Engine>Engine Stalling>Engine runs, then dies/stalls>

What type of fuel do you most often put into your vehicle? Regular gasoline.
Please describe conditions when this trouble occurs: It was a wet day, sprinkling, I did not hit any puddles that I was aware of.
To the best of your recollection, the trouble was first noticed: Within the 1st month after delivery.
Approximate mileage when trouble was first noticed was: 0 - 1499 miles.
Additional Comments: Engine stalled only once so far. It would restart immediately but sputtered and stalled as soon as I put car in drive. I was in a parking lot going approx. 5 mph when this occurred.

Transmission and Drivetrain>Automatic Transmission>

Automatic Transmission Hesitation or delay when shifting between gears.

Transmission and Drivetrain>Automatic Transmission>Hesitation or delay when shifting between gears>

Going into which gear/gears does the trouble occur? (check all that apply) Not sure.
Additional Comments: I love the fuel economy of the 8 speed transmission. There are times when I accelerate to pass that the transmission seems to hesitate a bit.

Entertainment/Navigation System/Connectivity>Navigation System>Navigation system works, but traffic information doesnt work/or is difficult to understand>

Please indicate what issues you are experiencing with the traffic information (check all that apply) Traffic info does not give me enough advance warning in order for me to change my route. It waits until I am already in the traffic jam to tell me.
Additional Comments: The traffic information is a great idea in theory but I have found it pretty useless in actual day to day commuting.

Entertainment/Navigation System/Connectivity>Navigation System>Navigation system works, but missing information; has incorrect information; gives wrong directions>

Please indicate which of the following best describes your concern (check all that apply): Navigation system takes me out of my way to get to my destinations. I often have to ignore it part of the way.
Please indicate which navigation system item has trouble (check all that apply): I took a road trip across three states this summer. The navigation would not have any information on the back roads. When driving on the interstate it could not find gas stations or places to eat.
I could see the entrance to the new expressway but it kept wanting me to turn off before then.
It took me to an empty lot.
Additional Comments: The navigation system is very frustrating and is not up to date. Many times it can't find the address I put in. I bought this car new and have only had it 8 months it should not be out of date already.

Points of Interest not well defined

Points of Interest not well defined	
Please describe the trouble with the Points of Interest within the Navigation system	Most of the time if I type in a name of a place it will not find it. And to search through all the categories takes too long.
Additional Comments:	Many times I know the exact name and address of a restaurant and cannot find it in Points of interest or by address if it is newer than 3 years old.
Hands-Free Phone / Bluetooth system loses connection	
How often does this trouble occur?	Trouble occurs intermittently.
Connection problem happens on:	Cell phone network.
Is there more than one phone paired to the vehicle?	No.
Lost connection problem happens when:	In the middle of a call.
Were you in the middle of a call?	Yes, and did not transfer call to headset.
Hands-Free Phone / Bluetooth system phonebook does not work correctly	
How many contacts do you have in your phone?	25-499.
How often does this trouble occur?	Trouble occurs regularly.
Did you refer to the voice tutorial, phone tutorial and voice training when experiencing hands-free phone/Bluetooth system issues?	I did, but it didn't address all my questions.
Additional Comments:	My phone book shows up on the touch screen but when I try to dial out, it does not connect. I have never been able to make a call from my car using the phonebook in the car. I have to dial or use the phonebook on my phone.
Voice Activation / Recognition doesn't recognize command	
Please describe when this trouble occurs:	voice recognition is the most frustrating feature on this car. I keep the user guide handy but it does not help. I repeat the street name over and over and it won't recognize it. I finally have to pull over and type in the name using the touch screen. I have tried speaking softly, loudly, clearly, slowly. It does not understand me and I am American, born here speak English my whole life.
What button did you use?	VR button on the steering wheel
Do you usually set HVAC vent direction toward ceiling?	Yes.
How often does this trouble occur?	Trouble occurs regularly.
Additional Comments:	I hate the voice recognition feature. It is so frustrating. I have to repeat and repeat over and over. I finally give up and pull over and type in my information.
Unnatural sounding voice or difficult to understand	
Please describe when this trouble occurs:	The voice sounds very mechanical and does not pronounce the street names correctly. The nav system in my other car sounds like a real person.
Do you usually set HVAC vent direction toward ceiling?	Yes.
How often does this trouble occur?	Trouble occurs regularly.
Entertainment/Navigation System/Connectivity>Voice Activation/Recognition>Voice Recognition feature does not have enough functions available>	
Please describe additional functions you would like to have:	I would like to be able to just say the name of place like McDonalds or Target instead of having to always give a complete address

Transmission and Drivetrain>Automatic Transmission>Gear selector is difficult to operate (auto. trans.)>	
Going into which position is the gear selector difficult to operate? (check all that apply):	Have often only gotten into reverse when parking. Hit the engine off button, only to find the car going backwards as I'm getting out of the car. Only then do I realize I didn't get it into "Park", and the engine is still running. Often times when backing out of my garage, I shift from Park into Drive accidentally rather than reverse. So far I've caught the error every time. This is the stupidest thing I've ever heard of. It doesn't work like a manual control. Apparently it still has some automatic actuator in it. The paddles get pressed accidentally when turning the steering wheel, which causes the car to change shifting modes without the driver realizing it, until the engine rpms go up too high. Then I have to look around to see what's going wrong. Getting used to it now, but it's really annoying. Get rid of it entirely or put in some kind of positive "feel" manual shifting mechanism. Whoever designed this system should be fired!!
Why is the gear selector difficult to operate?	Other (please describe).
How often does this trouble occur?	Trouble occurs regularly.
Please describe conditions when this trouble occurs:	There is no "feel" for which gear I have selected. I saw a 1950 something Plymouth that had a pushbutton transmission selector. You might want to go back to that.
To the best of your recollection, the trouble was first noticed:	At delivery.
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
Additional Comments:	This would be a fantastic car if it had a clutch and manual transmission.

You rated vehicle storage and space usage High. Use this space to provide any specific comments you would like to share.	Only problem is there is really no convenient place to put my phone, but since it all comes up on the screen when a call comes in it's not that big of a deal.
You rated operating controls while driving (gear selector, turn signals, horn, etc.) High. Use this space to provide any specific comments you would like to share.	Gear selection was a little hard to get used to but now I get irritated when I have to drive another car that is made in the old style.
You rated fuel economy and driving range High. Use this space to provide any specific comments you would like to share.	I'm getting about 8 mpg more than in my 2010 model!
You rated your purchasing experience (at the dealer/dealership) High. Use this space to provide any specific comments you would like to share.	You only gave me 0-5. Those people deserve a 10!
You rated your attitude overall towards your new car High. Use this space to provide any specific comments you would like to share.	It just looks hot when I look at it, even after 8 months.

Detail on Low Rated Items

We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	The climate control system. It was repaired but still acts up. When I turned it up high enough to get it warm in the car, it wouldn't go down lower unless I turned it off and left it off for a while. When I get in a car and it is cold, I want hot air to blow out until I turn it down and then I want it to just circulate. I was really dissapointed in that, but I think every car company is using these kind of systems now.

The Spring Shift - I've realized that I actually need to look to make sure I am in gear before stepping on the gas or releasing the brake. Have started to roll backwards when I thought I was in Drive but was actually in neutral. Also, I have also discovered that when I have started to drive away I realize the car is in Low and not Drive. Now I always look before doing anything,.

Overview	
Have you referred to the Owner's Manual, Warranty Manual, or other documents that came with your vehicle to answer questions about your vehicle?	Yes.
Many of our vehicles have supporting smartphone applications with vehicle information. Have you had the opportunity to download and review your vehicle's smartphone application (if available)?	No (after completing your survey, we will provide a link to download your vehicle application to your smartphone.).
Have you taken the vehicle to a dealer to have your trouble corrected?	No.
Overall, how satisfied are you with the quality of your new vehicle?	Neither satisfied nor dissatisfied.
Would you recommend this vehicle to family or friends?	No.
Please explain further about your choice to recommend your vehicle:	No alert if you exit vehicle with engine running. In past, alerts sounded with headlights on. Chrysler thinks leaving engine on is less of a problem than leaving lights on.
If our team has any additional questions about your responses, would you accept further contact?	Yes, by phone or e-mail.

Hard controls/menus: Front seat audio/entertainment/navigation controls/menus difficult to use/in a poor location	
Please indicate which of the following best describes your concern (check all that apply):	Taking eyes off the road is bad.
Please indicate why the controls/menus are difficult to understand/use; are in a poor location (check all that apply):	Controls require too much attention (must take eyes off the road) to operate.

Entertainment/Navigation System/Connectivity>Voice Activation/Recognition>Voice Recognition feature does not have enough functions available>	
Please describe additional functions you would like to have:	I expected to be able to control the interior environment by voice. The command "heat drivers seat" doesn't work, as an example.

Detail on Low Rated Items	
You rated ease of using system displays while driving Low. Use this space to provide any specific comments you would like to share.	Don't like being forced to take my eyes off the road.
You rated operating controls while driving (gear selector, turn signals, horn, etc.) Low. Use this space to provide any specific comments you would like to share.	The shift lever is awkward. I used to be able to know what gear I was in by where the lever was. The only way I know what gear I am in is to look at the dash. I cannot go from D to R. I end up going from P to R
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	I have stated them all previously. The one that upsets me the most that I want to emphasize is the carbon monoxide issue. No warning that the engine is still running when the driver exits the vehicle. When the garage door goes down, a perfect setup for CO poisoning.

About You	
Did you purchase or lease your vehicle?	Purchase.
What price did you pay for your vehicle?	?
Is this your first new vehicle ever purchased / leased?	No.
Please tell us about the vehicle you replaced (if applicable)	Toyota. Prius. 2001. Replaced Vehicle: Purchased New.
Primary vehicle you were considering:	Lincoln. MKZ. 2014. Primary Considered Vehicle: New.
Which, if any, influenced your purchase decision? (check all that apply):	300C suited wife's discomfort better than MKZ hybrid. If the MKZ had been as comfortable to her, I would have bought the hybrid. I preferred the MKZ's cockpit, she the 300C seats. Vehicle test drive. Dealership information. Previous experience with the vehicle/brand.
Please describe any other factors (not listed above) that significantly influenced your decision not to purchase this other vehicle.	As much as I prized the MKZ's mileage and instrumentation, the wife's comfort trumped all.
Secondary vehicle you were considering:	Cadillac. ATS. 2014. Secondary Considered Vehicle: New.

What Can We Do Better?>

Feedback/Concerns:	No secondary sun visor when sun is low and the road makes the sun alternate between windshield and drivers door window. Flipping visor from window to window is unsafe. Saying your voice control is primitive is paying it a compliment. no alert when leaving car with engine running is unsafe, especially done when parked in garage. Bad gear shift design. When stopped, can't shift quickly from D to R without ending up in P. A quick shift is needed now and then to avoid problems. Car shifts are jerky under 15 MPH.
What has Chrysler done right?	Wife found seats more comfortable than MKZ and ATS.

What Can We Do Better?>

Feedback/Concerns: I love the Charger, but there were a slew of features I'd love to have, that I didn't know about when I bought the car. They are as follows: I love the 8-spd transmission, but without paddle-shifters or sport-mode, I'm incredibly disappointed in the feeling of being engaged with the car. I'd like to know what gear I'm in, instead of just "D". The driver display could easily show those details, and the display should be customizable for what I want to view. Be cutting edge, the LED tail lights should be complemented with LED headlights and LED accent lights (that can cycle through colors). Full size spare, please.

What has Chrysler done right? The body design, and the refreshed interior is a huge advancement from the first generation of the new Charger. I'm in awe everytime I see the car. The driver interface and ergonomics need some work, for sure, but the aesthetics are really great. I never liked domes ic vehicles until I saw this Charger it completely wowed me!

Vehicle Satisfaction Ratings	
What are your favorite parts of your new vehicle?	Heated, red leather seats. They're beau iful!
Is there anything about your new vehicle you would like to see changed?	Auto-close trunk, Paddle-shifters, reverse camera, compass in mirror (or on driver's display)

Detail on High Rated Items	
You rated exterior design and appearance (overall impression) High. Use this space to provide any specific comments you would like to share.	The Charger's aesthetic is magnificent. It's aggressive, and still civilized. The LED taillights are a work of art.
You rated appearance of exterior paint High. Use this space to provide any specific comments you would like to share.	N/A
You rated front view styling (front fascia, hood, grille, headlight area) High. Use this space to provide any specific comments you would like to share.	It's a wicked front design, and really looks menacing on first sight. I'd like to be able to customize the grille prior to delivery, though, without an added cost. Why can't we order and install the custom grills at no cost before purchase of the vehicle?
You rated side/profile view styling (driver's side or passenger's side exterior area) High. Use this space to provide any specific comments you would like to share.	The scalloped area of the door makes the Charger look athletic and balances the massive size of the car.
You rated rear view styling (rear fascia, bumper) High. Use this space to provide any specific comments you would like to share.	The LED tail lights win every time.
You rated wheels, rims, and tires appearance and styling High. Use this space to provide any specific comments you would like to share.	N/A
You rated transmission gear change performance (smoothness) High. Use this space to provide any specific comments you would like to share.	I love the 8spd, but there needs to be a sports mode, and the ability to cycle through gears via the driver display. In inclement weather, it's a huge benefit so I can modulate how much power I need when climbing or descending steep inclines.
You rated fuel economy and driving range High. Use this space to provide any specific comments you would like to share.	I drive 400 miles a week, and I can go to about 425 miles before needing to refuel. My previous 4-cylinder turbo was good for about 320miles before fill-up. I pay less, now, per full tank, and get more miles for it.
You rated your purchasing experience (at the dealer/dealership) High. Use this space to provide any specific comments you would like to share.	The dealership experience was fantastic.
You rated your feelings about the durability of your new vehicle High. Use this space to provide any specific comments you would like to share.	The car feels solid, although the textures of many of the interior panels feels cheaply made.
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that you feel far exceeded your expectations.	The fuel economy was a huge factor for me. I also carry a lot of gear, so having a large trunk and back seat was critical. The colored leather seats really set the car apart from other vehicles at base model pricing.

Detail on Low Rated Items	
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	The driver display / computer should be customizable with what screens are shown when driving. Cycling through info. is fine, but I want to have specific details readily accessible. I didn't know paddle-shifters were available, and I sorely wish I could have those, especially with the 8spd transmission. Backup camera should be a standard option given the size of vehicle. An integrated compass would be very useful. The sunshades feels enormously oversized and flimsy, they need to be better refined. Heated rear seats also would be great. Relocate where the USB/Aux in interfaces are (to the center dash).

It sparkles at all times... love it!!!

I'm used to the Hemi engine, so the V6 is a very nice change in terms of fuel economy but I REALLY miss the responsiveness of the engine.

This is my 3rd dealer and I absolutely loved the experience, especially comparably speaking.

Is there anything about your new vehicle you would like to see changed?	I wish I had mud flaps and a heated steering wheel again and I dislike the grill/front of the car compared to the older models. I don't like the gear shifter at all. It's difficult to use properly.

What Can We Do Better?>	
Feedback/Concerns:	I would love to have the side trim on the doors like I had on my 2008 car. I miss that look. And I really liked the older style grill. It made the car look regal and fierce at the same time. This grill looks like every other car out on the market. And I also liked the bigger boxier lights. The car should come with mudflaps!! It is always getting filthy.
What has Chrysler done right?	The color is super. The car is beautiful. Granted I would like the above mentioned things to make it better, but I really love the car overall.

What Can We Do Better?>		
Feedback/Concerns:		Definitely the knob on the electronic shifter should be angled right to get full thumb control. The electronic shifter itself does not convey sufficiently the feeling for a gear change.
What has Chrysler done right?		I am happy with about every hing else so far. I have had the car for six weeks and only 700 miles.

Overview		
Overall, how satisfied are you with the quality of your new vehicle? Would you recommend this vehicle to family or friends? Please explain further about your choice to recommend your vehicle: If our team has any additional questions about your responses, would you accept further contact? Many of our vehicles have supporting smartphone applications with vehicle information. Have you had the opportunity to download and review your vehicle's smartphone application (if available)? Have you taken the vehicle to a dealer to have your trouble corrected?		Very satisfied. Yes. Overall it is an beautiful car with many amenities and an excellent value. I hope I will get used to the "electronic shifter" becaue so far I do not care for it. See my comments above. Upgrades such as adding a sound beep to the rear-view camera, and adding sensors to the outside mirrors to warn of blind spot movements should be offered by Chrysler as parts that the dealer can add to any existing vehicle. Yes, by e-mail only. No (after completing your survey, we will provide a link to download your vehicle application to your smartphone.). No.

Overview

Have you referred to the Owner's Manual, Warranty Manual, or other documents that came with your vehicle to answer questions about your vehicle?

Yes.

Other>

Please describe the other trouble you experienced:

1. The back up camera should be accompanied by sound beep to warn the driver how close he/she is to bumping a parked car. 2. At night, the light does not offer sufficient angle and seems rather weak. But the angle of view is very poor. 3. The mirrors on the driver and passenger side should have electronic warning lights ; this is now a standard and does not need to be part of some package.

How often does this trouble occur?

Trouble occurs regularly.

Please describe conditions when this trouble occurs:

Transmission and Drivetrain>Automatic Transmission>Gear selector is difficult to operate (auto. trans.)>

Going into which position is the gear selector difficult to operate? (check all that apply):

The electronic shifter does not convey the proper feeling of gear change. The knob on the left of the shifter is erroneously angled so that the thumb cannot apply full pressure and often slides. Often I think I am in Park but I am in Reverse or other position. I believe this is a design flaw and hope a new shifter will be designed so that I can replace mine.

Why is the gear selector difficult to operate?

Other (please describe).

How often does this trouble occur?

Trouble occurs regularly.

Please describe conditions when this trouble occurs:

I believe the button on the electronic gear is not properly angled. So one can easily miss a gear change. Also I feel that the gear change itself is not sufficiently stepped so one can easily miss a step.

To the best of your recollection, the trouble was first noticed:

At delivery.

Approximate mileage when trouble was first noticed was:

What Can We Do Better?>	
Feedback/Concerns:	DONT LIKE THE STICK SHIFT,HARD 2 GET IT N GEAR. NEEDS A ASHTRAY, VERY DANGEROUS WITHOUT ONE. MAKEUP MIRROR IS MINATURE SIZE, ONLY A QUARTER OF YOUR FACE FITS.
What has Chrysler done right?	I HAVE HAD CADILAC'S FOR THE LAST 20 YEARS, NOW THEY MADE IT TO HARD TO SEE OUT THE BACK WINDOW. EVEN WITH THE CAMERA I DID NOT FEEL SAFE. THIS CHRYSLER 300 WAS THE BEST OVERALL CAR WE COULD FIND, WE TEST DROVE 19 DIFFERNT BRANDS BECAUSE WE DID NOT KNOW WHAT 2 CHANGE TO. THIS CAR HAD THE MOST SPACE INSIDE, BY FAR IT IS THE ABSOLUTE SMOOTHEST RIDING CAR ON THE MARKET. YES WE DROVE JAGWIRES,MERCEDES & EVERYTHING ELSE. LOOKED AT ALL MODELS. TOOK US 6 MONTHS TO FIND THE SMOTHEST DRIVE WITH GOOD LOOKS. IT IS SPACIOUS, STRONG,SAFE.SMART,BEAUTIFULL & THE METALIC RED ,BLUE & BLACK R VERY ATRACTIVE COLORS. I LOVE MY CHERRY METALIC RED, BUT ALSO LIKED THE DARKEST METALIC BLUE, BUT IT COULD B JUST A LITTLE LIGHTER. WHEN THEY WASHED THE DARK BLUE AT THE CAR LOT IT WAS DUST N ONE HOUR, SHOWS DUST REAL BAD. BEAUTIFULL BUT JUST A LITTLE TO DARK NOT TO SHOW SO MUCH DUST FAST. THE DESIGNERS DID A GREAT JOB ON THIS CAR OVERALL. I LEASED MINE & WILL LEASE ANOTHER NEXT TIME. BUT PLEASE PUT A ASHTRAY, THE ADD ON ASHTRAYS DONT WORK GOOD, NOT SAFE. I HAVE 2 USE A WATER BOTTLE. GOOD JOB ON THE REST. BEAUTIFULL CAR METALIC COLORS REALLY MAKE IT LOOK LIKE A MILLION BUCKS

THE CLOSEST DEALER IS ONE HOUR AWAY ANOTHER IS 45 MINUTES. I WENT 2 THE MERCED,CA RAZARRI BECAUSE THE THE SALES MANAGER GORDON WAS REAL NICE, BY THE TIME MY NEW CAR ARIVED HE NO LONGER WORKED THERE,THE OTHER SALES MANAGER WAS GONE & SO WAS THE SALESMAN. SO AFTER THE PURCHASE, I WAS NO LONGER TREATED SPECIAL. I WAS TREATED LIKE I WAS NOT EVEN THERE. I KNOW THEY WERE GOING THROUGH CHANGES BUT I REFERED A FRIEND WHO BOUGHT A NEW JEEP & SHE WAS NOT TREATED MUCH BETTER. MY HUSBAND & I OWN SEVERAL BUSSINESS INCLUDING A DAIRY QUEEN FOR 26 YEARS & I CAN ASSURE U MY CUSTOMERS PAYING FOR A \$ 3.00 ICE CREAM CONE R TREATED LIKE ROYALY EVERYTIME. MY PURCHASE WAS A \$40,000 CAR THAT IS NOT HOW U TREAT CUSTOMERS . OVER A 4 MONTH PERIOD I LEFT MORE THAN A DOZEN MESSAGES 2 CALL ME BACK. I GAVE UP, THEN I GOT MAD & CALLED THE MAIN MANAGER WHO HAD THE SALES MANAGER CALL ME BACK. BUT THEY DID NOT DELIVER WHAT THEY PROMISED. I WELCOME U 2 CALL ME. I WILL NOT BUY FROM THEM N 3 YEARS, I WILL LEASE ANOTHER CHRYSLER 300 BUT I WILL GO 2 THE TURLOCK DEALERSHIP.

Strut problem/shock absorber problem

Please indicate where the strut/shock problem occurs: Front.
Rear.
Please describe conditions when this trouble occurs: The car rides so close to the ground that I have hit standard parking blocks/bumpers with the wind dam and damaged it. The car also bottoms out on even the smallest of speed bumps, even at very low speed.
To the best of your recollection, the trouble was first noticed: Within the 1st month after delivery.

Strut problem/shock absorber problem**Approximate mileage when trouble was first noticed was:**

0 - 1499 miles.

Additional Comments:

This is a major problem, since it has caused damage to the car already. I am extremely unhappy that my brand new car's front wind dam was damaged by a standard parking block. The dealer's repair shop basically told me there could be nothing done and that 'other models are even lower to the ground.' TOTALLY UNSATISFACTORY RESPONSE. I THINK THE DAMAGE SHOULD BE REPAIRED BY CHRYSLER!!!!!!

Additional Comments:	These issues are design issues and not a result of something working incorrectly.
Going into which position is the gear selector difficult to operate? (check all that apply):	When going from drive to park, it is too easy to mistake the car being in park when in fact it has gone from drive to reverse. The problem lies with the feel of it and I often need to check the dash to make sure it is in park and not reverse when moving it from drive. I HATE the paddles. they are far to easy to hit by accident and have done so on many occasions.

