Hello Erin and Cheryl,

We have a follow up request regarding topics associated with the NHTSA PE19-012 Information Request (IR) letter originally mailed on Feb 6, 2020. Specifically we are looking for an update of reports concerning failure allegations with steering defect '3B':

1. Please update the previously submitted data for question Q1 with two additional columns for each vehicle.
 - a. Has the remedy associated with TSB 08-092-18 been applied to the vehicle?
 - b. If the remedy associated with TSB 08-092-18 has been applied, on what date did it occur?
2. Please provide updates for questions Q2, Q3, Q4, and Q5 involving alleged steering defect '3B'. The refresh should cover data received from the last IR letter response to the current date (February 7, 2020 to May 3, 2021).

Please include all reports in the subject vehicle scope of the original IR letter (18-20MY JL Jeep Wrangler) and note that reports may include other steering defects (must include 3B but may contain 3A, 3C, 3D, 3E defects).

Please let us know a tentative date on a response to the above request. Additionally, let us know if any of the above needs further clarification.

Thank you,

Daniel Pinero
