created a lot of tension for us. We couldn t understand why this alert was activated. No body pulled in front of us, no loss of traction, no interfering objects or obstacles... just warning and the dealership couldn t understand why it happened either...
10. Abnormal Noises
Abnormal Noises Squeak/rattle/abnormal noises from instrument panel/dashboard.
Squeak/rattle/abnormal noises from rear cargo shelf/cargo cover.
Squeak/rattle/abnormal noises from center console.
Squeak/rattle/abnormal noises from door panels.
12. Transmission Noises
Transmission Noises Transmission makes abnormal/excessive noises.
13. Squeak/rattle/abnormal noises from door panels
How often does this trouble occur? Trouble occurs regularly.
Please indicate which interior door panels had abnormal noises (check all that apply): Driver s side front door. don t exactly know where this rattling noise comes from, but it s from all over the frond driver s side of the vehicle, could be instrument panel, doors, etc.
To the best of your recollection, the trouble was first noticed: At delivery.
Approximate mileage when trouble was first noticed was: 0 - 1499 miles.
14. Axle(s)
Axle(s) Axle makes whining, howling, clunking, or grinding noises.
15. Wind Noise
Wind Noise Excessive wind noise.

16. Front Doors
Front Doors Front doors are difficult to open/close.
Abnormal squeaks/rattles/noises coming from front doors.
17. Displays and Instruments
Displays and Instruments Collision Avoidance/Alert System works properly, but is difficult to understand/use; controls are in a poor location.

Writer contacted DLR 45214 and spoke to Joe who confirmed that they are the selling DLR but they are hours away from the customer s home. He confirmed that they don t have an open RO and no schedule appointment for diagnosis. He stated that they will be happy to diagnose the vehicle but it will be an inconvenience for the customer due to the distance.
Agent attempted to contact customerat [redacted] however, customer was not available.
Left message for a return call at extension 40551. The reason for the customer contact was to provide or request the following information:
Writer wnted to discuss his case further and get his expectations.
CONTACT UPDATE - Customer was contacted today at 4:30pm MST.
Customer was provided with agent s extension: 40551.
Writer contacted the customer a[redacted] and he has noise concern all over the vehicle. he lives in California now and he took the vehicle to Marin Chrysler DLR *415-886-3222* and test drove the vehicle with the tech and was advised that it s operating normally and the noise comes on only when driving on rough roads. Customer also has a front passenger door concern. When shutting it will not close the first time and the tech also duplicated it and advised that it might need some hinges to the lock system but would not know if Chrysler has it available for the model. Customer stated that this is not normal and are very concerning for a very new top of the line brand. He expects for the engineers to be aware and do something to resolve it. DLR released his vehicle advising that it s operating normally at this time. He stated that he listed the vehicle for sale now but still would like his concerns resolved. writer apologized and advised that he will contact the DLR and inquire if they

can open a STAR case or contact a TA to inquire verify if there s a resolution to is concerns at this time. He understood and agreed for a follow up no later than Wednesday 11/12/14.
Writer contacted Marin Chrysler DLR *415-886-3222* and spoke to Service Advisor Max since the SM was in a meeting. SA confirmed that he was the writer when it was there and that the air vent noise was never duplicated, the rattle in the shifter was as designed since they compared it to like vehicles which does the same. The clunk noise when stopping was never duplicated but they did a TCM update for it. The front passenger door not shutting at first attempt was never duplicated. SA confirmed that at this time the vehicle is operating as designed. Current mileage is 2921 mi.
Writer contacted the customer at [redacted] and he requested for the writer to call him some other time since he was busy.
Agent attempted to contact customer at [redacted], however, customer was not available.
Left message for a return call at extension 40551. The reason for the customer contact was to provide or request the following information:
Writer wanted to discuss lines 222-229 and to advised that if he is still having the issues to feel free to visit any Jeep DLR he preferred.
Writer contacted the customer at [redacted]6 and was advised of lines 222-229. Customer stated that he doesn t believe that the issues are critical or life threatening but it will be destructive or inconvenience & hoping that the clunk in the rear end of the transmission is not a safety issue but he is not driving the vehicle anymore & is waiting for it to be sold. Customer wanted the engineering to be aware about the issues at this time but he has no plan to bring it back to the DLR.
Writer apologized and advised that surveys are made so we can make things better and our engineers to investigate things out of their feedbacks.
Customer understood and agreed for the case to be close since he has no other concerns.
CLOSED LOOP UPDATE - no need for additional follow-up.

