ACTION / SUMMARY INFORMATION

Action: Open a PE

Summary:

Riders report random, low speed, stalling occurs while underway. Typically occurring when accelerating from a stop or when slowing, four operators allege they were injured when they lost control after their motorcycle stalled while they were turning at low speed.

This investigation is opened to better understand the cause and frequency of the stalling events.

The Canadian Ministry of Transport (CMOT) has an open investigation concerning this subject as well (CMOT inv# 2015455).
