### Summary:

On January 27, 2016, General Motors LLC (GM) notified the Office of Defects Investigation (ODI) that it would conduct Safety Recall 16V054 to address a loss of electric power steering caused by a poor electrical connection within the torque-sensor harness connector in 2,988 Model Year (MY) 2015 Colorado / Canyon vehicles built between January 6, 2015 and March 19, 2015.

Subsequently, ODI has received 50 Vehicle Owners Questionnaires (VOQ) reporting a loss of electric power steering in Model Year (MY) 2015 Colorado and Canyon vehicles, built outside the recall scope, that report a loss of power steering assist while driving under a variety of conditions.

ODI has opened a Recall Query to assess the scope of Recall 16V054 and to identify the causes and effects of electric power steering failure in the subject vehicles.