Briefly summarize why the customer is contacting Chrysler: Customer seeking lemon law.
Briefly summarize what the customer is expecting: Lemon law.
Offered to have vehicle looked at per the terms of his warranty. Advised we can escalate to case management to ensure all resources are accessed to guarantee vehicle satisfaction. Customer agreed, customer states he ll be dropping the vehicle off at DLR 63427 tomorrow. Customer states he s gone in a few times now for CEL issues, customer feels the electrical in the vehicle is very glitchy. Customer states sometimes his rear view camera won t work and he keeps getting all kinds of warning lights on his dash. Advised as he has an appointment tomorrow his case would be escalated and he would be contacted in 1-2 business days.
Preferred method of contact: Phone.

Writer contacted the DLR and spoke to SA Justine since the SM was off for the day. Advised the SA of lines 5-7. She confirmed that the vehicle is not at their DLR and there is no open RO. She stated that the last time it was there was on 10/16/14 for the cruise control that disengaged and

was repaired. Writer advised her that customer has check engine light, warning lights & rear view camera issues. SA advised to let the customer schedule an appointment for diagnosis ahead of time.
Corection for line 24; last time the vehicle was at DLR 63427 was on 10/16/13.
Agent attempted to contact customer at [redacted]3, however, customer was not available.
Left message for a return call at extension 40551. The reason for the customer contact was to provide or request the following information: Wanted to discuss his case and get his expectations.
CONTACT UPDATE - Customer was contacted today at 12:40pm MST.
Customer was provided with agent s extension: 40551.
Writer contacted the customer at [redacted] and he stated that the day he purchased the vehicle he went back due to wheel alignment repair and it was done twice.
2 visit for check engine light related to the cylinder deactivation
3 visit for the adaptive cruise control before they finally resolved it
2 recalls.
He stated that he contacted Uconnect and he was able to update his own software update for the 3rd time by their assistance since the screen was totally off and is now resolved.
Now he s back at the DLR 44566 for the reoccurring check engine light related to the cylinder deactivation
Vehicle blowing smoke when starting which is a known issue TSB is available.
21 point inspection since every after his oil changed, oil will go over his engine creating an oil smell and he was advised that it s a design issue.
Tire pressure & minor inspections
P36 recall.
Customer expects a replacement vehicle due to his different issues and he wouldn t want to go back to the DLR over & over & thought that he had a bad purchased and would like to have a vehicle where he will visit the DLR only for maintenance appointment. Writer apologized and advised that we don t have a LL dept and would like to de-escalate his replacement vehicle (BB) request by looking into offering him a possible SC (added care plus). Advised that s what the 536 warranty for to cover him in case things like these happen. Advised that she would be happy to research if Added care plus is possible and if it is, it will be attached after the repairs are confirmed and he has no other concerns. Customer understood and agreed for a follow up on Monday 11/10/14.
Writer attempted to contact the SM and SA Lee but was put on hold for 9 mins. Writee disconnected the call and will try again later.
Prior to line 35; customer contacted the writer and left a message requesting a callback.
Customer contacted the writer on 11/07/14 after 5pm CST and left a message stating that the DLR found fault with the sensor in the gas gap and repaired. DLR doesn t have the part for the P36 recall and he would not take his vehicle back there for the recall since he is not confident with them anymore. DLR was unable to duplicate the blowing smoke concern and is not aware of the TSB for it and customer is disappointed. DLR took care of the 21 point inspection. Customer requested a callback.
Writer contacted the DLR and spoke to SA Lee since the SM was unavailable at the time. SA confirmed that the vehicle has an engine light on POF is the fuel filler tube cause unknown or not abuse/neglect and they repaired it. Customer also addressed the smoking at start concern but they were unable to duplicate the concern. Write advised that there is a STAR case for it S1309000012 and inquired if they re aware. SA stated that even though a STAR case is available, they need to duplicate the concern first before further warranty repairs will be performed. SA also confirmed that they did not do a 21 point inspection, they just checked the fluid and tire pressure which are both normal/no faults found. They ordered the P36 recall part. Vehicle was picked up on Friday night 11/07/14. Current mileage is 20720 mi.
Was the customer in a rental? NO
Did the customer have a co-pay? under warranty