Additional Comments:	There is no trouble, the voice command system just seems dated compared to the other car I was considering.
Please describe when this trouble occurs:	There are 2 issues I have with the voice recognition program. When I purchased this car I was comparing to the Ford Taurus. The 300 voice command system is much slower and clunky than the Ford and has less command options.

Unpleasant interior smell/odor

Please indicate the unpleasant interior smell/odor (check all that apply):	Please see previously noted Recirculation problem in 2013 Chrysler 300. I had my 2013 Chrysler 300 for 16 months before it was replaced by Chrysler due to the previously noted Recirculation problem which could not be fixed. It did develop an unrelated, rather offensive stale interior smell. I don't know whether this may have been mold related or not. If the smell of these vehicles could be improved as they age by anti-mold agents, or otherwise, from use of different materials or de-odorizing agents, it would be great.

Front heating, ventilation and air conditioning controls are broken/not working

Approximate mileage when trouble was first noticed was:

0 - 1499 miles.

Please indicate which control is broken/not working properly (check all that apply):

From the beginning, Recirculation on my 2013 Chrysler 300 would randomly and frequently shut off and not come back on, even after parking the car for extended periods of time. The problem could not be corrected by my Dealer. After reporting this problem and documenting it by video to the Chrysler Office for Quality Control, I worked with Chrysler to seek a correction of this problem for approximately 6 months. Chrysler chose to replace the car at a nominal charge which I applaud and praise!! I have approximately 2,500 miles on my new 2014 Chrysler 300 and Recirculation operates properly in the new car. I am a big fan of the Chrysler 300 and of Chrysler Corporation in dealing with me regarding this problem.

Overview

Was the trouble resolved to your satisfaction?

No.

Would you recommend this vehicle to family or friends?

Yes.

Please explain further about your choice to recommend your vehicle:

I love my new 2014 Chrysler 300 due to the comfort of the seats and suspension ride; the great 6 cyl. engine; the great transmission; the great on-screen graphic user interface (GUI); the great Dr. Dre sound system; the great styling of the body, interior and wheels. I would prefer that the transmission shifter in the 6 cyl. Chrysler 300s had the manual feel of the 8 cyl. cars.

You rated transmission gear change performance (smoothness) High. Use this space to provide any specific comments you would like to share.	See previous comments.
You rated steering and handling (responsiveness, stability) High. Use this space to provide any specific comments you would like to share.	Changes in suspension are always a trade off. If possible a light increase in front sway-bar torque would be desired. However, the current model Chrysler 300 is a vast improvement from my prior 2010 model.

You rated your feelings about the durability of your new vehicle High. Use this space to provide any specific comments you would like to share.	I drove my 2013 Chrysler 300 for 31,600 miles, and other than the defective Recirculation problem, the car was problem free.
You rated your attitude about the brand of your new car High. Use this space to provide any specific comments you would like to share.	In the old days, I was a GM guy. Since 1996, I have been a fan of Chrysler, styling which has constantly improved (except for the 2014 Chrysler 200). Other than having a 2006 Infinity G-35 Sedan, I have had all Chryslers since 1996, and I consider myself to be automotively knowledgeable.
You rated clarity of sound High. Use this space to provide any specific comments you would like to share.	More watts would be cool!! But the Dr. Dre system is a relatively nice and clear system, as compared to the standard sound system.
You rated rear view styling (rear fascia, bumper) High. Use this space to provide any specific comments you would like to share.	See previous comments.

You rated appearance of exterior paint High. Use this space to provide any specific comments you would like to share.	The Black Pearl paint that I presently have is really a Black Metallic, and is fantastic. I would love to know if a Black Pearl is actually possible....
You rated your purchasing experience (at the dealer/dealership) High. Use this space to provide any specific comments you would like to share.	Monroeville Chrysler has been very helpful and friendly.
You rated engine performance during acceleration High. Use this space to provide any specific comments you would like to share.	My new 2014 Chrysler 300 has an E-85 6 cyl. engine, which seems more powerful in acceleration than my previous 2013 Chrysler 300 non-E-85 6 cyl. engine, however, gas mileage seems to be reduced by 2-3 miles per gallon. There also seems to be a bit of hesitation or non responsiveness to moderate gas pedal depression at times.
You rated front view styling (front fascia, hood, grille, headlight area) High. Use this space to provide any specific comments you would like to share.	See previous comments regarding the redesigned Chrysler 200.
You rated head/leg/foot room High. Use this space to provide any specific comments you would like to share.	See previous comments.

What Can We Do Better?>

What has Chrysler done right?

Chrysler stood behind it's product and when a timely solution to a defective Recirculation system could not be found or rectified; instead of making me smell external diesel and automotive fumes, skunks, burning wood and trash, due to the defective Recirculation system in my 2013 Chrysler 300; Chrysler offered to repurchase the vehicle. I have had five (5) Chryslers since 1996 and hope to continue to buy more. Thank you for standing behind your product. The Chrysler 300 has a great design. On redesign, make it sleeker, not smaller. The size of the car is correct and the side window to doors size ratio is nearly perfect.

Feedback/Concerns:

Please don't make the redesigned Chrysler 300, look like the new 2014 Chrysler 200, when it is redesigned. The exterior of the 2014 Chrysler 200 looks like a 2000 Ford probe and is unattractive in my opinion. On redesign of the Chrysler 300, a little more curve to the roof line would be cool. You could even look at the rear window and rear roof design of the 1996 LHS for inspiration, absent the huge, unattractive side windows that were on that car. I also recommend making the headlights light beams closer to 5000 K white light color temperature, similar to the color temperature of the white LED lights, to the extent possible, as this would improve the appearance of the car with the headlights on. As noted previously, I would make the 6 cyl. transmission shifter feel like the solid mechanical feel of the 8 cyl shifter. Please do NOT design a round shifter knob (ala 2014 Chrysler 200), or push buttons, or paddles, for the transmission. I like a solid feeling shifter; one where I can find the gear positions without concentrating on the shifter; as is presently the case with the Chrysler 300, 6 cyl. shifter. The shifter should be ergonomically positioned where the drivers arm comfortably reaches the shifter with the elbow bent at a 90 degree angle, with the elbow resting on the armrest of the console. I would recommend making the headrests in the Chrysler 300 either forward adjustable, or two (2) inches forward, closer to the head with the seat a comfortable, slightly tilted or reclined position. The headrests of the current Chrysler 300 are about 2 inches too far back. The seat design however, is perfect.

Shifter is a bit frustrating at times. Especially getting into park. Frequently when I switch to reverse, I hit neutral and have to wait and hit brake before I can engage into gear again. Frustrating, not a major complaint.

temperature controls distract a bit much from driving.

What to say? It's great except the unavoidably high floor center over the drive shaft.

again, what to add?

Cannot feel it go through the gears. Unbelievable engineering. Hate having to depress the brake every time to engage drive.

Desingers were inspired. Elegant with a sporty spin.

Elegant. I only wish there was a dark blue or dark violet color Hip and sporty. I settled for dark grey. Look glorious under blue light. I really loved the 2012 brown.

Every one who enters my car is impressed. You guys knocked his one out of the park. The wood natural wood grain is so perfect, it almost looks artificial. Plush seats, really plush. Blue running lights are not only functional, but sheer elegance.

Fits my life style. Posh sporty look without pretension. Frequently exchange a polite nod to other 300 drivers on the street. It's like, yah, we know. I wish I had the GPS but it was way over priced. Settled to use my Android on the console.

Have to look down to long to find target buttons

Absorbs city pot holes quite nicely. On smooth roads, it's like riding air. I keep the tires at max inflation for mileage and stability over comfort and still....smooth.

Anti-skid in snow is very good. I had to hard brake and swerve to avoid an accident. Was very stable and easy to control in the emergency. Tires didn't even squeal. The 300 did not even sway on the harsh turn.

This auto connect to Android a great improvement over my 2012 model.

Few believe my mileage. It rivals hybrids.

I'm a bit biased. Loved Chrysler in 60s and 70s. Nice to see them not only back, but excelling. Smokes anything out there at this price.

Most stable suspension I've ever driven short of tiny European sports cars - which have no comfort.

Rear reading lights are nice touch. Door handle lights just top off the elegance. Front map lights are nice and bright with high color temperature. Love it.

Headlights on my Caravans were terrible. The focused beam and output brightness uniformity on the 300 is glorious. Low eye strain even in night rain. Good work!

I would prefer 5 band graphic equalizer at a minimum. ^7 band far better. 3 band is near useless.

Instrumentation is impressive. Transmission and smart engine are unparalleled. 8 speeds. Wow. Accelerates sharply at any speed and truly optimizes engine work load.

The subtle metaflake is beautiful.

What Can We Do Better?>	
What has Chrysler done right?	Serious upgrade to transmission. I get 37mpg on highway with mid-grade. Every rider is amazed at the comfort. I love he interior lighting. Snappy response, tight suspension
Feedback/Concerns:	Interior was filthy upon delivery. No nitrogen in tires after two months ownership. Dealer machine down. Low bumpers though lovely are vulnerable to scraping. Voice command blue too h is frustrating. Wrong dialing 50% of time. I have about 50 different people in my car every week. Most are totally amazed. So happy Chrysler is back on track to such affordable elegance. I've had several New Yorkers and Caravans in he past.

Transmission and Drivetrain>Automatic Transmission>Hesitation or delay when shifting between gears>							
Please indicate driving condition where the shifting trouble is noticeable (check all that apply):				When trying to put transmission from park into drive or into or out of reverse, the gear shift works with hesitancy, lots of "slips." Perhaps more important, the transmission gear display on the instrument panel and on the shift knob, are out of sync with what the computer is reading the gear status to be, so sometimes the car won't start al hough it reads to be in park, or alternately, doesn't turn off al hough it reads to be in park. Because this problem is intermittent, rather than constant, I expect that a reasonably competent mechanic won't be able to disagnosis it and that it will be with me until I unload the car.

Going into which gear/gears does the trouble occur? (check all that apply)	The 8 speed transmission does not always downshift quick enough when needed, especially when you are in the mid gears in the 35-60 mph range.
Please indicate driving condition where the shifting trouble is noticeable (check all that apply):	When cold, it wants to hold the lower gears longer than I believe it should when taking off from a start. This goes away within the first 5 miles and it then upshifts normally

Additional Comments:	Once you get to know how the 8 speed transmission works, you adapt to it.

Transmission and Drivetrain>Automatic Transmission>Gear selector is difficult to operate (auto. trans.)>

Going into which position is the gear selector difficult to operate? (check all that apply):	The V6 ratcheting shifter is neat toy, but I prefer a standard shifter to move through the gears. You have to be at a dead stop to move from reverse to the drive positions, and also at a dead stop to move up to park. Some times there is a delay to shift reverse from drive, and the same from drive to reverse. It's a pain when you go to back into a parking space.

Was the trouble resolved to your satisfaction?	No.
Overall, how satisfied are you with the quality of your new vehicle?	Satisfied.
Would you recommend this vehicle to family or friends?	Yes.
Please explain further about your choice to recommend your vehicle:	I really enjoy the vehicle. I love the style, performance, and interior. I do have an ongoing issue with the front seats popping and creaking and it appears to be a known issue (lots of reference to it on various websites). Dealer made a single attempt to repair and then said that is just the way it is/nothing else they can do. For me, this is not acceptable and a fault of the vehicle. Additionally, I would like to see updates to the Nav/Entertainment system that would keep features working with new phones. My text feature quit working and on that subject, users should have the ability to edit the canned text responses in the system. Most of the entries are of no use to me.
If our team has any additional questions about your responses, would you accept further contact?	Yes, by phone or e-mail.

Please rate your overall level of satisfaction with the Smartphone Application	3 (neither satisfied nor dissatisfied).
Please provide feedback on how Chrysler can improve the Smartphone Application	The app is not too useful.. more of just a digital owners manual.
Which feature or section of the Smartphone Application did you find least helpful and why?	Integration with features and functions on the vehicle. For example, doing a route plan on the computer and then have the app send it to the Nav system when getting in the car.

What Can We Do Better?>	
Feedback/Concerns:	Overall, I am happy with my vehicle but I would like items/suggestions addressed. Also, I am not very fond of my local dealership. They seem to have the attitude that they are being bothered and could provide better customer service.
What has Chrysler done right?	Great vehicle. I honestly had not initially considered a Charger when looking for a new vehicle but once I did, I liked what I saw and made the purchase.

Detail on Low Rated Items	
You rated your purchasing experience (at the dealer/dealership) Low. Use this space to provide any specific comments you would like to share.	Worst car-buying experience I ever had. It took me six hours to finalize the purchase (was buying a used jeep and a new charger). I'm glad I have both vehicles, but wish I would have been able to give a different dealership my business. Lustine Dodge of Woodbridge, VA could use help on customer service!

Do not have this in the car and it should be in every car for safety reasons , period.

I love to drive , which means I over drive the car . I like to feel the road all the time . my body feels the car and every wiggle , shake . this car is missing the feel that I am use to . maybe I will get over it and let the car do it's thing.

Do not have and do not need it . If you do not know where are going ? why are you going there ??? get a map and read .

That 8 speed shifter suck's and I am being nice . Every thing else is just great , easy to use.

The high speed stability is a issue I hope to resolve with some wider tire's in the near future.

I really love the car over all . Great job . There is room for improvement in the area's I have mentioned . I only want to help with making the product better for everyone . I think many cars got traded in because that 8 speed shifter is hard to master , make me want to buy a stick shift / manual trans.

For the very basic seat package in this car I will never complain . Good job. My 2008 was a sxt and I hate leather seats . I will stay with this seat package any day . Wish this car had the adjustable seat like the sxt.

Getting in and out of the front is like no other car I've been in , wow lot's of room . doors swing wide , wonderful.

Great room all around . just a little tight getting in and out of the back seat for someone my size .

I like how hey work . apply steady foot pressure and they grab more and more as they heat up , do not need to apply more pressure .

Love the dual control's , great idea .

The head lights are great in the base package , if I could get the aim better on the right side .

Way better than previous model's . keep up the great work. lay out and looks are right on target.

The car looks fast sitting in a parking lot . Many people I meet just love the car and tell me about it . The over all package works .

The rear was a car all by itself , love it and so did many other people un il you put it on the Dart.

The side scallops on he door break up what would be a very flat boring side profile . My 2008 Charger was to flat and boring.

This little engine is great , with the 8 speed trans . wow what a great combination. You nailed it .

I love my car , style , color and the additions I have made to make her mine .

Love the hood and front fascia that make the Charger what it is , aggressive styling , a car that stands alone . We all agree some updating is needed but not look like another car . (Dart)

Quit , is there more ?? Love it .

Very good visibility , if you can see them you are safe .

33 mpg , 80 mph avg , 4 adults , trunk full , Denver to Salt lake city no problem on 1 tank of gas with room to spare . And back on 1 tank . need I say more ?

Rear Cargo Shelf/Cargo Cover is difficult to use		
Additional Comments: Please describe conditions when this trouble occurs: Approximate mileage when trouble was first noticed was: Please indicate why the rear cargo shelf/cargo cover is difficult to use (check all that apply):		A parts person and myself looked at a 2014 model Charger and the same panel was hanging down when we looked at it but here was a magnet in the panel to hold it up . I thought that was he part I was getting to fix my issue , but no I got a cheap Christmas tree pin and a hole drilled . When trying to load or unload cargo with the back seat folded down. 0 - 1499 miles. Below the rear window under the package shelf , behind the rear seat . The upper panel was not secured from the factory and was always hanging down . The dealership and I played with this loose panel for almost a year un il a T.S.B. came

Rear Cargo Shelf/Cargo Cover is difficult to use	
How often does this trouble occur?	out on my last visit to the dealership for an oil change . They repaired it as per the T.S.B. and that repair seemed cheesy at best . Really ??
To the best of your recollection, the trouble was first noticed:	Trouble occurs regularly. Within the 1st month after delivery.
What Can We Do Better?>	
Feedback/Concerns:	Always room for improvement . I do not like the part shelf styling of the 2015 Charger or is that a Chart or Darter . You have taken away the style that was the Charger and everything it had going for it . I do not think I will be buying a Charger ever again after that . I will keep my 2012 or trade it in for a truck .
What has Chrysler done right?	Thank you for the Chally and coming out with the Hell cat package . I will never be able to afford one . Way , way out of my price range . Thank you all for the wonderful car's and truck's . Keep up the good work and fix the Charger if you want to sell many of them .
Steering, Handling, and Ride>Steering and Handling>Steering system/wheel has too much play, feels loose>	
Additional Comments:	Maybe the type of shock that it used on this suspension . Or that he front end has no weight on it (3.6 L) .
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
Please describe conditions when this trouble occurs:	Take a ride with me and I will prove it .
Trouble occurs while traveling in these road conditions (check all that apply):	At highway speed's . On the same road I travel to and from work and in the same spots I get this shutter / shaking in the suspension . It feels like the shocks can not handle the road surface . I can change speed up or down and the shaking will go away much faster .
Trouble occurs while traveling at these speeds (check all that apply):	Steering feels very light at high speeds and acts like it is unstable / unsure of itself . I put on a wider wheel and that did help a lot . When these tires wear out I'm going to try a wider tire to give it more stability at 90 mph.
How often does this trouble occur?	Trouble occurs regularly.
To the best of your recollection, the trouble was first noticed:	Within the 1st month after delivery.
Engine>Engine Idling (rough, too low/high)>Engine does not idle properly: idles rough, too low, or too high>	
Additional Comments:	The idle issue started at about 22,000 miles and seems to be getting worst .
What best describes the engine idle trouble? (check all that apply):	The engine is starting to idle rough when cold / first started . Is less noticeable when full operating temp . I can see the tachometer moving 200 to 300 rpm when at operating temp and is a little rough.
Please describe conditions when this trouble occurs:	See above.
Approximate mileage when trouble was first noticed was:	8000 miles or above.
To the best of your recollection, the trouble was first noticed:	More than 3 months after delivery.
Engine idle trouble occurs after vehicle is started at:	Temp. does not matter.
How often does this trouble occur?	Trouble occurs regularly.
What type of fuel do you most often put into your vehicle?	Plus gasoline.
Engine idle trouble occurs (check all that apply):	When first started and warming up the idle seems erratic some time's but not all the time . When I drive slow during more of the warm up cycle the engine rpm goes really nuts. outside temp does not change the issue and I keep her in the garage when home.
Steering, Handling, and Ride>Steering and Handling>Steering wheel vibrates excessively while driving>	
Additional Comments:	The shaking does go away when I change speed , either faster or slower . I think it has a lot to do with the road .
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
Vibration is:	Moderate.
Are you using your vehicle for towing when the problem occurs?	No.
How often does this trouble occur?	Trouble occurs regularly.
To the best of your recollection, the trouble was first noticed:	Within the 1st month after delivery.
Steering wheel vibration trouble occurs during these speeds (check all that apply):	See previous comment . I do have the tire's rotated every 4,000 miles and have the balance checked every 8,000 mile's .
Please describe conditions when this trouble occurs:	Shaking in the front end / steering wheel . This could be the wonderful horseshoe path / roads we have around here .
Vehicle Exterior>Lights>Headlights aimed incorrectly>	
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
To the best of your recollection, the trouble was first noticed:	At delivery.
Please indicate which headlight is not aimed properly (check all that apply):	The dealership fixed this issue the best they could . There is only up and down adjustment's . No side to side adjustment . There needs to be a side to side adjustment for proper alignment . The car was delivered this way and they did the best they could . So I live with it . I noticed the issue the first time I drove the car at night .
Additional Comments:	There should be a side to side adjustment on the headlight's for proper light aiming . The factory is not perfect .

The exhaust system has a very low, muted, dull roar to it. It is quiet, yet you know it is ready to perform in an instant.

The interior has much more than adequate head/leg/foot room. If the 300C is produced in Front Wheel Drive the rear seat will be much more comfortable for the passenger in the middle of the rear seat with the removed drive shaft hump.

This 300C goes exactly where you want it to go-INSTANTLY. It holds true to course on the interstate and on local roads.

I think that has all been said in the above comments.

While the shifting selector takes a little getting used to, it is amazing once you get comfortable with it. All other controls are engineered for ease of use and response.

Actually, the dealer with whom we have done business for years, was truly the driving force in helping us to make our decision. We were about to leave Chrysler and go to Lexus. This departure was driven by a series of "CHECK ENGINE" light indicators. The frequency, time consumed and cost of repairs was extremely difficult to accept when we started our new car search. Our dealer was the only source of comfort and satisfaction. The numerous very critical reports of Chrysler quality/reliability seemed to be focused on the numerous ownership changes resulting in the development of a "poor quality culture" at Chrysler as owner after owner sucked out money from the company. Then came the challenge of Mr. Marchionne's effort to buy out Chrysler. We waited until January 2014 to see if he would become the owner of Chrysler. We felt he would be good for Chrysler. Once we settled on the 2014 300C, with Mr. [REDACTED] as the new owner of Chrysler, we felt he would resolve the "poor quality" and "poor reliability" environment issues. We now believe he is doing that. That enhances the values of the 2014 300C and affirms the quality of our purchase decision with Mansfield Jeep Chrysler.

Again, the profile of this vehicle seems to command attention.

Connection of the cell phone was amazingly easy.

It is so quiet while driving the 300C, you can hear the blood running through your veins.

The interior illumination is wonderful. The dashboard lighting is spectacular-in both day and night driving. The curb lights on the doors is very helpful-especially for those with night vision issues.

The trunk space is massive. The Trunk Cargo Net will improve with some re-design.

This 300C AWD rides as steady as an arrow in flight. It is quiet. The car seems to grab the road surface. Perhaps the ride could be slightly softer. The ride is firm, exceptionally stable. A slightly softer ride would be appreciated.

This engine is very responsive-especially when one is using a ramp onto the interstate and merging with existing traffic. The engine sounds smooth and does not sound strained. The ECO message on the Information Center enables the drive to save energy and money.

This is a very quiet engine. It belies the speed at which one is traveling.

We have compared the 2014 300C with the ACURA TL 3.7 AWD (requires premium gasoline), LEXUS 350SE and the Cadillac CTS PREMIUM 3.7 AWD. Chrysler 300C AWD, with Light Group and SafetyTec excels in every way and is exceptionally lower in cost-except of the Lexus 350SE-a front wheel drive vehicle. The Chrysler poor warranty AND poor reliability history nearly drove us to the LEXUS-UNTIL WE LEARNED THAT LEXUS IS A TOYOTA PRODUCT. We did not need to buy a car that has a history of "run away acceleration." Thus, by default, we went back to Chrysler-who we almost left after dealing with Chrysler since 1964.

Amazingly easy to use. Great sound for music. A High Definition Radio feature in addition to the existing features would be nice. Provide Blu-Ray video disc capability in addition to DVD capability.

From the front, this vehicle has a very imposing appearance/view. It seems to command attention.

The 300C is the easiest seating ever designed for entry and exit.

The ability to control the climate is both easy and practical. The command icons on the screen are immediately recognized and easy to use. Temperature settings for interior comfort are easy to use. The outside temperature is excellent information to use to set interior comfort. We have yet to use the Remote Start System with Interior Comfort Settings.

The design of the wheels is perfectly matched to this vehicle.

