Re: Insured: [REDACTED] 2015, Kia Forte
Date of Loss: February 22, 2015
Claim Number: [REDACTED]
C & A File Number: [REDACTED]

Dear Ms. Blackwell:

An initial non-destructive origin and cause examination was conducted on May 27, 2015 at Copart, in Hueytown, Alabama. In accordance with instructions received from State Farm Insurance Company, a joint inspection was conducted on August 19, 2015. Present during the examination were Mr. Frank Hagan, engineer representing State Farm Insurance Company and Eric Sauck with Kia Motors. During the August 19th examination, all parties were in agreement to have the engine removed from the vehicle at a later date, and forward all photographs to Hagan and Sauck. This activity was performed on September 24, 2015, with Mr. Morgan Fuller and Mr. Kevin Friday, both with Crain & Associates, Inc. present. After the engine was removed, it was agreed upon by all parties to remove the valve cover, photographing before, during and after, and again send the photographs to Mr. Hagan, and Mr. Sauck. This activity was performed on October 2, 2015.

The most extensive damage involves the rear of the engine in the area of the valve cover. The valve cover was removed and the rubber valve cover gasket is not properly mounted at the right rear. The gasket appears to have been "pinched" and did not seat properly during assembly process. The improperly seated valve cover gasket would have allowed engine oil to leak out and contact the hot surface temperature of the exhaust system.

It is my opinion, the fire originated at the exhaust system and was caused by leaking engine oil. The source of the engine oil leak is the right rear of the valve cover gasket which was improperly mounted during assembly.

[REDACTED]

At this time, we are awaiting further instructions from State Farm Insurance Company. If you have any questions, please do not hesitate to call me at 205-995-8231.

Sincerely,

[REDACTED]

Morgan Fuller I.A.A.I. - C.F.I., C.F.E.I., C.V.F.I.
