Dear Ms. Reyntjens:

This letter is to inform you that the Office of Defects Investigation (ODI) of the National Highway Traffic Safety Administration (NHTSA) has opened a Preliminary Evaluation (PE17-006) to investigate allegations of seat belt latch casing failures resulting in a potential latch/buckle failure and unrestrained passengers that increase the risk of injury in a crash in model year (MY2016) Van Hool buses manufactured by Van Hool N.V. (Van Hool). The purpose of this letter is to request certain information from Van Hool to assist ODI in this pursuit.

This office has received 7 reports of seat belt latch casing failures in certain MY2016 motor coach buses manufactured by Van Hool. Through Early Warning Data (EWR) review of Field Reports for 2016 Q1, several reports identified a failure of seat belt latch casings on some MY 2016 coaches from two fleets. In 2016 Q2 and 2016 Q3 EWR data additional reports were identified from one of the fleets as having repeat failures. Further review of EWR aggregate warranty data showed additional claims for MY 2016 buses which, upon review identified additional fleets as having similar latch issues.

During review of data related to the issue, ODI was contacted by the National Transportation Safety Board (NTSB) regarding a seat belt latch issue they discovered while investigating a crash between a train and a 2016 Van Hool bus in Biloxi, Mississippi. Through follow up with ABC Companies (ABC), Van Hool's North American distributor, interviews with other fleets/technicians and informal inspections of MY 2016 Van Hool buses in the Washington DC metro area, NTSB identified a series of concerns related to the seat belt latch issue. These concerns were provided to ODI suggesting the latch casing failures may be a wide spread problem found on MY 2016 Van Hool Buses.

Unless otherwise stated in the text, the following definitions apply to these information requests:
