Measures Performed / Technical Question(s):
Verified gas fume coming through vents during cold start up. Fumes go away after a few minutes. Also verified gas fumes under hood with key on engine off. Found low pressure fuel hose seeping at high pressure pump. The high pressure pump has 3 covers over it so leak was difficult locate. It was a pinch type hose clamp and it appeared to be tight. I used tracing powder to verify it was the hose and not the high pressure pump. I replaced the clamp and verified repair.
Parts Replaced:
hose clamp
Date:2016-03-03 17.11
Name:R592188 Status:Draft
Workshop Findings:
Verified gas fumes through dash vents during cold start up. After a few minutes gas fumes are no longer present. I can also verify gas fumes under hood with just key on engine off. No visual leaks can be verified.
