12/16/2019 12:23:00 PM	CASE #[redacted] | MONDAY, DECEMBER 09, 2019 5:54:21 PM | | I DO NOT LOVE MY TIGUAN... FIRST VW AND WILL BE MY LAST. CLOCK SPRING MALFUNCTION ON A 5 YEAR OLD CAR, AND MY CAR WAS NOT PART OF THE RECALL. I KNOW CARS DON'T LAST FOREVER, BUT THE ISSUES WITH THIS CAR ARE BEYOND NORMAL WEAR AND TEAR AND YOU'D THINK THE CAR SHOULD AT LEAST LAST THROUGH THE LENGTH OF THE LOAN. NEVER AGAIN VW. | | | MONDAY, DECEMBER 09, 2019 6:15:00 PM | | WE ARE SO SORRY TO HEAR ABOUT THE CLOCK SPRING MALFUNCTION ON YOUR TIGUAN, [redacted] AS WE KNOW THIS MUST BE A FRUSTRATING SITUATION, AND ISN'T THE TYPE OF FUN AND CARE FREE OWNERSHIP WE ENVISIONED FOR YOU. IF YOU'D LIKE TO SHARE MORE DETAILS, PLEASE SEND A PRIVATE MESSAGE, AND WE CAN LOOK FURTHER INTO THIS. | | | NATALIE N. | | VW SOCIAL MEDIA ADVOCATE
12/16/2019 12:24:00 PM	MONDAY, DECEMBER 09, 2019 8:10:48 PM | | HELLO, I HAVE ALREADY REACHED OUT TO THE DEALERSHIP, NOT SURE HOW MUCH MORE CAN BE DONE. MY CAR IS NOT PART OF THE CLOCK SPRING RECALL, NOR IS IT COVERED UNDER THE EXTENDED WARRANTY ANY LONGER. | | | TUESDAY, DECEMBER 10, 2019 8:17:37 AM | | THANKS FOR FOLLOWING BACK UP WITH ME, [redacted] AND I APPRECIATE YOU WORKING WITH OUR DEALERSHIP REGARDING THE CLOCK SPRING ISSUE. WHAT CONCERNS WERE YOU EXPERIENCING WITH YOUR TIGUAN ORIGINALLY THAT LED YOU INTO THE DEALERSHIP FOR THEM TO DIAGNOSE THE CLOCK SPRING MALFUNCTION, AND WAS THIS A RECENT SERVICE VISIT? ALSO, WHICH VW DEALERSHIP WERE YOU WORKING WITH? | | | WHILE I KNOW YOU'VE WORKED WITH THE DEALERSHIP ALREADY, I WOULD BE HAPPY TO GATHER SOME ADDITIONAL INFORMATION FROM YOU TO PULL UP YOUR VIN AND CHECK FOR ANY OPEN RECALLS OR WARRANTY EXTENSIONS THAT MAY BE ACTIVE ON YOUR TIGUAN. THE DEALERSHIPS DO HAVE ACCESS TO THIS INFORMATION, BUT WE CAN MAKE SURE THAT THERE AREN'T ANY MISSED OPPORTUNITIES. | | | NATALIE N. | | VW SOCIAL MEDIA ADVOCATE | |
12/16/2019 12:25:00 PM	MONDAY, DECEMBER 16, 2019 12:22:02 PM | | I APPRECIATE THIS INFORMATION, AS IT'S HELPFUL TO KNOW, [redacted] AND AGAIN I'M SORRY TO HEAR ABOUT THESE ISSUES WITH THE STEERING WHEEL BUTTONS AND AIRBAG LIGHT. I KNOW THIS IS YOUR FIRST VW, AND THIS CERTAINLY ISN'T THE OWNERSHIP EXPERIENCE WE ENVISIONED FOR YOU. | | | WHILE THE ISSUES YOU'RE EXPERIENCING MAY SOUND LIKE SYMPTOMS UNDER A WARRANTY EXTENSION, OUR DEALERS WOULD NEED TO GET A CURRENT DIAGNOSIS COMPLETED TO MAKE THAT DETERMINATION, WHICH IS WHY LUTHER VW ADVISED TO BRING YOUR TIGUAN IN. I KNOW HAVING TO PAY A DIAGNOSTIC CHARGE TO DETERMINE THIS IS NOT IDEAL, SO I CAN UNDERSTAND ANY HESITATION DOING SO. | | | I DID HAVE A CHANCE TO PULL UP YOUR VEHICLE INFORMATION TO CHECK FOR ANY WARRANTY EXTENSIONS RELATED TO THIS ISSUE. THERE WAS THE AIRBAG CLOCK SPRING THAT WAS ACTIVE, BUT AS YOU ADVISED YOU WERE OVER 120,000 MILES, THIS WARRANTY EXTENSION HAS EXPIRED. THIS WAS ACTIVE FOR 120,000 MILES OR 2/18/2024, WHICHEVER OCCURRED FIRST. I ALSO CHECKED FOR ANY OPEN RECALLS OR CAMPAIGNS, AND THERE AREN'T ANY. | | | ARE YOU STILL EXPERIENCING ISSUES WITH THE AIRBAG LIGHT AND STEERING WHEEL BUTTONS, OR HAVE YOU SINCE HAD THIS DIAGNOSED AND REPAIRED BY A VW DEALERSHIP OR INDEPENDENT MECHANIC? IF YOU'RE STILL HAVING ISSUES, I'D BE HAPPY TO HELP GET AN APPOINTMENT SET UP WITH ONE OF THE DEALERS IN YOUR SURROUNDING AREA IF YOU'D LIKE, AND WOULD JUST NEED TO KNOW WHICH TIMES/DAYS WORK BEST FOR YOUR SCHEDULE. | | | NATALIE N. | | VW SOCIAL MEDIA ADVOCATE | | | | MONDAY, DECEMBER 16, 2019 1:29:55 PM | | THE ISSUE HAS NOT BEEN FIXED. THANK YOU, BUT I WILL LOOK ELSEWHERE TO GET IT FIXED. I HAVE KIDS AND IT IS A SAFETY ISSUE BUT GOING TO A VW IS NOT FINANCIALLY FEASIBLE. IN THE MEANTIME I WILL PROCEED WITH A COMPLAINT TO THE NHTSA. BUT THANK YOU FOR YOUR WILLINGNESS TO HELP.

1/2/2020 2:51:00 PM	REFERENCE # [redacted] | | | DEAR MS. [redacted] | | | I APPRECIATE YOU FOR REACHING BACK OUT TO ME WITH THE REPAIR ORDER INFORMATION. | | | FROM YOUR PROVIDED PICTURES, I WOULD ALSO NEED TO SEE A PICTURE OF THE RECEIPT SHOWING THAT THE AMOUNT PRESENTED WAS PAID IN FULL. | | | ONCE THAT INFORMATION IS RECEIVED, I WILL BE ABLE TO ESCALATE YOUR CASE UP TO OUR CAMPAIGN REIMBURSEMENT REVIEW DEPARTMENT TO FURTHER LOOK INTO REIMBURSING YOU FOR THE COSTS INCURRED FOR THE STEERING WHEEL/AIRBAG CLOCK SPRING AND POSSIBLE REIMBURSEMENT FOR THE TIMING COVER REPAIR, AS YOU WERE WITHIN YOUR CERTIFIED PRE-OWNED (CPO) WARRANTY AT THAT TIME. | | | SINCE YOU┬┬VE MENTIONED THAT YOU ARE STILL EXPERIENCING CONCERNS WITH THE STEERING WHEEL CONTROLS, WHILE YOU ARE STILL WITHIN WARRANTY, I WOULD DEFINITELY RECOMMEND THAT YOU VISIT A LOCAL VOLKSWAGEN DEALERSHIP. THIS IS TO ENSURE THAT VW APPROVED PROCESSES AND RESOURCES ARE USED ON YOUR PASSAT. | | | REGARDING THE SWEATING SEAT CONCERNS, FINANCIAL COVERAGE FOR THIS ITEM WOULD BE CUSTOMER PAID, AS YOU ARE NOW OUTSIDE OF ANY APPLICABLE WARRANTIES BY AGE AND MILEAGE. | | | I KNOW THAT YOU ARE CONCERNED ABOUT THE DIAGNOSIS FEES. ONCE A VW DEALERSHIP DIAGNOSES THE CURRENT SYMPTOMS IN YOUR VEHICLE, AND DETERMINES THAT THE CAUSE IS RELATED TO THE WARRANTY EXTENSION, THE DIAGNOSIS FEE AND RELATED REPAIR COSTS WILL BE FACTORED WITHIN THIS EXTENDED WARRANTY. FOR THE SWEATING SEAT CONCERN, THE DIAGNOSIS FEE FOR THAT WOULD BE A CUSTOMER PAID ITEM. | | | AS OUR DEALERS ARE IN CHARGE OF SETTING THEIR OWN FEES, THE DIAGNOSIS FEE IS DETERMINED BY THE DEALERSHIP ITSELF. TO REFERENCE YOUR STATEMENT ABOUT THE LOANER VEHICLE, IT WOULD BE BEST TO INQUIRE FURTHER WITH THE DEALERSHIP ABOUT THIS, AS LOANER VEHICLES ARE AVAILABLE ON A FIRST COME, FIRST SERVE BASIS. | | | I HOPE THAT THIS EMAIL FINDS YOU WELL. 1/7/2020 8:29:00 AM	REFERENCE #[redacted] | | | DEAR DR. [redacted] | | | THANK YOU FOR SUBMITTING THE REQUESTED RECEIPTS. | | | I APOLOGIZE FOR MY PREVIOUS MISCOMMUNICATION; AS RESEARCHING FURTHER YOUR PASSAT WAS OUTSIDE OF THE TERMS OF THE CPO WARRANTY BY TIME WHEN THE TIMING COVER REPAIR WAS COMPLETED. WITH THIS REIMBURSEMENT FOR THE TIMING COVER REPAIR CANNOT BE PROVIDED, BUT WE STILL WANT TO REVIEW FOR POSSIBLE REIMBURSEMENT UNDER THE CLOCK SPRING WARRANTY EXTENSION. | | | I HAVE FORWARDED THE CLOCK SPRING REPAIR DOCUMENTS TO OUR CAMPAIGN TEAM. THEY ARE IN BEST POSITION TO COMPLETE THE REVIEW, AS THEY HAVE THE MOST FAMILIARITY WITH OUR RECALLS AND WARRANTY EXTENSIONS. THEY WILL DETERMINE IF THE REPAIRS COMPLETED ON YOUR PASSAT MATCH THE WARRANTY EXTENSION GUIDELINES, AND THEN SEND YOU THEIR DETERMINATION BY MAIL WITHIN 60 DAYS. | | | IF YOU HAVE QUESTIONS IN THE MEANTIME, PLEASE DON┬┐T HESITATE TO CALL US AT 800-822-8987 OR REPLY TO THIS EMAIL. [redacted] | | | | I'M SORRY TO LEARN OF THE STEERING WHEEL CONTROL CONCERNS WITH YOUR PASSAT. | | | | THE INFORMATION PROVIDED BY YOUR VW DEALER IS ACCURATE, AS SOLELY THE CLOCK SPRING COMPONENT IS COVERED UNDER THE CLOCK SPRING WARRANTY EXTENSION. ANY OTHER NEEDED REPAIRS WOULD FALL UNDER REGULAR MANUFACTURER WARRANTIES. YOUR VEHICLE WAS COVERED UNDER THE CPO WARRANTY UNTIL NOVEMBER 11, 2019. DUE TO THE TIME OUTSIDE OF THIS WARRANTY, ANY REPAIRS NEEDED TO THE STEERING WHEEL CONTROLS WOULD BE AT CUSTOMER RESPONSIBILITY. | | | | WE WANT YOU TO ENJOY YOUR PASSAT CAREFREE. 2/14/2020 2:24:00 PM	CUSTOMER STATES: I HAVE BEEN A LOYAL CUSTOMER SINCE 2005; THE SERVICE REP WAS RUDE TO ME AND TOLD ME NOBODY CAN CHANGE THIS DECISION; I WANT YOU TO HAVE AN OPEN MIND ABOUT THIS; I WOULD LIKE TO HAVE VW PAY FOR MY REPAIR BECAUSE THE DEALERSHIP TOLD ME THAT MANY PEOPLE HAVE TO HAVE THE CLOCK SPRING REPLACED AFTER THE AIRBAG RECALL IS PERFORMED AND THERE IS EVEN AN EXTENDED WARRANTY FOR MOST OF THE VEHICLES WHY NOT MINE. SUP ADVISED: RECALLS AND WARRANTY EXTENSIONS ARE VIN SPECIFIC THEY ARE BASED ON THE COMPONENTS IN YOUR VEHICLE AND YOUR VEHICLE WAS NOT IDENTIFIED AS ONE THAT NEEDED TO BE PART OF THE A WARRANTY EXTENSION FOR THE CLOCK SPRING; YOUR VEHICLE IS ALSO OUTSIDE OF THE NVLW BY BOTH TIME AND MILEAGE AND THAT IS WHY THE COST OF REPAIRS WOULD NOT BE COVERED. CUSTOMER STATES: I AM NOT HAPPY ABOUT THIS; I DO NOT APPRECIATE THAT VW WILL NOT ASSIST ME. NO FURTHER ACTION.

THE MAIN ISSUE HOWEVER IS, VOLKSWAGEN FAILED TO CONTACT ME DURING THE PURCHASE OF THIS CAR, OR ANY TIME AFTERWARDS THAT THERE WAS A WARRANTY EXTENSION ON THE CLOCK SPRING. I WAS ACTUALLY EVEN TOLD BY OUR LOCAL VOLKSWAGEN DEALER SERVICE CENTER IN GEORGETOWN TEXAS THAT THIS SHOULD HAVE BEEN INCLUDED IN OUR CONTRACT OR THAT WE SHOULD HAVE BEEN MADE AWARE OF IT THROUGH MAIL. THIS IS A FAILURE ON VOLKSWAGEN┬┐S PART BECAUSE IF I HAD BEEN MADE AWARE OF A POTENTIAL PROBLEM WITH THIS PART, AND THAT IT WAS UNDER AN EXTENDED WARRANTY, I WOULD OF COURSE, TAKEN IT STRAIGHT TO THE DEALERSHIP. | | WE HAVE BOUGHT 2 VOLKSWAGEN VEHICLES IN THE LAST 3 YEARS, BUT I WILL RETHINK THE BRAND OF CAR WE PURCHASE IN THE FUTURE. 4/29/2020 10:03:00 AM	MEDIA ATTACHED IN DOC CENTER | | | CUSTOMER STATES/SEEKS: MY TIGUAN RECENTLY GAVE AN INDICATOR THAT I HAVE AN AIRBAG ERROR AND I NOTICED A BIG RECALL WITH THE TAKATA AIRBAG SYSTEM BUT WHEN I PUT IN MY VIN, THERE ARE NO RECALLS | | | CO ADVISED: YOU DO HAVE AN EXTENDED WARRANTY ON YOUR TIGUAN FOR THE AIRBAG CLOCK SPRING FOR 15 YEARS, UNLIMITED MILEAGE. I'D RECOMMEND MAKING AN APPOINTMENT FOR A DIAGNOSIS WITH YOUR PREFERRED DEALERSHIP, AS THIS MAY COVER WHAT YOU'RE EXPERIENCING. | | | CUSTOMER STATES: IF NOT COVERED, DO YOU HAVE AN ESTIMATE ON HOW MUCH THAT WOULD BE? I WANT TO GET THIS TAKEN CARE OF AS SOON AS POSSIBLE, BUT I AM JUST PUZZLED AS TO WHY THE AIRBAG WOULD READ AN ERROR SEEMINGLY OUT OF NOWHERE. THEN I GUESS TO FIND OUT MY VEHICLE DOESN'T QUALIFY FOR THE RECALL? | | | CO ADVISED: AS OUR DEALER-PARTNERS ARE INDEPENDENTLY OWNED AND OPERATED, THEY ARE ALLOWED TO SET THEIR OWN PRICES TO SUIT THEIR BUSINESS NEEDS. THIS MEANS THAT PRICES MAY VARY FROM DEALER TO DEALER. THE REASON THAT YOU DIDN'T SHOW AS HAVING A RECALL IS THAT THERE WAS A RECALL ON YOUR TIGUAN FOR THE AIRBAG CLOCK SPRING - UNRELATED TO THE TAKATA AIRBAG RECALL - WHICH WAS ALREADY PERFORMED. THAT'S WHY YOU HAVE THIS WARRANTY EXTENSION. | | | NO FURTHER ACTION
5/4/2020 11:00:00 AM	MEDIA ATTACHED IN DOC CENTER | | | CUSTOMER STATES/SEEKING: I HAVE BEEN TRYING FOR A WEEK TO SCHEDULE SERVICE AT VW OF NORWOOD, MA. THEY ARE NOT RESPONDING AND I HAVE AN AIRBAG ISSUE I NEED ADDRESSED ASAP; LAST CONTACTED DEALER LAST WEEK AND THIS MORNING AT 930AM; I NEED THESE TO BE TAKEN CARE OF 1) - AIRBAG CLOCK SPRING WARRANTY EXTENSION.2) NEW FRONT LICENSE PLATE HOLDER WITH NEW SCREWS, AND NEW SCREWS FOR THE BACK 3)DRIVER'S SIDE WINDOW AUTO UP/DOWN FUNCTION (ESTIMATE COST) 4) CAR WASH (ESTIMATE?) | | | CO ADVISED: THEY HAVE YOU ALL SET UP FOR MAY 7TH AT 10AM. IN REGARDS TO THE 20% OFF, THEY SAY TO JUST PRINT THAT OFF FROM THEIR WEBSITE AND BRING IT IN. THEY HAVE MADE NOTE OF YOUR LICENSE PLATE REQUESTS. IN TERMS OF THE CONCERNS YOU'RE HAVING WITH YOUR WINDOW, THEY WILL NEED TO DIAGNOSE IT FIRST, AND THEN BE ABLE TO PROVIDE AN ESTIMATE AFTER. IF YOU DECIDE TO GO WITH THE REPAIRS, THE DIAGNOSIS WILL BE ROLLED INTO THE PRICE. AT THIS TIME, THEY ARE NOT OFFERING THE CAR WASHES, AS THEIR CLEAN UP TEAM IS NOT AVAILABLE DUE TO THE ONGOING PANDEMIC WITH COVID-19. | | | CUSTOMER ACKNOWLEDGED | | | NO FURTHER ACTION

12/24/2020 1:10:00 PM	HELLO EUGENE, I DEFINITELY UNDERSTAND YOUR LOGIC HERE, BUT THE WAY WE PROCESS PAYOFFS IN THESE SITUATIONS IS THAT ONCE THE CLOSING HAS BEEN COMPLETED, WE REACH OUT TO THE FINANCIAL INSTITUTION AGAIN AND OBTAIN THE MOST UP TO DATE PAYOFF AMOUNT ON THE ACCOUNT. I LIKE TO REIMBURSE CUSTOMERS DIRECTLY FOR OVERPAYMENTS MADE TO THEIR BANK WHEN I CAN BECAUSE ITS TYPICALLY FASTER THAN THEM RECEIVING A CHECK FROM THEM (IF AT ALL) AND WE CAN TRACK IT EASIER AS WELL.I DO HAVE TO OBTAIN MORE INFORMATION FROM HIS CASE SPECIALIST NICOLE ON THIS ONE IN ORDER TO CONFIRM THE REIMBURSEMENT. I WILL FOLLOW-UP WITH MORE INFORMATION ONCE IVE SPOKEN WITH HER. HAPPY HOLIDAYS!ROBERT HORGER CLOSING COORDINATOR CUSTOMER RESOLUTION & RETENTIONPHONE: [redacted] *PLEASE NOTE: EMAIL IS THE FASTEST WAY TO REACH ME *VOLKSWAGEN GROUP OF AMERICA, INC. 3800 HAMLIN ROAD AUBURN HILLS, MI 48326

12/24/2020 1:17:00 PM	MY POSITION WOULD BE THAT PER THE AGREEMENT ANY MONEY NOT SENT TO MCU IN THE ITEMIZED PAYOFF MUST BE SENT DIRECTLY TO MR.[redacted] NSTEAD. IM FINE WITH COUNTING UP PAYMENTS SO LONG AS IT EQUALS OR EXCEEDS THAT AMOUNT. EITHER WAY, HAVE A GREAT HOLIDAY. EUGENE KRUKAS, ESQ. (516) 203-4001 (516) 717-3605 (FAX)
12/24/2020 12:41:00 PM	FOLLOWING EMAIL RECEIVED FROM CUSTOMER ATTORNEY WITH PROOF OF 11/9/2020 LOAN PAYMENT FOR $750.00. ROBERT, WE HAD ONLY PREVIOUSLY PROVIDED PAYMENTS THROUGH OCTOBER 8.I HAVE ATTACHED PROOF OF THE NOVEMBER 9 PAYMENT. THAT SAID - THE SETTLEMENT AGREEMENT ITSELF DOES NOT COUNT UP PAYMENTS.ITS NOT A LEASE - SO THE ENTIRE COST OF THE VEHICLE WAS REFUNDED.FROM THAT REFUND, VW IS TO PAY $9,270.16 TO MCU TO PAYOFF THE LIEN.I THINK THE EASIER WAY TO HANDLE THIS IS TO JUST MAKE SURE THAT $9,270.16 PAYMENT IS SENT PER THE AGREEMENT AND THEN MY CLIENT GETS BACK ANY APPLICABLE OVERPAYMENT FROM MCU.EUGENE KRUKAS, ESQ. IN OBD UNDER TRANSMISSION VALUE BLOCK 126 FIELD 3 SHOWS (STEERING 0), THAT IS THE ONLY PLACE I FOUND THE READING GUIDED FUNCTIONS MEASURED VALUES DOES NOT SHOW 126/3 AS A SELECTION OPTION (FYI). BECAUSE COMMUNICATION WITH J527 IS POSSIBLE AND THERE ARE NOT DTCS STORED IN ANY OTHER MODULE COULD THIS BE A HARDWARE/SOFTWARE COMMUNICATION PROBLEM OR SHOULD I TRY ANOTHER PART?