The interior is exceptionally beautiful in color, texture and design. The seats are wonderfully comfortable-especially with the multiple power adjustments and power lumbar settings.

The Ivory Tri-Coat Pearl exterior finish is most pleasant to the eye. We have noticed that the paint has a slightly different hue to it as the angle of the view is slightly changed.

The night road is brilliantly illuminated. The turn headlamps are an amazing safety feature for rounding corners.

The power seat adjustments are very easy to use and are most responsive.

The power seat adjustments make it impossible to have any difficulty seeing all around you as you drive. The rear vision is amazingly enhanced with the use of the Back Up cameras and images on the 8.4N Uconnect screen.

The power/telescoping steering wheel is easy to use, quiet and beautiful. The memory power settings for 2 drives to set: steering wheel, mirrors and foot pedals is terrific.

The rear view is clean-cut and has the look of class.

The screen is large, clearly readable and the icons are instantly identified for use.

This 300C seems to be extraordinarily durable and of exceptional quality. Time will tell. We had real concerns about Chrysler RELIABILITY based on numerous articles advising extreme caution about buying Chrysler products. Indeed, I had my own issues with ENGINE LIGHT problems on my Chrysler. This 2014 300C seems to have put our concerns aside-up to this point in time. We spent an extra \$2,700 for the MOPAR LIFETIME SERVICE CONTRACT. There is no joy in making such a purchase. We hope we never have to use this contract. Indeed, we expect Mr. Marchionne to eliminate poor quality from the Chrysler environment and to establish extraordinary reliability to Chrysler products.

This is the smoothest transmission that I have ever driven. There is virtually no "bumping" as the gears change.

We have used radio wave signals, homemade CDs and commercial CDs. The sound is fantastic. DVDs play very easily and clearly. You might add Blu-Ray disc capability.

It takes a little getting used to the brakes, which are incredibly responsive with just a touch of the toe. Incredible response is exactly what one wants from an automobile braking system.

Large icon commands, ease of data/location entry and extraordinarily easy to see map and listen to very pleasantly voiced directional commands is superior.

Mansfield Jeep Chrysler is most accommodating for all automobile needs: service, sales and counseling. Open, seamless, honest, forthright, consultative sales guidance is the standard at Mansfield Jeep Chrysler. Add friendship to the mix and one becomes a customer for life.

My wife is the primary drive/user of this car. I have driven a few times. Everyone who sees this car loves it. We cannot figure out what the attraction is. We do a small "show and tell" demo and then tell them of our research and urge them to go to Mansfield Jeep Chrysler. Even our Pastor, Father Steve Madden, St. Mary's Foxborough, MA, buys his cars there. This car makes my wife feel good. When my wife feels good, I feel very, very good. It took us more than a year to decide on the 2014 300C. Thanks to Kevin Barnes patience, we think we made the right choice.

The sound of music over the Sirius system, via professional CDs and/or homemade CDs is superb.

This car gets a lot of attention as it is driven and/or parked. We have yet to understand this.

This is an ALL WHEEL DRIVE vehicle. We are getting more than 20mpg in local driving-even with the air conditioner operating. Plus, we are able to use REGULAR gasoline.

We did not do this. Our son did this and said it was exceptionally easy to use.

What Can We Do Better?>	
What has Chrysler done right?	1. [REDACTED] and our dealer, Mansfield Jeep Chrysler, Mansfield, MA. 2. Seems to have really focused on quality of everything: safety, fuel efficiency, workmanship, materials, design, human factors engineering, comfort, price banding is very good. 4. The Chrysler website shopping tools are vastly superior to other manufacturer shopping tool systems. 5. We were only a nano-second away from buying a Lexus. We had a very difficult time convincing ourselves to leave Chrysler. In the end, we re-reviewed a very detailed comparison via the Chrysler Shopping Tools, as well as a very exhaustive analysis of VEHICLE RELIABILITY. We took a giant leap of faith and cast our fate with Mansfield Jeep Chrysler and the 2014 Chrysler 300C All Wheel Drive with 3.6 Engine, 8-speed transmission, Light Group, SafetyTec Package in Exterior Ivory Tri-Coat Pearl with Dark Beige/Light Beige LEATHER Interior. At this point in time it appears to have been an excellent choice. Time will tell about the RELIABILITY. We bought the MOPAR LIFETIME SERVICE CONTRACT because of our RELIABILITY CONCERNS. We hope we never have to use it. As we watch the mind numbing automobile recalls so far in 2014, we are somewhat comforted by the exceedingly small number of recalls that involve Chrysler. We did learn today of the 700,000+ Jeeps that are recalled due to ignition switch potentially deadly failures. We pray our Chryslers (3) have no such failures.
Feedback/Concerns:	1. Make a 300C in FRONT WHEEL DRIVE. 2. Enhance the 300C WARRANTY-more years and more miles of coverage. 3. Install FRONT AND REAR SIDE RUNNING LIGHTS FOR SAFETY. 4. Integrate the FORWARD COLLISION WARNING SYSTEM WITH THE BRAKING SYSTEM. 5. SOFTEN THE 300C SLIGHTLY. 6. Provide an OWNER'S MANUAL with the car. 7. Provide docking/charging stations for iPhone/iPad/iPod. 8. Consider new radio with High Definition capability. 9. Re-design the TRUCK CARGO NET SYSTEM. 10. Provide a little more EXTERIOR AND INTERIOR COLOR CHOICES. 11. Consider including the Light Group and SafetyTec Package in the base pricing. 12. Consider adding LANE DRIFT WARNING SYSTEM (might need special highway sensors to do this effectively). 13. Consider dumping the HOT/COLD cup holder and just retain the standard cup holders.

Please describe the other trouble you experienced:	NO TROUBLES WHATSOEVER. I just have a few ideas that I believe will make the 2014 300C a totally spectacular car.

Overview

Overview	
Please explain further about your choice to recommend your vehicle:	<p>The 2014 300C is a spectacular vehicle in every way-safety, ease of use, fuel efficiency, comfort, appearance and especially in the ease of use of the on-board technology (and that is coming form a 72 year old fart who just stopped using smoke signals. I would urge Chrysler to consider providing the 300C as a FRONT WHEEL DRIVE vehicle-this would improve fuel efficiency and enable a extra adult seat in the back of our ALL WHEEL DRIVE car. NOBODY WANTS A REAR WHEEL DRIVE CAR. I would also urge CHRYSLER to provide a significantly better warranty in both miles covered and term of years covered. Chrysler, I believe, invented the long term warranty-now everyone has a warranty that is superior to Chrysler's. I would urge Chrysler to consider FRONT AND REAR SIDE RUNNING LIGHTS as added safety features so he 300C is significantly more visible to on-coming traffic when the 300C is at intersections and/or exi ing parking spaces. Everyone is in too much of a hurry-visibility is important. Chrysler ought to consider integrating the FORWARD COLLISION SYSTEM WITH THE BRAKE SYSTEM TO APPLY BRAKES IF THE VEHICLE IN FRONT SUDDENLY STOPS. Chrysler might consider LAND DRIFT WARNING if the National Highway System gets funding to install lane marker sensors. The 2014 300C ride is terrific-if somewhat stiff. Perhaps a slightly softer ride would make us old farts happier. The ride is exceedingly stable, and that is good. Provide an Owner's Manual-or offer it at purchase of the vehicle for additional cost if the buyer wants it. Chrysler might consider providing DOCKING/RE-CHARGE STATION for iPhone/iPad/iPod. The RADIO is superb. It could be better if Chrysler provided HIGH DEFINITION RADIO along with the 8.4N stuff-which is all excellent and unbelievably easy to use-even for dummies like me. Chrysler might really consider offering more color selections-especially for the John Varvatos models. I must confess, my analysis of the JV models provided me no driving reason to buy one-the</p>
Many of our vehicles have supporting smartphone applications with vehicle information. Have you had the opportunity to download and review your vehicle's smartphone application (if available)?	Yes.
Would you recommend this vehicle to family or friends?	Yes.
If our team has any additional questions about your responses, would you accept further contact?	Yes, by e-mail only.
Please provide feedback on how Chrysler can improve the Smartphone Application	<p>I have not used this Smartphone feature, our son has. He advises that it is terrific. We do not yet have a "Smartphone." We are now investigating a "Smartphone" purchase. The major objection is the amount of spying that is being done by the U.S. Government on all aspects of our U.S. citizens lives-in addition to the uncontrolled spying being done by the U.S. on all other countries and people. If he Smartphone makers will establish encrypted devices we will likely make the "Smartphone" purchase. While we do have a cellphone, we love the Bluetooth, hands-free operations. We are aware of the sensors that Chrysler has built into the 300C that enables spying of the Chrysler 300C operators.</p>
The Smartphone Application format is easy to understand and use	5 (strongly agree).
Have you taken the vehicle to a dealer to have your trouble corrected?	No.
Overall, how satisfied are you with the quality of your new vehicle?	Very satisfied.
Have you referred to the Owner's Manual, Warranty Manual, or other documents that came with your vehicle to answer questions about your vehicle?	Yes.

Detail on Low Rated Items

We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.

This is 2014 300C All Wheel Drive vehicle, with Light Group and SafetyTec Package is an exceptional automobile. The color coordination, exterior paint, interior finish, total fit, advanced safety features, amazing comfort, fantastic interior, quiet while driving, digital features that are unbelievably easy to use and understand, responsiveness, REGULAR GASOLINE, fuel efficiency and exceptional styling and human factors engineering (ergonomics) provides a car with incomparable value. I would desire a FRONT WHEEL DRIVE MODEL (RETAIN THE ALL WHEEL DRIVE-BUT DUMP THE REAR WHEEL DRIVE MODEL). INTEGRATE THE FORWARD COLLISION WARNING SYSTEM WITH THE BRAKING SYSTEM.,ADD SOME FRONT AND REAR EXTERIOR SIDE RUNNING LIGHTS FOR NIGHT SAFETY. INCREASE THE WARRANTY IN TIME AND MILES. SOFTEN THE RIDE SLIGHTLY-BUT KEEP THE STABILITY. PERHAPS YOU COULD ADD HIGH DEFINITION RADIO AND BLU-RAY DISC CAPABILITY. THE TRUNK CARGO NET OUGHT TO BE RE-DESIGNED. YOU CAN ALSO DUMP THE HOT/COLD A/C AND HEATED DRINK CUP HOLDERS. REGULAR HOT/COLD CUP HOLDERS ARE FINE. IT WOULD BE NICE TO HAVE RE-CHARGE & DOCKING STATIONS FOR iPHONE/iPAD/iPOD.

At night when I open the door it gives me plenty of light to get in and out.

I am [REDACTED] and have a difficult back. One of the main reasons I bought this 300 was for the comfort of the seats. They support my back and are very adjustable. And the white stitching looks great.

When I was shopping for this car I first test drove Cadillacs, Lincolns, Volvos and Buicks. Chrysler by far gave me the best deal.

yes, see my answer above.

Chrysler really surprised me with all the new technology they put into this car. The new engine, the first American 8 speed transmission and the infotainment center with the huge screen. Very innovative and modern. They are looking to the future!

It very easy to maneuver. The steering is not too light or too hard.

The 300 grille is very impressive. It makes a statement immediately when you see it. The LED headlights are very modern and distinctive. I have the 300S model with the blacked out headlights and grille - very sporty!

The headlights work great. However I think they should make the HID light standard and not an option. The led's are very cool and Chrysler has done them better than anyone else including Audi. I love how they sparkle.

The integration of usb ports is great. Maybe put them some where easier to access then at the bottom of the console.

I have the 20" rims on my 300S, wow, those really look great. Some of the best looking wheels I have ever seen. And also one of the reasons I bought this model over the 300C

The styling of the sides and the roof make the car look very solid and strong. The flat roof is cool and sporty. It has kind of a "chopped" look to it. And I like the slight slope to the rear window which is also sporty but elegant. My neighbor has a brand new Ford Taurus and it looks very bland next to my 300. The only thing I would add to the side is a little bit more chrome towards the bottom. It looks a little plain.

The trunk space is great and I love the fold down seats . They have come in very handy.

There are many features that have exceeded my expectations, the smooth ride, the comfortable seats, the smooth transmission and the gas mileage. Maybe it's silly but I do feel more important driving this car. I love it.

This car has been a learning experience for me. I now can play my ipod, and a thumb drive as well as a CD. I have over 2000 songs to listen to as well as the radio!

This is a large car but very easy to maneuver and change lanes. The large rearview mirrors are perfect. The back up camera is a great addition.

This is a marvelous engine. Powerful when you need it, quiet and great gas mileage. I am so glad I didn't get the hemi.

This is one of the nicest cars I have ever owned. The whole experience is a joy every time I get in it. I look forward to driving it every day. It always makes me feel good. And I think it is an impressive car, which I like too.

Yes, this is a very quiet car. I don't have to play the stereo to drown out the engine.

you just set them and forget them. just push the colored arrows up or down. Couldn't be easier than that.

Because of my back it's very important for me to be able to get in and out of a car easily. The 300 is perfect. I like the upright seating position. I am able to just step out of the car.

Everything is within easy reach. The touch screen works great and the large size makes it easy to read and operate.

I have gotten as much as 37mpg on the highway! I was so surprised and delighted.

I have the Deep Cherry Pearl and it just sparkles in the sunlight. It comes alive. A beautiful color.

I like how they have integrated the rear bumper into the overall styling of the car. It makes it look solid and not something that was just hung on the back. Great taillights, very distinctive. When you see them you know immediately it's a 300.

I like the exhaust because when I'm driving I don't hear it.

I love the look of his car. It is very impressive. It's a large car that looks very sophisticated and powerful. I feel more important when I drive it. I have gotten many compliments on it. I never really considered Chrysler 300 before, now I will stick with Chrysler for as long as they keep styling like this.

Vehicle Satisfaction Ratings

What are your favorite parts of your new vehicle?

I love the front end styling. You can always tell when a Chrysler 300 is coming. It doesn't look like anything else. I also like the more squared off look of roof. So many cars now have a very sloped rear window, for example the Cadillac DTS. It is not distinctive. The Chrysler 300 is unique and handsome. I think it is a masculine car. It looks elegant and solid. I also love the engine and transmission, I get wonderful gas mileage. (just fix the shifter) The seats are very comfortable.

Detail on Low Rated Items

We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.

I was very disappointed with the poor quality of the fuel pump which made the car very unsettling to drive initially. Now it's a dream to drive. The whole voice activation needs to be improved. It has never worked very well for me so I hardly use it now.

Interior Trim/Storage/Windows>Abnormal Noises>Squeak/rattle/abnormal noises from headliner>

Additional Comments:

I've been to two dealers and if I leave the car in the service area, it warms up and then they don't hear it. So I finally took on service guy on a ride with me in the early morning in December and he heard the rattle, but couldn't tell where it was coming from. So I left the car overnight and it was inside their service bay, so it warmed up and they could no longer hear the rattle. Very frustrating.

Please describe conditions when this trouble occurs:

It only occurs when it is cold out. I hear it in the winter, not in the summer.

Interior Trim/Storage/Windows>Abnormal Noises>Squeak/rattle/abnormal noises from headliner>

Please describe in the box below where from the headliner the trouble with abnormal noises is located:

When it is cold out I get an annoying rattle sound. It is a metallic rattle coming from behind me. It is either somewhere in headliner/sunroof or the back seat. It only happens when it's cold out. The dealer has not been able to locate the noise. They can hear but don't know where it is. This has been happening since the day I bought the car over 1.5 years ago.

Approximate mileage when trouble was first noticed was:

0 - 1499 miles.

Dissatisfied.

Where did you take your vehicle to have your trouble checked out? (check all that apply)

The second dealer's serve dept. was very helpful. They knew it has something to do with the oil sensor. They changed the sensor, wiring and finally replaced the oil pump. The new oil pump solved the problem. They were determined to fix the problem and they did. They also gave me a loaner car at no charge which was a very nice surprise.

They could not help me with any problems. When my check engine light would come on, they would say, it's alright to drive it that way. They couldn't find the problem so they would just clear the check engine code. It would come back on the next day. I went back to them for several months and then went to another dealer who fixed the problem.

Please describe conditions when this trouble occurs:

When I accelerate.

To the best of your recollection, the trouble was first noticed:

At delivery.

How often does this trouble occur?

Trouble occurs regularly.

What type of fuel do you most often put into your vehicle?

Regular gasoline.

Describe the engine performance issue you experienced (check all that apply):

I would push down the gas pedal to accelerate and there was no hing. I could push the pedal all the way to floor and nothing would happen. And I would start to slow down. This was dangerous while trying to enter an expressway. When I took my foot off the gas pedal and then pressed down again, it would accelerate normally.

Was the "Check Engine" light your first indication there was trouble?

Yes.

Please describe conditions when this trouble occurs:

It only occurred when I tried to accelerate. The dealer finally replaced the oil pump and now it runs fine. But it took two dealers 1.5 years to find the problem.

What best describes the engine stalling trouble? (check all that apply):

When I try to accelerate on to an expressway I step on the gas to speed up, the engine stalls, does not accelerate. I take my foot off the pedal and then press it again and it accelerates ok. Check engine light comes on. This happened from the day I bought the car. After 1.5 years they finally found the trouble was my oil pump. They replaced it and now it accelerates fine.

Going into which position is the gear selector difficult to operate? (check all that apply):

It is hard to find the reverse gear without looking down at the shifter. I usually end up in park, then back to drive, it's not easy to find reverse when not looking at the shifter.

Please describe conditions when this trouble occurs:

It happens every time I go into reverse. The shifter should have some kind of indent for each gear. Drive and park are easy because the both at the end and the shifter stops. But you have to be very gentle with the shifter to find the reverse gear. It always takes several attempts to find reverse and I have owned this car for over 1.5

What Can We Do Better?>

What has Chrysler done right?	It's a beautiful car with a lot of advanced technology. It has a beautiful quiet smooth ride and I get great gas mileage for a 6 cylinder. I have gotten up to 37mpg on the highway.
Feedback/Concerns:	Quality control needs to be better before the car leaves the factory. Adjust the shifter on the automatic so it's easier to put it into reverse. Adjust the voice activation to better understand the user. I never have a problem with my hand held Garmin. The voice activation is flawless. I never have to repeat myself. The UConnect rarely understands me.

Hands-Free Phone / Bluetooth system loses connection

Additional Comments:	Bluetooth will sometimes say "No device connected" when I power on the car, even if it was connected the last time I turned off the car.
Connection problem happens on:	Bluetooth connection between cell phone and the radio.
Is there more than one phone paired to the vehicle?	No.

Front seat audio/entertainment/navigation touchscreen controls/menus broken/not working

Please describe conditions when this trouble occurs:	Everyday use
How often does this trouble occur?	Trouble occurs regularly.
Please indicate which controls/menus are broken/not working properly (check all that apply):	My SiriusXM no longer works. It says "205" and that's it. I can't adjust or enter any menu settings. There is no data on what the "205" means when looking online. I just seems frozen.

Touchscreen Controls/Menu: Front Screen Display: Other Concerns

Please describe conditions when this trouble occurs:	Everyday use
How often does this trouble occur?	Trouble occurs regularly.
Please describe the other trouble you experienced:	Screen Brightness
Additional Comments:	The screen brightness controls are lackluster. When the screen is turned off, it should go pure black/ high contrast, instead of the dull grey that still emits light. I prefer my system screens powered off when traveling along rural areas that have minimal lighting, so that the electronics and car screens don't hinder my night vision.

Detail on High Rated Items

You rated interior comfort, design and appearance of interior (overall impression) High. Use this space to provide any specific comments you would like to share.	I have beautiful, gorgeous red leather seats. Everyone loves the color contrast against the black car. Compliments abound.
You rated head/leg/foot room High. Use this space to provide any specific comments you would like to share.	I'm a big guy. I need that space.
You rated engine performance during acceleration High. Use this space to provide any specific comments you would like to share.	The engine purrs, but the 8spd transmission doesn't do it justice when you want to really push to the limits. There needs to be a better auto-manual transmission option (or UPGRADED transmission you can install!)
You rated exterior design and appearance (overall impression) High. Use this space to provide any specific comments you would like to share.	It's large, imposing, and absolutely menacing. It's wonderful like that.
You rated front view styling (front fascia, hood, grille, headlight area) High. Use this space to provide any specific comments you would like to share.	The fascia is beautiful, and the car's front end is unmistakable. The halogen headlights have more character than the HID's because they are a homage to the original muscle cars.
You rated fuel economy and driving range High. Use this space to provide any specific comments you would like to share.	I keep a weekly log of my mileage and miles per gallon. The Charger averages about 480 miles per tank, on regular gas, and that's amazing given my commute.
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that you feel far exceeded your expectations.	There are so many special editions, packages, and upgrades, but they're always so pricey. Bring those prices down and give people a better reason to mod their cars using Mopar parts instead of 3rd-party crap. It's insane that my bumper costs \$300, and the GRILL costs OVER \$300. I'd buy a whole set on Ebay for 1/2 the cost. Give people the ability to show you just how cool your cars can be.

Secondary Household Vehicle: Purchased New.

RL.

Which, if any, influenced your purchase decision? (check all that apply):

I saw a sleek black car, outside of the dealership, in the rain, and the hint of a red interior. I was leaving the dealership, and that car stopped me in my tracks, and I HAD to go back inside and find out what it was. I was smitten by the color combination, the large trunk space, and the interior.

Have you taken the vehicle to a dealer to have your trouble corrected?

No.

Did you review the Owner's Information DVD?

No.

Please explain further about your choice to recommend your vehicle:

It works, mostly. I wanted a simple to fix, easy to maintain car, so this works. But it's the small things that make it frustrating. The interface systems are so restrictive that I feel as though I'm being prohibited from customizing and fine-tuning my driving experience and vehicle controls. With over 17,000 miles in 9 months, that's a huge frustration. I'm a driver, create the controls that put me in charge of my vehicle and how I want to set it up (instrument cluster brightness, bluetooth sync settings, being able to open the trunk when in drive).

