On 2014 at 10:43:01 Unit 304 dispatched to /WATERLOO, IA for a passenger vehicle fire. Dispatch advised the vehicle was near a residential structure. A additional engine company was requested to respond code 1. The location is a residential driveway. The incident was determined to be a(n) Passenger vehicle fire.

10:47:32 arrived on scene.

The following involvements were noted:

Name/Business Name	Involvement Type
	Driver/Owner

The following actions were performed on scene:

Unit 304 arrived to scene to observe a small passenger vehicle on fire in the driveway of scene residence. The fire was a engine compartment fire with flames showing from hood, bottom windshield, and front grill section of vehicle. Two structural and one automobile exposures.

Fire personnel advanced 150 feet of 1 1/2" hose line to the vehicle and directed by standers to go inside residence. Fire quickly extinguished by personnel and confined to engine compartment. Windshield breached by fire completely removed with halligan. All doors open to ventilate vehicle and confirm vehicle is unoccupied. Search is negative. Waterloo P.D. on scene.

Narrative:

On 2014 at 10:45:01 Unit 304 dispatched to [REDACTED] WATERLOO, IA [REDACTED] for a passenger vehicle fire. Dispatch advised the vehicle was near a residential structure. A additional engine company was requested to respond code 1. The location is a residential driveway. The incident was determined to be a(n) Passenger Vehicle fire.

10:47:32 arrived on scene.

The following involvements were noted:

Name/Business Name	Involvement Type
[REDACTED]	Driver/Owner

The following actions were performed on scene:

Unit 304 arrived to scene to observe a small passenger vehicle on fire in the driveway of scene residence. The fire was a engine compartment fire with flames showing from hood, bottom windshield, and front grill section of vehicle. Two structural and one automobile exposures.

Fire personnel advanced 150 feet of 1 1/2" hose line to the vehicle and directed by standers to go inside residence. Fire quickly extinguished by personnel and confined to engine compartment. Windshield breached by fire completely removed with halligan. All doors open to ventilate vehicle and confirm vehicle is unoccupied. Search is negative. Waterloo P.D. on scene.

Fire personnel conducted survey of vehicle to extinguish any hot spots. A interview of owner and by stander conducted to initiate investigation of fire. Both stated the vehicle was driven approximately at 0400 or 500 hours and parked. No sign of any operating problems. No work performed on vehicle. The by stander, resident of scene address, stated he entered vehicle approximately 15 minutes prior to dispatch page time to warm vehicle. The vehicle was running for approximately 10 to 15 minutes when he discovered fire and called 911.

Upon fire investigation personnel determined fire appeared to have started in the engine compartment area of vehicle with indications of highest heat to driver side front corner. The fire melted radiator from frame onto ground. No indications of foul play found. Unit 304 Lieutenant suggested owner contact insurance company and dealership. Shift Commander notified of fire. Shift Commander Jenn responded and examined fire. Exact fire cause classified as undetermined. Fire appeared to have started in engine compartment.

Vehicle owner's mother arranged tow service from Dysart.

* Used: (2) s.e.b.a.'s, 150 ft. of 1 1/2" preconnect, and halligan bar.

Approximately 300 gallons of water used on fire to extinguish.

Units responding were:

Unit 301 responded and took these actions:

Cancelled en route

Unit 304 responded.

Narrative:

On ██████████ 2014 at 10:45:01 Unit 304 dispatched to ██████████ WATERLOO, IA ██████████ for a passenger vehicle fire. Dispatch advised the vehicle was near a residential structure. A additional engine company was requested to respond code 1. The location is a residential driveway. The incident was determined to be a(n) Passenger vehicle fire.

10:47:32 arrived on scene.

The following involvements were noted:

Name/Business Name	Involvement Type
██████████	Driver/Owner

The following actions were performed on scene:

Unit 304 arrived to scene to observe a small passenger vehicle on fire in the driveway of scene residence. The fire was a engine compartment fire with flames showing from hood, bottom windshield, and front grill section of vehicle. Two structural and one automobile exposures.

Fire personnel advanced 150 feet of 1 1/2" hose line to the vehicle and directed by standers to go inside residence. Fire quickly extinguished by personnel and confined to engine compartment. Windshield breached by fire completely removed with halligan. All doors open to ventilate vehicle and confirm vehicle is unoccupied. Search is negative. Waterloo P.D. on scene.

Fire personnel conducted survey of vehicle to extinguish any hot spots. A interview of owner and by stander conducted to initiate investigation of fire. Both stated the vehicle was driven approximately at 0400 or 500 hours and parked. No sign of any operating problems. No work performed on vehicle. The by stander, resident of scene address, stated he entered vehicle approximately 15 minutes prior to dispatch page time to warm vehicle. The vehicle was running for approximately 10 to 15 minutes when he discovered fire and called 911.