12/13/2018 2:39:00 PM	THANKS FOR THE UPDATE. IF YOU REINSTALL THE ORIGINAL J527 INTO THE VEHICLE, DOES THE FAULT CLEAR OUT? IF SO, I SUSPECT THAT THE NEW J527 MAY BE FAULTY AND SHOULD BE REPLACED. IF THE FAULT REMAINS, PLEASE CHECK THE WIRE FROM THE J527 TO THE SHIFTER ASSEMBLY FOR ISSUES. CHECK FOR ANY SPREAD TERMINALS, PINS BACKING OUT, OR WIRING DAMAGE. PLEASE ALSO CHECK AROUND THE SHIFTER AREA FOR SIGNS OF FLUID DAMAGE. PLEASE UPDATE THE VTA WITH FINDINGS.
12/14/2018 5:52:00 PM	NO CHANGE IF THE OLD MODULE IS INSTALLED. FAULT WILL NOT CLEAR. ALSO CHECK FOR LOOSE PINS AT 5527 NO LOOSE PINS OR A POOR CONNECTION. NO SIGNS OF FLUID SPILLAGE ON SHIFTER ASSEMBLY OR ELEC. | CONNECTION AT SHIFTER. NO SIGNS OF DAMAGED WIRES. WHATS NEXT?
12/14/2018 6:13:00 PM	PLEASE VERIFY THAT THE NEW MODULE HAS ALL OF THE PINS IN THE SAME LOCATIONS AND THAT NONE OF THE TERMINALS WERE DAMAGED WHEN REPLACING THE CLOCK SPRING.
12/18/2018 1:10:00 PM	THE DTC WAS STORED IN THE TRANSMISSION MODULE PRIOR TO REPLACING THE CLOCK SPRING. ALL TERMINALS LOOK OK. WHAT CAUSES THE FAULT TO SET? IS THIS A NETWORK SIGNAL THROUGH THE CAN-BUS OR IS THERE A DIRECT CIRCUIT FROM THE SHIFTER? THE ONLY THING I SEE IN THE WIRING DIAGRAM IS THE CIRCUIT FROM 16L/11 OF J527 THROUGH F319 SHIFTER PARK SWITCH TO GROUND, WHILE CHECKING THIS CIRCUIT THE SWITCH IS OPEN WHEN VEHICLE IS IN PARK AND WHEN THE SHIFTER BUTTON IS PUSHED THE CIRCUIT CLOSES BUT SHOWS 433 OHMS RESISTANCE (CHECKED FROM 16L/11 TO GROUND). THE CAN-BUS WIRING CHECKS OUT OK. HOW IS THE CIRCUIT MONITORED, WHAT IS THE TRANSMISSION MODULE LOOKING FOR AND IS THE FAULT IN THE TRANSMISSION MODULE CAUSING THE MAINTENANCE WRENCH TO STAY ON (PER INFO IN OWNERS MANUAL)? |
12/18/2018 1:49:00 PM	THANKS FOR THE UPDATE. WE DO NOT HAVE THE EXACT CONDITIONS THAT CAUSE THE FAULT TO OCCUR OR WHAT MESSAGE THE TCM IS ACTUALLY MISSING. THE FAULT IS SIGNALING THAT IT DID NOT RECEIVE A MESSAGE THAT IT WAS EXPECTING. WHAT THE SIGNAL FROM THE F319 TO THE J527 WILL BE USED FOR IS THE PARK POSITION SWITCH. THIS IS USED TO UNLOCK THE IGNITION LOCK SOLENOID TO BE ABLE TO REMOVE THE KEY WHEN PLACED IN PARK. CAN THE KEY BE REMOVED FROM THE IGNITION SWITCH WHEN PLACED IN PARK? IF IT DOES, THE WIRE FROM THE J527 TO THE F319 IS MOST LIKELY OK. ALSO, ARE THE HORN AND STEERING WHEEL BUTTONS CURRENTLY OPERATIONAL? IF AVAILABLE, PLEASE SWAP IN A KNOWN GOOD SET OF STEERING WHEEL BUTTONS AND RETEST.
12/18/2018 12:00:00 AM	Customer states the airbag light is on. | The technician found DTC VAG00588 stored for drivers airbag igniter resistance too high. Also VAG02546 steering limit stops and stored in the transmission P1867 databus drivetrain missing message of steering column electronics. Replace clock spring, code module and set basic settings. Performed oil change service and try and reset maintenance reminder, wrench icon in the cluster will not go away. Rescan vehicle (new GFF ID [redacted] P1867 stored in the transmission module. Owners manual states wrench can stay/flash if DTC stored in transmission. DTC will not clear, test plan is useless. Was DTC set when clock spring failed and just won't clear or did we miss a step? | installed old unit , checked for coding , code erased, reconnect new unit checked for codes , no codes , rescan system 2 times test drove car no codes
12/18/2018 2:10:00 PM	HORN WORKS VEHICLE IS NOT EQUIPPED WITH STEERING WHEEL BUTTONS.
12/18/2018 3:33:00 PM	PLEASE INSPECT THE HARNESS IN FRONT OF THE SHIFTER AND WHERE THAT CONNECTS TO THE MAIN HARNESS FOR ANY SIGNS OF CHAFING OR DAMAGE WHERE IT BENDS AROUND THE HVAC AIR BOX.
12/18/2018 4:44:00 PM	WHAT WIRES AM I LOOKING FOR TO HAVE A PROBLEM? ACCORDING TO THE WIRE DIAGRAM THE CAN BUS WIRES DO NOT GO FROM THE STEERING COLUMN ELEC. TO THE SHIFTER? THEY GO FROM J527 TO THE GATEWAY. SO WHAT AM I LOOKING AT FOR? THE CODE IS A COMMUNICATION CODE FROM J527 TO TRANSMISSION AND GATEWAY.
12/18/2018 5:16:00 PM	PLEASE CHECK THE WIRE OR MAKE A TEST OVERLAY OF THE WIRE FROM T16/11 OF THE J527 TO T10S/2 AT THE F319 OF THE SHIFTER.

5/20/2020 2:20:00 PM	TECH NOTES THEY DID ATTEMPT TO CALL IN, BUT EVERY TIME THE ACCESS CODE WAS ENTERED THE CALL WAS DISCONNECTED. - - AFTER REPLACING THE J527, THE AIRBAG LIGHT AND FAULT DO NOT RETURN. STILL FAULT FOR NO COMM WITH STEERING WHEEL CONTROLS J435. HAD TECH SEND MOST CURRENT GFF LOG TO GFF PAPERLESS. 08 82 C4 00 08 IS CURRENT CODING OF AW 16. CONFIRMED THAT MATCHES THE ORIGINAL CODING. HAD TECH CHECK POWER, GROUND, AND LIN VOLTAGE AT J435. - CURRENT BATTERY VOLTAGE IS 12.1V..... T5U/2 = 12V - 15 POWER..... T5U/1 = .022 V DROP ON GROUND CIRCUIT..... T5U/3 = 9.9 TO 10.0V LIN CIRCUIT. PERFORMED TELEDIAGNOSIS. CHECKED CODING OF J453 IN AW 16. FOUND ONLY ONE BYTE AND IT IS "00." THIS IS WITH THE KNOWN GOOD STEERING WHEEL INSTALLED. PERFORMED SOFTWARE CONFIGURATION AND FUNCTION CLEARING ON AW 16. NO CHANGE IN CONCERN. PERFORMED THE TEST PLANS ON AW 19. NO CHANGE. TRIED MANUALLY CODING J435. WILL NOT ALLOW CODING CHANGES. TRIED CHANGING PLAIN TEXT CODING ON AW 16 FOR THE STEERING WHEEL BUTTONS. CURRENT SETTING IS FOR MFS LIN 2.0. ATTEMPTED TO CODE TO MFS LIN 1.3. WILL NOT ALLOW, STATES FUNCTION NOT AVAILABLE. HAD TECH REMOVE STEERING WHEEL BUTTONS FORM STEERING WHEEL AND INSPECT THE PART STICKER. FOUND NOTHING INDICATING WHICH VERSION STEERING WHEEL BUTTONS (1.3 OR 2.0). RECOMMEND CONNECTING SCAN TOOL TO THE LIKE MODEL THE STEERING WHEEL WAS BORROWED FROM. CHECK THE PLAIN TEXT CODING IN AW 16 TO SEE WHICH VERSION MFS LIN IS 1.3 OR 2.0. ALSO CHECK STEERING BUTTON BINARY CODING TO SEE IF IT IS DIFFERENT. IF IT IS, TRY MANUALLY CODING THIS CAR TO THAT CODING. ALSO HAVE YOUR PART'S DEPARTMENT CALL PART'S HELPLINE TO SEE IF THERE ARE ANY KNOWN ISSUES (POSSIBLY NEEDING A SPECIFIC STEERING WHEEL BUTTON P/N FOR THE NEW J527 P/N?) ESCALATING TO LEVEL TWO CONSULTANT.

10/17/2018 9:33:00 AM	CUSTOMER CAME IN WITH CONCERN OF HORN DOES NOT WORK, AIRBAG LIGHT ON, AND BUTTONS ON STEERING WHEEL INOP. ALSO STATED HE COULD HEAR CLICKING WHEN TURNING WHEEL. FOUND J527 WAS FAULTY. I HAD MY APPRENTICE REPLACE J527 AND AFTER HE REPLACED IT HE ATTEMPTED TO PERFORM CODING AS PER ONLINE CODING OF CONTROL MODULE. ERROR MESSAGE RECEIVED FOR ONLINE CODING UNABLE TO BE COMPUTED. AIRBAG LIGHT WENT OFF, HORN NOW WORKS, RADIO VOLUME AND STATION CHANGING BUTTONS ON WHEEL WORK BUT CAN NOT SCROLL THROUGH MFI OR OPERATE CRUSIE CONTROL. NOW HAVE FAULTS FOR P1647 CHECKING CODING/VERSIONS OF CONTROL MODULES IN DRIVETRAIN. P0568 CRUISE CONTROL SET SIGNAL AND B114913 WIPER INTERMITTENT MODE SWITCH OPEN CIRCUIT. I HAD HIM REMOVE AIRBAG AND I CHECKED WIRING AS WELL AS WIRING AT J527. I SEE NO VISUAL CONCERNS AT THIS TIME. WHEN I RAN THROUGH TEST PLAN FOR CRUSIE CONTROL IT STATES THERE IS A PROBLEM WITH CAN SIGNAL STATUS BUT THE HARDWARE SIGNAL STATUS SHOWS BUTTON ITSELF OPERATES. WIPER SWITCH WORKS AS PER MVBS. WHEN ATTEMPING TO PERFORM CODING TEST FOR ECM IN RUNS THROUGH WITH NO PROBLEMS BUT CAN NOT CLEAR P1647 FAULT

IF THE FAULT REMAINS, PLEASE CHECK THE WIRE FROM THE J527 TO THE SHIFTER ASSEMBLY FOR ISSUES. CHECK FOR ANY SPREAD TERMINALS, PINS BACKING OUT, OR WIRING DAMAGE. PLEASE ALSO CHECK AROUND THE SHIFTER AREA FOR SIGNS OF FLUID DAMAGE. PLEASE UPDATE THE VTA WITH FINDINGS.
12/14/2018 5:52:00 PM	NO CHANGE IF THE OLD MODULE IS INSTALLED. FAULT WILL NOT CLEAR. ALSO CHECK FOR LOOSE PINS AT 5527 NO LOOSE PINS OR A POOR CONNECTION. NO SIGNS OF FLUID SPILLAGE ON SHIFTER ASSEMBLY OR ELEC. | CONNECTION AT SHIFTER. NO SIGNS OF DAMAGED WIRES. WHATS NEXT?
12/14/2018 6:13:00 PM	PLEASE VERIFY THAT THE NEW MODULE HAS ALL OF THE PINS IN THE SAME LOCATIONS AND THAT NONE OF THE TERMINALS WERE DAMAGED WHEN REPLACING THE CLOCK SPRING.
12/18/2018 1:10:00 PM	THE DTC WAS STORED IN THE TRANSMISSION MODULE PRIOR TO REPLACING THE CLOCK SPRING. ALL TERMINALS LOOK OK. WHAT CAUSES THE FAULT TO SET? IS THIS A NETWORK SIGNAL THROUGH THE CAN-BUS OR IS THERE A DIRECT CIRCUIT FROM THE SHIFTER? THE ONLY THING I SEE IN THE WIRING DIAGRAM IS THE CIRCUIT FROM 16L/11 OF J527 THROUGH F319 SHIFTER PARK SWITCH TO GROUND, WHILE CHECKING THIS CIRCUIT THE SWITCH IS OPEN WHEN VEHICLE IS IN PARK AND WHEN THE SHIFTER BUTTON IS PUSHED THE CIRCUIT CLOSES BUT SHOWS 433 OHMS RESISTANCE (CHECKED FROM 16L/11 TO GROUND). THE CAN-BUS WIRING CHECKS OUT OK. HOW IS THE CIRCUIT MONITORED, WHAT IS THE TRANSMISSION MODULE LOOKING FOR AND IS THE FAULT IN THE TRANSMISSION MODULE CAUSING THE MAINTENANCE WRENCH TO STAY ON (PER INFO IN OWNERS MANUAL)? |
12/18/2018 1:49:00 PM	THANKS FOR THE UPDATE. WE DO NOT HAVE THE EXACT CONDITIONS THAT CAUSE THE FAULT TO OCCUR OR WHAT MESSAGE THE TCM IS ACTUALLY MISSING. THE FAULT IS SIGNALING THAT IT DID NOT RECEIVE A MESSAGE THAT IT WAS EXPECTING. WHAT THE SIGNAL FROM THE F319 TO THE J527 WILL BE USED FOR IS THE PARK POSITION SWITCH. THIS IS USED TO UNLOCK THE IGNITION LOCK SOLENOID TO BE ABLE TO REMOVE THE KEY WHEN PLACED IN PARK. CAN THE KEY BE REMOVED FROM THE IGNITION SWITCH WHEN PLACED IN PARK? IF IT DOES, THE WIRE FROM THE J527 TO THE F319 IS MOST LIKELY OK. ALSO, ARE THE HORN AND STEERING WHEEL BUTTONS CURRENTLY OPERATIONAL? IF AVAILABLE, PLEASE SWAP IN A KNOWN GOOD SET OF STEERING WHEEL BUTTONS AND RETEST.
12/18/2018 12:00:00 AM	Customer states the airbag light is on. | The technician found DTC VAG00588 stored for drivers airbag igniter resistance too high. Also VAG02546 steering limit stops and stored in the transmission P1867 databus drivetrain missing message of steering column electronics. Replace clock spring, code module and set basic settings. Performed oil change service and try and reset maintenance reminder, wrench icon in the cluster will not go away. Rescan vehicle (new GFF ID [redacted] P1867 stored in the transmission module. Owners manual states wrench can stay/flash if DTC stored in transmission. DTC will not clear, test plan is useless. Was DTC set when clock spring failed and just won't clear or did we miss a step? | installed old unit , checked for coding , code erased, reconnect new unit checked for codes , no codes , rescan system 2 times test drove car no codes
12/18/2018 2:10:00 PM	HORN WORKS VEHICLE IS NOT EQUIPPED WITH STEERING WHEEL BUTTONS.
12/18/2018 3:33:00 PM	PLEASE INSPECT THE HARNESS IN FRONT OF THE SHIFTER AND WHERE THAT CONNECTS TO THE MAIN HARNESS FOR ANY SIGNS OF CHAFING OR DAMAGE WHERE IT BENDS AROUND THE HVAC AIR BOX.
12/18/2018 4:44:00 PM	WHAT WIRES AM I LOOKING FOR TO HAVE A PROBLEM? ACCORDING TO THE WIRE DIAGRAM THE CAN BUS WIRES DO NOT GO FROM THE STEERING COLUMN ELEC. TO THE SHIFTER? THEY GO FROM J527 TO THE GATEWAY. SO WHAT AM I LOOKING AT FOR? THE CODE IS A COMMUNICATION CODE FROM J527 TO TRANSMISSION AND GATEWAY.
12/18/2018 5:16:00 PM	PLEASE CHECK THE WIRE OR MAKE A TEST OVERLAY OF THE WIRE FROM T16/11 OF THE J527 TO T10S/2 AT THE F319 OF THE SHIFTER.

1/14/2019 4:16:00 PM	YES THE HORN WORKS.
1/14/2019 4:29:00 PM	THE 5056C HAS TWO PLUGS BECAUSE OF DIFFERENT TYPES OF CONNECTORS AND THE BUTTON IS USED TO CHANGE THE RESISTANCE, SO WHEN YOU ARE VIEWING THE MEASURED VALUES FOR A PARTICULAR COMPONENT AND PRESS THE BUTTON YOU SHOULD BE ABLE TO SEE THE VALUE CHANGE FROM CORRECT TO EITHER TOO HIGH OR TOO LOW. THE TWO PIN CONNECTOR IS USUALLY USED TO CONNECT THE HARNESS THAT WOULD PLUG INTO THE STEERING WHEEL AIRBAG, THE BIG CONNECTOR ON TOP HAS VARIOUS HARNESSES THAT CAN CONNECT TO IT FOR TESTING OF OTHER CONNECTIONS THAT HAVE ONLY TWO PINS, SUCH AS THE OLD MK3 AND 4 CONNECTORS BEFORE THE CLOCK SPRING.

1/14/2019 5:05:00 PM	OK THAT MAKES SENSE HOWEVER I DO NOT HAVE A NUMBER OF THE CONNECTOR TO SEARCH FOR IT AS THERE ARE MULTIPLE CONNECTORS THROUGHOUT THE TOOL BINS I HAVE GONE THROUGH ALL THE BINS AT OUR SHOP BUT DON'T SEEM TO HAVE ONE THAT FITS THE AIRBAG TWO PIN CONNECTOR OR THE STEERING COLUMN MODULE. I THINK I HAVE THE ONE FOR THE 12 PIN CONNECTOR THAT PLUGS INTO THE CLOCKSPRING BEHIND THE AIRBAG, BUT WITHOUT KN OWING WHAT CONNECTOR NUMBER I NEED HOW DO I TELL IF ITS RIGHT OR NOT NONE OF THE CONNECTORS FIT THE AIRBAG OR COLUMN CONNECTOR. ALSO ODIS DOES NOT CALL OUT WHAT CONNECTOR TO USE IT JUST LISTS THEM ALL STARTING WITH 5056C/1 AND GOES UP IN NUMBERS FROM THERE WE HAVE ABOUT 6 OR SEVEN CONNECTORS BUT NOT THE RIGHT ONES ARE THEY IN ANOTHER TEST KIT#??? ODIS IS VERY FRUSTRATING BECAUSE IT DOES NOT GIVE ENOUGH DETAILS OR GUIDANCE. IF I HAD A FLOW CHART LIKE OTHER MANUFACTURERS DO THEN IT WOULD CALL OUT THE CONNECTOR NUMBER IN THE GUIDED FUNCTIONS. CAN YOU PLEASE HELP WITH THIS.
1/14/2019 5:17:00 PM	SOMETIMES WITH SOME TEST PLANS THERE ARE "DOCUMENTS" THAT CAN BE ACCESSED VIA THE SCAN TOOL. THEY CAN ALSO BE FOUND IN THE "TEST PLAN" TAB IN GFF. IF THE DOCUMENT EXISTS IT CAN BE FOUND THERE. ALSO IF YOU HAVE THE PERSON IN CHARGE OF ORDERING TOOLS DO A SEARCH IN THE TOOL SITE, IT MIGHT HAVE A DESCRIPTION OF THE DIFFERENT ADAPTOR HARNESSES FOR THE 5056C. OTHER THAN THAT, IF THERE IS AN ISSUE WITH ODIS, THE ONLY WAY TO ASK FOR A CORRECTION IS TO USE THE FEEDBACK BUTTON IN THE TEST PLAN.
1/15/2019 11:51:00 AM	STILL NO WAY OF KNOWING WHAT TEST LEAD TO USE AS THERE IS NO SPECIFIC CALL OUT IN GUIDED FUNCTIONS OR FROM FEEDBACK FROM TECH LINE. PERFORMED A GROUNDING OF STEERING COLUMN MODULE AND FOUND A NEW CODE FOR THIS. REPLACED COMPLETE CONTROL MODULE AND CODE AND RELEARN SYSTEM. ROAD TEST TO SET STEERING ANGLE SENSOR. CLEARED CODES AND SENT NEW GFF LOG IN. VEHICLE IS FIXED AT THIS TIME HOWEVER THIS TOOK EXCESSIVE TIME DUE TO A VERY VAGUE TESTING DESCRIPTION.

4/4/2019 12:40:00 PM	CUSTOMER COMMENTS: VEHICLE CAME IN WITH AIRBAG LIGHT
4/4/2019 12:40:00 PM	RECOMMEND REMOVING THE RIGHT FRONT SEAT COVER. INSPECT UNDER COVER AND ON SEAT CUSHION FOR ANY SIGNS OF FLUID / LIQUID STAINING. IF STAINING IS FOUND, UPDATE WITH CLEAR PHOTOS. THEN REPLACE SEAT COVER, SEAT CUSHION, FLEECE MAT AND SEAT HEATER ELEMENT IF EQUIPPED. IF NO FLUID STAINING IS FOUND, THEN EITHER SWAP THE R/F SEAT WITH A LIKE VEHICLE OR WITH THE SEAT COVER REMOVED, REATTEMPT POD BASIC SETTINGS. IF BASIC SETTINGS COMPLETES, THEN THERE IS SOME INFLUENCE IN THE R/F SEAT THAT IS PREVENTING POD BASIC SETTINGS FROM COMPLETING. RECOMMEND REPLACING SEAT COVER, SEAT CUSHION, FLEECE MAT AND SEAT HEATER ELEMENT IF EQUIPPED. UPDATE VTA WITH FINDINGS.

6/7/2019 9:49:00 AM	BASED ON TECHNICIANS FINDINGS SO FAR, ADVISE TECH TO DOUBLE CHECK THE SC 27 AND OR SC 35 FUSE. ALSO CHECK THE LIN BUS SIGNAL FROM THE J519 TO THE J350. LIN WIRE SHOULD HAVE 2 VOLTS LESS THAN BATTERY VOLTAGE. TECH CAN CHECK AT THE WHEEL SIDE OF THE CLOCK SPRING AT T12K/9 AND ON THE BACK SIDE OF THE SPRING AT T16K/8. IF NO VOLTAGE FOUND CHECK AT THE J519 ON T73B/17. ALSO INSPECT FOR POSSIBLE MISSING LIN CIRCUIT. IF NO VOLTAGE ON LIN CIRCUIT DISCONNECT COMPONENTS UNTIL J519 LIN OUTPUT IS RESTORED. IF LIN VOLTAGE IS PRESENT AT CLOCK SPRING AND NOT ON INFLATOR SIDE, SUSPECT INTERNAL OPEN IN CLOCKING AND REPLACE AS NEEDED AND RE-TEST FOR CUSTOMER CONCERN. UPDATE VTA WITH FINDINGS AND CALL BACK IN IF FURTHER TECHNICAL ASSISTANCE IS NEEDED.

7/19/2019 11:04:00 AM	THE CUSTOMER STATED THAT THE AIRBAG LIGHT IS ON. TECH VERIFIED THE CONCERN AND SCANNED VEHICLE WITH GFF AND FOUND ONE FAULT IN THE AIRBAG CONTROL MODULE, B10001B: DRIVER AIRBAG RESISTANCE TOO HIGH (STATIC). ALSO THERE IS NO COMMUNICATION WITH THE STEERING COLUMN ELECTRONICS MODULE AND THE HORN DOES NOT WORK. TECH REMOVED THE DRIVER AIRBAG, STEERING WHEEL AND STEERING COLUMN TRIM AND INSPECTED THE CLOCK SPRING. COULD NOT SEE ANY VISUAL DAMAGE TO THE CLOCKSPRING, BUT WHEN TURNING IT THERE IS A CLICKING NOISE, INDICATING THAT THE RIBBON HARNESS INTERNAL TO IT IS FAULTY. 11/11/2019 1:06:00 PM	SO, I 'BORROWED' A CLOCKSPRING FROM A 2016 TIGUAN, ALSO AN 'AL' PART NUMBER. BASIC SETTINGS SET IMMEDIATELY AND STEERING END STOPS SET WITH NO PROBLEM.
11/11/2019 1:08:00 PM	THAT MEANS THE NEW CLOCK SPRING HAS AN ISSUE PLEASE GET ANOTHER NEW PART .
11/11/2019 11:00:00 AM	ATTACHED NEW LOG. SOME FAULTS ARE DUE TO ME PLUGGING IN OLD CLOCKSPRING AND TRYING A SECOND NEW ONE. PIN DRAG ON G85 CONNECTOR WAS OK. CODING IS OK. PARTS DEPT SAYS THIS IS CORRECT PART. OLD WAS AP, NEW IS AL.
11/11/2019 11:09:00 AM	THANKS FOR THE UPDATED FAULT LOG PLEASE HAVE PARTS CONTACT THE PARTS HELPLINE NORMALLY THE SUPERSESSION DOES NOT GO BACKWARDS IF YOU HAD AN AP NOW YOU HAVE AN AL THIS SEEMS THAT THIS WOULD BE THE ISSUE BECAUSE THE OLD ONE WILL ADAPT.
11/11/2019 12:08:00 PM	PARTS HOTLINE VERIFIED THAT THE 'AL' IS THE CORRECT PART FOR THIS VEHICLE.
11/11/2019 12:35:00 PM	HAVE YOU TRIED TO GET THE AP PART FOR THIS CAR? DID YOU CALL THE PARTS HELPLINE YOURSELF? 800-767-6552 . WHEN USING MVB 7 IN ADDRESS WORD 44 DOES THIS NEW CLOCK SPRING SHOW ROTATION ?
11/11/2019 12:41:00 PM	AP IS NOT A VALID PART NUMBER. IF I LOOK AT ADDRESS WORD 44, BLOCKS 7.1 THROUGH 7.4. NEW G85 SHOWS NO STEERING ANGLE FROM CAN BUS, DOES SHOW STEERING ANGLE SPEED FROM CAN BUS. BASIC SETTING NOT PERFORMED AND INTERNAL STATUS OF G85 IS 1. OLD G85 DOES SHOW STEERING ANGLE AND SPEED FROM CAN BUS, BASIC SETTING IS PERFORMED AND INTERNAL STATUS OF G85 IS ZERO.
11/11/2019 12:54:00 PM	IN ADDRESS WORD 44, PLEASE ENTER ADAPTATION CHANNEL 9 AND CHECK IF THIS VALUE IS SET TO A "1" OR A "0". IF IT IS SET TO A VALUE OF "0" PLEASE CHANGE THIS TO A "1", CYCLE THE KEY AND ATTEMPT THE BASIC SETTINGS ONCE AGAIN. IF IT IS AT A VALUE OF "1" ALREADY, PLEASE CHECK THE MVB'S IN THE ABS FOR THE VEHICLE SPEED, ROTATION RATE, ETC AND NOTE IF ANY SENSORS ARE READING ERRATICALLY POSSIBLY PREVENTING THE BASIC SETTINGS FROM COMPLETING. IF THERE ARE NOT ANY ISSUES FOUND, PERFORM A 5-10MIN CAPACITIVE DISCHARGE AND NOTE IF THE BASIC SETTINGS CAN THEN BE COMPLETED.
11/11/2019 3:23:00 PM	REPLACED CLOCK SPRING WITH SECOND NEW UNIT. ON-LINE CODED AND BASIC SETTINGS 0F G85 WENT THROUGH SUCCESSFULLY. ALL FAULTS CLEARED. THANK YOU!!

11/11/2019 9:18:00 AM	CUSTOMER STATES AIRBAG LIGHT IS ON AND STEERING WHEEL CONTROLS ARE INOP. REPLACE CLOCKSPRING AND PERFORMED ONLINE CODING. AIRBAG LIGHT IS OFF AND CONTROLS NOW WORK. ATTEMPTING TO SET G85 STEERING ANGLE SENDER, BASIC SETTINGS WILL NOT COMPLETE. NO OTHER FAULTS. ATTEMPTED MULTIPLE TIMES THROUGH GUIDED FUNCTIONS AND GFF, WILL NOT SET. DATABUS CONNECTION TO G85 IS 1.

PLEASE CHECK THE MVB FOR THE ΓÇ£STEERING ANGLEΓÇ¥ IN AW16 ΓÇ£STEERING WHEEL ELECTRONICSΓÇ¥ IF THE READING OF THE STEERING ANGLE IS ┬▒360┬▒, PLEASE ROTATE THE STEERING SO THAT THE G85 READS ZERO (0), REMOVE THE STEERING WHEEL AND PIN THE G85. 5/20/2020 2:20:00 PM	TECH NOTES THEY DID ATTEMPT TO CALL IN, BUT EVERY TIME THE ACCESS CODE WAS ENTERED THE CALL WAS DISCONNECTED. - - AFTER REPLACING THE J527, THE AIRBAG LIGHT AND FAULT DO NOT RETURN. STILL FAULT FOR NO COMM WITH STEERING WHEEL CONTROLS J435. HAD TECH SEND MOST CURRENT GFF LOG TO GFF PAPERLESS. 08 82 C4 00 08 IS CURRENT CODING OF AW 16. CONFIRMED THAT MATCHES THE ORIGINAL CODING. HAD TECH CHECK POWER, GROUND, AND LIN VOLTAGE AT J435. - CURRENT BATTERY VOLTAGE IS 12.1V..... T5U/2 = 12V - 15 POWER..... T5U/1 = .022 V DROP ON GROUND CIRCUIT..... T5U/3 = 9.9 TO 10.0V LIN CIRCUIT. PERFORMED TELEDIAGNOSIS. CHECKED CODING OF J453 IN AW 16. FOUND ONLY ONE BYTE AND IT IS "00." THIS IS WITH THE KNOWN GOOD STEERING WHEEL INSTALLED. PERFORMED SOFTWARE CONFIGURATION AND FUNCTION CLEARING ON AW 16. NO CHANGE IN CONCERN. PERFORMED THE TEST PLANS ON AW 19. NO CHANGE. TRIED MANUALLY CODING J435. WILL NOT ALLOW CODING CHANGES. TRIED CHANGING PLAIN TEXT CODING ON AW 16 FOR THE STEERING WHEEL BUTTONS. CURRENT SETTING IS FOR MFS LIN 2.0. ATTEMPTED TO CODE TO MFS LIN 1.3. WILL NOT ALLOW, STATES FUNCTION NOT AVAILABLE. HAD TECH REMOVE STEERING WHEEL BUTTONS FORM STEERING WHEEL AND INSPECT THE PART STICKER. FOUND NOTHING INDICATING WHICH VERSION STEERING WHEEL BUTTONS (1.3 OR 2.0). RECOMMEND CONNECTING SCAN TOOL TO THE LIKE MODEL THE STEERING WHEEL WAS BORROWED FROM. CHECK THE PLAIN TEXT CODING IN AW 16 TO SEE WHICH VERSION MFS LIN IS 1.3 OR 2.0. ALSO CHECK STEERING BUTTON BINARY CODING TO SEE IF IT IS DIFFERENT. IF IT IS, TRY MANUALLY CODING THIS CAR TO THAT CODING. ALSO HAVE YOUR PART'S DEPARTMENT CALL PART'S HELPLINE TO SEE IF THERE ARE ANY KNOWN ISSUES (POSSIBLY NEEDING A SPECIFIC STEERING WHEEL BUTTON P/N FOR THE NEW J527 P/N?) CARFAX Glossary

Accident Indicator
CARFAX receives information about accidents in all 50 states, the District of Columbia and Canada.

Not every accident is reported to CARFAX. As details about the accident become available, those additional details are added to the CARFAX Vehicle History Report. CARFAX recommends that you have this vehicle inspected by a qualified mechanic.

- According to the National Safety Council, Injury Facts, 2015 edition, 8% of the 254 million registered vehicles in the U.S. were involved in an accident in 2013. Over 74% of these were considered minor or moderate.
- This CARFAX Vehicle History Report is based only on information supplied to CARFAX and available as of 1/28/21 at 1:23:02 PM (CST). Other information about this vehicle, including problems, may not have been reported to CARFAX. Use this report as one important tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

Damage Indicator
Damage can be a result of many different types of events. Examples include contact with objects (other cars, trees, traffic signs, road debris, etc), vandalism, or weather-related events. Not every damage event is reported to CARFAX. As details about the damage event become available, those additional details are added to the CARFAX Vehicle History Report. CARFAX recommends that you have this vehicle inspected by a qualified mechanic.

- This CARFAX Vehicle History Report is based only on information supplied to CARFAX and available as of 1/28/21 at 1:23:02 PM (CST). Other information about this vehicle, including problems, may not have been reported to CARFAX. Use this report as one important tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

Damage Severity
Damage events result in one of the following severity levels:

- Minor: Generally, minor damage is cosmetic (including dents or scratches), may only require reconditioning, and typically does not compromise a vehicle's operation and/or safety.
- Moderate: Moderate damage may affect multiple components of the vehicle and may impair the vehicle's operation and/or safety.
- Severe: Severe damage usually affects multiple components of the vehicle and is likely to compromise the vehicle's operation and/or safety.

