

Concern Driven Reporting (CDR):

The CDR system is a database which receives a nightly feed of data from multiple Ford systems. Three of these systems which provide a nightly feed to CDR are:

- FMC360 system or "OWNER REPORTS"
- Common Quality Indicator System (CQIS) or "FIELD REPORTS"
- Ford's Analytical Warranty System (AWS) or "WARRANTY"

The CDR system created a common data repository to house reports across different systems. To do this CDR uses both structured and unstructured data. The structured data is used to map from the Source system codes to the CDR commodity codes.

- FMC360 – Symptom Code to CDR commodity
- CQIS – Symptom Code to CDR Commodity
- AWS – WCC to CDR Commodity

CDR commodity Codes are hierarchical codes up to 5 levels depending on the commodity.

Two Examples are:

- Body – Glass – Backglass – Heated backglass elements
- Chassis – Service Brakes – Air Brake System

Once the structured mapping is done CDR then text mines the unstructured data to further qualify the commodities levels within the Commodity main level. In addition, CDR uses text mining to assign a CDR symptom(s) to the report.

Two examples are:

- Air in system
- Battery - dead / weak

CDR also utilizes text mining to flag reports for review for the five TREAD significant events of: Fatality- Personal Injury –Fire –Rollover – Property Damage where appropriate.

In responding to this information request, Ford electronically searched the CDR database using the following criteria:

For Subject Vehicle:

Selection Summary

make	Ford LM;
source system key	AP; AW; CQ; CT; CU; DU; FM; GQ; LM; LW; QF; ST; VO; VP; WL;
model year	2019; 2018; 2017;
vehicle line	F-250 SD; F-350 SD; F-450 SD; F-550 SD;
commodity category	body; electrical;
commodity level2	tailgate; truck bed/box; trunk/hatch; mod-driving condition-at cruise; mod-driving condition-at high rpm; mod-driving condition-at idle; mod-driving condition-at start up; mod-driving condition-engine-cold; mod-driving condition-engine-hot; mod-driving condition-in neutral; mod-driving condition-in park; mod-driving condition-on acceleration; mod-driving condition-on deceleration/braking; mod-driving condition-on grade; mod-driving condition-over bump(s); mod-driving condition-when engine running; mod-driving condition-when engine/ignition turned off; mod-driving condition-when refueling; mod-driving condition-while driving; mod-driving condition-while towing; mod-driving condition-while turning;
symptoms	
Selections	body - locks/latches -> Total
Selections	body - structure/sheetmetal -> Total

Selections	body - locks/latches -> Total
Selections	body - structure/sheetmetal -> Total
Selections	body - locks/latches -> Total
Selections	body - structure/sheetmetal -> Total
Selections	body - structure/sheetmetal -> Total
Selections	body - locks/latches -> Total
Selections	body - structure/sheetmetal -> Total

Reports were then filtered for vehicles that contain "remote tailgate release"

For Peer vehicles:

Selection Summary	
make	Ford LM;
model year	2019; 2018; 2017; 2016; 2015;
vehicle line	F-150;
commodity category	body; electrical;
commodity level2	tailgate; truck bed/box; trunk/hatch;
source system key	AP; AW; CQ; CT; CU; DU; FM; GQ; LM; LW; QF; ST; VO; VP; WL; mod-driving condition-at cruise; mod-driving condition-at high rpm; mod-driving condition-at idle; mod-driving condition-at start up; mod-driving condition-engine-cold; mod-driving condition-engine-hot; mod-driving condition-in neutral; mod-driving condition-in park; mod-driving condition-on acceleration; mod-driving condition-on deceleration/braking; mod-driving condition-on grade; mod-driving condition-over bump(s); mod-driving condition-when engine running; mod-driving condition-when engine/ignition turned off; mod-driving condition-when refueling; mod-driving condition-while driving; mod-driving condition-while towing; mod-driving condition-while turning;

Selections	body - structure/sheetmetal -> Total
Selections	body - locks/latches -> Total
Selections	body - structure/sheetmetal -> Total

An additional search of the AWS database for warranty claims reporting the replacement of the subject components in the subject vehicles was run using the criteria noted in the AWS section below.

A more detailed explanation of the source systems listed is provided below.

OWNER REPORTS

As the agency is aware, within FCSD's North American Customer Service Operations, there is a Customer Relationship Center (CRC) that is responsible for facilitating communication between customers, dealerships and Ford Motor Company. Among other things, the CRC handles telephonic, electronic, and written inquiries, suggestions, informational requests, and

concerns ("contacts") from Ford and Lincoln-Mercury vehicle owners about their vehicles or sales and service experience. The contacts are handled by CRC customer service representatives who enter a summary of the customer contact into a database known as FMC360. The database prior to FMC360 was known as MORS III/CuDL (Master Owner Relations System / Customer Data Link). The intent and content of MORS III/CuDL reports is similar to FMC360 reports. The software powering the database was transitioned in approximately 2009. Reports in Appendix C that note MORSIII/CuDL as the "Source System" refer to a similar type of owner report now stored in FMC360.

