Dear Mrs. [REDACTED]

This will further acknowledge contact to FCA US LLC, regarding your 2014 Chrysler 300.

Naturally, we were sorry to learn of the incident described to us during the initial contact. However, we have had the opportunity to review the inspection report and must inform you that we are not led to believe that the incident was due to a manufacturing responsibility. Therefore, we must respectfully decline any assistance associated with this incident.

Based on this information, we can only suggest that you refer this matter to your insurance carrier. Should they feel a manufacturing responsibility exists, they have full subrogation rights under the terms of your policy.

Thank you for allowing us the opportunity in reviewing this matter with you.

Sincerely,

As a follow-up to your report to the Vehicle Safety Hotline (VSH), we have recorded your information on the enclosed Vehicle Owner's Questionnaire (VOQ) form. Please review the form and make changes, additions and corrections as necessary. Additionally, please provide a more detailed description of the failure(s) you reported that you believe relevant to safety. Also, if available, include copies of repair invoices, letters to the manufacturer, or any other document related to the problem(s) you reported. If a crash or fire occurred, include a copy of the police or fire department report.

It is helpful to be as thorough as possible in your report so that our ability to use your report will be maximized. If you do not have the information, it is not necessary to complete all the boxes. However, it is very difficult to identify the scope of a vehicle problem unless the vehicle identification number (VIN) is known. The VIN is located inside the vehicle on the dashboard adjacent to the left (driver's side) of the windshield pillar and on the drivers' door or the driver's door jam. It may also be listed on a dealer repair invoice or your insurance or registration cards. When reporting a tire problem, the brand name, tire line and complete tire size should be included. Be certain to provide the DOT tire identification number. It is usually located near the rim flange of the tire on either side of the tire.

We do not make your personal information (name, address, phone numbers, etc.) available to the general public. However, if we open an investigation that involves your vehicle, we will provide the manufacturer of your vehicle with a complete copy of your report. The information you provide may assist the manufacturer and NHTSA in determining if a safety-related defect exists.

Any information provided is entirely voluntary. There is no consequence or penalty of any kind if you do not wish to provide it. We seek this information to develop both statistical and investigative evidence that will help identify potential safety related problems in vehicles or vehicle equipment, e.g., tires, child safety seats, jacks, etc.

When completed, please fold and staple or tape the form so that the pre-addressed portion of the form is on the outside. If a larger envelope is used, tape the VOQ form to the larger envelope so that the pre-addressed portion of the form is showing.

If further assistance is needed, please contact the VSH at their toll-free number, 1-888-327-4236.

Thank you for your cooperation.

Sincerely,

**BUSINESS BRIEFING**

TRIBUNE NEWSPAPERS AND NEWS SERVICES

## Feds Probe Fiat Chrysler Gear Shifters

Electronic gear shifters on some newer Fiat Chrysler SUVs and cars are so confusing that drivers have exited the vehicles with the engines running and while they are still in gear, causing crashes and some serious injuries, U.S. safety investigators have determined.

The National Highway Traffic Safety Administration, in documents posted during the weekend, has doubled the number of vehicles involved in an investigation of the problem, but it stopped short of seeking a recall. The agency found more than 100 crashes and over a dozen injuries, mostly in Jeep Grand Cherokees.

Agency tests found that operating the center console shift lever "is not intuitive and provides poor tactile and visual feedback to the driver, increasing the potential for unintended gear selection," investigators wrote. They upgraded the probe to an engineering analysis, which is a step closer to a recall. NHTSA will continue to gather information and seek a recall if necessary, spokesman Gordon Trowbridge said.

The probe now covers more than 856,000 vehicles including the popular Jeep Grand Cherokee SUV from the 2014 and 2015 model years and the 2012 through 2014 Dodge Charger and Chrysler 300 sedans with 3.6-liter V6 engines.