CARFAX recommends getting a pre-purchase inspection at a certified collision repair facility.

Dismantled Title
The vehicle sustained major damage to one or more major component parts and the cost of repairing the vehicle for safe operation exceeds its fair market value. When a Dismantled title is issued, the vehicle may be used only for parts or scrap metal. It cannot be re-titled or returned to the road.

Federal Odometer Act
The Federal Odometer Act requires a seller to disclose the vehicle's mileage on the title when ownership is transferred. Congress enacted this Act to prohibit odometer tampering and to protect consumers from mileage fraud. Under this act, sellers must disclose any issues with the vehicle's odometer. These disclosures translate into the Exceed Mechanical Limits and Not Actual Mileage titles.

First Owner
When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Junk Title
A Junk Title is issued on a vehicle damaged to the extent that the cost of repairing the vehicle exceeds approximately 75% of its pre-damage value. This damage threshold may vary by state. The majority of states use this title to indicate that a vehicle is not road worthy and cannot be titled again. Some states treat Junk titles the same as Salvage.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

New Owner Reported
When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Not Actual Mileage Title
When the seller certifies, under the Federal Odometer Act, that the odometer reading does not reflect the vehicle's actual mileage. This may occur because the odometer was tampered with, broken, or replaced.

Ownership History
CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Salvage Auction Record
Most vehicles sold at Salvage auctions were declared totaled by insurance companies. Most of these vehicles have sustained significant damage but there are some exceptions. For instance, recovered stolen vehicles are often declared a total loss regardless of the actual damage. Rebuilders and Recyclers purchase these vehicles at auction with intentions to rebuild them or dismantle them for parts.

Title Issued
A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

Total Loss Vehicle
An insurance or fleet company declares a vehicle a total loss when a claim exceeds approximately 75% of its pre-damage value or if the vehicle is stolen and not recovered. This damage threshold varies by company. These companies typically take possession and obtain the title. Not all total loss vehicles result in a DMV-reported branded title. This may occur when an insurance company's definition of a total loss is different than the state DMV's definition for a branded title or when the owner of the vehicle is a self-insured company, like a fleet or rental company.

E-Mail To Product Liaison - Larry West

Hello Larry,

Attached is an airbag report, regarding a 2014 Passat, with over 200,000 miles, in VA. There were no injuries. The customer admitted to having neglected to repair an existing airbag light concern. His daughter was allegedly in a crash, a few days ago where the airbag didn¿t deploy. The customer suspects it has something to do with the clock spring and he wants us to offer cost assistance toward a clock spring repair.

We denied his request for cost assistance due to the age/mileage beyond all applicable warranties.

Call From Level 1 - YOUNGALE

CA states the customer's daughter was recently in a crash and the airbags didn't deploy. CA states the customer's airbag light had been on, prior to the crash but the customer neglected to get it fixed. CA states the customer is beyond the warranty extension for the clock spring.

RC advised that as the airbag light being on, prior to the crash would indicate the possiblity that airbags may not deploy if all the proper criteria for a deployment is met. RC advised that this would be considered neglect on the customer's behalf for not having the light addressed. RC also confirmed that VW would not be able to offer cost assitance toward a clock spring repair, beyond all applicable campaigns.

Customer states: original owner; most maintenance done at Dealer 409412; wife drives vehicle and Customer is unable to provide mileage estimate; had concern with driver¿s seat material and material on center console ripping and tearing previously; had repair done at independent authorized mechanic about 1 year ago; Customer is starting to notice the same thing happening again now. Customer seeking best next step.

CO advised: wasn't able to find any open recalls or warranty extensions on vehicle related to seats or console; if Customer had repair done at independent mechanic, recommended returning to see if there is warranty available on the work they completed; vehicle also still has NVLW coverage by time; expires in March of 2017 or 36K miles.

Customer states: knows vehicle has over 36K miles and is over base warranty; purchased extended service plan from Dealer 409412 when vehicle was originally purchased that specifically covers interior concerns; this warranty was applied on previous repair at independent.

CO advised: most extended service plans are sold through third party company called Fidelity; this would be best resource if Customer has questions about remaining coverage; provided Fidelity's phone number and offered to send via email.

Customer thanked; would like phone number sent via email.

Note To Level 1 - LEVEL ONE

LEVEL ONE, When the customer calls back please advise the following:

- We apologize for her recent crash experience
- We see that she had previously called Customer Care, back on 12/17/18, to let us know that her airbag light was on and her horn didn't work
- We had set up an appontment for her to have the Clock Spring Warranty Extension performed by Island VW on 12/22/2018
- Did she have the clock spring repairs performed prior to her crash?
- If not, then that may explain why her airbags didn't deploy in her recent crash
- If she did have Clock Spring repairs performed and the airbag light was OFF, prior to her crash then we would like to research this matter
- To that end, we would ask for photos of the crash damage her Tiguan sustained in the crash and a copy of the police report

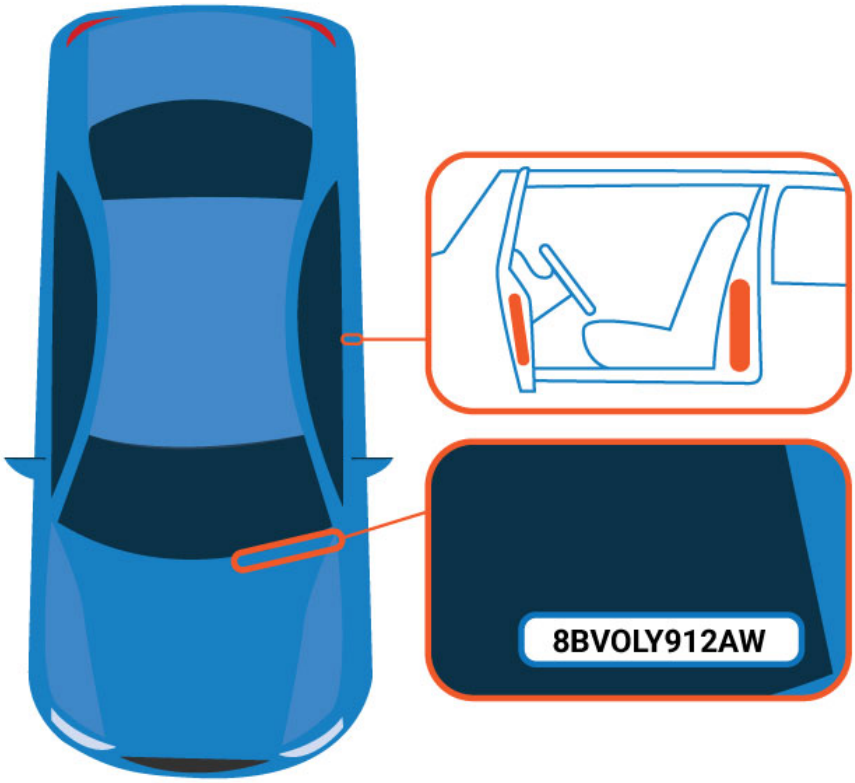
associated with this VIN

What if my car isn't recalled now? Could it be recalled later?



Yes. Whether a manufacturer independently conducts a safety recall or NHTSA orders one, the manufacturer must file a public report describing the safety-related defect or noncompliance. Manufacturers are also required to notify owners by mail within 60 days of notifying NHTSA of a recall decision.

Look for this distinct label to distinguish critical safety recall information from other marketing material.

Where's my VIN?

Look on the lower left of your car's windshield for your 17-character Vehicle Identification Number. Your VIN is also located on your car's registration card, and it may be shown on your insurance card.

What this VIN search tool covers

- Vehicle safety recalls that are incomplete
- Vehicle safety recalls conducted over the past 15 calendar years

- Vehicle safety recalls conducted by major light auto automakers, including motorcycle manufacturers.

What this VIN search tool does not cover

- Completed safety recall information
- Manufacturer customer service or other nonsafety recall campaign
- International vehicles
- Very recently announced safety recalls for which not all VINs have been identified
- Safety recalls that are more than 15 years old (except where a manufacturer offers more coverage)
- Safety recalls conducted by small vehicle manufacturers, including some ultra-luxury brands and specialty applications

From your complaints **to recall campaigns**

NHTSA issues vehicle safety standards and requires manufacturers to recall vehicles and

equipment's that have safety-related defects. Learn about NHTSA's recall process.

01 Complaints

Reporting your problem is the important first step.

Your complaint will be added to a public NHTSA database after personally identifying information is removed.

If the agency receives similar reports from a number of people about the same product, this could indicate that a safety-related defect may exist that would warrant the opening of an investigation.

Example of Complaints →

Report a problem with your vehicle, tires, car seats or other equipment. We review every problem as we work to keep our roads safe.

02 Investigations

NHTSA conducts an investigation from reported complaints.

A. SCREENING

NHTSA reviews filed complaints from vehicle owners and other information related to alleged defects to decide whether to open an investigation.

B. ANALYSIS

NHTSA conducts an analysis of any petitions calling for defect investigations. If the petition is denied, the reasons for the denial are published in the Federal Register.

C. INVESTIGATION

NHTSA opens an investigation of alleged safety defects. It is closed when they notify the manufacturer of recall recommendations or they don't identify a safety-related defect.

D. RECALL MANAGEMENT

NHTSA reviews filed complaints from vehicle owners and other information related to alleged defects to decide whether to open an investigation.

View monthly investigation reports →

03 Recalls

Initiated safety recalls require a manufacturer's action to announce and remedy the defects.

A recall is issued when a manufacturer or NHTSA determines that a vehicle, equipment, car seat, or tire creates an unreasonable safety risk or fails to meet minimum safety standards. Most decisions to conduct a recall and remedy a safety defect are made voluntarily by manufacturers prior to any involvement by NHTSA.

Manufacturers are required to fix the problem by repairing it, replacing it, offering a refund, or in rare cases repurchasing the vehicle.

Using our VIN lookup tool, you can access recall information provided by the manufacturer conducting the recall which may be not posted yet on NHTSA's site.

Roles in the Recall Process

Manufacturer

Manufacturers will notify registered owners by first class mail within 60 days of notifying

NHTSA of a recall decision. Manufacturers should offer a proper remedy to the owner.

NHTSA

NHTSA will monitor each safety recall to make sure owners receive safe, free, and effective remedies from manufacturers according to the Safety Act and Federal regulations.

You (owner)

You'll be notified via mail from the manufacturer. When you receive a notification, follow any interim safety guidance provided by the manufacturer and contact your local dealership to fix the recalled part for free.

Tips For Your Safety
Register your vehicle, tires, car seats & equipment and check recalls twice a year.

Accident Indicator
CARFAX receives information about accidents in all 50 states, the District of Columbia and Canada.

Not every accident is reported to CARFAX. As details about the accident become available, those additional details are added to the CARFAX Vehicle History Report. CARFAX recommends that you have this vehicle inspected by a qualified mechanic.