The CRC assigns to each vehicle-related contact report a "symptom code" or category that generally characterizes the nature of the customer contact or vehicle concern, as described by the owner. The CRC does not undertake to confirm the accuracy of the description provided by the owner; they simply record what is reported. Therefore, given the complexity of the modern motor vehicle, it is Ford's experience that a significant percentage of owner contacts do not contain sufficient information to make a technical assessment of the condition of the vehicle or the cause of the event reported. Accordingly, although owner contact reports may be useful in identifying potential problems and trends, the records are not the empirical equivalent of confirmed incidents and/or dealership's diagnosis. In the interest of responding promptly to this inquiry, Ford has not undertaken to gather the electronic images related to these contacts because of the largely duplicative nature of the information contained in the images, as well as the time and the burden associated with locating and producing those documents. The pertinent information related to those contacts generally would be included in the contact reports obtained from the FMC360 system. To the extent that those documents exist, they are characterized in the comments of FMC360 contact reports. Upon request, Ford will attempt to locate any specific items that are of interest to the agency.

LEGAL CONTACTS

Beginning in early 2008, most consumer complaints and all legal claim processing has been centralized in OGC within the Consumer Litigation team. A transition has occurred such that all legal contacts (including those formerly handled by "Litigation Prevention") are coordinated through this team.

Prior to the transition, there was a Consumer Affairs Department within FCSD that managed customer concerns, which could not be resolved by the Customer Relationship Center (CRC). Among other things, the Consumer Affairs Department had a section, known as "Litigation Prevention," that handled a variety of informal (i.e., non-litigation) claims, such as property damage claims or attorney demand claims.

The Litigation Prevention section had been centralized in the Consumer Affairs Department since 1995, in Dearborn, Michigan. Prior to that time, Litigation Prevention personnel operated on a regional basis. For matters that the Litigation Prevention section handled, there were typically paper files that reflected the handling, investigation and resolution of property damage claims.

The claims, known as "Legal Contacts" are entered into the FMC360 database that the CRC uses to enter other customer communications. When a customer contact is designated as a Legal Contact, it is so indicated near the top of the contact report.

FIELD REPORTS

Within FCSD, there is a Vehicle Service & Programs Office that has overall responsibility for vehicle service and technical support activities, including the administration of field actions. That Office is the primary source within Ford of vehicle concern information originating from Ford and Lincoln-Mercury dealerships, field personnel, and other sources. The information is

maintained in a database known as the Common Quality Indicator System (CQIS). The CQIS database includes reports compiled from more than 40 Company sources (e.g., Company-owned vehicle surveys, service technicians, field service and quality engineers, and technical hot line reports, etc.) providing what is intended to be a comprehensive concern identification resource. As with FMC360 contact reports, CQIS reports are assigned a "symptom code" or category that generally reflects the nature of the concern.

OASIS MESSAGES

FCSD is responsible for communicating a variety of vehicle and service information, such as warranty information for up to the past 360 days, Extended Service Plan part coverage information, and technical repair information, to North American Ford and Lincoln dealers. This information is communicated primarily through OASIS, which serves as an electronic link between Ford Motor Company and the dealers. OASIS covers all North American Ford and Lincoln-Mercury cars and light trucks, and medium and heavy-duty Ford trucks, for the ten most current model years. Technical diagnostic and repair information on OASIS is contained in Special Service Messages (SSMs) and Technical Service Bulletin (TSBs) titles and brief summaries. It should be noted that dealers cannot access brief summaries.

SSMs and TSB titles are coded in OASIS by model year and vehicle line, and may be coded to other specific vehicle attributes (body style, engine code, or vehicle identification number) and one or more OASIS Service Code(s). The dealers with access to OASIS usually search for information on the database by entering a VIN and the applicable Service Codes. SSMs and TSB titles that become inactive or superseded continue to be accessible by Ford employees, but no longer are accessible by the dealers. Dealers also are able to determine the recalls applicable to a particular vehicle by searching a particular VIN in OASIS. Recall information available on OASIS cannot be searched by Service Codes.

In July 2011, FCSD launched a new coding system for OASIS. All active SSMs and TSB titles have been re-coded using the new OASIS coding system. All inactive and superseded SSMs and TSB titles are still maintained under the old coding system.

In responding to this information request, Ford searched Global OASIS using both the new and old OASIS service codes for active, inactive, and superseded TSB titles and SSMs using the following search criteria:

Model Year: 2017-2018

Subject Vehicle: F-Super Duty equipped with remote tailgate release manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands.