Overview	
Smartphone Application covers the necessary features	3 (neither agree nor disagree).
Brake pedal feels mushy/soft	
Trouble with brakes occurs while traveling in these road conditions (check all that apply):	All road conditions.
Trouble with brakes occurs while traveling at these speeds (check all that apply):	High speeds (46 MPH and above). Medium speeds (26-45 MPH).
Trouble with brakes occurs during this type of braking (check all that apply):	The brake rotors are puny for a car this size. I was mortified when I saw them. My previous car was an Audi A4, and had larger brakes and firmer pedal feel than this. Panic stopping is scary, and the car feels like it's not very confident when braking evasively.
How often does this trouble occur?	Trouble occurs regularly.
Speakers have poor sound quality	
Please indicate which speaker has trouble (check all that apply):	I bought the vehicle in winter, so I never tested the volume with the windows down. They have be at level 20+ to overcome the wind noise at 60mph. That is very loud, and the sound is terrible from the speakers at that range.
Please indicate which media sources were being played (check all that apply):	Satellite Radio. FM.
Approximate mileage when trouble was first noticed was:	4000 - 7999 miles.
To the best of your recollection, the trouble was first noticed:	More than 3 months after delivery.
Trouble with speaker occurs:	Only at high volume levels.
How often does this trouble occur?	Trouble occurs regularly.
Radio	
Radio	Bluetooth streaming audio works, but is difficult to understand/use. AM/FM/HD/Satellite radio channels have poor or no reception.
Brake Operation	
Brake Operation	Brake pedal feels mushy/soft. Brakes do not have enough stopping power; brake pedal requires too much effort.
Vehicle Issues/Things Gone Wrong	
Continuous Quality Insight	Brake System. Entertainment/Navigation System/Connectivity. Transmission and Drivetrain. Interior Climate Control. Features/Controls/Displays. Interior Trim/Storage/Windows.
Dome/map/interior lights work properly, but difficult to understand/use; controls in a poor location	
Please indicate why the controls are difficult to understand/use; are in a poor location (check all that apply):	Controls are not easy to reach.
Please indicate which of the following best describes your concern (check all that apply):	I appreciate being able to dim the interior lights / instrument cluster, but the degree of dimming is mediocre and sloppy. I had an Audi prior, every 1/10th of a turn was a precise lighting change. The Charger switches seem crude and don't change much unless their at their extremes. I can't quickly glance to see which control I'm accessing. I have to look down or feel around because the steering wheel blocks the rotary switches.
Additional Comments:	Make switches that have a precise, measurable impact on the system they affect. For the instrument cluster, I want full control of what is lit, and how bright each section is.
AM/FM/HD/Satellite radio channels have poor or no reception	
Please indicate which frequency band has trouble (check all that apply):	Recently, I have static on my FM stations. I realized that this increases whenever I am charging my phone via a 12v-to-USB adapter. It happens no matter what 12v socket I plug into charge.
Please describe conditions when this trouble occurs:	When charging my phone
How often does this trouble occur?	Trouble occurs regularly.
Operation and Performance	
Operation and Performance	Heating, ventilation and air conditioning doesn't maintain desired temperature. Windows fog up a lot/take too long to clear/do not clear adequately.
Shifts at wrong times	
Please indicate driving condition where the shifting trouble is noticeable (check all that apply):	Maintaining a fairly constant speed while driving on steep/hilly roads. Hard acceleration.

Shifts at wrong times	
How often does this trouble occur?	The car struggles to find the right gear, and since the 8-spd. didn't have paddle-shifters, I can manually select a gear. I have to hit the gas to get it to shift down.
To the best of your recollection, the trouble was first noticed:	Trouble occurs intermittently.
Approximate mileage when trouble was first noticed was:	1 to 3 months after delivery.
Are you using your vehicle for towing when the problem occurs?	1500 - 3999 miles.
No.	
Automatic Transmission	
Automatic Transmission	Shifts at wrong times.
	Hesitation or delay when shifting between gears.
	Gear selector is difficult to operate (auto. trans.).

How often does this trouble occur?	Trouble occurs regularly.
To the best of your recollection, the trouble was first noticed:	1 to 3 months after delivery.
Approximate mileage when trouble was first noticed was:	1500 - 3999 miles.
Please indicate why the center console is difficult to open/close (check all that apply):	Trying to put a USB cable into the USB port is a feat of itself, because of the position of the port. It takes a lot of fumbling to get a flash drive setup in there.
Speakers are not loud enough	
Please indicate which media sources were being played (check all that apply):	USB Drive.

Windows fog up a lot/take too long to clear/do not clear adequately	
To the best of your recollection, the trouble was first noticed:	Within the 1st month after delivery.
Please indicate the trouble with the front defroster (check all that apply):	I spent 3 hours in gridlock traffic, during a snowstorm. I had to turn on defogger on EVERY 15 MINUTES because it would automatically turn off, and my windows would fog up again. Can you comprehend how aggravating that is?
How often does this trouble occur?	Trouble occurs intermittently.
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
Operation and Functionality	
Operation and Functionality	Center console is difficult to open/close.
Bluetooth streaming audio works, but is difficult to understand/use	
Please indicate which of the following best describes your concern (check all that apply):	I want my passenger to pair their bluetooth device while the vehicle is in motion, and I can't do this. WHY? It's frustrating to have to exit the highway and park to pair a device. It also won't connect to the 2nd device unless I turn off bluetooth on the first device.
Please describe conditions when this trouble occurs:	When pairing 2nd device
Touchscreen Controls	
Touchscreen Controls	Front seat audio/entertainment/navigation touchscreen controls/menus broken/not working.

Welcome	
Please tell us how many miles are currently on your vehicle:	More than 10,000.
Are you the primary driver of this vehicle?	Yes.
Gear selector is difficult to operate (auto. trans.)	
Why is the gear selector difficult to operate?	Other (please describe).
Going into which position is the gear selector difficult to operate? (check all that apply):	Some times I push up on the shifter, and assume it's in park because it doesn't go any further, only to find myself in reverse. I've had several moments of "Oh no!" as I released the brake and found myself going backwards unexpectedly.
	Shifting from park to drive, I'll hit the gas and realize I'm in neutral.

Gear selector is difficult to operate (auto. trans.)	
Approximate mileage when trouble was first noticed was:	4000 - 7999 miles.
How often does this trouble occur?	Trouble occurs regularly.
Additional Comments:	The 8-speed transmission is awesome, but even after almost a year of driving, still befuddles me. I have to consciously look down at the instrument panel to ensure I'm in the right gear, otherwise I probably won't be. It's frustrating that I can't do it by feel or muscle memory. Also, the light on the shifter is ridiculously bright; it needs to be dimmed.
To the best of your recollection, the trouble was first noticed:	1 to 3 months after delivery.

Media	
Media	Radio.

Hands-Free Phone / Bluetooth system is difficult to use	
Please indicate why the hands-free phone / bluetooth system is difficult to use:	Why can't I pair a 2nd device while the vehicle is in motion? My passenger wanted to their their iPod, during a roadtrip, and I had to wait until we pulled over on the side of the road to pair the device. I understand it's a safety feature. But I had a passenger in the car capable of doing the process. I feel like a child who is restricted from doing anything with the vehicle controls.

Brakes do not have enough stopping power; brake pedal requires too much effort	
How often does this trouble occur?	Trouble occurs regularly.
To the best of your recollection, the trouble was first noticed:	1 to 3 months after delivery.
Trouble with brakes occurs during this type of braking (check all that apply):	When I saw how puny the brake rotors were for a car of this size, I was mortified. My A4 had larger brakes, and was a smaller vehicle. Brake response time is sluggish, and doesn't grip very well. It takes a lot of force to stop the Charger, and the brakes feel inadequate for it. I've scared myself several times over while panic stopping. I've already purchased new performance brake pads and stainless steel cables in an effort to address the issues.
Trouble with brakes occurs while traveling in these road conditions (check all that apply):	All road conditions.
Trouble with brakes occurs while traveling at these speeds (check all that apply):	High speeds (46 MPH and above). Medium speeds (26-45 MPH).

Detail on Low Rated Items	
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	BRAKES. I drive so much, and it scares me how terrible the brakes are. I fear for anything that involves a panic stop. I'm cool with a fast car but I want to stop as soon I my foot touches the pedal. I don't have a lot of confidence in the braking prowess, and thus operate my car more conservatively. Not the persona you'd like to see for a Charger.

What Can We Do Better?	
Feedback/Concerns:	I have an ongoing list of pros and cons from driving the Charger. Contact me and we'll discuss, if you're inclined. I care about my car a lot, I want it to be the best it can be, and while I enjoy it, there is so much more I'd like to see enacted to make it perfect. Be a beacon of pride and ingenuity (and brute power) of being an American Car Marker. Bring better value to the people who can't afford the RT / SRT / Special Edition models. I love my car, I'd love even more to be able to upgrade the components with MOPAR accessories as I can afford them, for instance, give me a way to add paddle-shifters, because I couldn't afford them when I bought the car.
What has Chrysler done right?	You're making bad-ass cars. Keep it up, and outsource your newest designs to crazy brilliant designers. Don't fall into the trap of making all your vehicles look similar, because they become boring.

Printed User Guide format is easy to understand and use	5 (strongly agree).
Information in the Printed User Guide is easy to find and access	5 (strongly agree).
Please explain further about your choice to recommend your vehicle:	I do not like this 2014 Chrysler 300 quite as much as the 2006 Chrysler 300c it replaced. Looked at options from other manufacturers but selected the 300 primarily because of the easy of entry and exit and overall comfort for us older/larger people. I have recommended these cars as a good option to friends who lament the loss of the Ford Crown Vic/Mercury Grand Marquis platform.

Touchscreen Controls/Menu: Front Screen Display difficult to understand/use; in a poor location

Please indicate why the front screen is difficult to understand/use (check all that apply):	Most of my issues with this feature are as listed in the section before this. I am referring to the small display located between the speedometer and tachometer used to display time/distance and MPG. Need to put on my reading glasses to view. Not practical while driving.
Please indicate which of the following best describes your concern (check all that apply):	How the heck do you cancel out getting directions to a location and go back to just viewing the map. Neither I nor my wife have been able to figure this out. If I put in a known location of interest, with no intention of actually stopping here... just going to the general area... I can not figure out how to clear it and go back to just viewing the map. The system will continue giving me directions to that point. Talking to me all the while, trying desperately to get me to the place I'm not going. Ridiculous. Should be an easy way to stop/delete the directions function once I have arrived in the area. Maybe there is but if so it's not intuitive.
Additional Comments:	This has been the most disappointing feature on this car. The best "trip computer" both by ease of use and available functions was on my 1996 Cadillac. My 2006 Chrysler 300 was not as useful, but still ok. Now my 2014 Chrysler's is the worst yet. See a trend here?

You rated rear view styling (rear fascia, bumper) High. Use this space to provide any specific comments you would like to share.

After trying other brands... most interested in the Ford Fusion... we decided to replace the 2006 300C with a new 300 primarily due to comfort.

I am [REDACTED] and have replaced knees. The ability to stretch my legs out straight on long drives is of primary concern.

New 300 continues to have stately profile. Rear fascia is improved over my 2006 300C (I upgraded taillights with chrome overlay which helped). Chrysler got it right with new rear end treatment. Front fascia not as impressive as the 2006 that it replaced. Attractive, but a little too much like many other cars on the road. Older 300 was more distinctive.

There are not many conventional cars that are easy to get in and out of for the 50+ crowd. The Chrysler 300 is the best option in its price class.

I almost never give any thought to the ride. That is a compliment. The "ride" is something you notice when it's bad.

Side profile is about perfect.

Taillights/bumper is more attractive than the 2006 300 I replaced. Its taillights were too simple and untrimmed (though I added chrome overlays to mine). The 2014 has much nicer taillight treatment.

Detail on Low Rated Items

We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.

You rated ease of using system displays while driving Low. Use this space to provide any specific comments you would like to share.

No way to restrict/close off Air Conditioning to rear passengers.

Most disappointed with the view and control of the trip computer display (between the speedometer and tachometer). Takes way more attention to toggle between MPG and time/distance features than in my previous 300. Central video display is easier to see, but does not have the ability to display those functions which I use a lot. Also, NAV system has proved cumbersome, unreliable, confusing and more or less useless other than on one long trip through largely open road.

Vehicle Issues/Things Gone Wrong	
Continuous Quality Insight	Entertainment/Navigation System/Connectivity. Features/Controls/Displays. Interior Climate Control.

Navigation system works, but missing information; has incorrect information; gives wrong directions	
Please indicate which of the following best describes your concern (check all that apply):	Known locations not in database. Gives routes that are not logical. Gives directions to more distant business when there is a closer one nearby.
Please indicate which navigation system item has trouble (check all that apply):	System works well in rural driving but gives poor routes in urban area.

Front seat audio/entertainment/navigation system difficult to understand/use; in a poor location	
Please indicate which of the following best describes your concern (check all that apply):	Viewing and resetting the information display in front of the driver is much worse than on my 2006 Chrysler 300. I am frequently checking time/distance and MPG. On this car to reset or toggle between viewing my MPG and viewing my elapsed time I have to do the following steps: BACK, DOWN, DOWN, DOWN, >, DOWN, DOWN, DOWN, >. Then the reverse to view the other. Having learned what I need to do, I try to make these entries without looking, but often end up in the wrong place. So I have to take my eyes off the road for too long to get it right. End result is that I don't use this feature as much as I used to on my old car. Very frustrating. Should be able to "customize" display so I can quickly toggle between the only two features I commonly use. None of the other options have been of use to me so far. Perhaps the two most relevant (for me) items to be displayed should be adjacent to each other. That would help.

Entertainment/Navigation System/Connectivity>Navigation System>	
Navigation System	Navigation system works, but traffic information doesn't work / or is difficult to understand. Difficulty accessing Points of Interest. Navigation system works, but missing information; has incorrect information; gives wrong directions. Points of Interest incorrect.

What Can We Do Better?	
What has Chrysler done right?	In the 300, Chrysler offers a more upright and roomy, well appointed car for folks over 50 and over 200 lbs. In this car I can still stretch out my legs on long drives. This car is attractively styled and has nice details. In general we trust Chrysler brand products. This is our sixth new Chrysler.
Feedback/Concerns:	This survey did not have a place to discuss my problem with REAR seat climate control (there is none). Was unclear where to discuss my most annoying concern. That being with the trip computer display located between the speedometer and tachometer. Hopefully I got it right and someone will review and consider my concerns.

Touchscreen Controls	
Touchscreen Controls	Touchscreen Controls/Menu: Front Screen Display difficult to understand/use; in a poor location. Touchscreen Controls/Menu: Front seat audio/entertainment/navigation controls/menus difficult to use/in a poor location.

Difficulty accessing Points of Interest	
Please describe the trouble with the Points of Interest within the Navigation system	Looking for McDonalds restaurant that I knew was along my intended route not far away. Used Points of Interest feature to plan my stop but was directed to a McDonalds further away and in the opposite direction. When I got about 1 mile from my intended stop the Nav finally recognized that it was there. Perplexing.

Please indicate why the controls/menus are difficult to understand/use; are in a poor location (check all that apply):	<input type="checkbox"/> To toggle between MPG and time/distance (which I used to do easily and frequently on my 2006 Chrysler 300) it takes the following steps: BACK, DOWN, DOWN, DOWN, >, DOWN, DOWN, DOWN, >. Then the reverse to get back. Far too much time and attention at 65MPH. <input type="checkbox"/> No easy way to toggle between viewing time/distance and MPG. Much more cumbersome than on my 2006 Chrysler 300. A step backwards.
Please indicate which of the following best describes your concern (check all that apply):	<input type="checkbox"/> Maybe I'm in the wrong section, but I have not found the correct place to describe my issue. I am speaking about controlling the information display located between the speedometer and the tachometer.

Based on the feedback you provided, would you like someone from Chrysler LLC to contact you about your Chrysler vehicle?	<input type="checkbox"/> Yes.

Voice Recognition feature does not have enough functions available	
Please describe additional functions you would like to have:	<input type="checkbox"/> Voice recognition will bring me to a menu of proposed locations but will not scroll or allow me to make a selection without touching the screen. I can't just glance at the screen and state the business name, or the number selection next to it. Scrolling down and touching the screen to make my selection takes my eyes off the road too long, especially in urban driving. Should be able to make selection using voice command.

Reverse-camera works properly, but difficult to understand/use; controls in a poor location	
Please indicate why the reverse-camera controls are difficult to understand/use; are in a poor location (check all that apply):	<input type="checkbox"/> Biggest problem has always been trying to back out from between taller vehicles. Can't see crossing traffic until car is half way out into traffic. Reverse camera as it is is only marginally more help than the rear view mirror. Very disappointed that there was no cross traffic view available on this car. For my situation this will be a major selling point on my next purchase.

Detail on High Rated Items

You rated transmission gear change performance (smoothness) High. Use this space to provide any specific comments you would like to share.	Transmission gear change performance is excellent. The only transmission-related issues are 1. when car is rolling in neutral you have to stop in order to shift into Drive. This is a safety hazard. When moving at speed, it is possible to shift from Neutral to Drive without putting on the brakes, 2. I like the shifter but the detents could be changed so it is easier to distinguish by feel between Park, Reverse, Neutral and Drive.
You rated fuel economy and driving range High. Use this space to provide any specific comments you would like to share.	I got 35.9 MPG on a 400-mile trip once, going between 60 and 80 with some stop and go traffic.

You rated your attitude about the brand of your new car High. Use this space to provide any specific comments you would like to share.

I have been a Chrysler fan since my dad sold them in the 1960s, although I've owned other brands as well (Infiniti, Mazda, Buick). This 300 is the best I've owned, including my Q45.

What Can We Do Better?	
What has Chrysler done right?	The body style and overall look of the Charger and Challenger are definitely the best.
Feedback/Concerns:	I do not like the new electronic shifter in the automatic cars. Sometimes I feel I have to really jam it forward to get it into park. The small size of it makes the center console look a little awkward. Even though it is an automatic, I still want the feeling of actually shifting into gear.

Additional Comments: Please describe conditions when this trouble occurs: To the best of your recollection, the trouble was first noticed: Approximate mileage when trouble was first noticed was: How often does this trouble occur? Please describe in the box below where from the center console the trouble with abnormal noises is located:	It only occurred once, but it was pretty loud. Could have been related to a broken piece in the air vent to the right of the console. I was driving interstate More than 3 months after delivery. 8000 miles or above. Trouble occurs intermittently. The rattle/noise seemed to be coming directly behind the center console
What Can We Do Better?	
What has Chrysler done right? Feedback/Concerns:	Overall I really like the style, drive, and build of my charger. It feels like a "real" car, much like the larger vehicles that my parents had when I was a kid. It feels solid, but sporty at the same time. I would recommend a gearshift that is more solid when changing the gears, to ensure that it goes in the right gear - or into park correctly. Once I accidentally knocked it into low gear and didn't realize it right away, and more than once I thought I had it in park and started to step out to close my gate, and the car started to roll - and I realized it was in neutral instead of park.

Approximate mileage when trouble was first noticed was:	4000 - 7999 miles.
How often does this trouble occur?	Trouble occurs regularly.
Going into which gear/gears does the trouble occur? (check all that apply):	Not sure if it is 3rd or 4th gear, but when the engine is warm, but only driving for about 5 minutes after cold start, when you accelerate into traffic there is a very noticeable harsh shift. It only happens once, and in one gear, and only after a cold start.
To the best of your recollection, the trouble was first noticed:	More than 3 months after delivery.

Overview	
Have you taken the vehicle to a dealer to have your trouble corrected?	No.
Many of our vehicles have supporting smartphone applications with vehicle information. Have you had the opportunity to download and review your vehicle's smartphone application (if available)?	No (after completing your survey, we will provide a link to download your vehicle application to your smartphone.).
Have you referred to the Owner's Manual, Warranty Manual, or other documents that came with your vehicle to answer questions about your vehicle?	Yes.
Please explain further about your choice to recommend your vehicle:	It is fun to drive, and the looks are amazing. It has both performance when needed, and economy on long trips. I recently came back from Albany, NY to Virginia Beach, VA and got 32 MPG average, AND 300HP! That makes me happy. Of course, if I need the power, it is there, and I will get less gas mileage, but it is my choice. I like the fact I have that wide range from performance to economy. Too many times cars sacrifice performance for economy. I like having my cake and eating it too! Now, can I have a Hellcat please?
Which automotive publications do you subscribe to? (check all that apply)	I get my info from posts on Facebook.
Would you recommend this vehicle to family or friends?	Yes.

Please rate your overall level of satisfaction with the Printed User Guide	4 (satisfied).
If our team has any additional questions about your responses, would you accept further contact?	Yes, by phone or e-mail.

Hands-Free Phone / Bluetooth system voice activation doesn't recognize command	
Do you usually set HVAC vent direction toward ceiling?	No.
How often does this trouble occur?	Trouble occurs regularly.
Additional Comments:	The Samsung Galaxy S5 has a hands free car app built in that puts yours to shame. Perhaps you should collaborate with the cell phone manufacturers? Also, if you made your system software upgradable, then the fact that people own cars longer than cell phones wouldn't date your technology.
Please indicate which words, if any, are constantly misrecognized:	Words? It doesn't recognize anything I say. Also, the commands it is suppose to recognize are not intuitive. Google and Siri make your voice recognition look like a caveman made it.

Love the solid black rims from the Blacktop edition. I prefer solid wheels rather than "clad" wheels that simply have a plastic faux chrome cover.

The automatic headlights are a wonderful feature.

Blacktop edition was brilliant idea. Love the all black/solid color styling.

It looks amazing. I like the all solid color from the Blacktop package.

The backup camera is blurry. I suppose it is because we are spoiled by high definition TVs and cell phones these days. It seems odd that the backup camera appears so out of focus. Image is not as sharp as I would expect from the level of technology we have today. Also, uConnect has been a major disappointment, especially when compared to the features that are compatible with Ford's Sync and current Android phones, but do not work with the uConnect. When I called to complain, all I got was "Sorry". Not good enough. You need to fix that. If your system advertises hands free text features, it should work with most of the common phones out there. Why would you have features that do not work with the most common phones. I hate iPhone, so why do you worry about those elite iPhone snobs? Most of those smug jerks drive Prius' anyway.

The LED racetrack lighting looks sharp.

How do you define sexy?

Paint blemish/dirt in paint/foreign material under surface

Additional Comments:

I piked the car up at night. It rained a lot the first week I owned the car, so I didn't notice until about 2 weeks later when I picked my car up after having the paint protection package applied at the dealership. I would think there should be better quality control.

Please indicate the location of the paint issue (check all that apply):

It looks as though there was some sort of circular buffer used and it dulled the paint in that area, as if the topcoat wasn't dry before buffing.

Approximate mileage when trouble was first noticed was:

0 - 1499 miles.

To the best of your recollection, the trouble was first noticed:

Within the 1st month after delivery.

What Can We Do Better?

Feedback/Concerns:

Improve your uConnect system so it works with all Samsung phones! Make the system upgradeable/expandable.

What has Chrysler done right?

32 MPG and 300HP! Plus, the Hellcat is absolutely amazing! It's about time someone went back to the American muscle car roots!

Text messaging broken/not working

Additional Comments:

Why would you design a feature that does not work with almost all Android phones? Ford Sync works brilliantly. Yours sucks.

Please describe the trouble you experienced (check all that apply):

See previous note

No phone currently available from Verizon will work with text feature. It makes the feature pointless. This feature was a selling point for me, and after purchasing the car, discovered it was not compatible with my phone. I even got a new phone, and it still wasn't compatible. How can such an advanced system not work with the latest phones?

Hands free text feature was an influential selling point. I was extremely disappointed to learn it is not compatible with most phones on the market.

Additional Comments:

When traveling from Williamsburg, VA to Virginia Beach, VA, the system locked up and I didn't realize it, causing me to miss my exit. I have found that the system has an unpredictable flaw is unreliable for navigation in unfamiliar locations. All I use it for now is to see an ETA on known routes. My phone navigation with Google Maps is more reliable!

Navigation system works, but missing information; has incorrect information; gives wrong directions

Additional Comments:	For how much the system costs, you would expect better. Cell phones cost less and outperform your navigation system. Also, you should make it user updateable via consumer downloads and USB. I can upgrade my Garmin GPS device this way, as well as my Tom Tom. Its not hard, and we have the technology. Actually, it is old technology, so why are you so behind on the imes?
Please indicate which navigation system item has trouble (check all that apply):	Didn't I just answer this?
Please indicate which of the following best describes your concern (check all that apply):	I do not know why, but one day my GPS began telling me to go alternate routes that were longer, even though no traffic indications were present on the navigation screen.

Detail on Low Rated Items

We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	As I have said ad nauseam, your uConnect is lacking. I have been disappointed in the features. See my previous comments for clarity, or call me. I will be willing to give you and ear full. Also, after only about 6 months, the lock button on the drivers door appears to be turning grey and sun-faded. I would of thought it would last longer. The software seems a bit glitchy. Hire someone who isn't an iPhone user to work on it. When my navigation gives me erroneous information, my confidence level drops. My Garmin Nuvi works better than your Garmin uConnect. Also, the media player using the SDHC card doesn't always display the album cover art or the title of the song in proper format. I know that is probably an encoding feature from the source, but it sure would be nice if you had something we could download on our home computer that would properly format the music files so they can display correctly. If there is, perhaps you should mention that on your website. I know you dont want to endorse third party software, but it would be nice if you could provide some sort of referral to enhance owners experience when it comes to playing music files on your device. Just my opinion.
You rated integration with phones Low. Use this space to provide any specific comments you would like to share.	See my previous comment about iPhone users and Prius drivers...

Difficulty accessing Points of Interest

Please describe the trouble with the Points of Interest within the Navigation system	Does not search, hangs with hourglass displayed
Additional Comments:	It takes several minutes to try and search for something by name. Usually I just hit cancel and look it up on my phone. Makes your system pretty much useless. Why have a feature that is horrid compared to a cell phone? What are you using, an Intel 286 processor from the early 90's? Car is awesome. Your technology sucks.

Overview

Please provide feedback on how Chrysler can improve the Printed User Guide	i've looked to see what the envelope on my dashboard means. I can't find it. Quit looking. It's some hing like manuals that come with electronics these days. The assumption is made that there is a certain amount of information you should already know so it's not included in the guide. I also had difficulty linking my phone to the car. My dealer and my son also had trouble. I finally took it to my brother. He also said he couldn't get it to work. Then one day, as I'm talking to my brother while in my car, the phone linked up to the car.
Which feature or section of the Printed User Guide did you find least helpful and why?	See above.
Printed User Guide covers the necessary features	2 (disagree).
Where did you take your vehicle to have your trouble checked out? (check all that apply)	They did the computer updates they had. Said to bring it back ifit continues. I just don't have this kind of time.
Have you referred to the Owner's Manual, Warranty Manual, or other documents that came with your vehicle to answer questions about your vehicle?	Yes.
Information in the Printed User Guide is easy to find and access	2 (disagree).
Printed User Guide format is easy to understand and use	3 (neither agree nor disagree).
Did you review the Printed User Guide?	Yes.
Was there information needed that was not included in the User Guide?	Yes. Envelope in the dash. Adequate help to link my phone to my car.
Please rate your overall level of satisfaction with the Printed User Guide	3 (neither satisfied nor dissatisfied).
Many of our vehicles have supporting smartphone applications with vehicle information. Have you had the opportunity to download and review your vehicle's smartphone application (if available)?	No (after completing your survey, we will provide a link to download your vehicle application to your smartphone.).

Overview	
Overall, how satisfied are you with the quality of your new vehicle?	Satisfied.
Have you taken the vehicle to a dealer to have your trouble corrected?	Yes.
Was the trouble resolved to your satisfaction?	No.
Did you review the Owner's Information DVD?	No.
Would you recommend this vehicle to family or friends?	Yes.
If our team has any additional questions about your responses, would you accept further contact?	Yes, by phone or e-mail.

What Can We Do Better?	
Feedback/Concerns:	Just so you know...not everyone has a smartphone. My connectivity to my car shouldn't be affected because I've chosen to not own a smartphone. I'd really preferred to continue to drive a Jeep as I have for many years. No incentives or rebates were offered at the time my lease was up. So, I got a 300. I find that loading and unloading groceries with this 300 is not nearly as easy as it was with my Jeep. Also, I miss the cargo space.I also liked sitting up higher. It's been years now since I could get an incentive for being a returning Jeep leasee. Why not? Jeep is making you a ton of money!
What has Chrysler done right?	My Chrysler 300 is a beautiful and very comfortable car. I'm proud to drive it and for the most part, I'm very happy. I love my dealership. I do appreciate the better gas mileage. The styling on this 300 is beautiful. Trunk space is adequate. I really like the pull down console in the back seat. The interior lighting is impressive. It has so many features that if I had to, I think I could live in it. :)

Headlights not bright enough	
Additional Comments:	This particular problem is very disconcerting.
Please describe conditions when this trouble occurs:	Any time at night when I use low beams.

Headlights not bright enough

Please describe the trouble you experienced:

On low beam, there is a definite horizontal line of visibility, where the road ahead is brightened with the headlamps and above it, where it is dark. Consequently, I drive as often as I can with the high beams on.

Going into which position is the gear selector difficult to operate? (check all that apply):

I've been driving my car for almost a year now. This shifting should be second nature by now and it is not.

To the best of your recollection, the trouble was first noticed:

Within the 1st month after delivery.

Please describe conditions when this trouble occurs:

I've thought it was in park at a gas station, in my driveway, at the library. You may argue that I should pay closer attention. Well, believe me, I am now. I literally had to jump back into the car at the gas station when it began rolling away. Fortunately, I hadn't started pumping gas yet.

Why is the gear selector difficult to operate?

Other (please describe).

Shift between gears is rough/harsh under normal driving conditions

Going into which gear/gears does the trouble occur? (check all that apply)

there is a jerking motion between gears. The technician at my dealership couldn't find a problem. Said to bring it back if it continues. He did the computer updates that were available. I simply don't have the time to take it back in again. It means trying to get another car to drive to work.

It happens often. I've not paid attention to which gears are worse.

Please describe conditions when this trouble occurs:

My driving is usually under normal conditions. I don't accelerate quickly.

Detail on High Rated Items	
You rated steering and handling (responsiveness, stability) High. Use this space to provide any specific comments you would like to share.	It is responsive. Sometimes I'm not sure of clearances and have been told to dock the Queen Mary. I haven't been close enough to curb. Parallel parking was always a strong point for me, 4 inches from the curb. Haven't gotten there yet.
You rated ride quality High. Use this space to provide any specific comments you would like to share.	Like taking your sofa out for a spin.Many, many passengers comment on it.
You rated interior comfort, design and appearance of interior (overall impression) High. Use this space to provide any specific comments you would like to share.	Oh yeah. This is the closest any car has come to taking your sofa down the road. Knobs are greatly appreciated for controls, in fact, recent article highlighted touch controls are not great.
You rated fuel economy and driving range High. Use this space to provide any specific comments you would like to share.	This is a large car, gigantic by today's standard, I'm very happy with gas mileage.
You rated transmission gear change performance (smoothness) High. Use this space to provide any specific comments you would like to share.	very smooth.

Detail on High Rated Items	
You rated front view styling (front fascia, hood, grille, headlight area) High. Use this space to provide any specific comments you would like to share.	Looks mean
You rated steering and handling (responsiveness, stability) High. Use this space to provide any specific comments you would like to share.	Corners better than any other car I've ever owned
You rated seat adjustment and comfort High. Use this space to provide any specific comments you would like to share.	I like the memory function.
You rated rear view styling (rear fascia, bumper) High. Use this space to provide any specific comments you would like to share.	Best looking ass on the road
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that you feel far exceeded your expectations.	The V6 power is much better than expected. Would still like more, but don't want to sacrifice economy.
You rated head/leg/foot room High. Use this space to provide any specific comments you would like to share.	At 6'1" I can stretch my legs full out in highway cruise.
You rated side/profile view styling (driver's side or passenger's side exterior area) High. Use this space to provide any specific comments you would like to share.	Has style

Detail on Low Rated Items	
You rated integration with phones Low. Use this space to provide any specific comments you would like to share.	Won't always sync via bluetooth. Bluetooth doesn't function for texting.
You rated engine exhaust sound Low. Use this space to provide any specific comments you would like to share.	I'd like to hear a rumble. At least I'd know that the engine didn't shut off when I fail to get it into "P".
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	The Sport Mode paddles are without a doubt the stupidest idea any designer ever came up with. I like the car, but I've given serious consideration to taking a hack saw to them. They just get in the way, and are nothing close to "sporty".

Shifting paddles/buttons difficult to operate	
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
Please describe conditions when this trouble occurs:	Anytime I'm making a turn.
Additional Comments:	Whoever designed and approved the shift paddles for production, should be fired.
To the best of your recollection, the trouble was first noticed:	At delivery.
Why is the shifting paddle/button difficult to operate?	Operation of shifting paddle/button is confusing/doesn't make sense.
How often does this trouble occur?	Trouble occurs intermittently.
Going into which gear is the shifting paddle/button difficult to operate? (check all the apply):	Paddles are stupid to begin with. On top of that, they are positioned where they are constantly pressed accidentally, causing the driver to cycle the shift lever through Sport Mode and back into Auto Mode.

Where did you take your vehicle to have your trouble checked out? (check all that apply)	I had a molding issue when I took delivery. The dealer I purchased from had very large tires on my car. 20+ inches. I did not like them and said so. In the removal or instillation they cracked a piece of molding that runs from the back of the wheel well under the doors. I took it to a local dealer at 200-300 miles. I was told to take it back to the dealer I purchased it from because this dealer is not responsible and should not be required to pay for the other dealers damage. I agreed. When I called my purchasing dealer I was given the run around. I sent photos and explications of the ONLY logical cause for this damage. The large tire and rim install and removal. I asked my salesman (Carlos) to order a new piece have it painted to match my car and I would drive the 150 mile round trip for instillation. He started on about repairing it with fiberglass etc. That would have taken the entire day PLUS the 150 mile trip. He knew they broke/cracked it with the tire swap and just wanted a half ass fix that would have greatly inconvenienced me. I did not mind driving from San Diego to Ontario/LA for a quick part swap but no way was I going to sit and wait on paint and a fiberglass to dry? This sales man knew that dealer did this and chose to not man up. That dealership got their money and a good review from me and did the wrong thing at the end of the day.
Overall, how satisfied are you with the quality of your new vehicle?	Very satisfied.

Squeak/rattle/abnormal noises from instrument panel/dashboard

Please describe conditions when this trouble occurs:

Please describe in the box below where from the instrument panel/dashboard the trouble with abnormal noises is located:

when hot outside, I get in the car and for the first few minutes I hear these plastic cracking like sounds where material is obviously expanding or contracting around the dash area.

Approximate mileage when trouble was first noticed was:

0 - 1499 miles.

How often does this trouble occur?

Trouble occurs intermittently.

Additional Comments:

not a major deal just weird

To the best of your recollection, the trouble was first noticed:

Within the 1st month after delivery.

What Can We Do Better?

Feedback/Concerns:	Great car, GREAT MPG, Great Power, "fix the downshift delay" I would appreciate having 100% throttle off the line not the delay off a red light, that is not appreciated when trying to have a brisk acceleration, instead of Mushy slow motion until about 30Mph. Remote Start and a backup camera should be standard without question, Come on a Honda Civic has one standard now a days.
What has Chrysler done right?	Truly Beautiful vehicle, well made, high quality, and I am very impressed so far. I am glad you guys still make large sedans.

Detail on High Rated Items

You rated exterior design and appearance (overall impression) High. Use this space to provide any specific comments you would like to share.	I wish the front end was maybe a little more squared off with the grill but I like it. The rear end is perfect, There is literally nothing I would change.

You rated engine performance during acceleration High. Use this space to provide any specific comments you would like to share.	strong acceleration for sure. The engine sounds great,
You rated ease of using system displays while driving High. Use this space to provide any specific comments you would like to share.	works flawlessly. The chrysler exclusive radio controls on the back of the steering wheel are brilliant.
You rated your purchasing experience (at the dealer/dealership) High. Use this space to provide any specific comments you would like to share.	easy as it gets, did everything online, came in signed papers, great experience
You rated engine exhaust sound High. Use this space to provide any specific comments you would like to share.	I cant hear the exhaust at all in the car but I can hear the motor and it sounds good.
You rated front view styling (front fascia, hood, grille, headlight area) High. Use this space to provide any specific comments you would like to share.	I would like a more squared off front end. I would make the headlights squared off not like the round and then the skinny part like it is now. Also for the LEDs you guys missed the mark, You need to do what you did with the 2014 Jeep Grand Cherokee. The LEDs need to be all the way around the light and use a diffuser to make them look like the Durango rear taillights, The 2014 Durango taillights are absolutely gorgeous. You need to do that on everything.
You rated appearance of exterior paint High. Use this space to provide any specific comments you would like to share.	its a really nice finish with the exception of my one blemish.

Trunk lid latch works, but is difficult to operate

To the best of your recollection, the trouble was first noticed:

At delivery.

Why is the door handle/latch difficult to operate? (check all that apply):

just required you to close it pretty hard, I presume this is because the spring is strong to open the trunk fully, which is a great feature by the way.

Please describe conditions when this trouble occurs:

when closing

Trunk lid latch works, but is difficult to operate	
How often does this trouble occur?	Trouble occurs regularly.
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.

Fog/water/condensation in exterior light lenses	
Please indicate which exterior light lenses have fog/water/condensation in them (check all that apply):	<p>Condensation appears after the vehicle is driven and then parked in a garage. It is my opinion that the heat from the engine on the backside heats the back of the lens and is such a difference in temperature from the front of the lens that condensation occurs</p> <p>Condensation appears after the vehicle is driven and then parked in a garage. It is my opinion that the heat from the engine on the backside heats the back of the lens and is such a difference in temperature from the front of the lens that condensation occurs. it does not appear that there is a "leak" but condensation can be duplicated very easily by simply washing the car. The second you get the headlights wet the condensation occurs instantly. this should NOT happen ever.</p>
Please describe conditions when this trouble occurs:	Hot Car, then parked, or if you wash the car, even if it has been sitting for a long time it still happens

Hesitation or delay when shifting between gears	
Please indicate driving condition where the shifting trouble is noticeable (check all that apply):	slow downshifts
How often does this trouble occur?	downshift from 6-7-8th gear to lower gears takes way to long.
To the best of your recollection, the trouble was first noticed:	Trouble occurs regularly.
Please describe conditions when this trouble occurs:	Within the 1st month after delivery.
Going into which gear/gears does the trouble occur? (check all that apply)	anytime you need to pass a car, the delay is really bad
	when on the interstate cruising at 60MPH and you hit the gas to pass, it take 3 seconds, I counted for the car to actually do anything. The downshift from 8th to whatever gear it picks at that speed takes 3 seconds and you are literally sitting there NOT accelerating at all, I feel that is a strong safety issue. happened to me this morning. 3 seconds for a downshift is an eternity. I can duplicate it every time.
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.

Gear selector is difficult to operate (auto. trans.)

Please describe conditions when this trouble occurs:	always
How often does this trouble occur?	Trouble occurs regularly.
To the best of your recollection, the trouble was first noticed:	At delivery.
Going into which position is the gear selector difficult to operate? (check all that apply):	Going from Drive to Reverse, tactile feedback from shifter makes you think you've settled into Reverse but you're actually in Neutral. The sometimes when compensating for that, you end up in Park.
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
Additional Comments:	shifter gives tactile feedback through "clicks" that can be felt. These clicks do not coincide with the actual shift. Shifting into reverse from drive requires undue focus, and I've found myself in many embarrassing situations where it takes far too long to get the car into reverse. This is downright dangerous when trying to do a 3 point turn on a road.
Why is the gear selector difficult to operate?	Other (please describe).

What Can We Do Better?	
Feedback/Concerns:	Having driven Pontiacs for many years before this Dodge, I really prefer their method of detecting outside temperature and applying heat or air conditioning when the car is started remotely. The Dodge simply turns on whatever settings you left it on, meaning that I have to plan my climate control for the next morning when I get home at night. That's dumb.

What Can We Do Better?	
What has Chrysler done right?	I must admit the V6 engine is very good so far. Very powerful and getting 21 MPG in city.
Welcome

Additional Comments:	The tip of my foot hits the bottom of the dashboard, forcing me to apply the brake with the tips of my toes instead of the ball of my foot. Pedal should be at least 2 inches lower, or dashboard should have a cutaway.

Gear selector is difficult to operate (auto. trans.)

Additional Comments:	The electronic gear shift is an annoyance. You can't downshift to a specific gear which, in the mountainous region of PA where I often drive, I don't have good control going downhill. The old autostick selector was better. I also don't like the fact that you have to have your foot on the brake, in order to shift. Coming through a carwash, for example, you have to hit the brake to shift from N to D, whereas with the old shifter, you could be rolling at 2 mph or so. Sounds like a small deal, until you have someone right behind you in that carwash.
Going into which position is the gear selector difficult to operate? (check all that apply):	Other (please explain in Additional Comments box below).
To the best of your recollection, the trouble was first noticed:	At delivery.

What Can We Do Better?	
What has Chrysler done right?	Just about everything, I think. The vehicle is perfectly proportioned, handles great, has excellent performance and fuel economy, and is comfortable, even over long trips. I worked on the LX and LD product team before I retired. This vehicle has been improved even further and is continuing the legacy that we started back in 2000 - 2004. Well done.
Feedback/Concerns:	I would like to have some way of tracking oil condition...that is, how many miles until an oil change is due. If that's already available, I've missed it.

Detail on Low Rated Items	
You rated integration with media players Low. Use this space to provide any specific comments you would like to share.	audio won't stay on Pause when selected. If a phone call comes in while music has been paused, upon completing the phone call, the music starts playing (every time) instead of staying on pause.
You rated steering wheel adjustment Low. Use this space to provide any specific comments you would like to share.	Telescoping column doesn't have enough adjustment. Needs to be able to travel further to allow driver seat to go back far enough (all the way back) for leg/pedal adjustment/comfort, but still get the wheel close enough for arm comfort and optimum steering control.
You rated operating controls while driving (gear selector, turn signals, horn, etc.) Low. Use this space to provide any specific comments you would like to share.	That center gear shifter sucks. No other way to say it. You can't slam it into reverse. You can't even finesse it into reverse half the time you're in a parking lot situation and you're trying to move quickly. You have to go sloooooowwww... Stupid, especially for a "performance" type car. Where's the shifter performance?
You rated seat adjustment and comfort Low. Use this space to provide any specific comments you would like to share.	Driver's seat side bolsters come too far in toward the center, cause leg irritation on hour+ drives. Overall depth (front to back) is not long enough to provide full leg (body) support for a 6 foot tall person.
You rated integration with phones Low. Use this space to provide any specific comments you would like to share.	unpredictable audio - switches between phone and car at will
You rated vehicle storage and space usage Low. Use this space to provide any specific comments you would like to share.	2014 Chevy Impala is the standard
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	Way beyond the music/cell audio system issues is that shifter. Next is the uncomfortable driver's seat

Front seat audio/entertainment/navigation touchscreen controls/menus broken/not working	
Please describe conditions when this trouble occurs:	Randomly, usually during first 5 minutes after startup
Please indicate which controls/menus are broken/not working properly (check all that apply):	Music from iPhone. Selecting pause doesn't "hold". System will start playing again all on its own - i.e. without hitting the "Play" symbol on the touchscreen
How often does this trouble occur?	Trouble occurs regularly.

Seat material was damaged or dirty at delivery	
Additional Comments:	Don't like the seat bottom. Not deep enough (not enough full leg support) and the side bolstering comes too far into the middle of the seat and on drives of an hour or more puts pressure points on the outside edges of the leg. A larger flat area would be preferred. My 2003 BMW Z4 seats, small as that car is are more comfortable.
Please indicate which seat has trouble with its material (check all that apply):	Bottom cushion frame broke. New frame on order.
Trouble with the seat material is:	Other (please describe).

What Can We Do Better?	
What has Chrysler done right?	Nice shift patterns for both "D" and "S" modes. Like the paddles.
Feedback/Concerns:	Change/improve the transmission shift mechanism. I hate how even when being careful you'll miss getting it in reverse. If you had to do an evasive maneuver that involved pulling forward quickly, stopping and "slamming it into reverse" to get out of the way... you couldn't do it... train coming, car flying through a stop sign, whatever... you might die. Trunk, could use more capacity.

Detail on High Rated Items

You rated transmission gear change performance (smoothness) High. Use this space to provide any specific comments you would like to share.	For an 8-speed, it shift pretty smoothly. Just a weirdness every now and then as it finds a gear.
You rated integration with media players High. Use this space to provide any specific comments you would like to share.	I really haven't integrated any media players so I went high because there wasn't a N/A option,
You rated exterior design and appearance (overall impression) High. Use this space to provide any specific comments you would like to share.	Love the materials used for the dash. I remember sitting in a 300 back in 09 or 10 and thought it looked cheap. Now it looks very high quality. Like the white sticking in the black leather.
You rated interior noise level while driving High. Use this space to provide any specific comments you would like to share.	Very quiet!
You rated interior comfort, design and appearance of interior (overall impression) High. Use this space to provide any specific comments you would like to share.	Love the materials used for the dash. I remember sitting in a 300 back in 09 or 10 and thought it looked cheap. Now it looks very high quality. Like the white sticking in the black leather.
You rated your attitude about the brand of your new car High. Use this space to provide any specific comments you would like to share.	Chrysler is on a roll - keep it up. I rented a Town and Country over T-giving week - I hope you got some redesigns happening with that - seemed aged.
You rated steering and handling (responsiveness, stability) High. Use this space to provide any specific comments you would like to share.	Handling is great!
You rated wheels, rims, and tires appearance and styling High. Use this space to provide any specific comments you would like to share.	Love the smokey grey wheels on the S model.
You rated your feelings about the durability of your new vehicle High. Use this space to provide any specific comments you would like to share.	Well see. I only leased it for 27 mo/36K miles so everything will be covered under warranty. My last 7 cars have all been excellent with no trips back to the Service dept other than routine maint so I hope this is the same.
You rated side/profile view styling (driver's side or passenger's side exterior area) High. Use this space to provide any specific comments you would like to share.	Always been a damn good-looking car!
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that you feel far exceeded your expectations.	As mentioned, overall LOVE the car. I'm not happy about the neutral gear torque and not sure how I'm going to keep it clean. I buy an unlimited car wash package because I love a clean car and now can't use it because this car rolls to easy and I'm afraid to go through again.
You rated fuel economy and driving range High. Use this space to provide any specific comments you would like to share.	Getting about the same MPG as I got in my 2012 4cyl FWD Buick Regal. I think that's great considering bigger, heavier, more powerful and AWD.
You rated engine exhaust sound High. Use this space to provide any specific comments you would like to share.	Nice growl for the S model.
You rated seat adjustment and comfort High. Use this space to provide any specific comments you would like to share.	Seats are very comfortable.
You rated headlight illumination/performance during night-time driving High. Use this space to provide any specific comments you would like to share.	The fog light illuminate much better than my last car.
You rated engine sound High. Use this space to provide any specific comments you would like to share.	Very quiet
You rated appearance of exterior paint High. Use this space to provide any specific comments you would like to share.	When clean, the granite looks very deep. I wish I could keep it clean but can't because I can't take it through a car wash!

Slips/will not engage gear properly/shifts erratically

Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
Are you using your vehicle for towing when the problem occurs?	No.
How often does this trouble occur?	Trouble occurs regularly.
To the best of your recollection, the trouble was first noticed:	Within the 1st month after delivery.
Please indicate approximate operating temperature when shifting trouble occurs (check all that apply):	I drove about 2 miles from my office to the car wash.
Going into which gear/gears does the trouble occur? (check all that apply):	Neutral position is NOT neutral - car rolls too easily as if it has some torque being applied. Impossible to go through a car wash in Neutral.
Please indicate driving condition where the shifting trouble is noticeable (check all that apply):	Sitting in Neutral trying to go through a car wash.

