Hi Pat.

Have you responded to the information request letter yet? I know that we spoke and you informed me that Musi did not sell any defective kits w/Peter Paul valves. My understanding is that you were going to follow up with a written response from Musi to enter into the investigation file. If you have sent in your response already, I'll look for it. Our mail system has virtually disappeared and everything is mostly being done electronically. Please let me know what the status is as soon as you can.

Thank you.