F-150

Model Year: 2015-2018

Peer Vehicle: F-150 equipped with remote tailgate release manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands

Date Parameters: Through 11/7/18 (the date of this inquiry)

OASIS Service Code(s):

Code	Description
331D**	Fit/Finish/Body, Body Panels, Tailgate, Unknown Fit/Finish/Body, Body Panels, Tailgate, Alignment Fit/Finish/Body, Body Panels, Tailgate, Appearance Fit/Finish/Body, Body Panels, Tailgate, Difficult to Close Fit/Finish/Body, Body Panels, Tailgate, Difficult to Open Fit/Finish/Body, Body Panels, Tailgate, Loose/Attachment Fit/Finish/Body, Body Panels, Tailgate, Poor Fit
8814**	Safe & Secure, Latches/Locks, Tailgate, Unknown Safe & Secure, Latches/Locks, Tailgate, Difficult to Close Safe & Secure, Latches/Locks, Tailgate, Difficult to Open Safe & Secure, Latches/Locks, Tailgate, Loose/Attachment Safe & Secure, Latches/Locks, Tailgate, Manual Function Safe & Secure, Latches/Locks, Tailgate, Sticks/Binds
88C3**	Safe & Secure, Handle/Lever, Tailgate, Other Safe & Secure, Handle/Lever, Tailgate, Appearance Safe & Secure, Handle/Lever, Tailgate, Difficult to Close Safe & Secure, Handle/Lever, Tailgate, Difficult to Open Safe & Secure, Handle/Lever, Tailgate, Loose Attachment Safe & Secure, Handle/Lever, Tailgate, Sticks/Binds

F-Super Duty

Model Year: 2017-2018

Subject Vehicle: F-Super Duty equipped with remote tailgate release manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands.

F-150

Model Year: 2015-2018

Peer Vehicle: F-150 equipped with remote tailgate release manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands

Date Parameters: Through 11/7/18 (the date of this inquiry)

CQIS Symptom Code(s):

Code	Description
331D**	Fit/Finish/Body, Body Panels, Tailgate, Unknown Fit/Finish/Body, Body Panels, Tailgate, Alignment Fit/Finish/Body, Body Panels, Tailgate, Appearance Fit/Finish/Body, Body Panels, Tailgate, Difficult to Close Fit/Finish/Body, Body Panels, Tailgate, Difficult to Open Fit/Finish/Body, Body Panels, Tailgate, Loose/Attachment Fit/Finish/Body, Body Panels, Tailgate, Poor Fit
8814**	Safe & Secure, Latches/Locks, Tailgate, Unknown Safe & Secure, Latches/Locks, Tailgate, Difficult to Close

	Safe & Secure, Latches/Locks, Tailgate, Difficult to Open Safe & Secure, Latches/Locks, Tailgate, Loose/Attachment Safe & Secure, Latches/Locks, Tailgate, Manual Function Safe & Secure, Latches/Locks, Tailgate, Sticks/Binds
88C3**	Safe & Secure, Handle/Lever, Tailgate, Other Safe & Secure, Handle/Lever, Tailgate, Appearance Safe & Secure, Handle/Lever, Tailgate, Difficult to Close Safe & Secure, Handle/Lever, Tailgate, Difficult to Open Safe & Secure, Handle/Lever, Tailgate, Loose Attachment Safe & Secure, Handle/Lever, Tailgate, Sticks/Binds

OASIS 2 and Global OASIS are not capable of performing electronic word searches, so the search results are reviewed manually to determine their applicability to the alleged defect in the subject vehicles.

The OASIS database also contains Broadcast Messages. Typically, these messages are directed to all dealerships and either are notifications of new SSMs/TSBs, or announcements with non-technical information (for example, "the Dealer Hotline will be closed today"). Broadcast Messages cannot be searched by OASIS service codes, and can be retrieved only while active (approximately 2 to 4 days). Ford has not undertaken to search for Broadcast Messages because Ford expects that any responsive information obtained with such a search generally would be non-substantive in nature or duplicative of the information obtained with the TSB title and SSM search described above.

INTERNAL SERVICE MESSAGES

FCSD, as part of its technical support activities, maintains fleet and technical telephone "hotlines." During the early stages of Ford's efforts to identify and resolve potential vehicle concerns, hotline personnel may draft Internal Service Messages (ISMs) on CQIS for their internal use. The ISMs are assigned a CQIS "symptom code" or category that generally reflects the nature of the concern. An ISM can form the basis for an oral response over the technical hotline to an inquiry from an individual dealer or fleet technician. The ISMs, however, are not made available electronically to fleets and dealers. Therefore, although ISMs are not "issued" to dealers like OASIS messages, Ford is construing this request broadly to include ISMs that may be related to the alleged defect in the subject vehicles.