Gear selector is difficult to operate (auto. trans.)

Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
Additional Comments:	I think you already switched to a rotary nob in the 2015 so maybe complaints have already mounted about this joy stick gear shift.
Going into which position is the gear selector difficult to operate? (check all that apply):	The joy stick gear selector is difficult to use. I'm pretty used to it and still have to pay close attention when shifting in and out of Drive. Dumb feature.
Please describe conditions when this trouble occurs:	Anytime I'm switching gears.
Why is the gear selector difficult to operate?	Operation of gear selector is confusing/doesn't make sense.
How often does this trouble occur?	Trouble occurs regularly.
To the best of your recollection, the trouble was first noticed:	Within the 1st month after delivery.

Was the trouble resolved to your satisfaction?	No.
Where did you take your vehicle to have your trouble checked out? (check all that apply)	As mentioned, I asked the service dept about the neutral gear and they said that it was normal. Sitting in my driveway in Neutral with only a slight grade to the street and getting up to 2 mph does not seem normal to me, nor does speeding through a car wash to point a worked had to hold my car back to slow it down on the roller track!
Have you taken the vehicle to a dealer to have your trouble corrected?	Yes.

No (after completing your survey, we will provide a link to download your vehicle application to your smartphone.).
Overall, how satisfied are you with the quality of your new vehicle?	Satisfied.
Did you review the Printed User Guide?	Yes.
Please explain further about your choice to recommend your vehicle:	I'm very satisfied with my 300. I think the Neutral gear issue should be addressed. Also, I didn't see a choice for fuel tank. I used to really fill my cars up and with this car, if I don't remove the filler nozzle as soon as it clicks off, gas pours out onto my tires. That something else the service dept said was normal because of some release valve. Seems like a safety hazzard!
Was there information needed that was not included in the User Guide?	None

Automatic Transmission	Slips/will not engage gear properly/shifts erratically. Gear selector is difficult to operate (auto. trans.).

What Can We Do Better?	
What has Chrysler done right?	I think Chrysler marketing has done a great job creating interest. The design team for interior materials has done a great job upgrading the interiors. My brother recently rented a 2015 200 and loved it so those engineers and designers did a great job. The new dealership look is nice too. I bought mine from one in the woods so it's service dept hasn't been all fixed up like others I've seen so hopefully they get around to that. That's a requirement anymore - a nice waiting area for Service.
Feedback/Concerns:	Other than these couple things I LOVE this car! I've loved 300s since they first came out and when the oppty came up on the clearance event I went for it and am very happy. Was looking at a Cherokee or 200 but decided to go with the 300. Love the looks, love the size, love the power and fuel economy. I wish it had a smoother ride but I think because I got the S model and AWD it's got a firmer ride that I wasn't expecting.

Please explain further about your choice to recommend your vehicle:	I've had 3 recent Chrysler products. Two RT Chargers, 2006 and 2011, now I have 2014 300 S AWD. Love the ride/styling and have adaptive cruise control, as I had in my 2011, won't go without it now. Few things I would though have like to have in my 300 S, is a hemi, I couldn't get it and reason I went with the S instead of 300, I liked some of the styling features, black chrome and interior with the graphite, as opposed to the wood grain and the bolster seats as I had in my RT's, do not care for the regular seats, not comfortable.

What Can We Do Better?	
Feedback/Concerns:	Not crazy about the new shifter and as I provided, I'm having trouble again with, after having fixed once. Haven't had time to bring in yet to fix.
What has Chrysler done right?	Love the RT Chargers and the 300's, great styling, good bang for the buck. Again, I've had three since 2006, 2006 RT with performance package, 2011, can't remember the package but it had every feature you could get in a R/T model, now have the 2014 300 S AWD.

Slips/will not engage gear properly/shifts erratically	
Are you using your vehicle for towing when the problem occurs?	No.
Please describe conditions when this trouble occurs:	When parking car and trying to shift into Park
Approximate mileage when trouble was first noticed was:	8000 miles or above.
To the best of your recollection, the trouble was first noticed:	More than 3 months after delivery.
Going into which gear/gears does the trouble occur? (check all that apply):	Brought car in to fix shifter. Could not easily get car into park, would have to push button and push lever twice or three times to get into park, if not watching car would be in reverse. Was fixed three months ago with new assembly put in. Having same problem again though, when I engage to put in park, it stops at reverse and have to re-engage shifter again to put into park.
How often does this trouble occur?	Trouble occurs regularly.
Additional Comments:	I think it's caused by when coins may slip out of the tray and fall down inside the shifter. the plastic cover does not prevent small objects, such as coins falling inside.

Detail on High Rated Items	
You rated navigation system route accuracy High. Use this space to provide any specific comments you would like to share.	Really easy to use, large display, and with satellite option I have easy to select restaurants, golf course, other places to go to, and easily touch screen to put address into nav for directions.
You rated exterior design and appearance (overall impression) High. Use this space to provide any specific comments you would like to share.	Classy front grill look and with LED headlights. I have black out chrome for my S option on 300, I prefer over all chrome. Like the lines/flow of body on the car
You rated the value of your new car High. Use this space to provide any specific comments you would like to share.	Guess I would compare to 2003 STS Cadillac I had several years ago, 56K sticker price, and was a very nice and comfortable car but \$ for \$ for 300 was a better deal.
You rated vehicle storage and space usage High. Use this space to provide any specific comments you would like to share.	Good trunk space for golf clubs and other things with complete fold down for back seats
You rated seat adjustment and comfort High. Use this space to provide any specific comments you would like to share.	Seats very comfortable with option bolstered seats I have. My 2006 RT had also, but did not have in my 2011 RT charger, and were not nearly as comfortable. I made a point for my 2014 300, to make sure the one I purchased had bolstered seats in it.

Detail on High Rated Items

You rated your purchasing experience (at the dealer/dealership) High. Use this space to provide any specific comments you would like to share.

Very service orientated, good follow up. It was the Burnsville MN Chrysler dealership I purchased from. I did bring my car after shift problem to a closer dealer in Brooklyn Park and they did not get it fixed, I ended up bringing it back to Burnsville dealer I purchased from and they got it fixed quickly, though they did have to order in the part.

You rated interior comfort, design and appearance of interior (overall impression) High. Use this space to provide any specific comments you would like to share.

Nice upgrade on interior, as opposed to the 2006 RT I had, which had too much hard plastic. I had 2011 RT that had change to softer plastic materials and my 2014 300 S, has same softer plastic materials and also has incorporated leather cover on dash, which looks nice and also dash gauges redesign.

You rated front view styling (front fascia, hood, grille, headlight area) High. Use this space to provide any specific comments you would like to share.

Detail on High Rated Items

You rated operating controls while driving (gear selector, turn signals, horn, etc.) High. Use this space to provide any specific comments you would like to share.	Everything falls easily to hand and has good switchgear feel and movement.
You rated ease of using system displays while driving High. Use this space to provide any specific comments you would like to share.	I like that it's touch-screen but that you can reach it and that the buttons are large enough to press. The icons at the bottom to scroll through functions are great. I like this way better than most other systems.
You rated integration with media players High. Use this space to provide any specific comments you would like to share.	My music works great either through streaming or wire connection.
You rated interior noise level while driving High. Use this space to provide any specific comments you would like to share.	Other than all the rattling, the interior is very quiet compared to other cars.
You rated head/leg/foot room High. Use this space to provide any specific comments you would like to share.	Plenty of room for me and my passengers.
You rated ease of getting into and out of vehicle High. Use this space to provide any specific comments you would like to share.	The big door openings and make entry and exit easy.
You rated steering wheel adjustment High. Use this space to provide any specific comments you would like to share.	The steering wheel goes right where I need it for comfortable operation.
You rated integration with phones High. Use this space to provide any specific comments you would like to share.	Works great with my iPhone 5C
You rated side/profile view styling (driver's side or passenger's side exterior area) High. Use this space to provide any specific comments you would like to share.	I like overall wedge shape, front and rear fender flares, the low roof and the connecting character lines.
You rated steering and handling (responsiveness, stability) High. Use this space to provide any specific comments you would like to share.	I really like the rear-biased AWD. You can steer with the throttle around bends. The car is always firmly planted on the road and has an impressive lack of body roll for it's size. The steering is a little too loose, not as pleased with that.
You rated your attitude overall towards your new car High. Use this space to provide any specific comments you would like to share.	I think it's a truly good car. I traded in an Acura TL for this and, even though I didn't think I would, I like this car way better.
You rated your attitude about the brand of your new car High. Use this space to provide any specific comments you would like to share.	I've always been a Mopar fan. However, I had some really bad experiences with my '09 Challenger that sent me over to Acura to purchase my last new car. However, this car has renewed my confidence in Chrysler.
You rated headlight illumination/performance during night-time driving High. Use this space to provide any specific comments you would like to share.	The adaptive headlights are great when going around corners and the automatic high beams are extremely convenient.
You rated interior comfort, design and appearance of interior (overall impression) High. Use this space to provide any specific comments you would like to share.	I love the partial leather/cloth seats in my Glacier edition. These were the only seats that I found comfortable in the 300 or Charger - the standard cloth and the leather seats were hard and uncomfortable. Love the piano black and the aluminum trim. The plastic graining is nice and upscale.
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that you feel far exceeded your expectations.	I'm really surprised at how well the car handles for being so large and heavy. To be honest, I'm very surprised that it's been as reliable as it has, because I never expected that. I also thought I would have trouble adjusting to the touch screen, because I had test-driven several Ford products with one and theirs was so confusing and hard to use. However, Uconnect is awesome. Far superior to the myFord touch and the Honda/Acura dial interface.
You rated climate control operation (function and ease of use) High. Use this space to provide any specific comments you would like to share.	The auto climate control keeps the interior comfortable and the controls work easily.
You rated seat adjustment and comfort High. Use this space to provide any specific comments you would like to share.	The seats on my Glacier edition are comfortable and have good adjustments. Wish they had memory.
You rated overall audio, entertainment, and navigation system impression High. Use this space to provide any specific comments you would like to share.	The UConnect interface is really easy to reach and use while driving. The steering wheel radio controls are excellent in both placement and function. These are by far some of the best on the market.
You rated the value of your new car High. Use this space to provide any specific comments you would like to share.	I feel like I got a lot of car for my money, both in terms of physical size and features. Love that I could afford to get something with upscale features like the 8-speed transmission, adaptive headlights, rear-biased intelligent AWD and panoramic sunroof. Normally, these are the types of things you have to get an expensive Japanese or German car to find.

Detail on High Rated Items

You rated your purchasing experience (at the dealer/dealership) High. Use this space to provide any specific comments you would like to share.

My purchasing experience at Laurel Valley Motors was great. Everyone was friendly, patient and willing to help. They had amazing prices as well as the rare model and options I was looking for. My salesman, Bill Martz, is really an all star. I shopped there for several months until I found the car I wanted and he was willing to help me all of that time without the slightest hint of impatience or frustration. He was willing to answer all of my questions and was willing to text with me too if I needed to contact him while I was at work. He knew the product and was very intuitive. He always follows-up, even now, to make sure everything's going okay. I'm in the marketing profession and have to say that he does everything that you're supposed to do when you sell a product, from relationship building to after-sale follow-up to encourage repeat business. He's a true sales-professional and stands apart from every other salesman I have dealt with.

You rated transmission gear change performance (smoothness) High. Use this space to provide any specific comments you would like to share.

The transmission shifts smoothly and quickly. I think this is one of the best features of the car. Seems to make the most of the available engine power. The paddle shifter response time is way too slow though.

Abnormal noises coming from steering system	
To the best of your recollection, the trouble was first noticed:	More than 3 months after delivery.
Please describe conditions when this trouble occurs:	Seems to occur more often when it's cold. Usually when driving at low speeds, like in a parking lot.
From what area is the noise coming?	Steering column.
How often does this trouble occur?	Trouble occurs intermittently.
Additional Comments:	When my car was delivered, there was a clicking sound in the steering column. The dealer couldn't find it until it happened every time I turned the wheel. It turned out that my steering column was not correctly installed at the factory and was actually loose. Wondering if either this defect or the repair for it is causing the noise, because it started after that.
Approximate mileage when trouble was first noticed was:	8000 miles or above.
Noise sounds like (Check all that apply):	Normally, the steering moans while turning at low speeds.
How loud is the noise?	Moderate.

Detail on Low Rated Items	
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	I really didn't expect as many squeaks and rattles in a car that feels so solid. Nor did I expect steering noise. I think it's embarrassing to have passengers constantly ask what's rattling or what the noise is when I'm pulling into a parking space and the steering groans.

What Can We Do Better?	
Feedback/Concerns:	Polish-up the quality in terms of squeaks/rattles, evenness of paint, etc. I'd like to see some more unique exterior and interior colors/appearance and wheel options. The V6 could use a little more pickup when accelerating to pass at higher speeds and a sportier exhaust note. Better fuel economy would also be a bonus. I think it could also have tighter, more responsive steering. The option packages could also use some sprucing up.
What has Chrysler done right?	This is a great full-size, AWD vehicle that stands out. It has way more personality than the other full-size cars available. It's quiet and gives the impression of being strong and solid. I love the handling of the rear-biased AWD. The interior and exterior are upscale without being pretentious. It's also reasonably priced, after all of the available discounts. Overall, it's a really nice car.

We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	I am disappointed in the integration with my iPhone and the lack of being able to upgrade. In this day and age, there's no reason my radio/NAV unit couldn't get a software upgrade to integrate better with smartphones with new features are offered. I would have signed up for your monthly service, UConnect Access I think it is called, if it was supported by my 2014 300s. Being able to use voice text would also be very useful. Even worse, I can't use Siri when my phone is paired with my car so the lack of iPhone integration has caused me to actually lose functionality. Between the poor iPhone integration and the hard shifting in the low gears, I'm already thinking about what different make and model I'll be trading the 300s in on, which isn't good when I've got less than 1000 miles on it now.

What Can We Do Better?

Feedback/Concerns:	The lttitle "phone" holder slot next to gear shift is a lot shorter then on the 2011 model...can't use it to hold phone because it's not tall enough to hold the phone In it either way you put it. Can not stand the electric gear shifter...it's so touchy in the fact that you move it into reverse but most the time it goes to neutral and if I try tp.go.softer on pulling it back then I'm still stuck in park... just not very user friendly
What has Chrysler done right?	Smoo h ride. Nice sleek design

You rated seat adjustment and comfort High. Use this space to provide any specific comments you would like to share.	The only thing i felt was that for the price of the car that it should have had the duel seat control as standard equipment.
You rated engine sound High. Use this space to provide any specific comments you would like to share.	you don't mention the transmission. i would have to say the engine level has a high pitch when their is a hesitation in the shifting in gears.

To better serve you, briefly describe the topic(s) you would like to discuss. Please provide us with a phone number you can be reached at during daytime hours. Thank you.	Hesitation in shifting. [REDACTED], Just so you know the dealer has requested I leave it overnight. because it seems to be at its worst first thing in the morning. The lead mechanic did test drive it and it did have a slight hesitation (not as bad as the morning) and he said that that was common for this car. I did not believe him and told him it felt worst first thing in the morning that's when he suggested I leave overnight.
Based on the feedback you provided, would you like someone from Chrysler LLC to contact you about your Chrysler vehicle?	Yes.
Detail on Low Rated Items	
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	The most problem I have is the electronic shifting, trying to back into a space when traffic is stopped and getting into reverse quickly before the other drivers start getting irritated. I do not like pulling into a parking space because it is difficult trying to back out of a spot even with the back camera. The back camera does not show who is coming the road and it's tough looking out the side windows when there is a larger car parked along side of you. Today's drivers and people walking behind you do not stop even though they see your back lights on and you backing out slowly. I prefer the feel of the shift falling into the gear you selected.
You rated transmission gear change performance (smoothness) Low. Use this space to provide any specific comments you would like to share.	The transmission has a slight hesitation when changing gears. Dealer tested it said this was common in this car, I disagreed with him I told him I have owned a number of cars and have never had this problem except on one car and this required transmission work. I also explained to him this was most noticeable first thing in the morning, he suggested I leave it overnight so they could check it then. I plan to do this at my next service.
You rated operating controls while driving (gear selector, turn signals, horn, etc.) Low. Use this space to provide any specific comments you would like to share.	I do not like the electronic shifting. 1- You have to look at the console or down at the shift to see if you are in the proper gear. Trying to look at the console sometimes the steering wheel cross bar is in the way or it stopped in the proper gear but when you start to go it had shifted to another gear

What Can We Do Better?	
What has Chrysler done right?	It has improved over the 2005, it's a smoother ride and it does not have that truck suspension & noise that drove me crazy.
Feedback/Concerns:	I had a 2005 300c that had dual seat controls outside mirrors that dropped down in reverse & pedals that raised for short leg people. this was a \$40,000 car you would think this would be standard equipment.

We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	Electronic gear shift looks nice but is quirky in use. Seems to take effort and concentration to hit R. Never seen that on any other car or SUV I have had.

Door handle/latch is broken/not working properly	
Approximate mileage when trouble was first noticed was:	1500 - 3999 miles.
How often does this trouble occur?	Trouble occurs intermittently.
To the best of your recollection, the trouble was first noticed:	1 to 3 months after delivery.
Please indicate which door has trouble with the door handle/latch (check all that apply):	Button pops up when unlocked but outside handle will not engage to open door. Door must be opened once from inside. Has been back to dealer but intermittent problem continues.
Please describe conditions when this trouble occurs:	Immediately after unlocking

Automatic Transmission	
Automatic Transmission	Hesitation or delay when shifting between gears. Gear selector is difficult to operate (auto. trans.).

Bumped my head a couple of times getting out - old LHS had a bit more head room but it's just a matter of getting use to it.</p> <p>Never, never would have thought I would ever own a Chrysler and have now owned 3 of them. they stand out from the rest. My wife really likes it and for anyone married that means a lot.</p> <p>This was a deal breaker. Consumer reports and my mechanics really don't like the cvt which we were considering when looking at the Ultima.</p> <p>gear shifter taking a little get ing use to but I like it.</p> <p>most other cars look the same - this one doesn't</p> <p>see above</p> <p>We hope to keep this car a long time. I know the engine will go the distance inasmuch as we are sold on the use of synthetic oils. I have concerns about the transmission as it's only been out there a short while. Not to keen on it being a 'closed' system. We owned an auto repair shops and always changed the tranny fluid at every 50 thousand miles with Ams Oil - never had problems with them. Concerned about using this oil in this transmission for fear it would void warranty but after warranty expires we will use it.</p> <p>We tend to keep our vehicles 20 years or so and try to maintain the paint with professional waxing every 6 months. we find that that plus parking under shelter as much as possible maintains it's durability especially in Florida.</p> <p>Love the ability to access locked doors w/o 'using' the key as well as assisted lighting when you open the door - car looks great all around</p> <p>We got a great deal on line with laSalle Dodge - far cheaper than locally.</p> <p>We considered the 200 but decided it was too small for us. For accident reasons we prefer a larger car although the nine speed in the 200 did get my attention. I know hat trannies are the hardest thing to fix and I'd like to see you persue the research on improving them - that's were the fuel mileage is really going to improve.</p>
Excessive wind noise	
<p>Please describe conditions when this trouble occurs:</p> <p>Please indicate the location of the wind noise (check all that apply):</p>	<p>na</p> <p>As with our 2 previous LHS's the noise seems to come from underneath - from tires on the road. Recommend that some sort of sound absorbing material be put inside doors and under he car.</p>

No (after completing your survey, we will provide a link to download your vehicle application to your smartphone.).
Where did you take your vehicle to have your trouble checked out? (check all that apply)	purchased many miles away
Overall, how satisfied are you with the quality of your new vehicle?	Very satisfied.
Was the trouble resolved to your satisfaction?	Yes.
Did you review the Printed User Guide?	Yes.
Did you review the Owner's Information DVD?	Yes.
Please explain further about your choice to recommend your vehicle:	Although consumer reports doesn't rate the 300 as high as others in it's class they did the same with the two '94 LHS's we had and we were very satisfied. When you consider the size of the car and the good return in fuel mileage that's a nice pairing. It's a good looking car and fun to drive and quieter than our LhS, which was a big improvement. It was hard to hear conversation with passenger in the old LHS. Question: why can't car manufactures work to reduce glare from side mirrors like they do the rear view mirrors - that would greatly help fatigue during night driving - hate the glare from the side mirrors.

Please indicate which exterior light lenses have fog/water/condensation in them (check all that apply):	Passenger's side headlight.

What Can We Do Better?	
What has Chrysler done right?	Love the warranty. Love the improvement in the transmission to get the better fuel mileage and the fact that, unlike our older LHS's it uses regular fuel not 89 octane which costs us at least an extra 20 cents more a gallon - well done.

Paint is uneven: has sags, runs, overspray, thin spots, etc.	
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
To the best of your recollection, the trouble was first noticed:	Within the 1st month after delivery.

Paint is uneven: has sags, runs, overspray, thin spots, etc. Please indicate the location of the paint issue (check all that apply):	as soon as we could we had the car detailed with two coats of wax and special treatment of leather seats. We were told that there was evidence of overspray on the driver front fender although to us it isn't noticeable.

Detail on High Rated Items

You rated steering wheel adjustment High. Use this space to provide any specific comments you would like to share.	I like that it tilts and telescopes. Easy to find perfect driving position for me.
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that you feel far exceeded your expectations.	It's just a great car. I'm 40 years old - not old, but not young either. It's great to find a car that caters to my need to have a "fun" car to drive, but also a professional vehicle. This does bo h.
You rated rear view styling (rear fascia, bumper) High. Use this space to provide any specific comments you would like to share.	Like the tail lights as designed - looks nice especially at night.
You rated interior noise level while driving High. Use this space to provide any specific comments you would like to share.	no problems with interior noise
You rated side/profile view styling (driver's side or passenger's side exterior area) High. Use this space to provide any specific comments you would like to share.	Again, the inset on the style give it a better look and feel
You rated engine performance during acceleration High. Use this space to provide any specific comments you would like to share.	Even with the V6, I have plenty of power.
You rated front view styling (front fascia, hood, grille, headlight area) High. Use this space to provide any specific comments you would like to share.	I like the open grill. However, I do like the new 2015 grill even better.
You rated exterior design and appearance (overall impression) High. Use this space to provide any specific comments you would like to share.	Masculine, muscle car feel. Love the side profile design with 2014 body style as opposed to previous body styles (door insets). Also really like the taillights much better with this design as it flows together as one unit.
You rated ride quality High. Use this space to provide any specific comments you would like to share.	Ride feels like a luxury car
You rated ease of getting into and out of vehicle High. Use this space to provide any specific comments you would like to share.	High enough off the ground that entry and exit from the vehicle is very easy.
You rated interior comfort, design and appearance of interior (overall impression) High. Use this space to provide any specific comments you would like to share.	I'm 6'2, so it's nice to have a car with leg room and head room. Also, the interior lighting and detailing of the trim feels like a quality vehicle. So while it looks like a muscle on the exterior, it rides like a luxury car.
You rated appearance of exterior paint High. Use this space to provide any specific comments you would like to share.	Nice sheen and look
You rated engine sound High. Use this space to provide any specific comments you would like to share.	I like the sound of he engine at start up and outside he vehicle. However, it's not noisy at all when driving. Good balance.
You rated head/leg/foot room High. Use this space to provide any specific comments you would like to share.	I often can't get a sunroof b/c it reduces head room in many vehicles. This allows a sunroof and still room to spare.