Writer contacted the customer at [redacted] and he confirmed that the check engine light is resolved at this time but is very skeptical and not confident with the vehicle anymore and stated that the engine light might reoccur after their warranty expired. Customer understood if the DLR cannot duplicate the smoking issue but he is planning to bring it to another DLR and see if they can perform the STAR case for it. Customer confirmed that he has no plan to wait for the P36 to be completed at DLR 44566 since he is frustrated that every time he has a recall he will bring the vehicle in but the parts are not available yet. Customer wanted to know if WA670N will be approved to be offered for him since he will proceed to BB or contact an attorney if WA670N will not be offered. Writer advised that it will be determined no later than Wednesday 11/12/14. Customer agreed.
Agent attempted to contact customer at [redacted], however, customer was not available.
Left message for a return call at extension 40551. The reason for the customer contact was to provide or request the following information: To discuss an offer.
Customer contacted the writer on 11/11/14 and left a message requesting a callback.
Writer contacted the customer [redacted] and he confirmed that the vehicle is okay so far. He inquired if it s possible for him to be offered a max care. Writer advised that offering a service contract is not something that CAC would do on regular basis & any offers are goodwill and will be based on the issues they ve experienced. For his case since he has different components problem he is eligible for the Added care however the writer tried to justified the added care plus instead due to his reoccurring issues, inconvenience and he is a valued customer. Writer offered WA670N and he accepted it and verified his address which matches the one on file. Customer inquired if the $100 deductible can be waived. Advised that in some instances it can be waived especially if it is a reoccurring issue but the DLR has the capacity to waive it for him so building a strong relationship & maintaining his vehicle with the DLR would benefit him. Advised that he will receive the paper works in the mail within 30 days from when it was attached on his VIN. He can use the SC at any Jeep DLR. Writer will email him the contract number for his record. Customer understood and agreed for a follow up no later than 11/18/14.
WA670N Contract created. Contract number is [redacted].
Status update provided via email to the following email address:
[redacted]
Hello, this is your case manager Dynee from Jeep customer care. The contract number for your Added Care Plus is 39434637. You can use it at any Jeep dealership & you will receive the paper works within 30 business days. Thank you for being a valued part of our Jeep family.
Have a wonderful day.
End of Status Update
Writer contacted the customer [redacted]3 and was advised of line 129 & sent an email. Customer confirmed that the vehicle is working fine so far and would need more free time to schedule a second diagnosis for the smoking issue. Per lines 94-96 writer will follow up on Monday 11/24/14 to confirm if he has a scheduled diagnostic appointment to other DLR.
CUSTOMER - CM called Mr. [redacted]. Customer has had so many electrical issues, wants to discuss possibility for UConnect cost assistance.
Prior to line 144; customer contacted the writer & left a message on 11/20/14 & stated that he would like to know if the writer can extend their Uconnect free trial for another year. Customer is asking for free uconnect extension for a year.
Customer contacted the writer on 11/24/14 and left a message requesting a free uconnect extension or a remote start from his phone for free. Requested a callback.
Note: the customer Will seek another opinion/diagnosis Dispo has been put since 11/17/14.
Contacted the customer at [redacted] was advised that CAC do not

provision Uconnect free extensions but provided the Uconnect customer service number for his inquiry *855-792-4241*. Also advised that CAC do not provision accessories. Customer understood & confirmed that he will seek a second opinion for his blowing smoke concern but not too soon. He has no schedule appointment for it at this time. Customer has no other concerns & his issues are resolved to his satisfaction. He agreed to close the case.
CLOSED LOOP UPDATE - no need for additional follow-up.

Max Davis telephoned and that he started the vehicle about a week ago and there was a loud ticking sound. The vehicle has been at the dealer since Wednesday 11/5 and the customer is currently in a rental vehicle. Customer stated that he is in a van and seeks assistance with rental reimbursement. He is scheduled to return the rental on 11/11 with the possibility of being placed in a loaner vehicle. CM confirmed/updated customer address. Case and contact information to be forward to email address [redacted]. Customer contact number is 818-421-0795.
Status update provided via email to the following email address:
[redacted],
Thank you for contacting SRT Customer Assistance Center. The case for your concern is [redacted]. I will telephone you with an update. Please note that our number is 855-778-8326 and my extension is 4720313. If you have questions please give me a call.
Sincerely,
Veronica
SRT Specialist
End of Status Update
CM spoke with Mike, SM who shared that they have approximately 12 -13 items to check out for the vehicle including recall issues. Issues include a ticking sound from the vehicle, improperly welded sunroof, left fender panel need DI approval, right fender customer pay, front end alignment of the bumper (suspect the vehicle may have been in an accident), adaptive cruise customer pay or insurance, 3 recalls and 3 RRt s. SM stated that they did not put the customer in a rental. CM to follow up with customer for the rental. SM stated that the repair will take approximately 1 - 1 1/2 weeks to repair.