In responding to this information request, Ford searched CQIS for active ISMs using the following search criteria:

F-Super Duty

Model Year: 2017-2018

Subject Vehicle: F-Super Duty equipped with remote tailgate release manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands.

F-150

Model Year: 2015-2018

Peer Vehicle: F-150 equipped with remote tailgate release manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands

Date Parameters: Through 11/7/18 (the date of this inquiry)

CQIS Symptom Code(s):

Code	Description
331D**	Fit/Finish/Body, Body Panels, Tailgate, Unknown Fit/Finish/Body, Body Panels, Tailgate, Alignment Fit/Finish/Body, Body Panels, Tailgate, Appearance Fit/Finish/Body, Body Panels, Tailgate, Difficult to Close Fit/Finish/Body, Body Panels, Tailgate, Difficult to Open Fit/Finish/Body, Body Panels, Tailgate, Loose/Attachment Fit/Finish/Body, Body Panels, Tailgate, Poor Fit
8814**	Safe & Secure, Latches/Locks, Tailgate, Unknown Safe & Secure, Latches/Locks, Tailgate, Difficult to Close Safe & Secure, Latches/Locks, Tailgate, Difficult to Open Safe & Secure, Latches/Locks, Tailgate, Loose/Attachment Safe & Secure, Latches/Locks, Tailgate, Manual Function Safe & Secure, Latches/Locks, Tailgate, Sticks/Binds
88C3**	Safe & Secure, Handle/Lever, Tailgate, Other Safe & Secure, Handle/Lever, Tailgate, Appearance Safe & Secure, Handle/Lever, Tailgate, Difficult to Close Safe & Secure, Handle/Lever, Tailgate, Difficult to Open Safe & Secure, Handle/Lever, Tailgate, Loose Attachment Safe & Secure, Handle/Lever, Tailgate, Sticks/Binds

F-Super Duty

Model Year: 2017-2018

Subject Vehicle: F-Super Duty equipped with remote tailgate release manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands.

F-150

Model Year: 2015-2018

Peer Vehicle: F-150 equipped with remote tailgate release manufactured for sale or lease in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands

Date Parameters: Through 11/7/18 (the date of this inquiry)

CQIS Symptom Code(s):

Code	Description
------	-------------

331D**	Fit/Finish/Body, Body Panels, Tailgate, Unknown Fit/Finish/Body, Body Panels, Tailgate, Alignment Fit/Finish/Body, Body Panels, Tailgate, Appearance Fit/Finish/Body, Body Panels, Tailgate, Difficult to Close Fit/Finish/Body, Body Panels, Tailgate, Difficult to Open Fit/Finish/Body, Body Panels, Tailgate, Loose/Attachment Fit/Finish/Body, Body Panels, Tailgate, Poor Fit
8814**	Safe & Secure, Latches/Locks, Tailgate, Unknown Safe & Secure, Latches/Locks, Tailgate, Difficult to Close Safe & Secure, Latches/Locks, Tailgate, Difficult to Open Safe & Secure, Latches/Locks, Tailgate, Loose/Attachment Safe & Secure, Latches/Locks, Tailgate, Manual Function Safe & Secure, Latches/Locks, Tailgate, Sticks/Binds
88C3**	Safe & Secure, Handle/Lever, Tailgate, Other Safe & Secure, Handle/Lever, Tailgate, Appearance Safe & Secure, Handle/Lever, Tailgate, Difficult to Close Safe & Secure, Handle/Lever, Tailgate, Difficult to Open Safe & Secure, Handle/Lever, Tailgate, Loose Attachment Safe & Secure, Handle/Lever, Tailgate, Sticks/Binds

The CQIS database in which the ISMs reside is not capable of performing word searches, so the search results were reviewed manually to determine their applicability to the alleged defect in the subject vehicles.

FIELD REVIEW COMMITTEE

Ford's Field Review Committee reviews all potential field service actions, including safety recalls and customer satisfaction programs, and recommends appropriate actions to corporate management. A Vehicle Service & Programs representative serves as Secretary to the Field Review Committee. Following approval of a field service action, the Vehicle Service & Programs Office prepares and launches the action. A representative copy of the communication to Ford's dealers, fleets, and Regional offices announcing the field service action is maintained in the Field Review Committee files.

WARRANTY

Ford's Analytical Warranty System (AWS) contains warranty claims and vehicle information for model years 1991 and forward for North America, and model years 1992 and forward for Europe.

Ford performed a search of AWS for potentially responsive reports using the following search criteria:

Model Year: 2017-2018

Subject Vehicle: F-Super Duty with remote tailgate release in the United States, District of Columbia, Puerto Rico, Northern Mariana Islands, Guam, American Samoa and the Virgin Islands.

Reported Base Part Number(s): 9C888 and 14018