Voice Recognition feature does not have enough functions available

Please describe additional functions you would like to have:	It would be helpful to control all areas of the touch screen via voice recognition as the screen forces my eyes off the road.

They didn't know their inventory (I had to look it up on my phone and give my sales rep the invoice number). Their inventory was off-site and they made two trips back and forth before I requested to just go to the inventory site with him to view potential vehicles. They hid costs under "fees" during the negotiation. They took 3 weeks to schedule aftermarket install of the leather seats. The entire negotiation process took 6 hours. The only reason I purchased from them was that I was also purchasing a used Jeep Wrangler from the dealer and needed to purchase both to make it work for my budget. They have yet to ever reach out to me even when I expressed my concerns and displeasure.</p> <p>Just the gear shifting. It was awkward when I bought it, but I figured it would take getting used to. I still go to put it in park, and it's in reverse or go to put it in drive, but it's in neutral. It's just awkwardly touchy. I prefer the feel of moving from one gear selection to the next when driving and parking I guess.</p>

Gear selector is difficult to operate (auto. trans.)

Please describe conditions when this trouble occurs:	At all times
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
Additional Comments:	I thought I would, over time and use, learn how to "seamlessly" operate the shifter. after 10k miles and nearly a year its definitely better but still is a poor design in my opinion.
To the best of your recollection, the trouble was first noticed:	At delivery.
Why is the gear selector difficult to operate?	Operation of gear selector is confusing/doesn't make sense.
Going into which position is the gear selector difficult to operate? (check all that apply):	after having the vehicle for nearly a year I sometimes still miss getting into the gear I want, it is not "intuitive" and not designed to allow the driver to "feel" which gear he is in. I sometimes have teh vehicle in reverse when I believe I should be in park, could be a problem someday if I exit the car without being in park.
How often does this trouble occur?	Trouble occurs regularly.

I sliced my hand several times while hand washing the car, this was happening from a sharp edge on the bottom side of each exterior mirror. There was a sharp edge that acted like a razor blade. I finally used fine grit sandpaper to remove the edge, problem solved. I noticed this same problem on another brand new 300- fyi.

What Can We Do Better?

What has Chrysler done right?	The 2011-2014 model are going to be classics. They had the perfect blend of muscular styling, handling, power and fuel efficiency.
Feedback/Concerns:	You finally paired the R/T with the 8 speed transmission, but totally ruined the style of the car. I will not be buying one of the newer models. Sorry, but you dropped the ball on the refresh.

Contact Me	
Based on the feedback you provided, would you like someone from Chrysler LLC to contact you about your Chrysler vehicle?	No.
What Can We Do Better?	
Feedback/Concerns:	I plan to take the car into the dealer to check the steering vibration and pulling to the left and the dash board squeaks. I already discussed the awkward shifting with your customer surveys when I first bought the car and they said nothing could be done with it. I have gotten out of the car several times thinking the car was in park and it was in neutral and began rolling down the hill. This could end up hurting someone and be a potential lawsuit liability for Chrysler. In future car designs it needs to positively stay in park for safety reasons when you place it there.
What has Chrysler done right?	Initially the car has been perfect. Its the first new car I ever bought that I never took back to the dealer for warranty work in the first 18 months of ownership. Hopefully they can fix the items that are giving me trouble now. I just have to find time to get my car to the dealer.

Please provide feedback on how Chrysler can improve the DVD	Cancel the DVD-provide a printed manual. A printed manual is much more convenient to use when you NEED IT.
Was there information needed that was not included in the DVD?	No.
Please provide feedback on how Chrysler can improve the Printed User Guide	The printed USER GUIDE is good-AS FAR AS IT GOES. There is a lot of on-board electronic equipment that needs a lot of elaboration. To get that information one must use the CD disc or BUY the SUPPLEMENTAL USER GUIDE. One cannot carry the USER CD DISC in the car, as extreme heat is likely to destroy the CD. We bought the Supplemental User Guide-which made us somewhat unhappy that we had to make such a purchase for what we believed ought to have come with the new vehicle.

Which feature or section of the Owner's Information DVD did you find most helpful and why?	All the information on the DVD is helpful.
Which feature or section of the Printed User Guide did you find least helpful and why?	On-Board electronics needs a lot more enhancement.
Please rate your overall level of satisfaction with the Printed User Guide	3 (neither satisfied nor dissatisfied).
What have you used to view your DVD? (check all that apply)	Mac Computer.
Please provide feedback on how Chrysler can improve the DVD	Cancel the DVD-provide a printed manual. A printed manual is much more convenient to use when you NEED IT.
Was there information needed that was not included in the DVD?	No.
Please provide feedback on how Chrysler can improve the Printed User Guide	The printed USER GUIDE is good-AS FAR AS IT GOES. There is a lot of on-board electronic equipment that needs a lot of elaboration. To get that information one must use the CD disc or BUY the SUPPLEMENTAL USER GUIDE. One cannot carry the USER CD DISC in the car, as extreme heat is likely to destroy the CD. We bought the Supplemental User Guide-which made us somewhat unhappy that we had to make such a purchase for what we believed ought to have come with the new vehicle.
Which feature or section of the Owner's Information DVD did you find least helpful and why?	No information is least helpful.
Was there information needed that was not included in the User Guide?	See above.
Which feature or section of the Printed User Guide did you find most helpful and why?	The Printed User Guide data is all helpful. The maintenance log is good-but could be better. PROVIDE A CERTIFIED MAINTENANCE LOG RECORD THAT REQUIRES THE DEALER TO STAMP IT AND DATE IT TO BE CERTAIN THAT PROPER MAINTENANCE HAS BEEN COMPLETED TIMELY. This may improve Chrysler RELIABILITY ratings.
DVD format is easy to understand and use	5 (strongly agree).

Contact Me	
Based on the feedback you provided, would you like someone from Chrysler LLC to contact you about your Chrysler vehicle?	No.
What Can We Do Better?	
Feedback/Concerns:	I plan to take the car into the dealer to check the steering vibration and pulling to the left and the dash board squeaks. I already discussed the awkward shifting with your customer surveys when I first bought the car and they said nothing could be done with it. I have gotten out of the car several times thinking the car was in park and it was in neutral and began rolling down the hill. This could end up hurting someone and be a potential lawsuit liability for Chrysler. In future car designs it needs to positively stay in park for safety reasons when you place it there.
What has Chrysler done right?	Initially the car has been perfect. Its the first new car I ever bought that I never took back to the dealer for warranty work in the first 18 months of ownership. Hopefully they can fix the items that are giving me trouble now. I just have to find time to get my car to the dealer.

Please explain further about your choice to recommend your vehicle:	I s ill have my very first Chrysler from the year the major design changed which influenced the entire auto industry.Please remain with this very classic design! I drove the first car for nine years and plan to keep it forever! It made a major impact on the history of design with automobiles.However, I have now moved ahead and stopped by the dealer for three different lessons in reference to the electronics. They were VERY COOPERATIVE and I am making progress! Thank you Chrysler!!!

Detail on High Rated Items

You rated exterior design and appearance (overall impression) High. Use this space to provide any specific comments you would like to share.	One comment...My interior is entirely black which I have found on occasion to create a bit of a problem to find the buttons to open the garage door and front gate of the property at night. Perhaps a low intensity light could provide a background for this at night since it is above the sight line for driving.

Detail on Low Rated Items	
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	The electronic shifter is too difficult to simply put it into park, drive, reverse, by feel alone. Have to look at dashboard to see what gear it is in. If in a hurray and put it into gear without looking ant dash, the wrong gear is often selected and can go in the wrong direction (dangerous).

What Can We Do Better?

Feedback/Concerns:	All in all I feel that this is the best car available for the money.
What has Chrysler done right?	I am an older driver and this is one of the only cars I have driven that gives me the room and comfort I am looking for. I always drove Lincoln and Cadillac cars before and this car is equal in ride and comfort for a lot less money. I feel that dollar for dollar this is the best car on the market today.

Detail on High Rated Items

You rated ease of getting into and out of vehicle High. Use this space to provide any specific comments you would like to share.	As I get older it is important to find a car that allows easy access. The fastest growing portion of the driving public is over 50 years of age because of the aging baby boomer population but I often feel that most car companies are abandoning us to appeal to younger drivers who don't have the money to buy new cars or the interest. My fellow older drivers have the disposable income to purchase new cars and are having a difficult time finding cars to meet our needs.
You rated wheels, rims, and tires appearance and styling High. Use this space to provide any specific comments you would like to share.	I like the chrome wheels and chrome trim package on my 300C. I feel that it gives the car a great look and ride. My previous 300 had the 20" wheels and they gave a poor ride and I had tire problems from the beginning. I had to replace a blown tire with only 900 miles and had several flats. That is why I would like to be able to have a full sized spare. We own property in a remote part of North Dakota and I refuse to drive this car there because I am afraid of getting a flat tire with the difficulty in getting the tire fixed or finding a replacement.
You rated overall audio, entertainment, and navigation system impression High. Use this space to provide any specific comments you would like to share.	I like that the navigation is simple to use and the radio controls are easy to use.
You rated integration with phones High. Use this space to provide any specific comments you would like to share.	I use my blue tooth phone all the time and the system is easy to use and works well.
You rated interior noise level while driving High. Use this space to provide any specific comments you would like to share.	This car is probably one of the quietest cars I have ever driven.

No Concerns

Please explain further about your choice to recommend your vehicle:	This is my second 300 and I have been very satisfied with the car except the gear selection is terrible but I noticed this has been replaced in the new model.

Would you recommend this vehicle to family or friends?	Yes.

You rated clarity of sound High. Use this space to provide any specific comments you would like to share.	Beats sound is great.
You rated interior comfort, design and appearance of interior (overall impression) High. Use this space to provide any specific comments you would like to share.	Like the big seats.
You rated integration with media players High. Use this space to provide any specific comments you would like to share.	Like the strip disc in the center console.
You rated overall audio, entertainment, and navigation system impression High. Use this space to provide any specific comments you would like to share.	Ease of Use and visibility of radio and nav system is fantastic. Like buttons AND touch screen.
You rated climate control operation (function and ease of use) High. Use this space to provide any specific comments you would like to share.	Like knobs and touch screen, I use both depending on situation.
You rated ease of using system displays while driving High. Use this space to provide any specific comments you would like to share.	Very clear Garmin & Audio Controls
You rated wheels, rims, and tires appearance and styling High. Use this space to provide any specific comments you would like to share.	20s look great, but not as smooth ride as 18s.
You rated head/leg/foot room High. Use this space to provide any specific comments you would like to share.	Like the width, but rear seat could have a tad more room, but not complaining.
You rated exterior design and appearance (overall impression) High. Use this space to provide any specific comments you would like to share.	Beautiful, like my '14 so much better than the new '15 Dart looking Charger. Will probably shop other vehicles just because the uniqueness of the Charger exterior is gone.
You rated your purchasing experience (at the dealer/dealership) High. Use this space to provide any specific comments you would like to share.	Keep allowng us to search dealer inventories off of Dodge / Chrysler Web site. then can find what i want and go to that exact specific dealer.
You rated vehicle storage and space usage High. Use this space to provide any specific comments you would like to share.	Like cup holders in center and in doors and in fold down rear seat. I use them all...
You rated engine performance during acceleration High. Use this space to provide any specific comments you would like to share.	Love the Sport Mode and Paddle Shifters.

Vehicle Satisfaction Ratings

Is there anything about your new vehicle you would like to see changed?	Go back to this design, don't like the 2015 exterior nearly as much (looks like a blown up Dart). Would like 18s for smoothness instead of 20s available with 300HP and other pkgs.

We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	The electronic shifter is too difficult to simply put it into park, drive, reverse, by feel alone. Have to look at dashboard to see what gear it is in. If in a hurray and put it into gear without looking ant dash, the wrong gear is often selected and can go in the wrong direction (dangerous).

Detail on High Rated Items

You rated overall audio, entertainment, and navigation system impression High. Use this space to provide any specific comments you would like to share.	I like that the navigation is simple to use and the radio controls are easy to use.
You rated integration with phones High. Use this space to provide any specific comments you would like to share.	I use my blue tooth phone all the time and the system is easy to use and works well.
You rated interior noise level while driving High. Use this space to provide any specific comments you would like to share.	This car is probably one of the quietest cars I have ever driven.
You rated ease of getting into and out of vehicle High. Use this space to provide any specific comments you would like to share.	As I get older it is important to find a car that allows easy access. The fastest growing portion of the driving public is over 50 years of age because of the aging baby boomer population but I often feel that most car companies are abandoning us to appeal to younger drivers who don't have the money to buy new cars or the interest. My fellow older drivers have the disposable income to purchase new cars and are having a difficult time finding cars to meet our needs.
You rated wheels, rims, and tires appearance and styling High. Use this space to provide any specific comments you would like to share.	I like the chrome wheels and chrome trim package on my 300C. I feel that it gives the car a great look and ride. My previous 300 had the 20" wheels and they gave a poor ride and I had tire problems from the beginning. I had to replace a blown tire with only 900 miles and had several flats. That is why I would like to be able to have a full sized spare. we own property in a remote part of North Dakota and I refuse to drive this car there because I am afraid of getting a flat tire with the difficulty in getting the tire fixed or finding a replacement.

What Can We Do Better?

Feedback/Concerns:	All in all I feel that this is the best car available for the money.
What has Chrysler done right?	I am an older driver () and this is one of the only cars I have driven that gives me the room and comfort I am looking for. I always drove Lincoln and Cadillac cars before and this car is equal in ride and comfort for a lot less money. I feel that dollar for dollar this is the best car on the market today.

Detail on High Rated Items

You rated ease of getting into and out of vehicle High. Use this space to provide any specific comments you would like to share.	As I get older it is important to find a car that allows easy access. The fastest growing portion of the driving public is over 50 years of age because of the aging baby boomer population but I often feel that most car companies are abandoning us to appeal to younger drivers who don't have the money to buy new cars or the interest. My fellow older drivers have the disposable income to purchase new cars and are having a difficult time finding cars to meet our needs.
You rated wheels, rims, and tires appearance and styling High. Use this space to provide any specific comments you would like to share.	I like the chrome wheels and chrome trim package on my 300C. I feel that it gives the car a great look and ride. My previous 300 had the 20" wheels and they gave a poor ride and I had tire problems from the beginning. I had to replace a blown tire with only 900 miles and had several flats. That is why I would like to be able to have a full sized spare. We own property in a remote part of North Dakota and I refuse to drive this car there because I am afraid of getting a flat tire with the difficulty in getting the tire fixed or finding a replacement.
You rated integration with phones High. Use this space to provide any specific comments you would like to share.	I use my blue tooth phone all the time and the system is easy to use and works well.
You rated interior noise level while driving High. Use this space to provide any specific comments you would like to share.	This car is probably one of the quietest cars I have ever driven.
You rated overall audio, entertainment, and navigation system impression High. Use this space to provide any specific comments you would like to share.	I like that the navigation is simple to use and the radio controls are easy to use.

No Concerns

Please explain further about your choice to recommend your vehicle:	This is my second 300 and I have been very satisfied with the car except the gear selection is terrible but I noticed this has been replaced in the new model.

What Can We Do Better?>

Feedback/Concerns:

The only thing about the car that is poorly designed is the button on the gear shift knob. Why make us push a button in to get into drive? I understand pushing it to get out of park but if you go from park to reverse to drive you have to time the button just right or you stay in neutral. It is annoying and not necessary. 2014-07-21 00:06:35 227

Detail on Low Rated Items	
You rated operating controls while driving (gear selector, turn signals, horn, etc.) Low. Use this space to provide any specific comments you would like to share.	The electronic shifter seems like an unnecessary gimmick. After 8 months driving this car I still frequently end up with the selector in the wrong position.
You rated ease of using system displays while driving Low. Use this space to provide any specific comments you would like to share.	The information display between the gauges that contains trip information is much more cumbersome to use than in the older 300 it replaced. Arrowing up/down /left/right to move from one feature to another is distracting.
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	One item I did not mention is that the carpets/mats got very dirty very quickly. This despite us only entering from pavement or cement. They are a light color so I expected them to be a little difficult to keep clean, but they looked terrible within a few weeks and they just won't come clean. Not sure what the problem is but I've never encountered this on any car before.
Overview	
Please explain further about your choice to recommend your vehicle:	This was the most comfortable of all the vehicles I considered. Particularly for getting in and out of. I seems slightly less comfortable in that regard than the older style 300 it replaced which seemed a little taller. But it was still the best option for us.

Gear selector is difficult to operate (auto. trans.)

Going into which position is the gear selector difficult to operate? (check all that apply):

All positions.

Additional Comments:

This electronic shifter has feel to it. Finding a gear requires physically looking down at the shifter or at the indicator on the dashboard. The once simple action of placing the car in park (or any gear) now must be visually verified. I despise this shifter. I consider it a potential safety issue as the car frequently ends up in an unintended gear. Putting the car into drive frequently results in it inadvertently ending up in low. This is the worst single feature about this car,

How often does this trouble occur?

Trouble occurs regularly.

To the best of your recollection, the trouble was first noticed:

At delivery.

Why is the gear selector difficult to operate?

Other (please describe).

Hands-Free Phone / Bluetooth system voice activation doesn't recognize command

Do you usually set HVAC vent direction toward ceiling?

No.

Please indicate which words, if any, are constantly misrecognized:

There is a narrow window for the system to recognize a command. A small message is displayed when the system is ready for a command, however this requires taking my eyes off the road to watch for the indication. I frequently miss it. Then the system, trying to be helpful, gives me a long audio message about my options. I have to wait for it to be completed... then wait for the green text before I can try again. Sometimes I must try three or four times to make a call. Also, when driving with the window open as I often do, the system generally can not recognize my commands.

Front seat audio/entertainment/navigation system difficult to understand/use; in a poor location	
Additional Comments:	Cumbersome and distracting to navigate the menu on this display. Much less user friendly than on the 2007 Chrysler 300 this car replaced.
Please indicate which of the following best describes your concern (check all that apply):	Difficult to use. Frustration is with the display between the gauges though I don't see a place to comment on that in this survey.

What Can We Do Better?	
Feedback/Concerns:	The Crown Vic and Grand Marquis are gone. The new 300 seems lower and less upright than the older style. Those of us over 50 are left with few choices for vehicles we can be comfortable in. Also the electronic gadgetry seems to be getting less intuitive. Please keep the over 50 population in mind as changes are made. The one feature I desperately want in our next car (in two years) is rear cameras on the corners of the bumper so I can see crossing traffic as I back out from between pickups and SUVs. This would be a simple and much appreciated feature.
What has Chrysler done right?	The 300 is still a very comfortable car for older drivers. In its price range, it is the best choice for a large person with a bad back and other age related issues. The size, power, quality, and accessories, are all just about right for us.

Difficulty accessing Points of Interest

Touchscreen Controls/Menu: Front Screen Display difficult to understand/use; in a poor location	
Please indicate which of the following best describes your concern (check all that apply):	Difficult to use. My concern is with the operation of the small display between the gauges where trip information is displayed. Navigating around with up and down and side to side arrows to switch between functions like MPG and time or distance is cumbersome and distracting.

Navigation system works, but missing information; has incorrect information; gives wrong directions	
Please indicate which of the following best describes your concern (check all that apply):	Navigation system gives wrong directions. System often ineffective in city driving. Navigation system is missing information. Frequently can not locate destinations.
Additional Comments:	Can not figure out how to cancel navigation. Sometimes I want to use an interim point and I can not easily clear it out so system keeps trying to take me back. Speed indicated on display turns dark red and number becomes unreadable if posted speed is exceeded by even 1 MPH. Traffic information not displayed. No indication of distance remaining to destination. No range displayed on map.

Detail on High Rated Items

You rated engine sound High. Use this space to provide any specific comments you would like to share.	Actually just the opposite. I've occasionally forgotten to up shift because the engine is so quiet even at high revs. The road noise is what I call high. While I'm at it; the trunk lid sounds cheesy and cheap when I close it. A little deadening material on the underside might go a long way in quieting the vehicle. And giving you a satisfying "thunk" when you close it and not a tinny cheap vehicle sound. You know the one.
You rated ease of getting into and out of vehicle High. Use this space to provide any specific comments you would like to share.	Automatic seat slide back is sweet... Except when someone is sitting behind you. Needs an interlock of some sort to prevent passenger injuries.
You rated fuel economy and driving range High. Use this space to provide any specific comments you would like to share.	Awsome fuel economy on the highway. I often exceed the advertised 31.6 MPG, and I typically drive 70-75. Love it.
You rated your feelings about the durability of your new vehicle High. Use this space to provide any specific comments you would like to share.	Bulletproof, so far. One design issue that could mean body rot issues down the road. Especially in snow states. Tough to explain here. You'll need to call.
You rated your attitude about the brand of your new car High. Use this space to provide any specific comments you would like to share.	Dodge has always had a well-earned performance image. This car continues that.
You rated your attitude overall towards your new car High. Use this space to provide any specific comments you would like to share.	Love the compliments. Especially from the ladies. I've owned some nice cars over the past 50 years and none have garnered the compliments like this one.
You rated head/leg/foot room High. Use this space to provide any specific comments you would like to share.	The seat is wide enough. I'd like to see more support under my thighs. Maybe an adjustable support in keeping with all the other adjustability offered in the interior.
You rated exterior design and appearance (overall impression) High. Use this space to provide any specific comments you would like to share.	Your designers really captured the look of the 60's/70's Charger without being cartoonish. I get a lot of comments on the car.
You rated ride quality High. Use this space to provide any specific comments you would like to share.	Compliant yet sporty as a GT car should be. I do consider this a GT. My other vehicle is a BMW 335i. It is a rocket, but ride is too harsh. I'd rather drive my Charger most any day. You lose on a real nice day because the BMW is a convertible. Sorry.
You rated operating controls while driving (gear selector, turn signals, horn, etc.) High. Use this space to provide any specific comments you would like to share.	Most controls fall easily to hand. The lighting controls require a little getting used to to operate them without having to look at them.
You rated headlight illumination/performance during night-time driving High. Use this space to provide any specific comments you would like to share.	No complaints. The road is illuminated very well. I've never even used the fog lights, yet.
You rated seat adjustment and comfort High. Use this space to provide any specific comments you would like to share.	With the exception of adjustable additional thigh support, the seat has plenty of adjustability in my opinion.
You rated interior comfort, design and appearance of interior (overall impression) High. Use this space to provide any specific comments you would like to share.	I'm a big guy. Love all the adjustments. My only complaint is the rectangular removable tray to the right of the shifter on the console. With a little effort on the part of the interior designer this could be far more functional. I suggest a coin holder.
You rated steering wheel adjustment High. Use this space to provide any specific comments you would like to share.	I'm long-legged and wouldn't mind if the steering wheel could come back a little further.
You rated wheels, rims, and tires appearance and styling High. Use this space to provide any specific comments you would like to share.	The 20" chrome wheels really set the paint off and fill the wheel wells without looking stupid. Best handling OEM tires ever! I will replace them with the same if I can get them at a competitive price. So far, it doesn't appear to be the dealer.
You rated appearance of exterior paint High. Use this space to provide any specific comments you would like to share.	The paint really pops in the sunlight. Lots of compliments.
You rated engine performance during acceleration High. Use this space to provide any specific comments you would like to share.	This engine has a lot of grunt! Especially in the mid-range for passing. Very nicely done.
You rated steering and handling (responsiveness, stability) High. Use this space to provide any specific comments you would like to share.	Good road feel. Goes where you point it.
You rated rear view styling (rear fascia, bumper) High. Use this space to provide any specific comments you would like to share.	Nails the 70 Charger Kamm back style.
You rated side/profile view styling (driver's side or passenger's side exterior area) High. Use this space to provide any specific comments you would like to share.	Nice profile front to back.
You rated front view styling (front fascia, hood, grille, headlight area) High. Use this space to provide any specific comments you would like to share.	Nicely aggressive.
You rated brake responsiveness/effort High. Use this space to provide any specific comments you would like to share.	No issues. They haul you down from speed without drama and straight.