- According to the National Safety Council, Injury Facts, 2015 edition, 8% of the 254 million registered vehicles in the U.S. were involved in an accident in 2013. Over 74% of these were considered minor or moderate.
- This CARFAX Vehicle History Report is based only on information supplied to CARFAX and available as of 12/19/19 at 3:50:13 PM (CST). Other information about this vehicle, including problems, may not have been reported to CARFAX. Use this report as one important tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

Florida Damage Reports:

- Provide an estimate of the extent of damage in its accident reports for the following:
  - MINOR: The accident damage does not affect the operation of the vehicle and should not compromise vehicle safety.
  - FUNCTIONAL: The accident damage affects the operation of the vehicle and/or its parts. The vehicle could be driven from the accident location.
  - DISABLED: The vehicle cannot be driven from the accident scene due to damage. The vehicle had to be towed or hauled away from the accident location.
- Are required if the estimated damage exceeds $500

First Owner
When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall
Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

New Owner Reported
When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History
CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Rental
Vehicle was registered by a rental agency.

Title Issued
A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

Hello Ms. [redacted]

Thank you for sharing the crash damage photos of your 2017 Tiguan. We were able to share the photos with our engineers and they had some feedback.

For an airbag to deploy, two things have to be present. The first has to do with the angle of the impact and the second has to do with the rate of acceleration or deceleration. Both criteria must be satisfied in order for an airbag to deploy. The reason there is an angle criterion, is because the bodies of the occupants tend to move toward the point of impact. If an airbag were to deploy when an occupant is out of position, it could cause more harm than the possible benefit a deployment might afford. The reason for rate of acceleration or deceleration criterion is because the bodies of occupants could be injured if there is a life threatening change in velocity. We engineer our vehicles with this in mind and create a certain amount of flexibility and crushability into the vehicle. This allows for some mitigation of the forces involved in a crash. No crash would ever be considered a pleasant experience, but there are some crashes where the impact forces are below the thresholds required to keep occupants alive. In those cases, we wouldn¿t want an airbag to deploy.

Our lead airbag engineer analyzed photos, which show the crash damage 2017 Tiguan had sustained in this crash. He had the following observations:
¿Based on what I see, the impact to the front of the car cracked the bumper cover and shifted the left front bumper rearward, to a point that it got bent when the customer opened the driver door. I don¿t see the amount of damage that represents a high rate of deceleration, enough that would meet the criteria for an airbag deployment. This car performed as designed.

Our conclusion is that your 2017 Tiguan operated properly, by not deploying an airbag in in this crash because the rate of deceleration criteria was not met. Thank you for allowing us an opportunity to assess t

We did replace the wrong pump; the Dealer can reimburse Customer for towing; the Dealer replaced the clock spring in the vehicle under warranty to fix an airbag error. that was early February; RCM spoke with Regional Coordinator who has shared: We ask that the customer share with us a copy of the police report and photos of the crash damage their vehicle sustained. When received, we will share them with our lead airbag engineer. After two business days for analysis, we will circle back with the customer to share our findings or intentions for a next step; RCM will send Customer an email; any refund of a wrong part used, the Customer would need to speak with the Dealer; VW relies on our Dealer as technical advisors and can only speak to a Dealer diagnosis;

Customer states: there is No Police report/accident; does have photos of the damage, but that will not show the internal damage; was traveling 20-25 MPH and hit a vehicle that was at a dead spot, the Customer vehicle was just on the drive side wheel, the passenger side wheels were in the air; the drive of the vehicle that was hit, was in a police chase or something; then the Dealer 422232 has misdiagnosed the vehicle and wanted to charge Customer $1,000.00 for a Fuel Pump; Customer had to tell the Dealer what was wrong with the vehicle, because Customer knows a technician at North Scottsdale who shared that both Fuel Pumps would not fail at the same time; does not trust the Dealer nor VW: does not believe the Dealer installed the Airbag Clock Spring correctly; the vehicle is at the Dealer waiting for a tow company to pick up the vehicle and bring to Collision Center;

I have not seen the vehicle since the accident, and won¿t be able to tell much of anything since there is damage and warning lights on now. If he wants the vehicle looked at for a reason on why the air bags did not deploy this would have to get escalated to someone. Possible to engineering or definitely a QTM. I talked with [redacted] and [redacted] yesterday. They did have to come back twice for a fuel pump issue. We did replace the wrong pump. I talked to someone at warranty this morning and they said, If [redacted] emails me a copy of the tow bill, we can get that paid for them. I left a message with [redacted] this morning with some of the details. He just needs to call me back so he can email me the tow bill so I can get that processed. If I get it today I could have a check to him by Friday or Monday possibly.

As far as the air bag. We replaced the clock spring in the vehicle under warranty to fix an airbag error. That was early February. The airbag light has not come back on which means the system is working. It is my understanding they rear ended someone doing 15-20 mph and the bags did not deploy. I tried explaining to [redacted] that the system measures more than just speed to deploy the bags. It measures the deceleration of the vehicle, G force, impact angle, driving speed, and impact to the frame. I am sure there are more calculations but we just hear about the basics for calculations are a dealer level. I am not 100% sure how the software is written but do know it is more than just speed. That is something he does not seem to understand and was trying to fight me on it. He did admit the airbag light was not on before the accident which means the system was functioning and armed. He also mentioned that he was not wearing a seat belt, but I am not sure if that would affect anything or not.

Hello Ms. [redacted]

Thank you for sharing the crash damage photos of your 2017 Tiguan. We were able to share the photos with our engineers and they had some feedback.

For an airbag to deploy, two things have to be present. The first has to do with the angle of the impact and the second has to do with the rate of acceleration or deceleration. Both criteria must be satisfied in order for an airbag to deploy. The reason there is an angle criterion, is because the bodies of the occupants tend to move toward the point of impact. If an airbag were to deploy when an occupant is out of position, it could cause more harm than the possible benefit a deployment might afford. The reason for rate of acceleration or deceleration criterion is because the bodies of occupants could be injured if there is a life threatening change in velocity. We engineer our vehicles with this in mind and create a certain amount of flexibility and crushability into the vehicle. This allows for some mitigation of the forces involved in a crash. No crash would ever be considered a pleasant experience, but there are some crashes where the impact forces are below the thresholds required to keep occupants alive. In those cases, we wouldn¿t want an airbag to deploy.

Our lead airbag engineer analyzed photos, which show the crash damage 2017 Tiguan had sustained in this crash. He had the following observations:
¿Based on what I see, the impact to the front of the car cracked the bumper cover and shifted the left front bumper rearward, to a point that it got bent when the customer opened the driver door. I don¿t see the amount of damage that represents a high rate of deceleration, enough that would meet the criteria for an airbag deployment. This car performed as designed.

Our conclusion is that your 2017 Tiguan operated properly, by not deploying an airbag in in this crash because the rate of deceleration criteria was not met. Thank you for allowing us an opportunity to assess t

RCM advised: following up on the case; RCM spoke with SD Jason who shared: Customer back twice for a fuel pump issue. We did replace the wrong pump; the Dealer can reimburse Customer for towing; the Dealer replaced the clock spring in the vehicle under warranty to fix an airbag error. that was early February; RCM spoke with Regional Coordinator who has shared: We ask that the customer share with us a copy of the police report and photos of the crash damage their vehicle sustained. When received, we will share them with our lead airbag engineer. After two business days for analysis, we will circle back with the customer to share our findings or intentions for a next step; RCM will send Customer an email; any refund of a wrong part used, the Customer would need to speak with the Dealer; VW relies on our Dealer as technical advisors and can only speak to a Dealer diagnosis;

Customer states: there is No Police report/accident; does have photos of the damage, but that will not show the internal damage; was traveling 20-25 MPH and hit a vehicle that was at a dead spot, the Customer vehicle was just on the drive side wheel, the passenger side wheels were in the air; the drive of the vehicle that was hit, was in a police chase or something; then the Dealer 422232 has misdiagnosed the vehicle and wanted to charge Customer $1,000.00 for a Fuel Pump; Customer had to tell the Dealer what was wrong with the vehicle, because Customer knows a technician at North Scottsdale who shared that both Fuel Pumps would not fail at the same time; does not trust the Dealer nor VW: does not believe the Dealer installed the Airbag Clock Spring correctly; the vehicle is at the Dealer waiting for a tow company to pick up the vehicle and bring to Collision Center;

I have not seen the vehicle since the accident, and won¿t be able to tell much of anything since there is damage and warning lights on now. If he wants the vehicle looked at for a reason on why the air bags did not deploy this would have to get escalated to someone. Possible to engineering or definitely a QTM. As far as the tow reimbursement I am waiting to hear back from him. I left him a voicemail about 7:45am this morning. I talked with [redacted] and [redacted] yesterday. They did have to come back twice for a fuel pump issue. We did replace the wrong pump. I talked to someone at warranty this morning and they said, If [redacted] emails me a copy of the tow bill, we can get that paid for them. I left a message with [redacted] this morning with some of the details. He just needs to call me back so he can email me the tow bill so I can get that processed. If I get it today I could have a check to him by Friday or Monday possibly.

As far as the air bag. We replaced the clock spring in the vehicle under warranty to fix an airbag error. That was early February. The airbag light has not come back on which means the system is working. It is my understanding they rear ended someone doing 15-20 mph and the bags did not deploy. I tried explaining to [redacted] that the system measures more than just speed to deploy the bags. It measures the deceleration of the vehicle, G force, impact angle, driving speed, and impact to the frame. I am sure there are more calculations but we just hear about the basics for calculations are a dealer level. I am not 100% sure how the software is written but do know it is more than just speed. That is something he does not seem to understand and was trying to fight me on it. He did admit the airbag light was not on before the accident which means the system was functioning and armed. He also mentioned that he was not wearing a seat belt, but I am not sure if that would affect anything or not.

I am reaching out on behalf of this customer, who called Customer Care concerning these issues with the vehicle. I would like to provide the customer with a little more information about the diagnosis and the potential repairs that are needed.

Customer Concern: dealer misdiagnosed the vehicle, the clockspring and airbag went out, heard this was free to fix, also was driving and got into an accident and ran into the back of guys car; the vehicle airbags didn't deploy.

Were you able to duplicate the customer¿s concerns?
Were you able to recommend or complete repairs?
Is this a repeat concern with this vehicle?
Has a VTA been opened?
Was alternative transportation provided or offered?
Is there anything else that you would like to share about the customer¿s concerns?
Is there a GFF Paperless or any faults/crash data stored?

I would appreciate if you could reply with any helpful information that you have, Thank you.