Upon fire investigation personnel determined fire appeared to have started in the engine compartment area of vehicle with indications of highest heat to driver side front corner. The fire melted radiator from frame onto ground. No indications of foul play found. Unit 304 Lieutenant suggested owner contact insurance company and dealership. Shift Commander notified of fire. Shift Commander Jean responded and examined fire. Exact fire cause classified as undetermined. Fire appeared to have started in engine compartment.

Vehicle owner's mother arranged tow service from Dycart.

* Used: (2) s.c.b.a.'s, 150 ft. of 1 1/2" preconnect, and halligan bar.

Approximately 300 gallons of water used on fire to extinguish.

CARFAX Price Adjustment™

Accidents, service records, number of owners and many other history factors can affect a vehicle's value. The CARFAX Price Adjustment is a tool that analyzes millions of used car transactions to measure how the combination of all the information reported to CARFAX affects the value of a particular vehicle. The vehicle's retail book value plus the CARFAX Price Adjustment will give you a more accurate measure of the vehicle's value. Use this tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1994 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

RE: Claim Number: [REDACTED]
Date of Loss: August 23, 2015
Our Insured: [REDACTED]

Your File Number: **THEIR FILE NUMBER**
Insured's Deductible: \$500.00

To Whom It May Concern:

This notice is to advise of a loss that occurred to our insured's vehicle. The damage was caused by a failure of an electrical component or conductor along the left side of the engine within the front engine compartment.

Our investigation indicates that KIA is responsible for this loss. By virtue of our payment, we are entitled to recover from the responsible party. Please consider this letter as our demand to KIA for reimbursement of \$15,908.26.

Any settlement with State Farm's policyholder with respect to this loss must not prejudice our rights, as subrogor, and shall not be released by execution of a general release with such policyholder.

In order to assist you in evaluating and processing the claim we are asserting, we may provide nonpublic personal information about our customer. We are sharing this information to effect, administer, or enforce a transaction authorized by the consumer. However, you are neither authorized nor permitted to: (1) use the customer information we provide for any purpose other than to evaluate and process the subrogation claim, or (2) disclose or share the customer information we provide for any purpose other than to evaluate and process the subrogation claim.

If you have any questions or need additional information, please call me at the number listed below. If I am not available, any other member of my team may assist you.

REPORT OF INVESTIGATION

DATE: November 13, 2015 CASE #: [REDACTED]
INSURED: [REDACTED]
VEHICLE: 2014 Kia Forte
VIN: KNAFKAA6EE5 [REDACTED]
ADDRESS: 89 E. Sask Trail
CITY: Chicago Heights STATE: IL
DATE OF LOSS: [REDACTED] 2015 TIME: 11:30 p.m.
CLAIM NUMBER: [REDACTED]

SYNOPSIS OF INVESTIGATION

Based upon my thorough and scientific examination of the fire scene, including careful analysis of the fire patterns and information provided to me by the insured, it is my conclusion that the fire originated along the left side of the engine within the front engine compartment. The cause of the fire was due to a failure of an electrical component or conductor within the area of origin. Following the elements of fire cause classification in NFPA 921, the cause of the fire will be classified as "Accidental."

Insured:
Case #:
Claim #:

METHODOLOGY:

This fire scene examination was conducted using a scientific methodology, the basic method of fire investigation, and a systematic approach as discussed in the 2014 Edition of NFPA 921: "Guide for Fire and Explosion Investigations" and the 2014 Edition of NFPA 1033: "Standard for Professional Qualifications for Fire Investigator."

ASSIGNMENT:

On October 27, 2015 I received a fax transmission from State Farm Insurance Product Liability Investigator John Kessler requesting that I conduct an origin and cause investigation for a vehicle fire loss located at Copart Auto Auction in Chicago Heights, Illinois. I arrived at Copart Auto Auction on October 29, 2015 at 9:00 a.m.

BACKGROUND & INSURED INTERVIEW:

This investigation is in relation to a fire claim made by your insured, Mrs. [REDACTED]. I spoke with Mrs. [REDACTED] by telephone after my examination of the loss vehicle. Mrs. [REDACTED] related to me in summary that she purchased the vehicle in May 2014 from Napleton KIA of Calumet City. The vehicle contained approximately 5,000 miles at the time of purchase and 16,000 miles at the time of the fire. Mrs. [REDACTED] related that she is the primary driver and her son also occasionally drives the vehicle. During the time she has owned the vehicle, she has not experienced any electrical or mechanical malfunctions. She has not completed any repairs or upgrades to the vehicle's electrical or mechanical systems. The only maintenance completed to the vehicle has been oil changes and a new tire. The last oil change was completed at Velasquez and Sons Automotive in Harvey, Illinois three weeks prior to the fire. During the time she has owned the vehicle, she has not observed any unusual odors or leaking of automotive fluids. She has not observed any warning indicator lights while operating the vehicle. Mrs. Stephens stated that she has not received any recall notices from Kia.