Detail on High Rated Items

You rated fuel economy and driving range High. Use this space to provide any specific comments you would like to share. I drive fast and I am pleased with the highway mileage.

You rated clarity of sound High. Use this space to provide any specific comments you would like to share. I listen to audio books. The sound is great and the volume is adequate even with the windows/sun roof open.

You rated exterior design and appearance (overall impression) High. Use this space to provide any specific comments you would like to share. It looks nice and has a classy feel.

You rated steering and handling (responsiveness, stability) High. Use this space to provide any specific comments you would like to share. This vehicle is VERY stable. You feel very secure while driving even on mountain roads.

You rated ease of using system displays while driving High. Use this space to provide any specific comments you would like to share. I can reach & view the screen easily.

You rated your attitude about the brand of your new car High. Use this space to provide any specific comments you would like to share. I have had 3 Chrysler 300. I was not as pleased with the newer body style as well as the older version.

We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that you feel far exceeded your expectations. The mileage, the comfort, the safety features and performance.

You rated engine performance during acceleration High. Use this space to provide any specific comments you would like to share. This car has plenty of power and it is the smaller engine.

You rated headlight illumination/performance during night-time driving High. Use this space to provide any specific comments you would like to share. It has great illumination for night driving.

You rated integration with media players High. Use this space to provide any specific comments you would like to share. I use the media player all the time. It pairs with my phone quickly - sometimes too often as it comes on when I don't want it to.

Detail on Low Rated Items

We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations. I gave no "Low" ratings. The gear shift could use some adjustment and I would like a bigger trunk. Sometimes the panic "brake" alarm sounds without cause. Visibility is not the greatest.

Vehicle Satisfaction Ratings

Is there anything about your new vehicle you would like to see changed? Visibility and adjust the gear shift.

Going into which position is the gear selector difficult to operate? (check all that apply):

Park (P). electronic shift requires visual proof that you are indeed in PARK

How often does this trouble occur?

Trouble occurs regularly.

Additional Comments:

with manual shift a full forward motion always resulted in going into "park". That same motion with the electronic shift has on many occasions resulted in "reverse". The car then doesn't shut off and drifts backward unless you carefully watch the dash to make sure it is in park. I will never again accept a car with this type shift. It is dangerous.

To the best of your recollection, the trouble was first noticed:

At delivery.

Trunk Lid	
Trunk Lid	Trunk lid is difficult to open/close.

Hesitation or delay when shifting between gears	
Going into which gear/gears does the trouble occur? (check all that apply)	5th Gear. 6th Gear. 8th Gear. 4th Gear. Slow slow slow. I could downshift in a dump truck faster 7th Gear.

Axle(s)	
Axle(s)	Axle makes whining, howling, clunking, or grinding noises.

Seat material concerns	
Please indicate which seat has trouble with its material (check all that apply):	Driver's seat. Wear on lower left side bolster
To the best of your recollection, the trouble was first noticed:	1 to 3 months after delivery.
Approximate mileage when trouble was first noticed was:	4000 - 7999 miles.

Fog/water/condensation in exterior light lenses	
Please indicate which exterior light lenses have fog/water/condensation in them (check all that apply):	Driver's side headlight. Both lights fog up when the car is washed or after its parked they fog up. Only happens when very humid but I've owned 28 cars lived in the same state and NEVER had this happen. Total bs Passenger's side headlight.
Please describe conditions when this trouble occurs:	When parked
How often does this trouble occur?	Trouble occurs intermittently.

Fog/water/condensation in exterior light lenses	
To the best of your recollection, the trouble was first noticed:	At delivery.
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.

Engine does not idle properly: idles rough, too low, or too high	
Engine idle trouble occurs (check all that apply):	Driving the vehicle for more than 20 minutes. Within first 5 minutes after starting vehicle.
How often does this trouble occur?	Trouble occurs regularly.
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
Engine idle trouble occurs after vehicle is started at:	Hot condition - after vehicle is off for less than 1 hour.
To the best of your recollection, the trouble was first noticed:	Within the 1st month after delivery.
Additional Comments:	It appears like a general characteristic of the engine. When cold the transmission or engine is jumpy the colder the way more violent. When at temp it never happens. Its like its hopping. Like a whomp whomp shift whomp whomp shift. Also when coming to a stop. The car downshifts and feels like you got rear ended. Not sure what's w i h that. And the downshifts response is downright NHSTA worthy of a recall. I can count almost 3 seconds for the car to downshift from 8th to whatever gear required to pass a car in the interstate. Its really unacceptable. I can hit the gas and count to three before the car takes off. Its very scary. This occurs at speeds above 40+. Also off the line throttle response is garbage.
What best describes the engine idle trouble? (check all that apply):	Engine idling is rough. It's random. But if just sitting in park the car shakes like it has a v8 but its not violent it just shakes the car. If you hold revs at 1100 its smooth as glass
What type of fuel do you most often put into your vehicle?	Regular gasoline.

Engine Idling (rough, too low/high)	
Engine Idling (rough, too low/high)	Engine does not idle properly: idles rough, too low, or too high.

Detail on Low Rated Items	
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	Electronic gear shift is a bad design, period.
You rated headlight illumination/performance during night-time driving Low. Use this space to provide any specific comments you would like to share.	Illumination is very poor at night. Especially on roads with no light, and especially when turning. It seems that the angle of lighting is such that upon sharp turning, the driver has no visibility whatsoever. It is like driving in the dark.

What Can We Do Better?	
Feedback/Concerns:	Electronic gear-shift system is an big drawback.
What has Chrysler done right?	Overall quality and reliability. Overall cost at good performance.

Entertainment/Navigation System/Connectivity	
Please tell us your cell phone model	iPhone 6
Please choose your cell phone brand	Apple.
Please choose your cell phone carrier	Verizon Wireless.

Gear selector is difficult to operate (auto. trans.)	
Please describe conditions when this trouble occurs:	The automatic electronic transmission does not allow a good feel for the change of gear. Often I end up in R when I pushed to Park and I could be in N when I am going to D. It is extremely dangerous when I think I am in P while the car is really in R. The gear shift does not give a good feeling to the driver.
Additional Comments:	The trouble (gear-shifting) was noticed immediately after delivery of the car. Although I love the car for its many other features, I know now that I would not buy it again if the gear shifting system is still the same. Even old drivers like me need to feel that the change of gear is firm and immediate.
Approximate mileage when trouble was first noticed was:	Less than 10,000.
Why is the gear selector difficult to operate?	Other (please describe).
How often does this trouble occur?	Trouble occurs regularly.

Voice Activation / Recognition doesnt recognize command	
Additional Comments:	When the car is running, one cannot use the GPS to enter a destination. One has to use voice command; but that does not work (recognize the voice etc... or recognize something different). Unless one stops to enter directions, there is no solution.
How often does this trouble occur?	Trouble occurs regularly.
Please describe when this trouble occurs:	When stating a name. Since one cannot enter directions when the car is moving this can be very annoying; that is the GPS does not work or follow commands.

Please describe the other trouble you experienced:	Do not like the gear shift AT ALL. Very difficult to get into the correct gear. At times, it appears the car is in PARK and I take my foot of the brake and realize that it is rolling because it's in NEUTRAL. Also very difficult to get into DRIVE -- again, it's in NEUTRAL. Very unhappy with this and have spoken to several other 300 owners who feel the same way. Very, very dangerous. Also do not like during normal driving, often my hand/finger will accidentally hit the manual gear and downshift the engine during regular driving.

Gear selector is difficult to operate (auto. trans.)	
To the best of your recollection, the trouble was first noticed:	9-12 months into ownership.
Going into which position is the gear selector difficult to operate? (check all that apply):	Park (P). When I brought it in, could not shift into park. Was fixed but now I can't just shift lever from drive to park, it goes up to neutral or reverse and I have to push again to get to Park. Haven't had chance to bring in yet, but a nuisance to saw he least or potentially dangerous when I think it's in park and go to get out of car and it's in reverse. Love my 300 but I much preferred shifter I had in my 2011 Charger R/T.
Please describe conditions when this trouble occurs:	6 months or so after i owned the car. Drove into my driveway to park car and could not get it into park. So I was not able to shut car off. I drove to dealership, put the emergency break on car with car running in drive and the dealer was at least able to show me a way to get car in park until I was able to bring back next day to have a replacement part put in car.
Approximate mileage when trouble was first noticed was:	10,000-19,999.

What Can We Do Better?	
Feedback/Concerns:	As commented, though I do like the 8 speed over the 5 speed I had in my 2006 and 2011 Charger R/T's, I do really do not prefer the electronic shifting mech. over my shifter mech. in my 2006 and 2011 chargers.
What has Chrysler done right?	Best Nav GPS over all other car mfgrs!!! Very east to use, not cluttered, difficult to use, i.e. such as Fords. Travel link is great also!
Detail on High Rated Items	
You rated ease of using system displays while driving High. Use this space to provide any specific comments you would like to share.	Ease to read/use
You rated front view styling (front fascia, hood, grille, headlight area) High. Use this space to provide any specific comments you would like to share.	I have sport model, instead of chrome on front, I like the black out look in place of chrome.
You rated the value of your new car High. Use this space to provide any specific comments you would like to share.	Several years ago I owned a 2003 Cad. STS Seville. Very nice, comfortable riding car, but with a \$56K MSRP price in relation to what I paid for my 2014 300S AWD, is a much better value.
You rated navigation system route accuracy High. Use this space to provide any specific comments you would like to share.	Very easy to use, laid out well, intuitive, uncluttered.

What is your attitude overall towards the BRAND of your new car?	5.
Is there anything about your new vehicle you would like to see changed?	1. I am not sure that the car's mapping system is up to date. 2. Sometimes, it is difficult for my wife to get out of the car without the door coming back at her and hitting her in the leg. 3. I do not like the gear shifter at all. It is suppose to glide to Drive or some other position BUT I find it very annoying as I wrestle with what gear. I would like to have control and just shift to the gear I want. Don't like this feature at all.

No (after completing your survey, we will provide a link to download your vehicle application to your smartphone.).
Would you recommend this vehicle to family or friends?	No.
Please explain further about your choice to recommend your vehicle:	I like the power, the ride and the handling of the car. I would not buy this vehicle again as the trunk is not functional for me. I just think that when a person buys a large car, it should have a larger trunk. Also, I find it intersting that you send this survey 20,000+ miles later and 1.5 years after I bought the car. I went on your website looking to provide feedback to you before but you do not provide access to make comment. I would think that you would want feedback, even earlier than this, to possibly make adjustments to new car roll-outs.

Detail on Low Rated Items	
You rated vehicle storage and space usage Low. Use this space to provide any specific comments you would like to share.	Note reason above.

Other	
Please describe conditions when this trouble occurs:	as described above
Please describe the other trouble you experienced:	1. I have always enjoyed big cars. The real complaint about this car is the size of the trunk. The trunk, at least, should be big enough to hold two sets of golfs without having the to put the back seat down. 2. I have always had rear wheel drive, I find that in normal snow I do not always have a feeling of control.

I can honestly say I am very disappointed in the shifter.. it seems to not be user friendly, not easy to go from park to reverse to drive.. I imagine a normal 3 point turn would be slowed bc of the way its not easy to shift. I just came from the 2012 and that was very easy and you could quickly go from park to whatever and not have to worry about it slipping to another drive.. From drive to park sometimes it doesn't lock up.. I don't think this electronic method should be used again.. I fear I may think I am in park and the gear still be engaged.. just very poor gear changer and system.

I took the Jeep in to the shop to have the gear shift looked at because it jumps out of park. I was told there was nothing wrong with it although my daughter & I have had numerous incidences with this occurring. Then, two days later an article appeared in the paper about a defect occurring in Chevy & 2014-2015 Jeeps jumping out of automatic gear. Everyone at the shop seemed dumb regarding this issue.

My Jeep has rolled away two times when my car has been in park. I have talked with your customer service toll free line, tried to get an answer from the dealer and their service area. I have also filed a case with the NTSB because the answers I received were totally irresponsible. The fact that you have a vehicle that roll away in park and there has not been something done to correct this, is very disconcerting. Will it take a death or multiple deaths to have the company due something. When my car rollway, I was beside it the first time and hopped back in the car to put on the brake. I got out of the car after turning it on and resetting the park position turned it off and walked in front of the car just before it rolled forward, hit my nephew's car and put it through the garage door. Not only was there nothing done by Chrysler to fix the issue, my insurance increased by \$50 dollars a month because of an unforeseen unexplained and accident that was not fault of my own. Chrysler do something about this. I will continue to tell anyone I know that there is an issue with this vehicle and will do whatever I can to help the NTSB with their inquiry. I am not usually like this, but there is a significant defect in this vehicle. When I asked about the problem, the mechanic said "Oh yes, this is an open differential system and when one wheel slips they all roll forward." Does that seem like an appropriate response for someone representing the company? DO SOMETHING!!!!

We left Florida driving our Jeep, heading for Minnesota in a hurry. My mother-in-law was terminally ill, we spent the last 6 weeks of her life with her. She passed away on 2-14-16, her funeral was 2-20-16. On 2-19-16 our 16 year old dog became ill & we lost him with kidney failure the night before the funeral. When we drove to the funeral home on the 20th we were unable to get the Jeep to provide any passenger heat. I watched the temperature gauge until arriving at the funeral home, the vehicle did not overheat. After unloading the Jeep I parked it, went inside to help my wife and the funeral director set up the things we had brought, then excused myself to go check on our Jeep. The Jeep had overheated, there was anti freeze on the ground and all over the engine. I called AAA and they towed the Jeep to Feist Automotive. They called me at the funeral and said the thermostat had stuck, they were unable to get the part on a Saturday afternoon, and recommended that they trailer my vehicle to an authorized dealer because it was new and under warranty. They were great! They trailered the Jeep to Coon Rapids, left a note in my vehicle, and left the keys in the drop box. On Monday morning I was at Coon Rapids Jeep at 7:00 AM prompt. I spoke with Todd Bean and was told they were two weeks out on service. I explained our situation, that we really needed the vehicle so we could head back to Florida. I told him we needed a new thermostat, I could change one out in 20 minutes on my 1957 Chevy, and if he would get me a new thermostat I would take it from there. He asked that I check back around 11:00 and he would see what he could do. I went back at 11:00, they had driven the car, they couldn't make the thermostat stick, and thought the problem might even be with the transmission because that fluid "was red also". They would not be able to replace the thermostat because the existing one would not act up and therefore, they would not be reimbursed by Chrysler. Wow ! They were telling me a reputable mechanic had taken it apart, inspected a stuck thermostat, and they could not believe his diagnosis. They were unable to tell antifreeze from transmission fluid at a Chrysler dealership, I finally negotiated a new thermostat, install

Previous to the incident that occurred on February 8, I was very likely to recommend the Jeep to others. This is my second Jeep and I was very pleased with it. Now that an incident that could have been deadly or very serious to myself and/or my domestic partner, I am very uncomfortable with this Jeep.

It had performed very well until February 8. I am a paraplegic and my domestic partner drives the Jeep. I also have a Dodge Caravan wheelchair accessible vehicle that I drive. The Jeep was parked in our driveway. He took my wheelchair out of the back, as he always does when he has driven me someplace. Then he helped me to transfer into my wheelchair and we went into the house. A few minutes later, he looked out of the window and saw that the Jeep was at the bottom of the driveway and halfway out into the street. He got in it and started it. 7 or 8 times he drove it up the driveway and put it in park. Each time the Jeep rolled down the driveway with the wheel rolling while it was in park. If this had occurred while he was removing my wheelchair from the back, he would have probably been killed. If it had occurred while I was transferring out of the vehicle, the open door would have struck me in my wheelchair, knocked me down as well as probably knocked him down because he was behind the chair holding it. We called the dealer and brought the Jeep in. They tried at first to tell him that it slip on the snow in the driveway. He explained that the wheels were rolling the the car was in park. They examined the car, said it was a software update that was needed and returned the car to him. This has not occurred since, but neither of us feels safe with the car. It has had no problems in our driveway for the past year, but we do not feel confident that this problem will not occur again. It is a more serious problem for us, since my wheelchair is put in the back and I transfer slowly from the car to the wheelchair and could not get out of the way if the Jeep rolled again.

You rated interior comfort, design and appearance of interior (overall impression) High. Use this space to provide any specific comments you would like to share.

Small rise for left foot location. It's OK, but a little higher would work for long driving.

You rated your feelings about the durability of your new vehicle High. Use this space to provide any specific comments you would like to share.

Right now it's a guessing game. I think it will be OK.

You rated interior comfort, design and appearance of interior (overall impression) High. Use this space to provide any specific comments you would like to share.	The console box has very little storage. The back cargo storage area gets smaller with every new jeep I purchase. Golf clubs no longer lay flat in it. his is a big negative to golfers

What Can We Do Better?>	
Feedback/Concerns:	The shifter and the steering wheel paddles drive me crazy. I never know what gear I am in. I bump from drive to sport too easily. The biggest problem is when I turn the steering wheel and I bump a paddle the next thing I know is the engine is running at 4,000 rpm. The car is so quiet that you don't hear it very easily.
What has Chrysler done right?	The Vehicle is awesome. Other than the shifter!

You rated operating controls while driving (gear selector, turn signals, horn, etc.) Low. Use this space to provide any specific comments you would like to share.	my last jeep shifted back into a higher gear on its own. Once you bump the down shift paddle in continues to drop to 1st gear unless you press the up paddle. I have to shift into Nuetral to disengage. i would think this accidental bumping of the paddles would put undo stress on he engine due to high RPM.
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	just the shifter, paddles and some storage room. i do love the vehicle

Overview

Overall, how satisfied are you with the quality of your new vehicle?	Very satisfied.
Would you recommend this vehicle to family or friends?	Yes.
Information in the Smartphone Application is easy to find and access	3 (neither agree nor disagree).
Smartphone Application covers the necessary features	5 (strongly agree).
Please rate your overall level of satisfaction with the Smartphone Application	5 (very satisfied).
Please provide feedback on how Chrysler can improve the Smartphone Application	Have good salesmen (see below)
Which feature or section of the Smartphone Application did you find most helpful and why?	See above
Have you referred to the Owner's Manual, Warranty Manual, or other documents that came with your vehicle to answer questions about your vehicle?	Yes.
Where did you take your vehicle to have your trouble checked out? (check all that apply)	The salesman explained the paddle shifter
Was the trouble resolved to your satisfaction?	Yes.
If our team has any additional questions about your responses, would you accept further contact?	Yes, by phone or e-mail.
Many of our vehicles have supporting smartphone applications with vehicle information. Have you had the opportunity to download and review your vehicle's smartphone application (if available)?	Yes.
The Smartphone Application format is easy to understand and use	3 (neither agree nor disagree).
Which feature or section of the Smartphone Application did you find least helpful and why?	I probably don't know enough to answer. I use the phone, that's all.
Please explain further about your choice to recommend your vehicle:	I love the car It's a Summit, what's not to love). I hate the transmission shifter but love the Paddles now that I know how to use them. All the trim and interior items (most) are very nice and the car is a real looker. I think there should be a anti-door ding strip on the outside of the door (like the 2012 Overland). I think the interior wood trim was much, much, much nicer on the 2012 Overland. And I think the buttons to operate the seat heaters and steering wheel heater was much easier and safer to operate on the 2012 Overland. Outside of those four issues Transmission shifter, ext door trim, interior wood quality, and seat/steering wheel heater controls) the 2014 is a much nicer car. I love the headliner, seats, carpet, eight-speed trans, hemi, ext trim. wheels, etc. I do think there is more road/ tire noise than should be in a \$56000 car, you might work on that but I also know that is a difficult problem to solve. Thanks for providing the opportunity to express my concerns (and my delights far out weigh my concerns).
Have you taken the vehicle to a dealer to have your trouble corrected?	Yes.
What information did you need that was not included in the Smartphone Application?	I'm not a techy so the dealer salesman set it up for me and I just use it. It works great

Transmission and Drivetrain>Automatic Transmission>Gear selector is difficult to operate (auto. trans.)>	
Approximate mileage when trouble was first noticed was:	0 - 1499 miles.
Going into which position is the gear selector difficult to operate? (check all that apply):	See comment on Park It leaves you feeling unsure of what gear you are in. I owned a 2012 Overland and I liked the gear shift system on it much, much better
To the best of your recollection, the trouble was first noticed:	At delivery.
How often does this trouble occur?	Trouble occurs regularly.
Additional Comments:	Their is no clear ratchet to one position at a time. If you happen to hold the shifter alittle too long in either down or up shift mode it can skip two or more gears (so you end up in Park when you want reverse, or you end up in Drive when you want reverse) That didn't happen on the 2012 Overland shifter.
Please describe conditions when this trouble occurs:	Daily driving
Why is the gear selector difficult to operate?	Other (please describe).

What Can We Do Better?>	
What has Chrysler done right?	I provided a whole list. The car in the photo above is the car I bought. It's a great looking, great riding and handling car. I love red so you might think about making the "High Octane Red" available on the Jeeps soon. I also like blues but the only blue you have available is so dark it is almost black. Have at least one lighter blue to chose from (like Atlantic Blue, or close to it).
Feedback/Concerns:	Pay attention to the four/five items I gave you and improve hem.
Detail on Low Rated Items	
We want to hear what's on your mind. Please use this space to comment on any feature of the vehicle that fell well below your expectations.	See the survey. Trans shifter was the worst, interior wood was disappointing, road/tire noise was higher than should be, I hate parking lot door dings so some protection for the door would be good, Seat/steering wheel heater controls take your eyes off the road too long for safety, and on a car like the Summit use Michlin tires please.

What Can We Do Better?>

What has Chrysler done right?	we have not had time to take the GC on a trip yet but everything seems to be great. Gas mileage is averaging around 20 in town. Handles like a sports car and provides a great ride also. Runs great with ample power. Would like to do a review after driving on a trip and in 10,000 miles.

To the best of your recollection, the trouble was first noticed:	At delivery.
Going into which position is the gear selector difficult to operate? (check all that apply):	2014 gear selector works fine, but when transitioning from drive to reverse, reverse to drive, drive to park, etc., it's often difficult to know where you've positioned without looking. I think the spacing is too tight to easily tell by "feel".