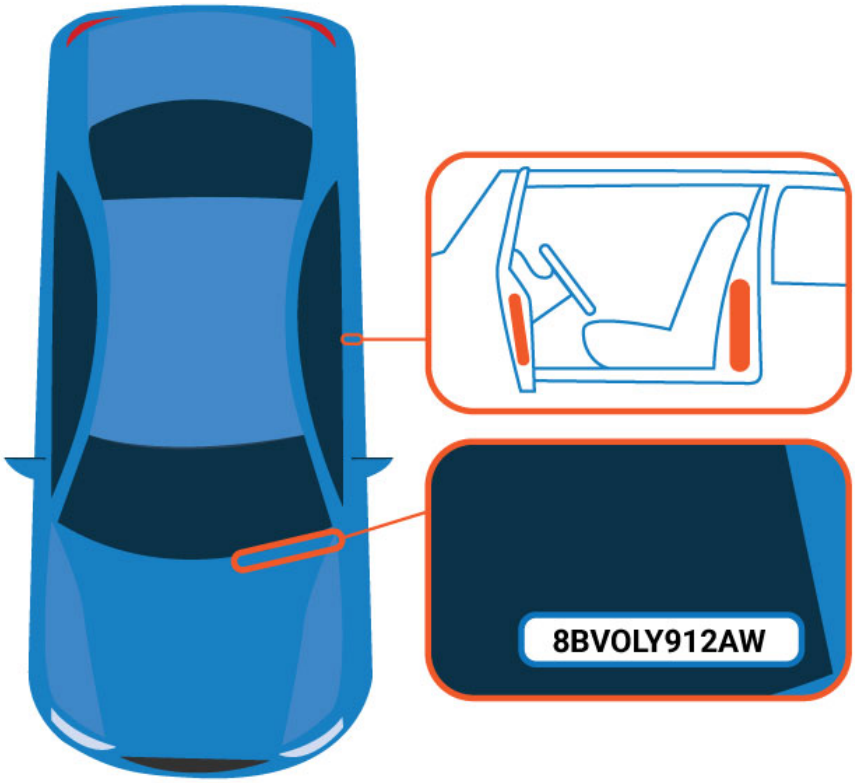
associated with this VIN

What if my car isn't recalled now? Could it be recalled later?



Yes. Whether a manufacturer independently conducts a safety recall or NHTSA orders one, the manufacturer must file a public report describing the safety-related defect or noncompliance. Manufacturers are also required to notify owners by mail within 60 days of notifying NHTSA of a recall decision.

Look for this distinct label to distinguish critical safety recall information from other marketing material.

Where's my VIN?

Look on the lower left of your car's windshield for your 17-character Vehicle Identification Number. Your VIN is also located on your car's registration card, and it may be shown on your insurance card.

What this VIN search tool will show

- An unrepaired vehicle affected by a vehicle safety recall in the past 15 calendar years

- Vehicle safety recalls from major light auto automakers, motorcycle manufacturers and some medium/heavy truck manufacturers

What this VIN search tool will not show

- A vehicle with a repaired safety recall. If your vehicle has no unrepaired recalls, you will see the message: "0 Unrepaired recalls associated with this VIN"
- Manufacturer customer service or other nonsafety recall campaign
- International vehicles
- There may be a delay with very recently announced safety recalls for which not all VINs have been identified. VINs are added continuously so please check regularly.
- Safety recalls that are more than 15 years old (except where a manufacturer offers more coverage)
- Safety recalls conducted by small vehicle manufacturers, including some ultra-luxury brands and specialty applications

From your complaints

to recall campaigns

NHTSA issues vehicle safety standards and requires manufacturers to recall vehicles and equipment's that have safety-related defects. Learn about NHTSA's recall process.

01 Complaints

Reporting your problem is the important first step.

Your complaint will be added to a public NHTSA database after personally identifying information is removed.

If the agency receives similar reports from a number of people about the same product, this could indicate that a safety-related defect may exist that would warrant the opening of an investigation.

02 Investigations

NHTSA conducts an investigation from reported complaints.

A. SCREENING

NHTSA reviews filed complaints from vehicle owners and other information related to alleged defects to decide whether to open an investigation.

B. ANALYSIS

NHTSA conducts an analysis of any petitions calling for defect investigations. If the petition is denied, the reasons for the denial are published in the Federal Register.

C. INVESTIGATION

NHTSA opens an investigation of alleged safety defects. It is closed when they notify the manufacturer of recall recommendations or they don't identify a safety-related defect.

D. RECALL MANAGEMENT

NHTSA reviews filed complaints from vehicle owners and other information related to alleged defects to decide whether to open an investigation.

03 Recalls

Initiated safety recalls require a manufacturer's action to announce and remedy the defects.

A recall is issued when a manufacturer or NHTSA determines that a vehicle, equipment, car seat, or tire creates an unreasonable safety risk or fails to meet minimum safety standards. Most decisions to conduct a recall and remedy a safety defect are made voluntarily by manufacturers prior to any involvement by NHTSA.

Manufacturers are required to fix the problem by repairing it, replacing it, offering a refund, or in rare cases repurchasing the vehicle. View the 2018 Recall Report.

Using our VIN lookup tool, you can access recall information provided by the manufacturer conducting the recall which may be not posted yet on NHTSA's site.

Alleged Accidents and Injury Summary Assessment
Supplemental Response to Request No. 2(c)

As set forth below, due to varying circumstances and certain ambiguities within some reports, Volkswagen was unable to assess whether the clock spring contributed to every alleged accident. For the sake of completeness, Volkswagen has summarized the facts related to all six reported incidents below for the Agency's consideration.

FILE 48508: Alleged Accident / Injury – VIN WVWBW7AH7CV[redacted]

Summary

Customer states the airbag light was on, horn was inoperative, and steering controls did not function at a point prior to a crash in August 2017 during which the vehicle's airbag did not deploy. Customer states daughter broke her hip as a result of the crash. The vehicle was totaled.

Volkswagen's records indicate the vehicle was involved in Safety Recall 15V-483 / 69L2 and had clock spring replaced over a year before the crash on 03/03/2016.

Customer contacted Volkswagen about service treatment at dealer and the airbag non-deployment incident on 11/19/2018, more than one year after the crash.

Customer also stated that when vehicle was picked up after a service appointment, the steering controls were inoperative. The service visit occurred prior to the August 2017 crash, but it is unclear if customer is referring to March 2016 clock spring replacement date as the "service appointment" date.

Assessment

Volkswagen was unable to access the vehicle, therefore Volkswagen is unable to make a determination why the airbag did not deploy. It may relate to an improper repair/replacement prior to the crash (customer stated steering control were inoperative when the vehicle was picked up at the dealer).

FILE [redacted] Alleged Accident – VIN 1VWBS7A30EC[redacted]

Summary

Customer contacted Volkswagen 12/03/2018, stating daughter was in a crash and the vehicle's airbag did not deploy, alleging the non-deployment was due to a preexisting clock spring failure. No injury is alleged. Customer indicated clock spring was replaced at approximately 95K miles in March 2016. Customer acknowledged airbag light was on for a period of time prior to the crash.

A diagnostic log dated 10/26/2018 indicates that the airbag light most likely would have been illuminated, per the DTC B10000B recorded at that time. Volkswagen's records indicate the vehicle was not involved in Safety Recall 15V-483 / 69L2; vehicle was covered under warranty extension. Customer was reimbursed for out of pocket expense for a clock spring replacement in March 2016, under the parameters of the warranty extension.

Assessment

Based on the facts provided by the Customer and VW's lack of access to the vehicle, Volkswagen could not assess the airbag non-deployment nor assess whether it was clock spring related.

FILE [redacted] Alleged Accident – VIN 1VWAT7A3XGC[redacted]

Summary

Customer contacted Volkswagen 01/04/2019 and stated he "was operating vehicle and was turning going 10 mph and vehicle steering wheel would not turn, hit another vehicle and airbags did not deploy; Customer feels steering wheel did not turn due to warranty EXT (clock spring) on vehicle."

Customer acknowledged the airbag light was not on prior to the crash.

Volkswagen's records indicate the vehicle was not involved in Safety Recall 15V-483 / 69L2; vehicle was covered under warranty extension and had not had a clock spring replacement performed.

Customer was advised that Volkswagen would diagnose the vehicle once it has been repaired. There has been no further contact from the customer.

Assessment

Based on the statement by the customer, it appears due to the low speed (10 MPH), the vehicle was travelling at a speed below the threshold for a deployment. Additionally, the failure of a clock spring will not impair vehicle steering. Volkswagen would assess the concern is not clock spring related due to the customer' acknowledgement that the airbag bag light was not illuminated prior to the crash.

FILE [redacted] Alleged Accident – VIN WVGAV3AX8EW[redacted]

Summary

Customer contacted Volkswagen 04/08/2019 and stated she rear-ended another vehicle, which totaled the customer's Tiguan. Customer was not injured. Customer stated the horn was inoperative, acknowledged the airbag light was on prior to the crash, and the airbag did not deploy. Customer sought to have extended warranties cancelled on vehicle due to totaled status.

Prior to the crash, customer had an appointment 12/22/2018 at a dealer to replace clock spring. There is no record that indicates the vehicle was serviced on that date.

Volkswagen's records indicate the vehicle was not involved in Safety Recall 15V-483 / 69L2; vehicle was covered under warranty extension and has not had a clock spring replacement performed.

Assessment

Based on the facts provided by the Customer and VW's lack of access to the vehicle, Volkswagen could not assess the airbag non-deployment nor assess whether it was clock spring related.

FILE [redacted] Alleged Accident / Injury – VIN 1VWAP7A30CC[redacted]

Summary

Customer contacted Volkswagen 11/21/2019, indicating the clock spring had been replaced in 2017; the customer stated they were involved in a crash the prior week, in which the airbags did not deploy. Customer alleged "due to the recall husband head hit windshield and was bleeding and had concussion and did not go to hospital." It is unknown whether the airbag light was on prior to the crash. Customer requested who to speak with about why airbags did not deploy.

Customer was requested to provide a police report and photographs of vehicle after the crash.

VW contacted the customer several times and the customer did not respond.

Volkswagen's records indicate the vehicle was involved in Safety Recall 15V-483 / 69L2 and had a clock spring replaced 10/21/2016.

Assessment

Based on the limited information and lack of responsiveness from the customer, Volkswagen is unable to assess why the airbags did not deploy or if the incident was clock spring related.

FILE [redacted] Alleged Accident – VIN WVGRV7AX2HK[redacted]

Summary

Customer contacted Volkswagen 04/14/2020, indicating they rear-ended another vehicle and the customer's airbag did not deploy. Customer alleged "DLR had misdiagnosed the vehicle; also the clock spring and airbag went out; heard this was free to fix." Customer wanted to know why airbag did not deploy.

Customer acknowledged seat belt was not in use and the airbag light was not on when the crash occurred. Statements in the enclosed documents indicate the speed at the time prior to the crash was between 10-25 MPH.

Customer was requested to provide a police report and photographs of vehicle after the crash. Customer indicated there was not a police report and did provide photographs.

Volkswagen's records indicate the vehicle was not involved in Safety Recall 15V-483 / 69L2; vehicle was covered under warranty extension and had clock spring replaced 02/05/2020.

Upon review of the photographs of the vehicle provided by the customer, Volkswagen's lead engineer indicated, "Based on what I see, the impact to the front of the car cracked the bumper cover and shifted the left front bumper rearward, to a point that it got bent when the customer opened the driver door. I don't see the amount of damage that represents a high rate of deceleration, enough that would meet the criteria for an airbag deployment."

Assessment

Based on the acknowledgement that there was no airbag light on by the customer, the timeframe between the clock spring replacement and crash dates, and the low speed impact, it appears unlikely the clock spring was a contributing factor to the non-deployment of the airbag. Due to the low severity of the impact, deployment of the airbag was not necessary. Airbag performed as designed.