Insured:
Case #:
Claim #:

On the date of loss, Mrs. [REDACTED] son drove the vehicle six blocks to [REDACTED] for breakfast. He arrived back home at approximately 8:30 a.m. The vehicle was parked on the street in front of Mrs. [REDACTED] home. The vehicle was locked and unattended until approximately 11:15 p.m. that night when a neighbor began knocking on her door yelling that her car was on fire. Mrs. [REDACTED] contacted 9-1-1 and the fire department responded.

FIRE SCENE EXAMINATION:

I began my examination by walking around the exterior of the vehicle in a clockwise manner. This vehicle is a 2014 Kia Forte, four door sedan. Examination of the exterior of the vehicle revealed severe fire damage to the front end engine compartments. Fire intensity and movement patterns indicate the fire originated within the engine compartment and communicated outward through the front grill opening and front fender wheel wells. Examination of the vehicle's tires revealed the front tires to be fire damaged and deflated. The rear tires were observed undamaged and intact. The front windshield of the vehicle was observed fractured due to flame impingement from the engine compartment area of origin. Examination of the remaining exterior panels of the vehicle revealed no further fire damage. Examination of the interior passenger department revealed fire damage due to communication through the windshield opening and an opening in the engine compartment bulkhead which allowed the fire to communicate into the passenger compartment behind the dashboard.

Examination of the interior passenger compartment revealed no fire damage to the top of the dashboard due to communication from the engine compartment through the openings in the bulkhead. No fire damage was observed within the passenger compartment consistent with an area of origin. Examination of the transmission shift lever revealed the vehicle was in the park position and the ignition switch was in the off position.

Opening the engine compartment's hood, I examined the vehicle's engine compartment. Severe fire damage was observed to the underside of the hood with the heaviest damage

Unredacted
Case #
Claim #

along the left corner area with movement toward the right passenger side. Examination of the engine compartment revealed severe fire damage throughout the entire compartment with the most severe fire damage observed along the top, left side, of the engine. Severe fire damage was observed between the engine and the left front fender with movement and intensity pattern observed communicating upward from this area. Examination of the vehicle's battery, located along the left inner front fender, revealed external fire damage due to three impingements from the area of origin. The battery was observed fire damaged along the right side that faced the engine. The right side of the battery was observed collapsed toward the left side of the engine's area of origin. Examination of the fuel relay panel, also located along the left front fender, revealed external fire damage due to communication from the area of origin. Examination of the electrical battery cables revealed the conductors to be externally fire damaged and intact. Examination of the vehicle's interior and exterior revealed external fire damage due to three impingements. Examination of the right passenger side, of the engine revealed fire damage consistent with the fire communicating to this area from the left side of the engine's area of origin. Closer examination of the top left side of the engine's area of origin revealed several electrical conductors lying along the top left side of the engine. Electrical conductors were observed lying along the left side of the engine with termination connections disconnected from the electrical component they were connected to. These electrical conductors were placed inside an evidence bag to maintain integrity for future examination. Several other electrical conductors were observed along the front of the engine. These additional electrical conductors were placed in an evidence bag for preservation for future examination. The entire front end of the vehicle, including the headlight housings, radiator, and coolant system radiator fans were observed exiting from the vehicle. Based upon the burn pattern analysis, the fire originated within the front engine compartment, along the left side of the engine, in the area of the electrical conductors lying on the left side of the engine. Further examination of the electrical conductors located within the area of origin will be completed at a later time.

Insured:
Case #:
Claim #:

CONCLUSION:

Based upon my thorough and scientific examination of the fire scene, including careful analysis of the fire patterns and information provided to me by the insured, it is my conclusion that the fire originated along the left side of the engine within the front engine compartment. The cause of the fire was due to a failure of an electrical component or conductor within the area of origin. Following the elements of fire cause classification in NFPA 921, the cause of the fire will be classified as "Accidental."

These findings and conclusions are based on and within a reasonable degree of accepted fire science and investigation certainty. This report was generated considering information available at the time of its completion. The knowledge, skill, experience and training of the investigator(s) associated with this investigation were used in the rendering of the findings and conclusions.

Respectfully Submitted,

John Orlund, CFI, CFEI

Valuation Notes

DAMAGE ESTIMATE AMOUNTS \$1,500. OBVIOUS TOTAL LOSS. COMPLETE FRONT END BURN & PARTIAL INTERIOR BURN...UNABLE TO GET MILEAGE

Vehicle Valuation Methodology Explanation

WorkCenter Total Loss was built through a joint partnership between J.D. Power and Associates vehicle valuation division Power Information Network (P.I.N.) and Mitchell International, a leading provider of claims processing solutions to private passenger insurers.

WorkCenter Total Loss produces accurate and easy-to-understand vehicle valuations via this five step process:

Step 1 - Locate Comparable Vehicles

Locate vehicles similar to the loss vehicle in the same market area. WorkCenter Total Loss finds these vehicles in AutoTrader.com, Cars.com, Veeva.com and directly from dealerships.

Step 2 - Adjust Comparable Vehicles

Make adjustments to the prices of the comparable vehicles. The comparable vehicles are identical to the loss vehicle except where adjustments are itemized. There are several types of comparable vehicle adjustments:

- **Projected Sold Adjustment** - an adjustment to reflect consumer purchasing behavior (negotiating a different price than the listed price).
- **Mileage Adjustment** - an adjustment for differences in mileage between the comparable vehicle and the loss vehicle.
- **Equipment** - adjustments for differences in equipment between the comparable vehicle (e.g. equipment packages and options) and the loss vehicle.

Step 3 - Calculate Base Vehicle Value

The base vehicle value is calculated by averaging the adjusted prices of the comparable vehicles.

Step 4 - Calculate Loss Vehicle Adjustments

There are four types of loss vehicle adjustments:

- **Condition Adjustment:**
Adjustments to account for the condition of the loss vehicle prior to the loss.
- **Prior Damage Adjustment:**
Adjustments to account for any prior damage present on the loss vehicle prior to the loss.
- **After Market Part Adjustment:**
Adjustments to account for any after market parts present on the loss vehicle prior to the loss.
- **Refurbishment Adjustment:**
Adjustments to account for any refurbishment performed on the loss vehicle prior to the loss.

Step 5 - Calculate the Market Value

The Market Value is calculated by applying the loss vehicle adjustments to the base value.

Vehicle Valuation Methodology Explanation

WorkCenter Total Loss was built through a joint partnership between J.D. Power and Associates vehicle valuation division Power Information Network (P.I.N.) and Mitchell International, a leading provider of claims processing solutions to private passenger insurers.

WorkCenter Total Loss produces accurate and easy-to-understand vehicle valuations via this five step process:

Step 1 - Locate Comparable Vehicles

Locate vehicles similar to the loss vehicle in the same market area. WorkCenter Total Loss finds these vehicles in AutoTrader.com, Cars.com, Vaut.com and directly from dealerships.

Step 2 - Adjust Comparable Vehicles

Make adjustments to the prices of the comparable vehicles. The comparable vehicles are identical to the loss vehicle except where adjustments are deemed. There are several types of comparable vehicle adjustments:

- **Projected Sold Adjustment** - an adjustment to reflect consumer purchasing behavior (negotiating a different price than the listed price).
- **Mileage Adjustment** - an adjustment for differences in mileage between the comparable vehicle and the loss vehicle.
- **Equipment** - adjustments for differences in equipment between the comparable vehicle (e.g. equipment packages and options) and the loss vehicle.

Step 3 - Calculate Base Vehicle Value

The base vehicle value is calculated by averaging the adjusted prices of the comparable vehicles.

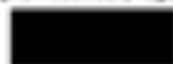

Step 4 - Calculate Loss Vehicle Adjustments

There are four types of loss vehicle adjustments:

- **Condition Adjustment**
Adjustments to account for the condition of the loss vehicle prior to the loss.
- **Prior Damage Adjustment**
Adjustments to account for any prior damage present on the loss vehicle prior to the loss.
- **After Market Part Adjustment**
Adjustments to account for any after market parts present on the loss vehicle prior to the loss.
- **Refurbishment Adjustment**
Adjustments to account for any refurbishment performed on the loss vehicle prior to the loss.

Step 5 - Calculate the Market Value

The Market Value is calculated by applying the loss vehicle adjustments to the base value.

CARFAX Price Adjustment™

Accidents, service records, number of owners and many other history factors can affect a vehicle's value. The CARFAX Price Adjustment is a tool that analyzes millions of used car transactions to measure how the combination of all the information reported to CARFAX affects the value of a particular vehicle. The vehicle's retail book value plus the CARFAX Price Adjustment will give you a more accurate measure of the vehicle's value. Use this tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent

changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

CARFAX Glossary View All Glossary

First Owner
When the first owner(s) obtains a Title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall
Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

New Owner Reported
When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Rental

Vehicle was registered by a rental agency.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
